No, no, no, by all means, stay, you are indeed in the only ng that counts. as far as selling that type of equipment, we have many closet hammies here who freeband and have fun, so you never know who may or may not purchase your wares, my good fellow. Good luck with it.

Well they are both good answers.
Why I may not agree with some of Leland's
views, I must say he did give a good answer.
I'm sure that Paul understood what he said,
without a problem. On the other hand, your
answer was good too, basic and down to the
point.
What I'm saying, there's enough flaming going
on already, no need to fan the flames any further
when a very legitimate answer was given by both.

The Landshark

The entire Gunn series has 'impressive' specs...
Specs mean little when they're exaggerated by the manufacturer or vendor.
They may actually be pretty good beams but their gain claims (specs) are a
farce.
Build yourself a Quad-beam for far less and with greater gain.

> Sure there is, Leland. There are many freebanders,

Tim is getting a taste of his own rhetoric and logic. If the shoe fits a little too tight on his foot, that's his problem. Tim is most definitely NOT a paradigm of a law abiding citizen on the spectrum. He wants to point out what others are doing wrong, well he gets to explain why he is such a "special case", and why everyone should excuse his activities. It's a two way street. There are a multitude of CBers who operate within the parameters established by the FCC for CB Radio, then there are a few who "push" the envelope a little, the there are those like Tim, who operate so far outside of any reasonable definition of FCC sanctioned operation that have no excuse. So if he really dislikes the negative attention he gets he has two choices; quit, or stop wearing his activities as a badge of honor. His actions, attitude, and excuses are a badge of dishonor he pins on the chest of every legal CBer everyday he continues doing what he feels like. When CB Radio gets bashed in the public light people like Tim provide the shining example of what is wrong with CB Radio in the US. In my opinion CB Radio can do with a few less negative examples of the lawlessness being associated with it.

It is truly astonishing the pirate operators fail to recognize the damage they are doing to the hobby they so profess to love. The Alan Dixon petition to the FCC, requesting the 150 mile limit rule be eliminated, may have had a good chance of actually coming to pass if the FCC had not been backed in to a corner where they felt it would encourage further wide spread use of amplifiers, along with the interference potential. So the pirate operators continue to play their cat and mouse games on the bands, spewing their convoluted twisted logic why they can continue to do so, while the real losers are the legal operators.

> Hey Doc. Ever load anything truly weird?

well.... didn't use a 3k tuner, but have used various tuners to load a seawall (didn't work anyone), the bow rail on my boat (worked most of the east coast), and a random wire below ground level around the inside of our basement (had just moved in and hadn't had time to set up any antennas, but wanted to get on-the-air... worked VERY nicely for 40m US contacts, not so hot for DX). Loaded up the gutters once, but the RFI was tremendous due to poor joint connections.... even tried loading the aluminum 'drip edge' installed with the new roof as a loop antenna, but ran into the same RFI problem.. too hard to make good connections that'll withstand the weather.

I'm not the least bit interest in his answer to the question I asked you, which you would certainly like to have drop from discussion, and that is about bootleging on bands other than 11m.

> in another esponcse you just chose to
> ignore that one and skip straight to this message. here you are preaching about
> ten meters again.

Ten meters? You do seem to have a fixation for that don't you. So why don't you brag about your other H.F. band activities? Don't like to talk about that?

> did you finnally pass that code test and work your way to hf?
> you dont have to worry about me showing up on any ham bands. i have to much
> great dx to keep me busy on the freeband.

Until the current solar cycle puts an end to that, then you will be more in to H.F. bootlegging on other bands.

> if i wanted to talk on the ham bands
> i would be liscened. 5wpm i can do in my sleep and the theory isnt a problem
> either,

OK, if you're that good so go get the license just to bug me. You don't have to talk on the Ham bands, I promise. Of course since all of the answers are published all you need is a high-liter, yeah you're right, the theory would not be a problem for you because you would not need to know any, just rote memorize the answers.

> and thats without the radio shack book you studied.

That's funny Tim. You have a sort memory. I told you awhile back I never studied for the exam, no need to, somebody on the spur of the moment bet money if I could pass the test or not, so I passed the exam, and collected my winnings. In fact just a few weeks ago I was checking out the possibility of joining the Hazel Park Michigan Amateur Radio club. One of the members there knows my back ground and asked if I could teach some of the theory classes during the club meeting. I told them I can't because it would conflict with the nights I would be at school working on my Masters Degree I want to start this fall. Just think Tim, if I lived by you, you could end up

sitting in a licensing class I would be teaching. How would that feel?

Hey, I just remembered you were bragging about me being in your killfile in another thread! At least I spell your name right. Your not supposed to be talking to me Tim. What happened? You had change of heart, or trying to do some damage control?

1692. RCI2950/2970 Built in SWR meter questions

Newsgroup: rec.radio.cb
Date: 2001-01-09 18:05:15 UTC
From: Richard Smith <rsmith@NOSPAMplaneteer.com>
Message-ID: <NWJ66.1476$Oe.8730@tor-nn1.netcom.ca>
Source record: 67712

Can anybody please tell me how accurate (or not) the built in SWR meter is in an RCI2950 or 2970 radio ? I realise that it is no substitution for an external SWR meter, but is it a fair indicator of SWR condition ? Also, can anybody tell me what units the bar graph is in ?

Thanks,

Richard.

> Licensing data will drive a sane man to the booby hatch if he takes it
> seriously.

...Well, in my previous post, I wasn't defending anyone, simply stating the obvious about licensing numbers and their merit. I, for one, care little about the 'statistics'. Statistics can be made to say whatever you want them to say... it all depends on how you bend the data.

What does it matter if numbers are falling... or rising? The hobby/service is still going strong... regardless of more or less operators

A case could be made for the 'dying' of amateur radio as well as the 'health' of amateur radio using available numbers... same for CB. In my own area, I've watched the demise of numerous Amateur Radio Clubs (CB clubs too... lack of members, lack of involvement is always cited) while the one I'm involved with has grown into the largest in the state (our club doesn't focus on the 'radio' as much as we do the 'fun' of socializing... Isn't that why many folks get into radio... the 'social' aspect?) I think the reason for some of the local clubs' demise was that they took themselves as radio operators too 'seriously' and turned their clubs into 'radio forums'.... (boooooooorring!) Many made the fatal mistake of rejecting as inferior the codeless Technicians who could've swelled their ranks.... Wonder if those same groups would have rejected a Novice licensees too, years earlier?

Source record: 67847

for starters, keep you rf and mic gains at max, later on you may want to adjust them after you get used to the radio, as far as SWR's go, it sounds like you are fine, the lower the SWR the better, and with the skip cycles as hectic as they are, it IS normal to turn your squelch 1/3 of the way, sometimes more with all that noise, hope this helps, 73's

Simply because it will allow greater voltage excursions before breaking down. The specifications normally indicate power handling ability at a 3:1 mismatch, although this spec varies by manufacturer . At greater mismatches the tuner will arc over at lower power settings. Look at it as a safety factor. Heck I would like a 10KW tuner in spite of the fact the max power I ever use is 1300 Watts.

well the truth is .. you cannot stop what you cannot see.
there will always be what they call illegal equipment, illegal
equipment is in the eye of the beholder, what isn't illegal these
days?? Is someone really a crimminal to speak there words on the
airwaves at a given amount of power to be herd? Will we be dictated
too what we can and cannot do to be herd? probally not....

I think Mr. Boobner is some what obsured in his ideal
quest to remove such equipment from Ebay.

Perhaps his princiaple is thoughtfull, but i belive its a bit trivia.
If Mr. Boobner wants to really do good in this world, perhaps he
should be helping the homeless living on the streets.
Especially this time of year.

well... i don't care if someone is running two thousand watts on the
cb band, if thats what it takes him/her to be herd, then so be it.
Aslong as your not causing interference, whats the harm?
who cares, it seems to me that there are more problems in this world
to worry about than trivia matters such as this.

It disturbs me, that some people set there prioritys to this non-sense trivia, these horn blowers have no princiable what so ever.
take a look around, the government(s) are the same way, who cares if john down the street is illegally running radio equipment, does it really matter, when people in your own town,city,country are living in poverty that need food, medical attention, take a look around folks, what is wrong with some of you people today.

If jesus christ was here today, im sure he would shake his head.

On another note, removing the carrier and one sideband increases the portion conveying intelligence by 6dB and another 3 dB is gained in the receiver for a total of 9dB in the RF budget. To make the math simple, call it 10dB and you can see you would have to put out 40 Watts on AM to equal 4 Watts on SSB.

I've run a 300 W tuner for years.... and had it 'arc over' several times when the mismatch is REALLY bad at the antenna.... I never run over 100 watts. What Fred says is true.... I'd rather have the 'safety factor' of a higher rated tuner, especially if you plan on operating into unknown or variable loads.

In the US, NO license is needed to buy a ham rig.... and even more rarely
asked for. The mods to 'open up' the Yaesu are public information and easy
for anyone with even the most limited electronic skills to accomplish. What
makes you think a Ham's involved at all?

No. They buy a brand new Yaesu and competently do the mod themselves.

(It's Yaesu not Yeasu. You must not have one or you'd know how to spell it.)

Couldn't agree more. Clubs in general are having problems. The club over
the years that I liked most met originally in the basement of a park
pavilion in the Civil Defense days. The only rule in the club was not to

spill your beer on the concrete steps -- they got slippery.

leland, you never asked me any question. instead you stated improper facts about me hoping i wouldnt see because you were in my kill file. well my news reader has the ability to read filtered post as well and i do that from time to time to see what the trolls are up to. i just find it really funny that your the great defender of the ten meter line when your not allowed closer than 20 or so megs to that actual line. i have no fear in my heart when it comes to you and the likes of you leland. that should be obvious by my posts here and my web page. what would you like to know? want to hear about the great ssb dx on 11 meters? all the cw, rtty, and psk31 contacts on 27.500? what about the sstv on 27.700? maybe its the echo charlie on 6.670 you are interested in? never once have i pirated in the ham bands and never once will i. i have no desire to talk to a bunch of guys on the radio that i would never surround myself with in person. as far as getting a lisence just to bother you, dont flatter yourself. your not that important. just think leland, while your in your ham class teaching theory i could be right next door teaching code, all while never being lisenced. wouldnt that be a hoot? after all who would care as long as i can teach them what they need. hey come to think of it you may even be one of the students yourself since youve made it clear dont know cw.

Tim & Jay,
Antennas only radiate what's put into them, they don't
'generate' a signal themselves. If an antenan radiates a
harmonic/parasitic/unwanted signal, it's because it was
fed to the antenna by the radio. Radios produce RFI, not
antennas.
'Doc
PS - I didn't use a Radio Shack license manual either...

Hey Boobner, I never said that the FCC does'nt care. I said that I am
Responsible for my own Actions. I am aware of the reprocutions of what
I do , and that is MY business BOOBIE Get it???? I may have merely
stated that there are more severe issues that you should worry about,
than some dude in the country running an amplifier. I could be robbing
your house, or selling Crack to your children, Drunk driving. Do you
get on other Newsgroups and Flame them about "the legalities of Smoking
Weed" Or The gun news groups and Flame them about modifying ak 47s to
operate as a fully automatic???? It seems Mr Boobner , that if I was a
Father would be more worried about how available weapons are to our
children, than some guy talking on 27.555. You don't Go to ANY other
group, and harass them because you are the one who does not have their
priorities straight. You are not doing any of this because you
are "concerned" about radio operations. You come here and harass us
because for the first time in your life you have people paying
attention to you, and talking about you! That is it !! I will Not Reply
to you , as you are a waste of my time. Do not include me in your
menial posts and quote me. You sir are a complete Idiot who has way too
much time on your hands! Maybe if you could get Ludmilla to hook you up
with a little Trim every now and then, you might not have as much time
to flame, but then again, if my wife looked like that I would have alot
of time on my hands too !! PAIN&#65533;

Hehehe...Yea, Tim, south of the border never falls out completely on us either. The islands are always there for the taking, too. Catch me on 715, they all know who "Loco Gringo" is. Was out there DXing one day (years ago) and a bunch of them boys called me the Loco Gringo and said it was Espanol only down there. I made it a habit of DXing there for quite awhile. Now when I'm on the road I always try to stop down there and say hello to them boys. There are some amigos there, but also some vatos. But it is a lively frequency and they all know who the Loco Gringo is and wave a hand for the most part.

I just had an idea. If you want to create a better public image for
CBers, stop bragging about using equipment and transmitting on
frequencies that you're not authorized to.

Helpfully,
-Aaron-

I'm not sure I would want my power supply in my matcher. Too much RF.

Also one side note, using a clarifier while actually off-roading (not stopped) is darn near impossible. Of course, this depends on how and where you are off-roading. The volume control is often more than enough of a challenge !

See ya in the woods,
Triple 3

I have some left-over lengths of 1/2 inch copper tubing. If I take 2 sections
~9 ft. long and attach the shield to one and center connector to the other,
will this make an acceptable antenna? I'm pretty sure I have seen something
like this done w/ wire, but don't know if tubing would work the same.
If so, any ideas on how to attach the two pipes together without them touching?
Thanks

>-Paul

With out getting to technical side band is just another way of
transmitting a signal. A side band signal can be heard but not
understood by a normal AM only radio. Side band does not require
specific frequencies to operate, but frequencies are set aside in
order to reduce incompatibilities between AM and side band. These
frequencies are not written into law but are generally 35-40 for side
band and 1-34 for AM.

When using a side band radio you have three choices of operating
modes. USB upper side band, LSB lower side band or just your regular
AM mode. The party you are communicating with must be using the same
mode.

The main benefit of side band is it has an equivalent gain of 9db
over your standard AM signal.

Drawbacks include:
1..Side band has to be tuned precisely (not always easy for a novice)
2. Not nearly as common as AM

Be nice if you would include the post I was responding to so the context
would be present. I was commenting on the *fact* that certain Hams spend a
lot of time accusing CBr's of all this illegal activity, all the while
ignoring the *fact* that their own house is not so clean.
I grow weary of this constant name calling and other sophomoric,
stereotypical behavior of some Hams. I *always* include the "some" when I am
speaking of a group. I do not paint all that are in that group with the same
brush, as "some" Hams do when speaking of CB and CB Operators.

Not totally true Doc, a bad connection between sections of an antenna can act as a diode and generate a broad band of noise.

However for a properly installed antenna, you are correct.

The copper tubes will give you a little more bandwidth and greater efficiency. (defined as radiation resistance / conductor resistance) the copper tubing will have lower ohmic resistance than the wire. The RF signal flows on the outside (skin effect) of the element and you have a much larger surface area.

Simply use a couple of clamps to attach them to a non conductive surface. As a dipole is current fed and the voltage is at a minimum a painted piece of wood works OK. I prefer a layer of Teflon under the tubing and a layer wrapped around the area where the clamps are located, but this is just belt and suspenders. Attach the shield to one tube and the center conductor to the other. Make a loop in the coax of at least 5 turns 10" in diameter and tape. Trim the elements for best swr and your all done. Put some corks in the ends or the antenna will whistle in the wind.

Cap'n,

WAAAAAL, most of the time, they're easy. I rolled with the "new" stuff"
thru the TS50. Then the 706 came along, and the #$%^%$#^ components
were so small I could barely SEE them, much less get my big old mitts in
there to make changes. mod for out of band.----------and before some-
one says AH HA! You admitted modding a radio!!-------- Yes. For MARS
and Civil Air Patrol. And all my equipment currently meets ALL perti-
nent standards, bulletins, regulations for operating on all frequencies
for which I am licensed. So There! Them flamers thought they were
gonna git me! LOL!

Anyway, I draw the line on the super small stuff. My bifocals and big
fists just don't go well with the miniature stuff! PHOOEY!

Pertaining to the posts that I have now read in the newsgroup, certain people have actually left the statement as to why I don't reply. Before I do so, I would like to Thank all of the people that have called in their personal effort of support to this situation that I have been reading about. Even the calls from people that don't even have the newsgroup as a place of entertainment saved in their computers that herd about this in the way of rf travels. Its really amazing how some people do not seem to have a life in general and the fact that they need to feel important leads them to thank that they may be GOD or a disciple with the ultimate saber tooth staff. For these people that I am speaking of, F**K Y*U. Is that blunt of enough statement to satisfy you or not? If not, please let me know and special arrangements can be made for you to personally drink coffee or a coke with me so you may be the real man or men that you are to ask your questions. Now as for this notification that you have spoke about, you don't respond to something that you don't have in presence. Another part of this that has royally pissed me off is the fact that it has been posted as follows; (* FCC levies fine for illegal amplifier sales: The FCC has fined Stephen

Fowler, doing business as Exports R US in Pineville, Louisiana, $7000
for
marketing an unauthorized external radio frequency power amplifier. The
FCC's New Orleans field office issued a Notice of Apparent Liability
last
September against Fowler d/b/a/ Exports R Us; the FCC says Fowler has
not
responded. The forfeiture is due within 30 days of the Forfeiture Order,

adopted December 28, 2000.) In the country of the United States you are innocent until proven guilty in a court of law by your peers. Pretty simple to follow statement unless in fact your brain dead. When you get a ticket for speeding, you plead guilty or not, then go to trial if you pleaded not guilty. No wonder the new President Elect made the open statement on television at a news conference that the first organization he was looking at dismissing was the FCC. Bare in mind that some sort of uniformed body will still need to be present due to Satellite's, phones, cell phones, am/fm broadcast stations, and television. Also I am not saying that it is right to do other things on channels that a person should not be on. That is actually called respect for and to others. As for a keydown contest, I have went to several and became involve in order to have a better understanding of what is going on and why. I have always seen that the actual contest takes place in a very distant remote location. The reason that I actually feel that this has been done for is that the concern out of respect has been considered for others in a way not to bother them in way. I'm sure that may not be the case in each and every situation, but sometimes people don't consider what they may have had not thought of. In this case you would politely make the suggestion to whom it

concerned so the proper thoughts could and most likely be considered. Some of the very people in this group that start shit as of this may have had something happen to them that they did not have the ability to take care of due to the fact that they have no mentality to reason with the situation they are faced with. So here we go with the feeling that we aren't important and the self a steam is less than 5%. Get a real life, children make a life very important to someone needing to be told they are cared for on a daily occurrence. You don't have to be a jerk off all your life, there will be a female in your future sometime, somewhere that will give you all you want, you say no, well maybe as people call it, a boodie smacker for you will be the proper thing for you. The saying is Different Strokes for Different Folks may be your style, but not mine. Now sir if you must know, I have had a crises that was more important and closer to my heart than to worry about your lifeless post. I am the father of 4 daughters. Almost 5 years ago I lost my oldest in a car accident, wanna know about life, come spend a couple of days with me every January 19th and 20th. You will find out what life is all about, but I don't think you would be strong enough to stay in the same room. My second daughter has been an honor role student from day one and is about to venture into college. My 3rd daughter for the second time in 5 months had a drug overdose the other night. This is a child that has always been raised with the things she needed or wanted in life, but since losing her sister, has went down hill since. Do you want a piece of what a real life has to offer, I don't think you would survive sir. You may ask, well how is she getting this shit without me knowing. The schools today are pure play grounds and the kids of today have learned to hide things in a better way. So all you can do is educate yourself even more to try and keep up with their inventfull minds. She is only 15 years of age by the way in case you feel that you must know. People often ask, how are you able to deal with this? Lose a child and the inner strength that you will gain will make superman look weak. You may feel Mr. Aaron H. Voobner that you are truly a superman, yea right dream on. The people around you may feel the same way, yea right, continue dreaming. Pull out the story of Alice in Wonderland and you may feel more at ease. Come and wear my shoes and I promise that you will want to leave as soon as your toes stated getting squashed when you slipped them on. You see sir, when you lose something greater to you than the life you have by the grace of God, you then have no fear of what life offers next. I only fear what I cherish in life the most and that would be the loss of another child of mine. I buried my daughter with my own two hands and shovel cause it was going to be done correctly by one person that cared and loved her more than his own life, me her father. I invite you to come play a hand of poker with me, but if you fear high loss of betting in life, stay where you are and save your face. By the way, my 5 year old also is almost another perfect the many activities that she is involved in. Oh and another thing that comes to mind, the amateur license that I hold, you can have it as well. Nothing against the majority of ham operators, but some just like in CB radio think that they are God almighty with the world on tilt at the house. Bottom line I guess is that no matter what type of organization it may be, there are always the few that try to screw up their own kind so that they themselves feel important. To all whom are hear and read this, I do humbly apologize for the lengthily post and as always Thank You for space to do so. If I am wrong, I will also pay the fine for my faults.

With all the noise on Ch 19 my squelch needs to be set about 3 o'clock which is 3/4 of the way around on my RCI. Maybe you could a little more specific about how you determined the other radios are outperforming you.

Peace, Nick

A increase of only 8417. Am I to understand 682,240 is the grand total to date?
What else can be said?

Twisted,
Some of dem characters, I know personally!!!! Andrew Martin is a cousin
to my mother in law so we are watching this closely!!! Dey ain't got
ole Eddie into the Prison yet and the appeals are starting.
Slick Eddie might have a picture of somebody in Washington with a goat
so don't rule em out yet.

No one (save your ego) gives a damn about you Dunn and Bradstreet
rating, how easy you are to find in search engines,or ratings that you
have manipulated. Your customer service skills were exposed here, and
by you of all people, the CEO! There are several posts here that say
that you don't answer the phone if you suspect that the customer has a
problem. What kind of warranty matters if the people behind it have

chapped lips from sucking wind about how good they are while not caring because the bucks are in the register. Putting people on hold for twenty minutes says it all. And threatening to charge them 15% to take care of a problem, when your "customer service" should have sent them a new one and had a pick up order attached via swap to the customer. That's how you build customers.. Your company sucks, and the more you retaliate without helping that fellow shows how much of a "Customer service servant" you are.. Bullshit...

Very well said. I have said as much before. Half the worlds children go to bed hungry each night and these people think they are contributing to society by spending all their energies figuring out new ways to snitch on cbers. A sad situation.

Peace, Nick

OK, but make a point of opening up every HF rig ad to verify that it is/is not modified for ext'd.TX, those that are should be requiring proof of MARS/CAP involvement along with a valid license of the correct class from any prospective buyers. Spotted a 101E that advertised openly "125 watts on 11M", wrote in to eBay to ask why my 2510 (that had been un-modded) got dumped but the 101 with 11M rocks in it was determined to be acceptable the answer was because the "40 CB channels were not readily displayed". Go figure

Hello!
I need some info and hope with all the knowledgeable people out here I will get the answer.
I have a grid driven 6m. amp that uses two,4CX250B tubes. I want to convert it to 10m. use.
My questions are:
What should the "plate" and "load" capacitors be changed to?
What about the plate choke? Can I keep the one thats in there? Or do I need to replace it with a different value?
And last,how many turns should the tank coil be? It has a 3 1/2 turns at 2" coil now.

lease email me direct at Bird_Watts@webtv.net

Thanks for all the help,
Sonny

Doc: Who said anything about unwanted signals? Stay focused here will
ya.

I'll type slow here fer ya. Antenna patterns.....

Jay in the Mojave

LOL...

Gives the real meaning to that old insult:

"Put a cork in it!", and it is so true.

My sincere sympathy goes out to any parent who has suffered the horrible trauma of losing a child. Likewise, to any person undergoing financial, emotional, or family difficulties, I wish them well and hope that better times lie ahead for them.

However none of these terrible misfortunes can be used as an excuse for running a business based on the sale of contraband items. The Federal Government has not only identified these items as illegal for sale or use, but has publicly announced its intention to prosecute distributors of them.

The grid input circuit will have to be changed as well as the output coil. You will have to increase the number of turns on the coils. Depending on the value of the capacitors you may have to change them as well. The RF choke will probably need to be replaced as well. Time to get out the old grid dip meter and see where you are and see if it will scale to where you want to be.

Let me get a hankie you are gonna make me cry. So you are saying you have never sold a Illegal amplifier?? Innocent until proven guilty. Now you are sitting here lying to our faces. And give us some sob story to boot well Ill be damn don't we all have a sob story to tell. I say Tell it to the judge, dont worry about surrendering the ham license they will probably take it. I hear your still selling amps can I get one?

well i saw something on the tv news the other day. saying something
about the need to expand airline services, etc. and also corresponding
to that, a need for extra freqs for air service. well can you smell the
coffee? they are going to get those freqs somewhere, he, he . who
wants 27 mhz. too much noise. so where oh where are they going to get
those extra freqs, my my. if i was a hamster, i would quit whining
about 11 meters and think about covering my own posterior. that is of

course unless in some back room deal, the hamsters agree to give up some bandwidth at vhf and in return for their acquiescence, they are awarded the 11 meter band for their chivalry. well, i can tell you that plan isn't going to fly. i don't talk on the radio that much, but when i take a notion, i will and i am a old fart and crafty, and know all the games and what needs to be done, etc, and i can tell you, if the hamsters take over 11 meters again, there will be no joy in muddville, and that is a fact jack, so put that in your pipe and smoke it and be sure to enhale,.....cd is out.....

1788. Re: To Whom It May Concern;

Newsgroup: rec.radio.cb
Date: 2001-01-10 03:01:50 UTC
From: sparky@cet.com
Message-ID: <3a5bd06a.10454314@news.cet.com>
Source record: 67890

Hypocrisy is the real problem.

Many in this newsgroup have defended their illegal operation within the Citizen's Band with one of the arguments you have used; namely, "nothing is illegal until you get caught". Drunk driving is illegal, and for obvious reasons. Tens of thousands lose their lives to drunk drivers each year, simply because the driver feels the same way - "if I get caught, THEN AND ONLY THEN will I take responsibility". That attitude doesn't really help the families of those that are killed, and compensation for wrongful death is not "taking responsibility." Obviously, it is unlikely that anyone will get killed by the illegal operation of CB radio. Regardless, if the criminal gets caught, responsibility is not "taken", it is mandatory.

Laws are not solely intended to prevent death, but in a greater context, to prevent the infringement of one person's rights by another. CB radio, that is Citizen's Band radio, was instituted to provide any citizen access to radio communication. But like any other right granted by law it comes with certain restrictions. There are reasons for these restrictions. One reason is that if there is going to be a band available to a large population, it should be regulated so that everyone has an equal opportunity to use it. One of these regulations is on the maximum power allowable, and the reason is simple: when more power is available, fewer people will have access to the band. That is why there are only a few Class A broadcast stations licensed by the FCC. If a person wishes to operate beyond the limits, then he or she has only to get a license to do so.

Likewise, if someone decided to squat in your backyard, you would be infuriated. More so if the local law enforcement refused to act because they had more important things to do. Take matters into your own hands and you may be in violation of a law more serious than squatting. This may not be a perfect example, but the principle is the same. Boiled down, some in this newsgroup have justified the commission of a felony because someone had committed a misdemeanor against them. By their own justification, anyone that operates illegal CB radio should be shot.

But illegal operators don't just infringe on the rights of legal CB operators, but on the rights of non-operators as well. Interference is a major problem. If these amps are widely available, there will indeed be a percentage of operators that will run a clean signal, but the majority don't care (until they get caught). Their RF interferes with many other electronic devices, including some that may be used for emergency or life support services. If has not already happened, it is

only a matter of time until someone dies because one of these services was disrupted by a cheap CB amp. This is not such a ridiculous speculation when you look at a spectrum analyzer and see that one of the harmonics lands very close to a band intended for medical telemetry.

Disruption of television broadcast is probably the most common problem. TV broadcast stations have licenses, and therefore the legal right, to operate in their respective bands. Again, some CB operators think that they have the right to run power even if it interferes with legal allocations that existed long before they were even born. This is akin to the government telling you that a trespasser has the same rights to your land as you do, land that has been bought and paid for by your ancestors with work, sweat, blood and tears.

Recently, some of the people on this newsgroup have forced N8WWM out of his ISP. They cried to AOL that he wasn't abiding by the rules. These are the same people that defended their discussions about illegal operation with the 'freedom of speech' argument. In that context, the laws exist only for their enjoyment: everyone must abide by the rules except them. This is hypocrisy at it's finest.

How you live your life is your business, and how anyone else lives their life is theirs. The exception to that is when one person's life negatively interferes with someone else's. In order for all the people to live in the same community, each citizen has a responsibility to that community, and those responsibilites are called laws. Like it or lump it, they are here to stay. And they are what put the 'citizen' in 'Citizen's Band'. Abuse the laws and you abuse your citizenship, forcing your business to become the business of the community and every other citizen. That is why criminal cases are entitled, "The People vs. Joe Hypocrite".

I suspect that N8WWM will be back. All he has to do is sign up for a different ISP, but I guess they didn't think of something as simple as that. I also suspect that Voobner will continue to voice his opinions. Yes, there are other problems that are much more important, and I do my part for other causes as well. But I will continue to oppose illegal operation both here and in my hometown, and I will do it legally. If, at any time, anyone feels that anything I have done is illegal, then they have the LEGAL right to do something about it.

This has been an intelligent, logical, and decent response to your post. I have no doubt that others will respond to this with their typical sarcasm and ad hominems. If you intend to do the same, then do it by your "real man" standards.

Sparky, Friend of Legal Radio Communication

BTW, I find it absolutely repulsive that you have decided to justify your activities with a plea for sympathy. You are not the only person on this planet with a "real life", and you are not the first person to

have ever lost a child. For you to suggest that you are the only one
that has ever felt pain only implies that you don't know people half
as well as you think you do. I am no stranger to tragedy myself, and
I'm sure that very few people here, if any, have never lost a loved
one. I really hope that no one turns this into some sort of idiotic
tragedy competition. I do sympathize with your loss, but how that
pertains to CB radio is beyond me, and for you to bring it up in the
same context is disrespectful to anyone that has ever felt the loss.

Sad that life has dealt you the hand that it has, but we all have our burdens to carry. I cannot fathom how horrible the loss of a child would be. I have two children, and love them more than life itself, and would lay down my life in a hearbeat to protect them. In that respect, yes, I do feel for you as any sane person would.

Now, back to the crux of the matter at hand. You made some very poor business decisions in dealing with the gentleman as you have on this newsgroup. That, you still need to apologize for, rather than trying to justify it with your life story.

Hope things get better for you, and I sincerely hope that you get your child the help that she needs.

Randy Chapman

we had no problem with n8wwm stating his opinion. we had problems with him interjecting it at every possible step when it had already been stated over and over again or when it was totally unwanted. i personally had a problem with him starting 20+ threads a day with pure and utter nonsense, they were pure name calling. his trolling was not well thought out. looked like something that a 5 year old could could beat. if he continues with the nonsense then he should and will be reported again. did you think what he was doing and the way he did it was right? i think he should be reported just as the deakeyers and whistlers on 11 meters or any other band should. and yes your still in my kill file but i'll have to peep in it just to see your answer.

I am sometimes taken back by the bravado in many of the messages, and then the long sad "not me" stories when these same people are caught violating regulations. It appears that those that crow the loudest are the same ones with tears as big as horse turds rolling down there face when fined.

My heart was touched by the trials and tribulations of the gentleman who lost a daughter and had a second one on drugs. As a Father, Grand Father, and Great Grand Father my heart goes out to him and the troubles he has had to endure. That being said, one wonders why someone would compound the problems in their life with illegal activity. His claim that "he is innocent until proven guilty" is the cry of one not versed in the law. He failed to answer the charges and lost by default. case closed. "Wow, you mean your serious about that stuff", funny I heard those exact same words from the gentleman here who was warned by the local LEO that they would soon have jurisdiction, and if his illegal operations continued he would be the first visited.

Those that continue to scoff at the FCC and the law will have their words fed back to them at a number of $$$ per word. I did not post this to get in a heated exchange with those that feel nothing applies to them. Those folks, continue to do what you are doing, the wise will see the handwriting on the wall. Thus it has always been...

Never let your alligator mouth overload your humming bird butt!

Hams don't want 11 meters back, there are 6 times as many hams as there were when I last operated on 11 as a legal hamband. The us Vs them will be the downfall of hobby radio.

Spend a little time with a ham instead of taking pot shots at a preconceived notions as to what a ham is. Do you expect your message to endear you to anyone? The vitriolic approach serves simply to mark you as a closed minded person that most rational people would rather not deal with...

Yeah, some people just don't understand the philosophy of "If you don't like it, then don't participate." They feel an uncontrollable urge to try and impress their opinions and censorships on the matter on everyone else. It's just as rediculous as a fashion designer trying to explain to the circus clown that sripes and plaid don't go with each other. It may be true, but the clown doesn't care.

I've been reading this discussion about n8wm for quite some time. Look... It's quite simple N8WM, if you don't like it, then don't participate. I don't even own a CB anymore, I have my HAM ticket, but it's not my job to police the newsgroup. You're trying to be a newsgroup vigilante on the topic of running out of band or excess power. Vigilantes aren't tolerated by either the police, OR the perpetrator. To sum it up, you're in a lose lose situation.

I'm not for or against seat belt laws. I wear mine, and if other people don't, that's their problem. But I'm not going to run out on the highway and disrupt the flow of traffic because someone isn't wearing theirs. If they get in an accident, they get hurt. Survival of the fittest. Darwin put it quite simply.

Now N8WM, if you choose to play in traffic insisting that everyone buckle up, that's your choice. But I guarantee you that you're going to make a lot of drivers angry. And some people have "Road Rage"... So, I'd be carefull out there... Just wear your seat belt, and let the others do as they may. It's their life, not yours.

you can't make laws protecting people from their own ignorance. We'd have to outlaw all sharp pointy objects. And that'd include the top of your head.

Just my 2 cents... Thought I'd add it in to the till...

Honestly Kari,

All they talk about is amps. Amps this and amps that. We heard them the first time, yet they insist on filling the newsgroup with the same thing over and over again: amps, amps, amps, amps, amps. What a nuisance. Nobody wants to read the same badder-than-thou drivel about "dropping the maul" over and over and over again.

Message-ID: <3A5BF3DC.5EEF91B5@oio.net>
Source record: 67758

Tim,
There are a number of things that could have changed when swapping antennas, there's no way I or anyone else can say why the RFI disapeared at this point. All you can say it that it's nice it did disapear.
The angle of radiation isn't a well defined area with 'sharp' edges. This 'near field' extends for quite a ways, not yards, but thousands of yards. The difference in how far this 'near field' extends, when comparing a 1/2w and a 5/8w antenna, is negligable when compared to the distance between you and your neighbor. The same neighbor is going to be in the 'near field' of both antennas, and if you measured the field strength between these two kinds of antennas at your neighbor's house, I seriously doubt if you could see ~any~ difference.
The reason the RFI 'went away' is more likely because of some other change that was made, such as a different feedline route, or who knows what.
'Doc

Sparky, you need to read some more, my personal life matters were the reason that I did not make a reply to what was being posted this past weekend, not an excuse for business. Business is business and personal is personal. No one here looking for anything else, just making the statement as it was asked for as to why I had not posted a reply or statement. Pity, no I don't need any for this, more of a man than you will actually know. Besides, how did Texas Star, Galaxy, and Ranger win in court, do you know, I do. Deal with the real problems of the land first and I then I will sit on your side. Drugs, drunk driving and those kind of things are killers, Amps and Radios don't kill, you need to learn how to seperate the difference. Oh and by the way, I don't and won't tell a person to freeband or anything else like that. I let people choose their own way of lifestyles. Russia at least now are free states as they call it due to the fact that people got tired of the dominating government practices, Its not for off in this country if you really know anything about what is really happening in this country.

Steve,
You know only in all good time your day's were numbered!

I'm sorry to tell you the truth. But to put a add on the web is going to catch up with you in good time..

You really dint need to post your family life on the "NG".

You were a guy that "HOOKED UP"
with a guy that made amp's and you know that it's not a good thing..
Shame,Shame,on you....

Now it's only time that they will catch up with "X-FORCE".
Then "Carl 151" will be in the "Hot seat"!!

That will give him a wake up call..

All of this is your owen fault. You can't blame no one else but your self..

I may had did some stuff. But "Greed" got in the way and pushed me to the side and i'm happy four that..

Now,
"YOUR"Ass is on the line, and you seem to be asking four forgiveness??

All i can say is that i had lost a lot more than $7000.00 in all of this and you know this Steve!!

Hell you may have been part of it all?
I don't know.

Now you have to spend some money and try to get out of it,and you may do just that...?

Well all i can say is "Good Luck "
Because you will need it!!!

Hay "STEVE" if you are warding why i'm posting a BAD post on you?

You really did have your head were the sun don't shine.....

Have a Good Day.....$$$$$$$$$$
321ILL.

That is correct. A properly working antenna generates nothing. As I pointed out earlier a corroded joint of course is capable of generating noise across the spectrum. How do you make a noise generator? Use a diode, right? Want to really generate some noise, get out the old antenna tuner and load up a rain gutter that has been up any amount of time.

:>hard core radio operators and know more then you would want to admit.

: Yes. They know how to buy an "opened up Yeasu" (sic). That's the
: extent of their hard core technical knowledge!

Don't bet your house on it, Sonny.

Surprisingly enough, there are many Hams who are also CBers. Some of
those Hams even know as much about electronics as some of the CBers.

The main attraction of CB is that you can buy a rig, and get it on the
air with minimal effort. It doesn't take much more, these days, to get
a Ham license and get on the air - at least in the US. The written tests
are a joke, and have been for years. Just memorize the code, and you are
close to 5 wpm.

Hey Dan, your right on some, but wrong on the other. If proven wrong, I don't mind paying the fine for being wrong. As for the personal life, you missed the whole point as some will unless comprehention is your best asset. Also, never be ashamed of what you do, if you are, you don't need to do it in the first place. I have nothing to hide was the whole point. G.E.D.'s are available if you put forth the effort, common sense is the ability to think out different facts with simple reason. If you had read the whole story of all the post that I did, you would know and comprehend why the post was made in the fashion that it was. NO pity being asked for at all, and do not want any. I will walk the road of bumps and hard knocks, can you? Not in your life time as I see it and know it. Also, know what you are saying on a subject before you say it, cause you can look pretty stupid if you don't, you go figure. Its not what you know, but rather who you know in this world.

wrote:

: A standing wave along a transmission line behaves just like an
: antenna, in that it has points of high voltage and points of high
: current which are 1/4w apart from each other. The point that has high
: voltage is also a point of high impedance, and the point of high
: current is a point of low impedance. When this happens, the
: transmission line does not behave as predicted because the line is
: designed for a fixed impedance. Power is therefore lost in the
: transmission line and is radiated away as both heat and RF.

Actually, the transmission line will still perform as theory predicts.
It just will not function as a perfect transmission line.

It is a bit misleading to say that "A standing wave .... behaves just
like an antenna.

When there are "standing waves" on the line, there are both forward and
return currents. As you note, the phases of these currents vary along
the length of the line. This means that the vector sums of the voltages
and currents vary along the line in a sinusoidal fashion - this giving
the result the name "standing wave". But the individual currents do not
have these non-moving nodes - so they do not have standing waves. It is
only the vector sums that do.

: > Now back to the transmission line. Granted no line is perfect. But a

: > positioned in a straight line, no harmonics are radiated. But as we
: > all know, that is almost never the case. (In the case of mobile
: > installs, however, the harmonics are generally contained within the
: > vehicle).

It does not matter if the impedances match or not. And the impedance of
the source is immaterial - it does not cause standing waves.

If the impedance of the load matches the transmission line, then all
the power will be coupled to the antenna - so no current will "leak"
to the outside of the coax. However, power can still be coupled to
the outside of the coax from the signal radiated by the antenna.

If the impedances do not match, then current may or may not leak to
the outside of the coax. If it does, then it can be eliminated (or

at least made insignificant) by use of a choke balun.

Using a 1/4 wavelength of coax will not eliminate harmonics being radiated by the coax, although it will help minimize them. The coax itself will not create harmonics, unless the coax is defective.

I didn't say that I agreed with his methods. I went back through many
of the posts, and what I saw was that his behavior mirrored the
behavior of those he opposed. So who threw the first punch? It doesn't
matter since both sides behaved less than stellar (IMHO). So again
that is hypocritical -- they condemn him but they won't condemn
themselves for the same nonsense.

You are trying to run circles around my argument, but the buck stops
here. I pointed out in my post the differences as well as the
similarities. In both cases, the rights of the law-abiding citizen are
infringed upon. And you are right: amps and radios don't kill. Neither
do guns. People kill. And innocent people have been killed by far less
because somebody thought he had the "right" to ignore his
reponsibility to obey the law. Also, radio has been an indespensible
part of war since it's invention, so to say that radios don't kill is
only a half-truth. They are a tool in the hands of man, and can be
either used or abused.

If you don't like the laws, then there are ways to change them
legally. If you don't want to do that then leave. Most of us are
generally satisfied with the way things work. I have never heard of a
politically-motivated keydown. And there has never been any defense of
illegal radio practices because of governmental conspiracy -- that
belongs in another NG, or in the office of your local therapist.

Bill, why do you think many hams are pissed off at the illegal CBers in
Europe and elsewhere? That's right, because thety DO come to the ham bands,
and do not give a hoot about any regulations or band plans. If they'd stayed
on eleven, I wouldn't have bothered to write about them in the newsgroups.
Listen to the CW portion of ten meters any day and you'll hear some of them,
taht's for sure. Too bad - legal CB is a nice hobby for anyone.

Paul, SSB is very different from AM, and it can take some work to get used to. However SSB also offers many advantages over AM, but your partner will also need to have SSB for communication.

AM consists of a dead carrier and two side bands. Radios that have the Single Side Band (SSB) mode transmit either the lower or the upper of the two side bands. In other word you only output power when you speak, there is no dead carrier in SSB.

If you have been paying attention, Gunny, more of the citations from the FCC were directed to "illegally operating HAMs" meaning "Amateur Radio Operators". Besides, a 4 watt radio can also cause interference as well (no matter how justifiable you maybe), my Washington bleeds my neighbors computer speakers at 80% modulation with a "tight" set-up from station to antenna. STHU!

Which serves him right! He should've abided by the "America Online Member Agreement/Terms of Service" put forth by AOL's Community Guidelines (http://legal.web.aol.com/aol/aolpol/comguide.html). And I quote:

"...Proper online conduct.

Online conduct should be guided by common sense and basic etiquette. You will be considered in violation of the Terms of Service if you (or others using your account) do any of the following:

Post, transmit, promote, or distribute content that is illegal. Harass, threaten, embarrass, or do anything else to another member that is unwanted. This means: don't say bad things about them, don't keep sending them unwanted Instant Messages, don't attack their race, heritage, etc. If you disagree with someone, respond to the subject, not the person.

Transmit or facilitate distribution of content that is harmful, abusive, racially or ethnically offensive, vulgar, sexually explicit, or in a reasonable person's view, objectionable. Community standards may vary, but there is no place on the service where hate speech is tolerated.

Disrupt the flow of chat in chat rooms with vulgar language, abusiveness, hitting the return key repeatedly or inputting large images so the screen goes by too fast to read, etc. This is online vandalism, and it ruins the experience for others."

End quote.

<snip><statement deleted due to more babbling>

Have you checked the output power with a meter?

Could be a bad ground, be sure you have good chassis ground on the radio, sometimes you have to remove some paint or use a washer that bites.

It is almost always best to power the CB directly to the battery positive, and then ground the CB with a short ground wire to the chassis. It is also important that your battery and alternator have good connections to chassis.

Be sure to fuse the positive power lead AT THE BATTERY!

With a stock microphone Mic Gain is usually best around 75%, depending road noise and how loud you speak.

The RF gain controls your receive sensitivity, usually best at 100%, however if you are very close to another station you may like to decrease the gain.

The squelch level will depend on how much noise or activity there is on the band. On very quite days it is not unusual to squelch out at 1/3.

It would have been more accurate to say that a resonant antenna works
because of standing waves.

>When there are "standing waves" on the line, there are both forward and

Again, I should have qualified that to say that the source (in that instance) is to be considered the radio + transmission line.

>If the impedance of the load matches the transmission line, then all
>the power will be coupled to the antenna - so no current will "leak"

>
>Using a 1/4 wavelength of coax will not eliminate harmonics being
>radiated by the coax, although it will help minimize them. The coax
>itself will not create harmonics, unless the coax is defective.

This is an effect mentioned in only a couple books I found, and being somewhat skeptical I verified it on my own. Intentionally create standing waves on a coax, then move a FSM along the coax. There will be points of RF leakage at the points of the standing wave that are of high-impedance. This is presumably due to an improper (high) impedance forced on the coax by the standing wave. This can be verified by anyone. I also had a spectrum analyzer and measured the harmonics. The harmonics (odd) were more pronounced from the coax than from the antenna. On the contrary, I did not detect RF from the points of low impedance as the book said I should have. I checked RG-58, RG-8 and RG-8 foam, all with similar results. This was about 20 years ago, but I don't suspect coax has changed that much since then.

Dear Friends,

I know you are probably interested in promoting legal CB. You might
want to pitch in and help clean up the band of these illegal amplifiers.
It only takes a few seconds a day.

Thank You,
-Aaron-

Theoretically speaking of course, I can see where this kind of thing
could really upset a person, especially if a large part of that
person's income was derived from the sale of illegal devices in direct
violation of FCC rules.

> Is this against some "law"? Show it to me.

You know you've done well when your spankard considers your method of teaching him worthy to use on his enemies. Imitation is indeed the highest form of flattery, but I advise him to be sparing in his admiration of me, lest he be accused of shamelessly slurping me. A reminder:

Before I began punishing him severely for his lying and libelous accusations, he was totally out of control and locked in the grip of insanity. After one flame from me, he needed his wife Ludmilla to soothe his wrecked ego in her broken English in order to stay afloat, and tearfully reported it all to the group the next day.. He's a completely different, more honest troll these days as a result of his harsh lessons from me, so I think I've been a good teacher to him. Even a cowardly troll can benefit from the truth, and The Truth Is Setting Him Free...

> My mistake. Better run crying to your "Captain".

It's a personal victory for me that he can now admit his mistakes to even his greatest enemies because he fears my wrath. I only hope that one day he'll stay truthful not from fear of punishment, but from the knowledge that truth is its own reward, and that being a trolling coward is better than being a cowardly trolling liar.

Folks,

At least several dozen times on this NG I have articulated the reasons why I am opposed to illegal CB amps, freebanding, etc. I even have a website (http://www.geocities.com/aaronvoobner/) that explains this in excruciating detail.

Yet, you guys keep dreaming up your OWN reasons for MY opinions (e.g. Aaron's crazy, a wannabe cop, attention-seeking, jealous of us, a troll, hates CBers, etc.) You're in such serious denial that it's laughable. My advice to you is to face reality. Stop dreaming. Flame or troll me if you'd like, but my opinions are extremely appropriate to this NG. And I'm here to stay.

-Aaron H. Voobner-

I see this thing has bias setup in it. Is it sideband ready? It does not have the labels (colored end caps) for the 4 switches or a working meter (relative output). Any ideas on where I can get these items? The front panel has "4 lateral" and "DX400" on the front. This unit has 4 MRF455 transistors in it.

Due to the state of this newsgroup email me any parts sources!

It's like this:

We had a five-person carpool of guys who worked at a chemical plant in Baytown, TX. Each week, we had a different driver. The driver could set any start time he wanted, and the rule was that the driver paid any traffic tickets (like when he started late and then had to speed to get us to work on time).

We got pulled one day because the driver was speeding. As the cop was writing the ticket, other vehicles went speeding past.

"What about THAT son of a bitch?" our driver asked. "And what about THAT son of a bitch?" "And THAT son of a bitch?"

"Take it easy, young man," replied the cop. "One son of a bitch at a time....."

>

So your neighbor gets 1500 watts. Now what? Heck, Redneck, you'd be the first to complain because he was preventing you from using your radio.

Guess it depends on what side of the fence you're on. You've got that bumper sticker on your truck--you know, the one about not messing with your rights to do what you want. But you don't mind messing with someone else's.

As we get less and less respect for each other, the USA grows weaker and weaker. And when somebody else takes over and removes all our rights, we'll see how big you talk, Old Son.

When countries were taken over in Europe, the citizens were told to bring all their radio receivers and guns to the town square where they would be smashed and burned. Failure to do so would result in a death sentence when they searched a house and found contrabrand.

Mr. Redneck from Bama, I predict that when that day comes, you'll be right at the head of the line to throw your big radio onto the pile, 'cuz you don't wanna die. Until then, play the role of "tough guy" and go on disrespecting everyone. Your mama tried to raise you right. Did you diss her, too?

And didn't any of your relatives tell you about dodging bullets and bombs in the '40s and '50s to protect the freedoms which you now are abusing?

You see, Redneck, you view this as purely a radio situation. Wrong. Your "anything goes" attitude tears at the very fabric of our society.

Source record: 67904

>Hams don't want 11 meters back,

Amen. Hams didn't use it anyway. It was outside the harmonic relationships of the other bands, which made it necessary to put up specific antennas and use specific radios. The relationship of the other bands made it easy to design gear and antennas that work together. Hams face the same problems today getting on the WARC bands. Who'd want 11-Meters back?

If hams wanted to, they could get illegal operation on 11 meters shut down within 18 months. Hams know how to recognize and locate illegal stations. And they know where the illegal equipment is being sold. Remember that hams, through necessity, operate with a close relationship with the FCC. Is this the group you want to "tick off"? I don't think so!

Fortunately, Hams don't give a flip what happens on CB, with two exceptions. Some CB equipment splatters and throws spurs into the 10 meter band--particularily on the weak signal frequencies. And some CBers think it's cool to operate on 10 meters without a license. Those two things get attention. Fast.

If you want to keep CB the way it is, get after those who are attracting all the unwanted attention. Tell them to clean up that modulation, quit overdriving the amplifiers, and to stay off of 10 meters. You know who they are. A few yoyo's like that are going to ruin it for everybody!

There are a lot more 10M amps than 6M amps- sell it and buy what you need.

Many of us in the NG can identify with your loss(es), having suffered the same blows--loss of child of spouse. Auto accidents are worse than, say cancer. There was no time to say goodby; no sense of what was about to happen.

That does not negate your ordeal with the FCC. It is a separate issue, and I dare anyone to even suggest that all that happened to you was "punishment" for selling illegal radio equipment. Life is life, and the "rain falls on the just and the unjust".

While I disagree with ExportRus as a source of radio equipment clearly intended for markets where it is not authorized, I salute you personally for being a survivor in far more of the sense than the recent TV series which watered down survivorship. I also think you deserve a lot of credit for accepting responsibility for your actions.

The FCC does what it does because of a mandate from Congress and the FCC's charter of authority and responsibility. Hopefully, a quick resolution can be achieved in your situation which will allow life to go on.

You've shown a tendency toward lying, making your "reasons" for trolling this group laughable at best and delusional at worst. Your trolling of this group will do no more to lessen use of illegal equipment on CB than if you sandbagged the group (as would anyone remotely official) for "evidence" to email the FCC, Ebay, etc. Your effect here since the VERY BEGINNING has been disrupting discussion with attention-seeking headlines and inflammatory (and often blatantly false) rhetoric and grandstanding such as you show with this post.

You are a troll by the canonical definition - One who seeks to disrupt discussion by drawing attention and flames to oneself. I, on the other hand, only seek to disrupt YOU because of your obvious trolling and your initiation of a flamewar with me.

> Yet, you guys keep dreaming up your OWN reasons for MY opinions (e.g.
> Aaron's crazy, a wannabe cop, attention-seeking, jealous of us, a troll,
> hates CBers, etc.)

Your behavior in this group provides evidence GREATLY supporting you being insane, a wannabe cop, attention-seeking, jealous of those who have friends, or a hater of CB altogether. You may not think so, but your refusal to accept the statement of FACT that you are considered a TROLL WITHOUT ANY USEFUL CONTRIBUTION from NEARLY ALL admitted legal CBers AND amateur licensees who have subbed this group for MANY YEARS only makes the charges against you that much more plausible and your "reasons" for trolling the group that much more ridiculous.

Simply put, it's *obvious* you have a grudge against CB, no matter if due to illegal usage or you having been angered by a CBer a few months ago, and your purpose here is CLEARLY not friendly, CLEARLY not useful, CLEARLY not generally acceptable to the group, and you CLEARLY cannot support your "reasons" for trolling.

> You're in such serious denial that it's laughable.

You are a pot calling virtually the ENTIRE GROUP's kettle black. Get a grip.

> My advice to you is to face reality. Stop dreaming.

OUR advice is the same to YOU, but the words of many respected and admitted legal CBers and licensed amateur regulars seem wasted on you. If you consider yourself doing ANY good on this group for CB or amateur radio, I remind you that your support is VERY CLOSE TO NIL. Other than N8WWM, I have seen NOBODY openly support your trolling. The very fact a known usenet abuser and troll is/was your only real support should tell you something.

> Flame or troll me if
> you'd like, but my opinions are extremely appropriate to this NG. And
> I'm here to stay.

You have the option to troll this group if you wish, and you will continue to be disliked and spoken against, as well as flamed by those you claim to speak for and those you have insulted. You have somewhat of a talent for portraying yourself as some type of persecuted hero of the legal CBer. As a legal CBer I say, if you're a hero, we don't need enemies. I'm here to stay also, first to make sure you aren't considered anything more than what your behavior and effect on this group would suggest you are - A TROLL, and second, to continue to work you over until you apologize openly to my satisfaction for implying I was involved in any illegal activity whatsoever.

Keep in mind YOU initiated the drawn-out flamewar that you and I have been engaged in for weeks by implying that I was some big-time amp/drug/xyz dealer and was going to jail and paying a fine - FOR NO REASON AT ALL. I quote your ending statement, "roll the dice, buddy". I'm happy to have forced you to give up MUCH of what you routinely did to harass others and disrupt discussion, but you haven't become any less of a troll as a result. You've only changed tactics.

BTW, Giving this "I'm-not-a-troll" post the subject, "The Voobner Effect", does little to support you.

Message-ID: <20010110083548.05480.00000004@ng-xb1.aol.com>
Source record: 67909

Thank goodness the FCC doesn't read this newsgroup. Everybody is spouting off, spilling his guts about what equipment he runs, and advertising high-powered gear.

It's also fortunate that the FCC never cruises around from 27 to 28 MHz. Whew! Think what would happen if they did!

Of course, the lack of FCC presence is not surprising. After all, the Highway Patrol never uses unmarked cars. DEA officers never slip into drug buys undercover. And no Adults (to my knowledge) hang on on the Internet posing as children in an attempt to snare pedofiles.

So relax. When you see one of those "WTB: Amplifer" posts, it's not a sting operation. Why, the FCC hasn't got a clue about what a Dave Made is!

This NG is the safest place in the world for CBers. The FCC is too busy over on E-Bay. They don't have time to read 200 posts/day in rec.radio.cb, even if somebody told them about this NG!

So let's get back on topic. I need a "foot warmer" for the truck. What'cha got, and how much do ya want for it?

LET ME JUST SAY THIS TO VOOBNER...
FIRST OF ALL THERE ARE SO MANY AND I MEAN SO MANY GUYS AND GALS THAT SELL AMPLIFIERS FOR CB AND HAM USE. VOOBNER ALWAYS MENTIONS DAVEMADE BECAUSE IT IS BY FAR THE MOST FAMOUS PRODUCT. TO A LESSER DEGREE THE X-FORCE IS ALSO ALWAYS MENTIONED BY HIM. X-FORCE HAS SOLD ALOT ESPECIALLY BECAUSE OF THIS WHOLE INTERNET THING. AS I HAVE LEARNED FROM READING POSTS ON THIS GROUP FOR A LONG TIME AND FROM MY PERSONAL FRIENDSHIP WITH ICECOLD. I HAVE LEARNED THAT THERE ARE SO MANY AMP BUILDERS OR AMP COPIERS OUT THERE THAT YOU WOULD NEVER GET THEM ALL!
MOST OF THEM DONT EVEN USE THE INTERNET OR EVEN EVER LOG ON TO A COMPUTER. YES X-FORCE IS MAINLY INTERNET BUT, AS WAS SAID EARLIER THE GUY THAT SELLS X-FORCE ON THE INTERNET IS FULLY AWARE OF THE FINES AND HAS PAID A GOOD MANY BEFORE. THIS IS JUST PART OF THE BUSINESS. SHIT HE ADVERTISES ON THE NET MAN! THE OTHER AMP BUILDERS ARE ALL OVER THE COUNTRY AND THEY SELL MANY AMPS AS WELL BUT THE ARE VIRTUALLY ANONYMOUSE TO ALL OR MOST. I THINK ICECOLD KNOWS SO MANY OF THEM THOUGH, BUT HE IS NOT TELLING SO DONT EVEN ASK HIM. DAVEMADE FOR SOME REASON DECIDED TO GET ON THE INTERNET BECAUSE THIS PRODUCT ALSO WAS A PRODUCT FOR THE SPECIAL CB GUYS, MOSTLY KEYDOWN GUYS I BELIEVE. THIS WAS AND STILL IS A VERY TIGHT KNIT GROUP. EVENTHOUGH THERE ARE A GOOD MANY NEW KIDS ON THE BLOCK! SOME GUYS JUST WANTED THE BEST THEIR MONEY COULD BUY AND THAT IS WHY THEY HAVE DEALT WITH THE 2 THAT YOU ALWAYS MENTION. THERE ARE PROBABLY FROM WHAT I HAVE LEARNED, AMP BUILDERS IN ALMOST EVERY STATE OF THE UNION. SOME OF COURSE ARE MORE SUCCESSFUL THAN OTHERS AND SOME ARE JUST VER SUCCESSFUL IN THEIR OWN AREA.
I SINCERLY HOP THAT THIS HAS HELPED VOOBNER SINCE HE HAS ASKED SO MANY QUESTION OF THIS NEWSGROUP.

Hey Spark, I don't wanna argue, but you're using THAT mentality again and it's pure golden BS! You said laws are not solely intended to prevent death, but an infringement on anothers rights. Agreed. TO A POINT! How in the hell do YOU justify a law that carries penalties, forfeiture, fines, WHATEVER, some form of punishment or retribution, WHEN THERE IS NO VICTIM? If you don't have a victim, you do NOT (And therefore, should not) have a crime. And I Don't give a damn what the law says about it...if that makes me a criminal in your eyes, so be it. Your analogy of spectrum space is null and void when you compare it with land. There is/was no blood shed or sweat of the brow for frequency allocations by ancestors. In addition, you are comparing a tangible with an intangible, which in and of itself discredits your attempted illustration. You also imply that all illegal ops interfere. That is so far removed from the truth that I won't bother educating you on this point because you are too far removed from actuality of real life situations. You take something you have read, heard, been told, maybe even experienced a time or two, and run with it and try to apply it as a blanket to all who don't fit your idea of a "legal op". Again..pure golden BS. FORCED the N8 boy off his ISP? MAn, are you on crack? All one has to do is check out his posts. Obviously you have NEVER read Aol OR Usenets user agreements. Again, I will not educate you here, go read them for yourself, but your warped little bastard troll was in violation of MANY. Talk about hypocrisy, you take home the golden calf award for that as well. You talk about taking responsibility for one's actions, but in the same breath you defend the trolls posts and violations of Usenet and his ISP, attempting to deflect HIS own irresponsible behavior that got him booted, onto the group, as if somehow WE are to blame. It was never a question about content of a post UNTIL HE MADE IT SO! He came out here and cast the first stone, and second and third. HE come out here and thought that since it didn't conform to rules and regs, it shouldn't be discussed. Well, too friggin' bad! He had way more opportunity to clean up his act around here than I would have given him in person...just my humble OPINION, and many others I'm sure. Since you are so fond of analogies, let me give you one. If this was in public, and eye to eye, how many times would you let him insult you or your family with sexual references, degradations, and slander before kicking his ass? Insult me all you want. Say something in front of my wife or kids and direct it to them, guess I'm going to the county hilton for a spell. Damn, Spark, you are a piece of work. I was amazed by your post, but I am no longer surprised to see you rise to the defense of the bottom feeders, for you share similar and meritless views.

Let's see if I have this right.......The laws of our country are in place for our betterment and are to be obeyed by ALL. I distinctly remember a little federal law about the speed limit being 55 MPH that was flagrantly violated by EVERY SINGLE MOTORIST at one time or another. When will these people in glass house stop throwing rocks?????

Isn't there something in the law that states that if you don't enforce a law uniformly that you can't enforce it specifically? If a law is unenforceable does it become null and void?

With high profile companies like Express Electronics, Left Coast Radio, Exportsrus, and others all advertising amplifiers prominently on their web sites for at least a year, why has the FCC waited until now to single out Exportsrus?

This subject concerns me because as a customer of some of these companies what will happen if their records are looked into? My name and many others on this group will come up. Can the FCC just send out fines to all of us and request that we send in our "illegal" equipment?

That's what A-1 Telecom did. When they got busted a few years ago. They turned over there database to the FCC. RCI & Texas Star's bust were the result of A-1 Telecom database. This is a ongoing practice with the FCC. Some get popped some don't. A lot of the time it is due to people that complain to the FCC about one company or the other. These type of investigation take a long time, if I remember correctly the A-1 bust was 2 years...

I have no idea why you should be concerned, many of the "lawyers" on this group have stated "no one cares about CB amplifiers"

Sarcastic mode off: The FCC has said exactly what it intended to do. When solving a large problem, use a big gun and you will see a series of actions directed to those with the most visibility. This is not intended as a troll, simply as information to those who are wise enough to take council from the information.

Your point about customer lists is accurate, and an area that should concern those who have made purchases from the targeted companies.

No I'm sorry Fred,
His statement means that he understands that it
is illegal. He know that the FCC is enforcing the
rules. He just doesn't understand someone's
priorities that isn't working for the FCC are that
we must rid the world of amps, export radios
over the end of hunger, war,disease strife,
etc, etc, etc.
Now can you imagine how much alcoholism would
be reduced if said person would go into bars and
show them the evils of alcohol. What about cigarettes?
If they sat out in front of tobacco stores and pointed
out how much Tax money is spent keeping them
alive after they get cancer. Yup, I sure can see the
cancer rate going down if they devoted the same
amount of energy to those really just causes.
Yes it is illegal to operate and sell a linear, yes you
could get fined, but that is the job of the FCC, that
is why we all pay taxes (Except Dave & Debby)
Hey, here's a good one.....
WHAT ABOUT GUN CONTROL?
Yeah, if they spent all these energies on the gun &
hunting newsgroups, man the death rate would drop!
Another question? How come when they see an
illegal item on e-bay or this group (notice that's the
only place they hangout at) they never e-mail the
person direct. I have had numerous e-mails with
the people they are accusing of selling illegal items,
and not once did these people e-mail them to tell
them what they are doing is wrong. Hell on one
of those amps, it is in the ham section, states not
for 11 meters, and only hams are bidding on it with
their call sign.
I have posted below his response to me, I have
removed any reference to him or the item, in
respect for this individual.

I am still unaware as to how my itemItem #xxxxxxxxxx is illegal. It is in
the Ham section for listing. It is perfectly legal for Hams to operate with
this device. I even mentioned it was not for CBers in my listing. There are
undoubtedly many Hams out there who could use this with their base unit. I
don't understand his case here. I appreciate the fact that he is trying
to help the overall situation on Ebay, but I don't understand how I'm
a violater.

You need a reading comprehension course Fred. The issue of obeying or not obeying FCC regs was not in any way part of my post. Having the priorities in ones life out of wack was. Got it now Freddie? Good.

You'd be really fucking wrong too. There are no FCC issued licenses
for the CB class radio services; so I figure they don't have the
authority to tell us what equipment we can use.
You've got your opinion I have mine.

<rant>
I do understand the legalities of the issue. That really wasn't the point of
my post. Perhaps I worded it poorly. My position was, and is, that
some Hams want to have their cake and eat it too. The holier than thou
attitude some Hams display is particularly troubling to me. A lot of Hams
complain about illegal frequency use and CBr's with converted 101's and 450'
s, but fail to mention that a lot of those radios were originally owned and
converted by Hams, then sold to the CB'r, without a second thought.
Why don't they spend their time cleaning up cess pools like 2 meter first? I
guess it's because they have to have a place where they can keep their
junior hams until they are deemed ready to graduate and become "Real" Hams.
Who knows? More importantly: Who cares? Certainly not the average CB'r.
I was into scanning for awhile and I sure heard a lot of hijinks going on on
a lot of the Ham Bands. Long Key ups, cursing, no id's, jamming and all the
rest. Not just on the zoo, as the local 10 meter repeater is referred to.
I've been into CB for several years and have had a lot of fun doing it.
I have spent a whole bunch of bucks buying, testing, using and selling, then
buying more equipment over the years. Why should any of us have to take this
drivel lying down? I consider my hobby a HOBBY.
It's insulting to me when certain Hams, who, by the way, generally know
no more about radio operation, theory, antenna construction or anything else
related to communications than I do, come to this group and speak to us like
we are all the proverbial red-headed step children of radio and must be
admonished like a child that got caught with it's hand in the cookie jar. I
am not a child and I will not tolerate being spoken to as one.
Voobner and N8blahblahblah come to this group and act like self
appointed hall monitors. I don't need some self important little fussbudget

telling me not to run in the halls, or to always carry the scissors with the points facing towards the ground. Jezus Keyrist, Voobner isn't even a Ham! Anyway, sorry for the rant. It builds up like a boil and needs to be lanced once in awhile (That's a nice visual, eh?).

With all due respect, your opinion does not hold water. If you plan to use your theory as a defense, you are in for an education on the FCC regulations.

While many problems exist in a not so perfect world, populated by not so perfect people, each of us makes our contribution to improve the world.

Mine happens to be Nurses Training and The Carvelle Star. Mr. Voobner's apparently is to make the CB band more enjoyable for legal users.

They make chocolate and vanilla so each may make his choice. You may find his crusade disdainful if you are in opposition, however he chooses his cause and you or I choose ours. He simply chooses to support the law as written and is hardly different than "Mothers against drunk driving", who I am sure the drunk drivers find a group of obnoxious busy bodies, "hey I can drink and drive and ain't killed nobody yet". One might note the similarities of the defense used.

No one person can solve the problems of the world, this does not obviate an individual choosing an issue to the exclusion of others. Nor does the exclusion make his point any less valid. Should they let me go for mugging you because there are murders at large? One does not relate to the other, in spite of the numerous times we see this type of false logic used in the forum. A crime that is a lesser crime in relation to another is still a crime.

Your statement obviated any activity towards enforcement of CB. You refereed to it as snitching, I was the one who characterized it as objection to any one trying to enforce regulations. I will leave it to other readers to judge my reading comprehension. While children do indeed starve, it is in no way provides an excuse for any illegal activity of any type.

I have more respect for someone who makes no excuses for their activity than someone that tries to minimize their peccadilloes because greater transgressions occur in the world.

You will please note that I replied to you in a civil and courteous manner. I would appreciate the same in response. I find the diminutive use of my first name, by someone who does not know me, gauche at best.

Hey Everybody,

I appreciate all of the discussion so far. Maybe I can rephrase part
of my post.

I have heard that the fiberglass antennas emit a greater level of RFI
than an aluminum counterpart.

Any thoughts?

73,
Cowboy

"The Packrati¿½",
There are a few share whare programs for use with Windows
that work very well. Take the speaker output of the radio to
the input of a sound card for receiving. The output of the
sound card to the mic-input of the radio for transmit. Two
audio cables from the 'Shack', basically. May have to do some
'feed back' removal but that's not that big a deal.

in
>> excruciating detail.

>You've shown a tendency toward lying, making your "reasons" for
trolling this
>group laughable at best and delusional at worst. Your trolling of this
group
>will do no more to lessen use of illegal equipment on CB than if you
sandbagged
>the group (as would anyone remotely official) for "evidence" to email
the FCC,
>Ebay, etc. Your effect here since the VERY BEGINNING has been
disrupting
>discussion with attention-seeking headlines and inflammatory (and often
>blatantly false) rhetoric and grandstanding such as you show with this
post.

Pot, kettle, black. (see below)

>You are a troll by the canonical definition - One who seeks to disrupt
>discussion by drawing attention and flames to oneself. I, on the other
hand,
>only seek to disrupt YOU because of your obvious trolling

You crow that you have a righteous cause, you're here to
avenge/protect/insure the freedom of the innocent, and you have vowed to
pursue your cause against the opposition. That makes you either a
delusional troll or a loony crusader - by your logic.

>and your initiation
>of a flamewar with me.

YOU came here and sought ME out, big fella. Remember?

>>Yet, you guys keep dreaming up your OWN reasons for MY opinions (e.g.
>> Aaron's crazy, a wannabe cop, attention-seeking, jealous of us, a
troll,

>> hates CBers, etc.)

>Your behavior in this group provides evidence GREATLY supporting you being
>insane, a wannabe cop, attention-seeking, jealous of those who have friends, or
>a hater of CB altogether. You may not think so, but your refusal to accept the
>statement of FACT that you are considered a TROLL WITHOUT ANY USEFUL
>CONTRIBUTION from NEARLY ALL admitted legal CBers AND amateur licensees who
>have subbed this group for MANY YEARS only makes the charges against you that
>much more plausible and your "reasons" for trolling the group that much more
>ridiculous.

You once stated that you approved of dissenters to the illegal focus of rec.radio.cb - but only if they are not disruptive, and make their opinions known respectfully, occasionally, and quietly. (Which I think is outrageous, pure BS) You named Professor and SPARKY as examples of well-behaved legal CBers. But when Sparky didn't conform to your point of view, you decided he needed some slapping around to keep him in line.

Your "contribution" to this NG seems to be that of thug and enforcer.

>Simply put, it's *obvious* you have a grudge against CB,

Your saying so doesn't make it true.

>no matter if due to
>illegal usage or you having been angered by a CBer a few months ago, and your
>purpose here is CLEARLY not friendly, CLEARLY not useful, CLEARLY not generally
>acceptable to the group, and you CLEARLY cannot support your "reasons" for
>trolling.

Clear only to you when you have fantasies of me being angered by a CBer.

>>You're in such serious denial that it's laughable.

>You are a pot calling virtually the ENTIRE GROUP's kettle black. Get a grip.

The "group" inexplicably uses the same arguments for being illegal as they accuse me of using *against* them. Even YOU can see that.

>> My advice to you is to face reality. Stop dreaming.

>OUR advice is the same to YOU, but the words of many respected and admitted
>legal CBers and licensed amateur regulars seem wasted on you. If you

consider
>yourself doing ANY good on this group for CB or amateur radio, I remind
you
>that your support is VERY CLOSE TO NIL.

There are plenty of legal CBers here who do not support your point of
view.

>Other than N8WWM, I have seen NOBODY
>openly support your trolling.

That's because I'm not trolling. The posts of Fred, Sparky, QRM2000,
Kari and others support the same ideas I do. And more pro-legal CB
people keep popping up every day. You're saying I have no support
doesn't make it so.

>The very fact a known usenet abuser and troll
>is/was your only real support should tell you something.

See above.

>> Flame or troll me if
>> you'd like, but my opinions are extremely appropriate to this NG. And
> >I'm here to stay.

>You have the option to troll this group if you wish, and you will
continue to
>be disliked and spoken against, as well as flamed by those you claim to
speak
>for and those you have insulted.

That doesn't bother me. Read some of the hateful, profane and
threatening posts made to me by some "people" in this NG. Shame on you
for defending them.

>You have somewhat of a talent for portraying
>yourself as some type of persecuted hero of the legal CBer.

That's in YOUR mind.

>As a legal CBer I
>say, if you're a hero, we don't need enemies. I'm here to stay also,
first to
>make sure you aren't considered anything more than what your behavior
and
effect on this group would suggest you are - A TROLL, and second, to
continue
>to work you over until you apologize openly to my satisfaction for
implying I
>was involved in any illegal activity whatsoever.

You're not "working me over" by any stretch of the imagination. You are
an admitted flame-Troller from cotse.com come here in hopes of
some "righteous" fun - who doesn't have the stamina to keep up his

little flame war. As such, I will ignore your occasional disruptive antics.

>Keep in mind YOU initiated the drawn-out flamewar that you and I have been
>engaged in for weeks by implying

Blaming other people for making YOU do things? Only YOU are to blame for YOUR decisions and actions.

>that I was some big-time amp/drug/xyz dealer
>and was going to jail and paying a fine - FOR NO REASON AT ALL. I quote your
>ending statement, "roll the dice, buddy".

You're reading things into my statements about "dice" now? Next, you'll be correcting my grammar.

>I'm happy to have forced you to give
>up MUCH of what you routinely did to harass others and disrupt discussion, but
>you haven't become any less of a troll as a result. You've only changed tactics.
>BTW, Giving this "I'm-not-a-troll" post the subject, "The Voobner Effect", does
>little to support you.

Your taking credit for having some effect on me does not make it reality. In fact, you have NO influence on me. None. And you will continue to have none.

(BTW: good to see you shed your argumentative, clownish, troll clothing and enter an actual discussion).

Claiming you have an effect on me does not make it so. Plus, you're down
to two posts a day. That hardly qualifies as a "severe" anything.

Clearly, the old saying -- "all that is necessary for evil to flourish
is that good men remain silent" -- never had more relevance than it does
today in rec.radio.cb.

1936. Hey Boobner

Newsgroup: rec.radio.cb
Date: 2001-01-10 22:32:41 UTC
From: The Phoneman <phoneman01@hotmail.com>
Message-ID: <dq576.4965$qb2.266939@news1.epix.net>
Source record: 67987

Ya know Boobner....It's your choice if you want to spend
your days fulfilling your little agenda of ridding the world of
those cb'ers you don't approve of, none of my business or
anybody elses what you do. Your nonsensical postings are
at times almost humorous. Even the fact you have manufactured
the Boobner Group of non-existent personnel who spend 24/7
tracking the activities of all the big bad cb pirates is hilarious.
BUT.....what REALLY pisses me off is when you have to make
postings to the NG with braggings of how many amps/radios
you had removed from ebay. Just remember you little twerp,
what goes around comes around.
I have decided to launch a little endeavor of my own. Since you
spend so much of your time doing research on all the activities
of those cb'ers you don't approve of, I am going to give you a new
research assignment.

Here is todays lesson.

1. What does the software product Netspy do?
2. What could a tech at AOL do with this product?
3. After using the product to acertain certain info, what could
be posted in the NG for EVERYONE to see?
4. Who has the connections to get this job done?

If you come up with the correct answers to ALL of these
questions, you may want to consider changing your posting
tactics just a smidge.

Love, The Phoneman

1943. Re: Officer Jorg needs support, Cincinatti, Ohio Police dept.

Newsgroup: rec.radio.cb
Date: 2001-01-10 23:03:10 UTC
From: The Packrat&#65533; <spam@n7uic.net>
Message-ID: <OS576.250366$U46.7947217@news1.sttls1.wa.home.com>
Source record: 67996

The Story:
Jorg and Patrick Caton were among five officers who subdued Owensby, 29, at a Roselawn convenience store Election Night. Owensby passed out after the scuffle and died later at University Hospital from what the coroner determined to be a choke hold or extreme pressure on his chest or back. A Hamilton County grand jury indicted Jorg on charges of manslaughter and assault and Caton for assault.

Robert ''Blaine'' Jorg, 28, was charged with involuntary manslaughter and assault in the death Nov. 7 of Roger Owensby Jr., a College Hill man officers were trying to arrest at a Roselawn gas station. Officer Patrick Caton, 34, was indicted on a charge of assault.

Owensby died after a struggle with officers who tried to arrest him inside the gas station where he had just purchased an energy drink. According to a security camera inside the store, Owensby fully cooperated with police until he was about to be handcuffed. Then he bolted away and officers appeared to dive after him before they moved out of range of the camera.

Also:
Unknown suspect. Oct. 11, 1998. Clifton. Officer Robert "Blane" Jorg said he fired five shots at an intruder in his home. The officer was exonerated.

Very touching, Mindy, but there are two sides to every story. I'd like to hear the other side as well. I have a friend that lives up top of Colerain hill (or is it Cool rain?) near Roundtop Road. Think I'll give her a call and see what the other side is saying.

Hi

Does anyone have an owners manual / schematic for the Palomar Skipper 300
linear? I would be more than happy to pay for a copy.

Thanks in advance,
Chris

While a user may state his case, I think you may be treading on extremely dangerous grounds with this post. It's not nice to upset Mother AOL... Your statement makes an implied assertion that either through your employment with AOL, or a connection to someone employed at AOL that you are capable of posting information not generally available from public records. I think that AOL will take a dim view of your assertions, and may even suggest that you have done them damage. I would suggest there are other ways to state your case with much less likelihood of legal repercussions.

I remember the A-1 Telecom Bust,
I also remember it got hot enough for a dealer in
Southern CA, close shop and move elsewhere.
Remember folks not only does the bust hurt them in the pocketbook in
fines
but also invites a probe by the Internal Revenue Service and other
federal agencies for unclaimed income.
As far as who to bust and not bust I don't think that is the case
time is on the fed's side so let it be said here seller and buyer
beware unless you got some spare beer money laying around to
send to chicago.
Donnie

1952. THE VOOBNER REPLY

Newsgroup: rec.radio.cb
Date: 2001-01-10 23:33:35 UTC
From: BRAND SPANKIN' NEW <brandnew@hotmail.com>
Message-ID: <93irgfotr1@nnrp1.deja.com>
Source record: 68056

LET ME JUST SAY THIS TO VOOBNER...
FIRST OF ALL THERE ARE SO MANY AND I MEAN SO MANY GUYS AND GALS THAT SELL AMPLIFIERS FOR CB AND HAM USE. VOOBNER ALWAYS MENTIONS DAVEMADE BECAUSE IT IS BY FAR THE MOST FAMOUS PRODUCT. TO A LESSER DEGREE THE X-FORCE IS ALSO ALWAYS MENTIONED BY HIM. X-FORCE HAS SOLD ALOT ESPECIALLY BECAUSE OF THIS WHOLE INTERNET THING. AS I HAVE LEARNED FROM READING POSTS ON THIS GROUP FOR A LONG TIME AND FROM MY PERSONAL FRIENDSHIP WITH ICECOLD. I HAVE LEARNED THAT THERE ARE SO MANY AMP BUILDERS OR AMP COPIERS OUT THERE THAT YOU WOULD NEVER GET THEM ALL!
MOST OF THEM DONT EVEN USE THE INTERNET OR EVEN EVER LOG ON TO A COMPUTER. YES X-FORCE IS MAINLY INTERNET BUT, AS WAS SAID EARLIER THE GUY THAT SELLS X-FORCE ON THE INTERNET IS FULLY AWARE OF THE FINES AND HAS PAID A GOOD MANY BEFORE. THIS IS JUST PART OF THE BUSINESS. SHIT HE ADVERTISES ON THE NET MAN! THE OTHER AMP BUILDERS ARE ALL OVER THE COUNTRY AND THEY SELL MANY AMPS AS WELL BUT THE ARE VIRTUALLY ANONYMOUSE TO ALL OR MOST. I THINK ICECOLD KNOWS SO MANY OF THEM THOUGH, BUT HE IS NOT TELLING SO DONT EVEN ASK HIM. DAVEMADE FOR SOME REASON DECIDED TO GET ON THE INTERNET BECAUSE THIS PRODUCT ALSO WAS A PRODUCT FOR THE SPECIAL CB GUYS, MOSTLY KEYDOWN GUYS I BELIEVE. THIS WAS AND STILL IS A VERY TIGHT KNIT GROUP. EVENTHOUGH THERE ARE A GOOD MANY NEW KIDS ON THE BLOCK! SOME GUYS JUST WANTED THE BEST THEIR MONEY COULD BUY AND THAT IS WHY THEY HAVE DEALT WITH THE 2 THAT YOU ALWAYS MENTION. THERE ARE PROBABLY FROM WHAT I HAVE LEARNED, AMP BUILDERS IN ALMOST EVERY STATE OF THE UNION. SOME OF COURSE ARE MORE SUCCESSFUL THAN OTHERS AND SOME ARE JUST VER SUCCESSFUL IN THEIR OWN AREA.
I SINCERLY HOPE THAT THIS HAS HELPED VOOBNER SINCE HE HAS ASKED SO MANY QUESTION OF THIS NEWSGROUP.

Your comparison of Boobs crusade of snitching on CBers to the cause of MAD (mothers against drunk driving) is odious and offensive in the extreme. I suggest you ponder on this a while, and if you still feel the same, then you are one sorry mother fucker and we have no common ground to have any kind of meaningful discussion.

Phoneman,

I can see where the scenario you have posted would certainly be a disaster to someone who had something to hide, i.e. someone running an illegal business who needs to keep their ID hidden. However your threat of exposure is no threat whatsoever to me. My name and address are a matter of public record and shall remain that way, despite your veiled hostility.

That said, misuse of AOL resources is a very serious crime.

In the best interests of the AOL user community, your recently posted intent (reprinted below) to violate AOL privacy policies and Federal Internet Stalking Laws has been forwarded to the appropriate AOL and hotmail authorities.

Sincerely,
-Aaron H. Voobner-

Ya know Boobner....It's your choice if you want to spend
your days fulfilling your little agenda of ridding the world of
those cb'ers you don't approve of, none of my business or
anybody elses what you do. Your nonsensical postings are
at times almost humorous. Even the fact you have manufactured
the Boobner Group of non-existent personnel who spend 24/7
tracking the activities of all the big bad cb pirates is hilarious.
BUT.....what REALLY pisses me off is when you have to make
postings to the NG with braggings of how many amps/radios
you had removed from ebay. Just remember you little twerp,
what goes around comes around.
I have decided to launch a little endeavor of my own. Since you
spend so much of your time doing research on all the activities
of those cb'ers you don't approve of, I am going to give you a new
research assignment.

Here is todays lesson.

1. What does the software product Netspy do?
2. What could a tech at AOL do with this product?
3. After using the product to acertain certain info, what could
be posted in the NG for EVERYONE to see?
4. Who has the connections to get this job done?

If you come up with the correct answers to ALL of these
questions, you may want to consider changing your posting
tactics just a smidge.

Love, The Phoneman

yep, no need to tell fadious t boobner such things , he won't listen
anyways, but it does appear brand, that the xfarce brand has been dealt
a setback, albeit, momentary, until things cool off, ten four,.....cd
is out.....

Well, Boobner, you finally forgot which name you were posting under there troll boy,.I knew it would happen AGAIN sooner or later, I was just waiting. Show us one, just ONE place where a voobner is in a public record. I exposed you long ago for a notorious liar and you dodged it, but you're popped like corn now, pal! Liar, fraud, troll, and multi-aliases. Now get lost!

"Odious and offensive"? To whom? Only those that choose to disregard the laws of the land. I take back not a whit of what I have written. I never let others set my standards, they normally set them too low.

My complements, you did manage almost two sentences before showing us your ability to become profane. Profanity is the curse of those not blessed with the ability of language.

A few hours a day reading will improve your vocabulary to the point you may post an entire message without resorting to vulgarities and profane speech.

I was on the phone with A-1 when all this shit came down. My salesperson was like....."Let me get back to you.....there are guys coming in here with guns drawn. Sam as I heard it didn't exactly turn but DID have all his records confiscated by the Feds. Right or wrong, good or bad, left or right, it doesn't matter.......None of the people who want to run power on the radio are going to give a rats ass what the whiney little piss ants have to say about the amps being illegal. I know when John stopped selling boxes and when Charlie got to the point that if you didn't have an existing account with him, he wouldn't even talk to you. Sam got lucky and was just fined and got no jail time. Some of the big players have merged with others or moved on to other things but the void gets filled by the next rung on the ladder. The system still works!

Why do you guys even reply to this dildo? He is doing this for his own personal enjoyment, he could give a rats ass whether or not any of you run an amplifier. He has turned this into a spitting contest to see if he can make you guys spit fire. Ignore anyone that downs your mentality or hobby without doing it within arms reach.

Mindy,

Not sure what you mean by "decent" people. It's my observation that the majority of those responding to your post from rec.radio.cb are more interested in pursuing how Officer Jorg might be in the wrong.

You take it correctly. This item sold for 99.95 new. I call it the auction effect. Some people don't care how they spend. I have a budget for my radio equipment/toys so when it gets out of hand I stop. I have gotten caught up in the online auction thing when it first started with onsale.com.
And yes I'm a sore loser.

Thank you for the info, Brand. I applaud you for not using profanity or threats. As you know, I have no respect for keydowners or amp-makers. Their selfish practice of playing "king of the hill" at the expense of others has made CB into a cesspool. The idea that a lot of them exist does not change my opinions.

-Aaron V.-

This is so wierd...
I was just talking to Tricycle Willy, operator of a local Communications
Shop about this very issue. He's not on-line (I'm trying!) so I tell him
some of the things that go on here and elsewhere on the net. I had mentioned
the "Local Enforcement" issue to him and he told me of a number of local PD
and CHP that come to his shop and have him, er, fix them up, wink wink. He
doesn't sell amps out of his shop to the general public but he gets them for
his Officer "friends". I told him to be careful. Dealing with Johnny Law can
be as painful as dealing with La Cosa Nostra! Once your in bed with them,
you don't get out until they say so!

Yes !!

Beware of this Troll, or I should say under educated
Two-way wanabe. If this homless jerk who probably
only accessing the internet from department stores
could only realize that his complete, absolute, and
total non-sense comments hurt only itself, it would
save itself from alot of self abuse. Seems this jerk
hangs around too many bathrooms after dark, so I
would beware for sure, unless one shares in common
of a two-way wanabe. Go back to bullying your friends
and maybe they will become Dentists and remove the
rotton teeth you have.

Persons who Hide are only Cowards, and will remain
cowards all their limited life spam.

Dan

Some people may just have larger budgets! I wish I could of got my first one in 1990 for $99.00 I had to pay $140.00 for the unit. Ended up trading it away for some other equipment & I've been sorry ever since. At that time I didn't realize that they quit making them. I've been on E-bay since Late1995 & I have seen only two VC 200 for auction. The other one went for $120.00 & it wasn't new in the box. Look what the VC 300 sells for today & it is not near as much fun. Hell it's only money, might as well have fun with what it can buy...

Buy the way peewee at least all No Name amps are made in the No Name shop. Tuned and tested buy Stickman (MR. No Name) unlike Dave Made DC line of amps that are made 1,000 miles away from Daves shop in N.J. They are all made at Joe's cb shop in N.C. and I doubt Dave has ever set foot in it. That's why they should chang the name to Joe Made

: You'd be really fucking wrong too. There are no FCC issued licenses
: for the CB class radio services; so I figure they don't have the
: authority to tell us what equipment we can use.
: You've got your opinion I have mine.

Well, you are wrong. The FCC has authority over ALL radio transmissions in the US and its territories - as provided by congress. That includes licensed and unlicensed stations alike.

The CB band used to require a license - I have had two different numbers over the years. But with the big CB craze of the 70s (how many of the posters here were even out of diapers then) it became too much of a bother to attempt to require licensing. I suspect that their computers were not capable of storing the massive amount of data that such licensing would entail. So licenses were dropped.

: antennas.
: 'Doc

Not necessarily true. If there is a non-linear element in the
antenna (such as a corroded connection between sections) - then
the antenna could certainly generate harmonics (as well contribute
to the generation of IMD).

Cross-posted to: uk.rec.radio.cb,uk.radio.amateur,rec.radio.cb

In rec.radio.cb Gary <heppu@boxi.net> wrote:

:> How about taking your own advice. "You live on the Ham bands, and
:> leave CB (including the bootleggers) to others." If they trespass
:> on the Ham bands, then take action.

: Bill, why do you think many hams are pissed off at the illegal CBers in
: Europe and elsewhere? That's right, because thety DO come to the ham bands,
: and do not give a hoot about any regulations or band plans. If they'd stayed
: on eleven, I wouldn't have bothered to write about them in the newsgroups.
: Listen to the CW portion of ten meters any day and you'll hear some of them,
: taht's for sure. Too bad - legal CB is a nice hobby for anyone.
: 73, Gary

Unfortunately, the CB and Ham bands are not identical throughout the
world. They may be, in a decade or two, but we will have to wait. Until
then, we will just have to accept the interference from other countries.

I am all in favor of action being taken by the authorities when the CBer
ventures onto the Ham bands, and would fully support the Ham aiding in
this enforcement. The same is true for freebanding that interferes with
licensed communication (is there any now? The government seems to have
abandoned the segment between 10 and 11 meters).

But Hams coming to this group and bitching and moaning about illegal
operation on 11 meters is unnecessary and counter productive at best.
At worst, all it does is create more hate and discontent.

I've been gone for a while, and noticed this subject.., " WTB: DaveMade or X Force 6 or 8 pill "... Not sure who started the Thread, but just as well, wanted to let everyone know: The X Force Amplifier I have is still for sale to the best offer I come across.The Amplifier I have is a Model X60012, with Variable Power output, a Copper Board with 16 pill cutouts (easily Expandable for Transistor Upgrade).
Several Features were Added at the Time of Manufacture: Biasing Circuit (Created, and Perfected by "#12"), Single SideBand Delay (with On/Off Switch), Recieve Amplifier, UpGraded Power Leads (It now has 1- 10ga. for the Driver section.., and 3- 8 ga. for the Final Section). I Also have the 18 Foot Wired Remote Control. EVERY available factory option has been added..This Unit was Custom-Made for Me in June of this past year. The Unit is in Excellent Working Condition. It has NEVER been Abused, Over Driven, or Over Volted. The Original Transistors are still inside. Please Email, with any Questions you may have. I will be happy to answer. No "Reasonable" offer will be refused....
Thanks for reading.......
Maniac.

2036. The Voobner Effect = Trolling

Newsgroup: rec.radio.cb
Date: 2001-01-11 10:26:59 UTC
From: Sea Captain Deadbeard <goldberg-no-spam@cotse.com>
Message-ID: <979208819.3a5d8a735bb8a@webmail.cotse.com>
Source record: 68142

"Mr. Aaron H. Voobner" <aaronvoobner@my-deja.com> wrote in message news:93ih6v$et7$1@nnrp1.deja.com...

> You once stated that you approved of dissenters to the illegal focus of
> rec.radio.cb - but only if they are not disruptive, and make their
> opinions known respectfully. (Which I think
> is outrageous, pure BS)

That is exactly what makes you a troll. You admit that you are deliberately disruptive and disrespectful, hence YOU ARE A TROLL by canonical definition. I will be referring to this stated intent to disrupt and disrespect the group throughout this post.

> You named Professor and SPARKY as examples of
> well-behaved legal CBers. But when Sparky didn't conform to your point
> of view, you decided he needed some slapping around to keep him in line.

NEVER have I mentioned Professor in ANY of my posts. Again you have shown your tendency to LIE. How many does this make now?

Sparky STILL has not proven me wrong in my example of NON-TROLLING pro-legal CBers, and at no time did I "slap him around" or "keep him in line", as I so often do with you. Sparky showed needless disrespect in a thread by dismissing without cause what I had said, and I showed it back. Your deliberate mischaracterization is typical of a troll's tactics.

> Your "contribution" to this NG seems to be that of thug and enforcer.

How so? Because I continue working you over in a flamewar you started? Because I oppose your deliberate disruption of a group I like to read? Because I call you on every lie you attempt to put forth? Because I don't like trolls? What have I enforced other than the constitutional rights of others which you had ignored? To whom (other than YOU) have I been a "thug"?

> >Simply put, it's *obvious* you have a grudge against CB,

> Your saying so doesn't make it true.

Right. Your stated commitment to DISRUPTING A CB GROUP makes it true.

> The "group" inexplicably uses the same arguments for being illegal as
> they accuse me of using *against* them. Even YOU can see that.

The group is not illegal. The "group" also does not seek to disrupt itself, YOU DO. That's why I continue to correctly call you a lying troll and you prove it yourself time and time again.

> There are plenty of legal CBers here who do not support your point of
> view.

Name them. I don't think ANYBODY supports your stated intent to disrupt and disrespect the group, other than perhaps N8WWM.

> >Other than N8WWM, I have seen NOBODY
> >openly support your trolling.
>
> That's because I'm not trolling.

I'm sorry, but you ARE a troll by deliberately disrupting this group, and ONLY N8WWM joins you in doing so. You HAVE stated your respect for him because he also claims to be against "illegal CBers" and shows it by flood-posting, disruption and disrespect, even though fellow hams have unanimously spoken against him and he has been repeatedly kicked from ISPs for abusing usenet.

> The posts of Fred, Sparky, QRM2000,
> Kari and others support the same ideas I do.

I don't think any of them have the intent to disrupt this group as you do, or to be disrespecful as you are. I fully support legal CB, and I think being rabid anti-illegal trolls as you and N8WWM are is a waste of time on usenet discussion forums. I only hope none of the folks you mentioned intend to act in the way that you have for the past few months.

> And more pro-legal CB
> people keep popping up every day. You're saying I have no support
> doesn't make it so.

Again, I have no complaint with pro-legal CB folks because I AM ONE OF THEM. I just don't like trolls such as YOU, because your selfish desire to disrupt the group for whatever "reason" is only intended to draw flames and attention to yourself. Or, as I said, perhaps you have simply been angered by a CBer and you want your revenge from behind a keyboard.

> >The very fact a known usenet abuser and troll
> >is/was your only real support should tell you something.

> See above.

You've not explained why only YOU and N8WWM find it worthwhile to disrupt this group. It is *obvious* that you both despise CB, and merely use the issue of "illegals" as your disguises in hopes that legitimate posters will join you in trashing the group. Others who discuss the wrongful nature of illegal CB show respect for the group, but you and Gay Doug don't.

> >You have the option to troll this group if you wish, and you will
> continue to
> >be disliked and spoken against, as well as flamed by those you claim to
> speak
> >for and those you have insulted.
>
> That doesn't bother me.

That never bothers trolls like you and N8WWM...

You enjoy disrupting the group and WANT to be flamed and spoken against, even when denounced by those you associate yourself with (i.e. hams & pro-legal CBers). You ALWAYS assume the worst of CB and are quick to spout it as it brings the flames and "persecution" that you crave.

> Read some of the hateful, profane and
> threatening posts made to me by some "people" in this NG. Shame on you
> for defending them.

Strangely enough, you just said that none of this actually bothers you (previous)... You are only proving that you are a troll in disguise. You get the flames you troll for and use them to bolster your image of the "persecuted hero of the legal CBer" exactly as I have said MANY times before. You won't fool many, and I'll be here to make sure of it.

> >You have somewhat of a talent for portraying
> >yourself as some type of persecuted hero of the legal CBer.
>
> That's in YOUR mind.

And YOUR behavior. Read your previous two statements in which you contradict yourself openly, showing that you are a troll using "persecution" to validate your trolling behavior. Are any of your "supporters" being persecuted as much as YOU are? I don't think so. That's because they're not TROLLS.

> You're not "working me over" by any stretch of the imagination.

Check the archives. You don't even need imagination to do that. You've been unable to respond with valid argument since the very beginning. You quickly drop the thread when you've been proven wrong, take what I have proven, and adjust your disguise to fit. When I explained to you that NOBODY with half a clue bought your "vandalized hit-counter" lie, it vanished without a trace. When I pointed out that your calling me a "paid assassin" was a big laugh to the net-savvy, that also disappeared from your repertoire of "persecutions". You're a newbie that didn't realize that his lies were so far-fetched, but you wised up quick and said nothing, hoping they'd be forgotten.

> You are
> an admitted flame-Troller from cotse.com

I admitted no such thing. Your newbie attempt to judge my intent based on my usenet host is as stupid as if I were to suggest you were a newbie because you were on AOL. I also remind you that I target YOU ONLY (making me NOT a troll), because you're a TROLL who initiated a flamewar.

> >Keep in mind YOU initiated the drawn-out flamewar that you and I have
> been
> >engaged in for weeks by implying that I was involved in illegal activity.
>
> Only YOU are to blame for
> YOUR decisions and actions.

Absolutely. You made unfounded accusations and I am fully responsible for working you over ever since. I find justification for working you over because you are a common troll fouling a group I enjoy reading and learning from.

> >I'm happy to have forced you to give
> >up MUCH of what you routinely did to harass others and disrupt
> discussion, but
> >you haven't become any less of a troll as a result. You've only changed
> tactics.
> >BTW, Giving this "I'm-not-a-troll" post the subject, "The Voobner
> Effect", does
> >little to support you.
>
> Your taking credit for having some effect on me does not make it
> reality.

Hmm.. I forced you in debate to recognize that ALL discussion is protected under the first amendment, and after quickly dropping the thread you included this concept in your .sig. You then gave up your tactic of accusing anyone you disliked of being "illegal" after dropping *that* thread, because I also made you accept that you had NO right to accuse others of breaking the law without proof. You then started bringing up my name to beat others over the head with, as if they had "cried to me" to come and work you over. Not even close. I've been reading this group for YEARS and I gave you PLENTY of time to have your troll kicks and go away, but you didn't. I called you on a lie and ragged on you for it, and you responded with some really out-of-this-world accusations and implications. Thus the flamewar.

You're a troll, much like other trolls we've seen over the years in this group, whose SOLE purpose is to disrupt and annoy the group. Pro-legal CBers like myself DO NOT appreciate trolls even when they share the pro-legal CB stance. I know that some enjoy seeing "illegals" get ranked on constantly by trolls, but it serves NO purpose and rights NO wrongs, it only serves to drive lots of good guys away who just want to talk about radio. If you cannot express your opinions without being disruptive and disrespectful to an entire group, you are by definition A TROLL. Since you are proud of this behavior, you can be proud of being a troll.

You are correct about A1, they were involved in many things they should not have been. EEI however has a very interesting filing method via a WAN. We use it for data integrity and security for credit card processing, and we only maintain customer records for statistics and catalog mail-outs. We do not log credit card numbers, and we only database customer orders to account for inventory control. We do not keep any records of what exactly our customers purchased, as we have no need for the information. We really don't think any government agency would care what we sold to who, but nevertheless, we do not waste the hard drive space with the information

So, this would explain the impossibility of getting a refund for defective merchandise. You have no record of what you sold to whom.

-----Bill Nelson

Bill is correct. The FCC's authority even extends to NON-TRANSMITTING equipment and the interference it must accept. (Read the back of your TV, intercom, and maybe even your coffee pot!)

You'd be surprised how many consumer products, medical devices, etc., have FCC ID numbers on the product labels.

Okay, so I lied about the coffee pot--but don't let us catch you tweaking your garage door opening to get an extra block's range! Ditto for the keyless remote for your automobile.....don't be swapping the original battery for something "with a little more kick". :)

Well, I would usually agree with you there, but there are times when the vernacular chosen was utilized to construe or represent how the writer felt, and there are times when non-anglo saxon vulgarities simply won't do. Such is the case of our asswipe resident queer troll, note the singulatrity reference, intentional, 'cause there really is only one. But he's is a way better liar than he is troll.

Tnom... it's perfectly legal to sell USED 23 channel gear in the US...
The regs were changed when 40 channels were approved to stop the sale and
manufacture of NEW 23 channel rigs for the US market. There's nothing in
the regs that would prevent the sale of a used 23 channel CB.

Odious and offensive to the families and friends of the 30,000 people a year
who are killed in alcohol related automobile accidents. You compare this to
folks who use souped up cb radios? Your standards are too "LOW"????

And yes there is a place for profanity to convey a strong message, and like I
said before, you are one sorry mother fucker.

Then if this is the case. Why couldn't CB shops sell "used" 23 channel radios? The rules state that the type acceptance changed in 1978 & " ALL" 23 channel radios did not meet the new standards! 23 channel radios according to the FCC office in San Francisco stated that " They my only be sold for parts in non working condition. " Although that this Rule is a very low priority to enforce according to that office.
Never fear the FCC, call them! It has always been a very enlighten experience for me. You can find out how many of the " Rules " not Laws are really a low priority to them...

It always pays off when you can do these upgrades yourself. These radios usually get no more than $150. on the used market. I personally own a Uniden Grant XL. It has been Peaked, Tuned, and Aligned. My Radio also has Extra Channels (26.8150~28.045). I am kind of confused: That wouldn't happen to be an "Expo" Channel kit you have?? I know of no other way you can get 40 up and 40 down, without going with the "kit". Mine is Off of the 8719 pll chip. The "kits" tend to drift. I also have the Galaxy FC390 6 Digit Frquency Counter, Hardwired to the board, and mounted to the top of the Radio, Variable Power added, along with the Galaxy Echo/Voice Changer/Robot Board, A 10- Second Voice Recorder, and a 5 - Tone RogerBeep.Used with an Astatic 575 Mic on the Base, and an Astatic 636 mic in the Mobile... I have about $325 in mine, and I know I will NEVER get close to that, if I went to sell it. Everyone wants the Galaxies, and Rangers Nowadays...
Don't get me wrong, I like the Radio.. But It just doesn't do any power. The MOST you can get out of those is about 7 watts carrier, and 20 watts peak. That, along with the Soundtracker Circuit, Are NOT good selling points. The MOST you will get is $150....Bottom Line.
Maniac.

Well, first of all Chuck (formerly Chucks 2 Way) you have no room to even add anything to this conversation. You have in your day stirred up more crap than most on this newsgroup, and anyone that would listen to your views may need help as well. I have been watching your actions here in this newsgroup for a few years now and remember a time when you were as bad as ole Voobner, so please mind your own business.
A lot of you are right, the newsgroup was not the place for the CEO here at EEI to lose his cool. It tends to happen to the best of us at the worst times.
This matter should have been left out of the newsgroup, and should have been dealt with over the phone if not possible to handle it in person.
I believe that there was a communication problem, and the matter is being dealt with as best it can be.
One tends to take offense when their livelihood is threatened in anyway, so therefore we retaliate with anger.
I am not the CEO, however he does employ me, and in the event that a response is warranted here on the newsgroup, it will be my responsibility to do so from now on.
We will not conduct any further dealings with this matter over the newsgroup. Who is actually to say who is right or wrong? Unless you know the actual parties involved and the circumstances pertaining to this matter, how can you form an opinion on hear-say to who is the guilty party?
The customer brought it to the newsgroup which should have never been done. All of you out there know that this was a very stupid idea, especially in "rec.radio.cb".
We at EEI know that we can not please each and every individual that does business with us know matter how hard we try. We will do our very best to work things out to where the customer has some sort of resolution.
We have many loyal customers out there that know this is true and come back time and time again.
Lets just say that if you have 1,000 customers, and 1 of them left unhappy, in the overall picture, I believe that is a pretty good reputation.
I know that the troublemakers come out of the woodwork to hop aboard a subject such as this, but let me just say this. If you make a reply to this message that is nothing but hate, sarcasm and pure immaturity, I will not respond at all, but if you do want to conduct yourself as an adult, in a civil manner, I will gladly answer all of your questions.

Then I guess that "Maul Dropper" (on the bowl, but how would you know since you guys in Southern Maryland don't talk with the boyz) is using your trade "No Name slogan" and by the way, if a man only builds 1 or 2 amps a week he can look at each one.

What an ASSHOLE!
That saying is sooo old it has absolutely nothing to do with noname amps.
I personally have been saying that since about 1969 on the cb radio and if I am not mistaken it was used in the 1940's to describe jazz and swing music!!
Were you even born in the 60's???
Of course not because if you were you would have already known that!
Consider that a free lesson. Next time you are gonna pay for it!!!!!

Well there, support. DO you have a name? A nic we can use? I think the forum is a good place for a good guy/bad guy alert. You are correct in one aspect only, and that is who to say who is right or wrong. By this person taking their grievances to this forum, and it appears only after many attempts at dialogue with your company failed, they were able to elicit a response, which is more than what it appeared you were giving them pre-forum. BUT, by both of you posting here, it appears that most have formed an opinion over who was right or wrong, and obviously, so did your company.
Granted, 1000 customers with one complaint is excellent service. But you know whats even more valuable? That one customer that was unhappy, for WHATEver reason, and you in turn go out of your way to make it right. That speaks volumes about ones integrity and in turn, reflects on the company. I would rather have 100 satisfied customers than 499 satisfied customers with 1 unsatisfied. Too many companies are too quick to discard the buyer after they have their cash. Sadly, that is part of what screwed this country..greed, motivated by commission, with no after thought of customer service, and in some instances, quality. I have dealt with a company or two that has questionable references, with a glitch here or there, but it was made right. And guess what? When people ask me, I will continue to refer them to the company that did right by me. I have made these type companies plenty of orders through referrals. Even a product of MARGINAL quality can take on an esssence of gold, if it is backed, serviced, and warranted by the company supplying it. I hope you all have this matter settled and good luck to you both in you ventures.

Well, he has the right to speak his peace where ever he chooses, but the point I was trying to make was that who is to say who is right or wrong? What makes his word better than ours or ours better than his?
Sure it is a good way to get a response if that is all you want, but I think that all parties that are not involved in this matter should try and treat both parties involved equally instead of jumping on the bandwagon and making matters worse.

Thank you for your input and have a nice day.

Source record: 68039

After reading these posts, i looked at express' website. Man, what a crock of crap is printed there! I can't believe anyone other than a niaeve novice would fall for the stuff. Here's some highlites (real dealers & techs get a load of this!):
Under a section called" What's an export radio" is some of the following;
1) ..."The receive quality of an export radio is on average !) Timesthe incomming signal process than a CB unit is" (!!??!?!!)
As we all know, many if not most "export" rigs due to their wide freq design, pick up a lot more splash, adjacent channel interference than say a Uniden 76/grant, or a Cobra 29.
2) ....."export radios are "higher quality" & have "better warranties" than regular CB's.." (!!?!??!)
Try to even Find a printed warranty or phone number or address in a Connex or Superstar or Mirage etc. box......You can't! The ONLY warranty is thru the place that sold you the thing, if they even have one! How is that "better" than the 2 year "real"warranty from Cobra, Uniden & others. My local dealer will exchange a "real" CB , & I can call the company & parts dept without going thru a dealer if I want. I spoken to many CB tech & they tend to agree in general that Export radios are MORE prone to problems, freq drift, & don't hold up as well mobile than a typical Uniden/Cobra.& They don't have to meet any FCC standards, & are generally built to a LOWER quality standard, although they do tend to have more "bells & whistles".
3) They go on to babble about how EVERYONE should buy an export CB, that they will sell you units with 24-32Mhz coverage & there's "no reason" really not to get one
THis really gets me. I don't have anything against an export radio with channels, but at least tell your customers that They are illegal in most places, & they are breaking fcc rules by selling them to people with a USA address. A pharmacy can't put all the prescription drugs out in the main aisles & sell them to anyone, with a little note stating that "in some countries you need a doctor's prescription"..that would be against FDA regs, just as marketing & selling a non-FCC Type approved radio w/ CB channels is. Even Yaesu, Icom & Kenwood can't sell their radios with 11 meters xmit "right out of the box" to USA addresses, Did Express Electronics get an FCC exemtion to do so??
4) LAST...they want you to pay them to "open or mod" the radio because.."Some radios require many many hours of work by a skilled technician" to open the 11M!!!!!!
Techs, take a look at what they offer, Galaxy, Rangers & superstars... can you find ONE radio on their website that would require "Many hours" of work by a "Skilled technician"?!! Moving a jumper, snipping a wire or plugging in a connector has become a monumental task for the morons at Express electronics!! Most good techs could almost BUILd & Align an entire radio from scratch if you gave them "many hours"!

GOOD LUCK TO ANYONE WHO WOULD BUY ANYTHING FROM A COMPANY THAT PRINTS
SUCH HORSESHIT FOR US TO EAT.....

Hello All,

My nephew got a CB from a friend and is interested in getting his own call sign. What form on the FCC website is best for this? Is it form 605?

Answers can be emailed to me.
Thanks

Roger

----quote:--.." 4) LAST...they want you to pay them to "open or mod" the radio because.."Some radios require many many hours of work by a skilled technician" to open the 11M!!!!!!
Techs, take a look at what they offer, Galaxy, Rangers & superstars... can you find ONE radio on their website that would require "Many hours" of work by a "Skilled technician"?!! Moving a jumper, snipping a wire or plugging in
a connector has become a monumental task for the morons at Express electronics!! Most good techs could almost BUILd & Align an entire radio from scratch if you gave them "many hours"!
GOOD LUCK TO ANYONE WHO WOULD BUY ANYTHING FROM A COMPANY THAT PRINTS SUCH HORSESHIT FOR US TO EAT....."
I don't know what is the "best" idiotic line from their website, the one above or the one about export radios having TEN TIMES the receive of a regular CB. Perhaps a "regular" CB to them is a $29 dollar GE brand 3 channel CB walkie-talkie.
It looks like Express Electronics has made Copper look like the Better Business Bureau....and that's hard to do!!

You asked for a name, nic, something to call me, but yet you left none for yourself. Just for curosity sake, my name is Ted.
Yes you are right in having a place to voice your complaints and to make yourself heard, and I agree 100% with that aspect of what you are saying. Like I said, without knowing the facts, how can anyone throw stones just because 1 man jumps up and says to?
Yes that one customer is very important to us as is reputation. We are doing everything possible to make this customer happy and getting the matter dealt with. I just don't understand how the views of one man can influence so many so easily to believing whatever he wants them to believe.
Like I said, I am just trying to make piece in the whole matter and lay this to rest. Some people have nothing better to do than throw gasoline on the fire just to keep it going and i refuse to be a part if that is their intention.

One thing, every mans voice is important, no matter how big or how small, but it takes a wise man to listen.

Have a good day.

Ted

Here's another quote from Express electronic's "Informational" web-page!!
(This one's a doosey!)
On a page describing some sort of "Turbo megatune" (I forget the exact
name) that they want to sell you for your radio, in regard to souping up the
watts & modulation they say..."..As long as a radio does not interfere with
other type-accepted equipment it is still within it's Legal Parameters"!!
Holy Cow!! does this mean that if Express ups my modulation & lets my
radio swing 40 watts it is still FCC approved, just because I ain't interfering
with my neighbor's TV?? And if I then drive down the street & then come
through someone's phone, that same rig is now against FCC rules & illegal?
Then wait, I drive another block and ..whammo! My rig is legal again!! Wow,
Express Electronics really has a grasp on reality!!!

2103. Topic: Voobner's Effect On The Newsgroup

>>opinions known respectfully. (Which I think
>>is outrageous, pure BS)

>That is exactly what makes you a troll. You admit that you are
deliberately
>disruptive and disrespectful, hence YOU ARE A TROLL by canonical
definition.

Then that makes the keydown gang "trolls" because they are both
disruptive and disrespectful to legal CBers. Thanks for clarifying
that.

>I will be referring to this stated intent to disrupt and disrespect the
group
>throughout this post.

First of all, I take exception to you "speaking for" the newsgroup. No
one elected you spokesman. Your views represent your own and no one
else's. If opinions about legal CB "disrupt" the newsgroup and it
bothers you, you are free to post conflicting opinions. But that doesn't
make them any more valid than mine.

>> You named Professor and SPARKY as examples of
>> well-behaved legal CBers. But when Sparky didn't conform to your
point
>>of view, you decided he needed some slapping around to keep him in
>>line.

>NEVER have I mentioned Professor in ANY of my posts.

So who DID you mention as examples of good, quiet, pro-legal CBers?

>Again you have shown your tendency to LIE. How many does this make now?

How should *I* know what your fabricated little "Voobner-Lie-Counter"
reads today?

>Sparky STILL has not proven me wrong in my example of NON-TROLLING
pro-legal

>CBers, and at no time did I "slap him around" or "keep him in line", as I so
>often do with you.

In your own mind, Captain.

>Sparky showed needless disrespect

I would say his only "disrespect" was having the chutzpah to disagree with you.

>in a thread by dismissing without cause what I had said, and I showed it back.
>Your deliberate mischaracterization is typical of a troll's tactics.

I simply see things differently from you. (And how do you know so much about "troll tactics"?)

>>Your "contribution" to this NG seems to be that of thug and enforcer.

>How so? Because I continue working you over in a flamewar you started? Because I oppose
>your deliberate disruption of a group I like to read? Because I call you on every lie you
>attempt to put forth? Because I don't like trolls? What
>have I enforced other than the constitutional rights of others which you had
>ignored? To whom (other than YOU) have I been a "thug"?

To anyone who disagrees with you. Sparky was the first to disagree with you. Many to follow.

>>>Simply put, it's *obvious* you have a grudge against CB,

>> Your saying so doesn't make it true.

>Right. Your stated commitment to DISRUPTING A CB GROUP makes it true.

Show me where I stated that I am committed to disrupting rec.radio.cb.

>> The "group" inexplicably uses the same arguments for being illegal as
>> they accuse me of using *against* them. Even YOU can see that.

>The group is not illegal. The "group" also does not seek to disrupt itself, YOU
>DO. That's why I continue to correctly call you a lying troll and you prove it
>yourself time and time again.

You have proved nothing except that you enjoy flaming and then patting yourself on the back for it.

>> There are plenty of legal CBers here who do not support your point of
>> view.

>Name them. I don't think ANYBODY supports your stated intent to disrupt
and
>disrespect the group, other than perhaps N8WWM.

You changed definitions in mid-argument. Of course no one supports an
intent to disrupt the group. But a growing number support legal CB.

>>>Other than N8WWM, I have seen NOBODY
>> >openly support your trolling.
>>
>> That's because I'm not trolling.

>I'm sorry, but you ARE a troll by deliberately disrupting this group,
and ONLY
>N8WWM joins you in doing so.

If opinions in favor of legal CB disrupts illegals, that's their fault,
not mine.

>You HAVE stated your respect for him because he
>also claims to be against "illegal CBers" and shows it by
flood-posting,
>disruption and disrespect, even though fellow hams have unanimously
spoken
>against him and he has been repeatedly kicked from ISPs for abusing
usenet.

>> The posts of Fred, Sparky, QRM2000,
>> Kari and others support the same ideas I do.

>I don't think any of them have the intent to disrupt this group as you
do, or
>to be disrespecful as you are.

I told you I have no respect for illegal CBers. They deserve no respect.

>I fully support legal CB

No one has ever seen ANY evidence of that, except for you saying it.

> and I think being
>rabid anti-illegal trolls as you and N8WWM are is a waste of time on
usenet
>discussion forums.

Fortunately, YOU are not a factor in deciding how people spend their
time.

>I only hope none of the folks you mentioned intend to act in
>the way that you have for the past few months.

If you mean they might choose to speak their mind in a group dominated
by rude, disrespectful, pro-illegal CBers -- I hope they DO.

>> And more pro-legal CB
>> people keep popping up every day. You're saying I have no support

>> doesn't make it so.

>Again, I have no complaint with pro-legal CB folks because I AM ONE OF THEM. I
>just don't like trolls such as YOU, because your selfish desire to disrupt the
>group for whatever "reason" is only intended to draw flames and attention to
>yourself.

Again, you're ascribing intentions and motivations to me which don't exist.

>Or, as I said, perhaps you have simply been angered by a CBer and you
>want your revenge from behind a keyboard.

You ruminate about my "reasons" a lot. No matter, because you are wrong.

>>>The very fact a known usenet abuser and troll
>>>is/was your only real support should tell you something.

>> See above.

>You've not explained why only YOU and N8WWM find it worthwhile to disrupt this
>group. It is *obvious* that you both despise CB,

Obvious to YOU only.

>and merely use the issue
>of "illegals" as your disguises in hopes that legitimate posters will join you
>in trashing the group. Others who discuss the wrongful nature of illegal CB
>show respect for the group, but you and Gay Doug don't.

"Respect" illegal keydowners and illegal amp makers and those who gleefully post their exploits in freebanding and channel-lockdowns?

You gotta be kidding. These people have no respect for anyone, and deserve no respect in return.

>>>You have the option to troll this group if you wish, and you will
>>>continue to
>>>be disliked and spoken against, as well as flamed by those you claim to
>>>speak
>>>for and those you have insulted.
>>
>>That doesn't bother me.

>That never bothers trolls like you and N8WWM...You enjoy disrupting the group and

>WANT to be flamed and spoken against, even when denounced by those you associate
>yourself with (i.e. hams & pro-legal CBers). You ALWAYS assume the worst of CB and
>are quick to spout it as it brings the flames and "persecution" that you crave.

Again, your amateur psychology is in error.

>>>Read some of the hateful, profane and
>>>threatening posts made to me by some "people" in this NG. Shame on you
>>>for defending them.

>Strangely enough, you just said that none of this actually bothers you
>(previous)...

Re-read, please. I stated that hateful, profane and threatening posts targeted at me exist. I did not say they "bothered" me.

>You are only proving that you are a troll in disguise. You get
>the flames you troll for and use them to bolster your image of the "persecuted
>hero of the legal CBer" exactly as I have said MANY times before. You won't
>fool many, and I'll be here to make sure of it.

Clearly you feel YOUR trolling is an honorable "quest". You post your opinions, I'll post mine.

>>>You have somewhat of a talent for portraying
>>>yourself as some type of persecuted hero of the legal CBer.
>
>>That's in YOUR mind.

>And YOUR behavior. Read your previous two statements in which you contradict
>yourself openly,

[here are the previous two statements]

>>>>Read some of the hateful, profane and
>>>>threatening posts made to me by some "people" in this NG. Shame on you
>>>>for defending them.

>>>That doesn't bother me.

I say "shame on you" for defending hateful, profane, and threatening posts. YOU infer that to mean I am "bothered"? That's in YOUR mind.

>showing that you are a troll using "persecution" to validate
>your trolling behavior. Are any of your "supporters" being persecuted as much

>as YOU are? I don't think so. That's because they're not TROLLS.

I thought you said I had NO supporters? Contradictory.

>>>You're not "working me over" by any stretch of the imagination.

>Check the archives.

YOU check. And prove to me your alleged "victory".

>You don't even need imagination to do that. You've been
>unable to respond with valid argument since the very beginning.

I can say the same for you.

>You quickly drop the thread when you've been proven wrong, take what I
>have proven, and adjust your disguise to fit. When I explained to you
that
>NOBODY with half a clue bought your "vandalized hit-counter" lie, it
vanished
>without a trace. When I pointed out that your calling me a "paid
assassin"
>was a big laugh to the net-savvy, that also disappeared from your
repertoire of
>"persecutions". You're a newbie that didn't realize that his lies were
so
>far-fetched, but you wised up quick and said nothing, hoping they'd be
forgotten.

How do YOU know what I realized or didn't realize? Honestly, your
presumption is ASTOUNDING. As is your erroneous version of events.

>>You are
>>an admitted flame-Troller from cotse.com

>I admitted no such thing. Your newbie attempt to judge my intent...

I wouldn't be so quick to invalidate attempts to "judge intent" if I
were you. It's the entire basis of your argument against me.

>...based on my
>usenet host is as stupid as if I were to suggest you were a newbie
because you
>were on AOL. I also remind you that I target YOU ONLY (making me NOT a
troll),
>because you're a TROLL who initiated a flamewar.

Again, which one of us sought out the other?

>>>Keep in mind YOU initiated the drawn-out flamewar that you and I have
>>>been
>>>engaged in for weeks by implying that I was involved in illegal
activity.
>
>> Only YOU are to blame for

>> YOUR decisions and actions.

>Absolutely. You made unfounded accusations and I am fully responsible
for
>working you over ever since.
>

Claiming victory, no matter how vigorously, doesn't make it so.

>I find justification for working you over because
>you are a common troll fouling a group I enjoy reading and learning
from.

I see no evidence of your contribution to the group.

>>>I'm happy to have forced you to give
>>>up MUCH of what you routinely did to harass others and disrupt
>>>discussion, but
>>>you haven't become any less of a troll as a result. You've only
changed
>>>tactics.
>>>>BTW, Giving this "I'm-not-a-troll" post the subject, "The Voobner
>> Effect", does
>>>little to support you.
>
>>Your taking credit for having some effect on me does not make it
>> reality.

>Hmm.. I forced you in debate to recognize that ALL discussion is
protected
>under the first amendment, and after quickly dropping the thread

Show me where I dropped a thread due to your debating skills.

>you included this concept in your .sig.

You own no copyright on that concept.

>You then gave up your tactic of accusing anyone you disliked of being
"illegal"

I don't have to accuse anybody. Many posters gleefully admit that they
operate illegal CB or traffic in illegal CB amps. Read the NG.

>after dropping *that* thread, because I also made you accept that you
had NO right
>to accuse others of breaking the law without proof.

Show me where I dropped a thread due to your irrefutable logic.

>You then started bringing up my name to beat others over the head with,
as if they
>had "cried to me" to come and work you over.

THEY brought up YOUR name. I responded. Sorry if that bugged you.

>Not even close. I've
>been reading this group for YEARS and I gave you PLENTY of time to have
your
>troll kicks and go away, but you didn't.

How is it that you purport to know so much about "troll kicks"?

>I called you on a lie and ragged on you for it, and you responded with
some
>really out-of-this-world accusations and implications. Thus the
flamewar.

Your swaggering and attacks didn't "prove" anything. YOU initiated the
flamewar for your own enjoyment.

>You're a troll, much like other trolls we've seen over the years in
this group,

Ahem. You implied Mark Fuller was a "troll". He debated the merits of
legal CB. Your definitions are lacking a certain, uh, objectivity.

>whose SOLE purpose is to disrupt and annoy the group. Pro-legal CBers
like
>myself DO NOT appreciate trolls even when they share the pro-legal CB
stance. I
>know that some enjoy seeing "illegals" get ranked on constantly by
trolls, but
>it serves NO purpose and rights NO wrongs, it only serves to drive lots
of good
>guys away who just want to talk about radio.

But you don't seem to mind the pro-illegals rude and anti-social
behavior to any of the pro-legal "regulars" who don't show "respect" for
their illegal views.

Newbies with 4-watt radios are regularly derided as "ducks" by this
crowd of overpowered babies. Anyone who dares answer back is given
a hefty dose of profanity and told to move on.

I find it ASTONISHING that you have put yourself in a position to
defend this kind of behavior and then attempt to engage me in
a pissing contest about "who said what when". But that's your
business. Flame away.

>If you cannot express your opinions without being disruptive

If opinions about pro-legal CB "disrupt" a newsgroup entitled
rec.radio.cb, there's something desperately wrong here.

>and disrespectful to an entire group,

An entire group? No, just the pro-illegals. And maybe you.

>you are by definition A TROLL. Since you are proud of this behavior,
>you can be proud of being a troll.

You say I am a troll, I say I am not. So far you haven't been able to prove anything except that you are seeking to justify your attacks on me and my opinions any way you can.

Everyone can believe what they want to believe. We are selling a product and we have our pitches just as everyone else does. I am sure there are many of you out there that swear by your Galaxy 88, just as there are ones that swear by their Cobra 29, and each would argue with you as to which is the better radio. It really does not matter as to which radio will out do the other, what does matter is the customer gets what they ask for by their choosing.
We do not assume that people are stupid. It would be stupid on our part knowing what is available on the internet as far as knowledge goes. People make their own choices and we will try and give them the best service at providing them with that choice.

Have a good day

THAT PRINTS
> SUCH HORSESHIT FOR US TO EAT.....

I SUPPOSE THESE PEOPLE SHOULD PROOF READ THEIR THOUGHTS. IF YOU READ THE SITE...IT SAID....(THIS WAS COPIED FROM SITE)In America , and Canada, many retailers sell the Galaxy, Ranger, Connex, and President radios in their 10 meter configuration. It is required by FCC regulations that you have a license to transmit on these frequencies. Radios in their 10 meter configuration are often a lot cheaper than their "International Band" (export version) counter parts. Copper Electronics, Thomas Distributing, and many other online retailers sell 10 meter amateur radios. These radios they sell can not be used on the CB channels, they must be converted back to their original export version condition to work on all the bands again. Some are made

intentionally so they can not be converted to full-band use. Some of these companies try to sell you a "how-to" instructional video tape so you can do the tricks yourself. Realistically, it can be done on some radios by an amateur, some radios are easy. Some require many hours of work by a skilled technician. We sell over 200 different radios, they all require different conversion techniques. Many good radios have been destroyed by amateur conversions. To make matters even more complicated, each manufacturer will constantly their designs, so your how-to book may actually be well out of date even if it's brand new.

AND IT ALSO SAYS......An Export Radio is designed to be sold globally. They are in a much more competitive market than a Cobra CB radio is. To be competitive in the world's communications markets the manufacturers are forced to turn out a higher quality product, with more features, and usually a better warranty than a domestic CB Radio manufacturer. For the same money you would spend on a Cobra 148 Night Watch Sound Tracker, you can buy a Connex 3300. The Connex will talk circles around the Cobra, and will live another ten years after the Cobra falls apart. Almost all the export radios come with a factory installed echo/reverb. The receive circuit in an export radio is on average 10 times the incoming signal processor a CB unit is. And since an export radio has no governing body to determine how many watts it should do, they do significantly more than the CB limit of 4 watts. Some do as much as 300 watts, or more. Basically you get a lot more for your money in an export radio, and have all the feature preinstalled that you would have had to add extra to a Cobra 29LTD later. If you are serious about quality radio equipment, then there is no other choice.
NOW RE-READ IT. WORD FOR WORD!! IT NEVER SAID THEY RECEIVE 10 TIMES BETTER....THE SIGNAL PROCCESSOR IS ON AVERAGE 10 TIMES BETTER!

2112. export radios on ebay

Newsgroup: rec.radio.cb
Date: 2001-01-11 23:23:43 UTC
From: Axle Jack <axlejack@REMOVE-TO-REPLYdingoblue.net.au>
Message-ID: <3a5e414a$0$15491$7f31c96c@news01.syd.optusnet.com.au>
Source record: 68164

Hi all
I'm quite new to this groups so have been reading through the past messages with utter bemusement :-) The whole troll and counter troll thing you've got going makes me laugh.
But I have to point out something you maybe are not aware of.
When complaining about illegal export radios on ebay, please check which country they are being sold in.
I live in Australia, and here these radios are legal to buy and own (but not to use on unlicensable frequencies) if the buyer has an amateur license. The reasoning behind this is that it encourages them to be converted to 10m band and stops them being a problem on CB.
So it is legal to advertise and sell them in Australia. Please check you are not complaining about an Australian rig.
Thanks
Jack

2113. The REAL Keyclown press conference

Newsgroup: rec.radio.cb
Date: 2001-01-11 23:31:25 UTC
From: zerstorer@my-deja.com
Message-ID: <93lfod$2hk$1@nnrp1.deja.com>
Source record: 68166

The text of the REAL Captain Dead Dick press conference!

I Sea Captain Dead dick, think I am cool because I have ILLEGAL KEYCLOWN amps, coax with excessive power-handling-specs (pudwack), and "GO ILLEGAL" announcements - I am a joke and a compliment to people with Downs syndrome, who are more intelligent than ILLEGAL KEYCLOWNS (pudwack). And just LOOK at the sissy ILLEGAL KEYCLOWNS go apeshit when Voobner and the MIGHTY N8wwm start telling us we are ILLEGAL KEYCLOWNS. We are sissy boys who walk with a swish, and can't take the constant ribbing of the MIGHTY N8wwm and Voobner.

The only way we can fight the truth and justice of the MIGHTY N8 and Voobner is to be an anonymous cretin dedicated to defying federal radio laws, and make up pussy anonymous posts with false names, like faglips Phoneyboy does.

Fellow ILLEGAL KEYCLOWNS, what shall we do? The MIGHTY N8 and Voobner are just too smart for our disease infested minds....
[NeboDweebo:I think we need more BOOZE!!!]
[Phoneyboy: I vote we make anonymous anti Voobner and N8 posts]
[1mangang: I suuuuuuck N8 whenever he wants me to!!]
[IBendoveragainandagain: I vote we go buy some hamsters, furnace tape 'em so they don't rupture, and have sex with 'em!]
[tnom: Eats moldy tomato and pukes all over Scottiekins]
[->splat<-]
[Scottiekins: Licks up puke and sperm mixture and offers tnom another tomato with a horny look on face]
[Twistie: Eyes Scottiekins enviously, wipes sperm-tomato puke off tnom's lips and licks his fingers]
[NeboDweebo: I think we need more booze!]

Wow, The Keyclowns sure have powerfully smelly friends.

Yes, and you DON'T because you bathe on a regular basis, unlike ILLEGAL KEYCLOWNS. We are condescending, paranoid buttmonkeys whose every fantasy is made real by the magic of our gayness. You are a threat to our moronic, homo life style, and we have to talk shit to you because we are too stupid to get ham licenses and plus we like keying our mikes and saying "AAAAAHHHDIO, AAAAHHHDIO" 50 times a day and we can't do that on the ham bands because we would be held accountable for our conduct.
Mark it down in your little booklet, we KNOW Riley is gonna get us!
Heh..We are weenie washing puke prains with the collective IQ of a

gerbil. In any event, I accept the fact that we are homo ILLEGAL KEYCLOWNS and run on the platform of making love to NeboDweebo. And NeboDweebo runs on his high heels to me so he can be dorked by an expert buttpumper.

Thankyouverymuch. Now, who wants to be blown first?
[NeboDweebo: We need more booze!]
[applause & sounds of several Keyclowns furiously masturbating and of 1mangang unzipping SCD's pants to lick his nut sack]
[NeboDweebo: GOD DAMN IT, I SAID WE NEED MORE BOOZE!]

Unmitigated bovine excrement! A sales pitch does not contain outright lies. Misleading statements normally bring down the wrath of the FTC, but who is going to complain?

I assume you feel that because you are selling an illegal product that anything goes! At least there are a number of knowledgeable CB folks to warn the less initiated to your deceptive practices.

Yeah Roger (no pun intended),
It,s all changed. Now we have cb's that are modified to talk on freq,s other (and as well as) the standard 40 channels, and the fcc dropped the class D license thing around 1980. I was kawp 6002 in 1977. Now just get him to make up a clever nickname (handle) for 40 channel, and if he talks on sideband the action seems to be at 38LSB these days and they pretty much all use "self assigned" 3 digit #'s as handles there.
The best part of all is your nephew is getting involved in radio. The negative side is though there is a lot of foul language on there as with anything it seems.

Thats one of the problems with a "Turbo Megatune"!
Express told me I should wrap lots of that heavy aluminum foil around the radio (except where the knobs can still show) and that will eliminate most of the receiver front-end loading in the neighborhood.
They also said if anyone complained to give their 800# and they would send anyone who complained a free high pass filter.....but, with a shipping charge.
Ken

Hi, Thank you for reading this post. I have a Leece alternator capable of 22
volts at 200 amps, comes with tempo external regulator and metering, and
ignition relay setup, very low hours. asking $250 plus S&H.
If you are interested in this item you can contact me at badco@jps.net
or (530) 589-3633.
Frank Sellers..

Mr. Maynard,
This is an example of what I mentioned earlier that your nephew may encounter on the cb radio these days. Unfortunately it seems to infect all areas these days.....pardon me.....(Way to go Voob alias.....you may now have kept this man from getting his nephew involved in radio.).....Sorry for the interuption.....As I was saying, there is a lot of filthy speech on the cb as well as in this newsgroup so you may want to be there with your nephew as he starts out with his new hobby.
Best of luck,
Ken

It also includes intentional and unintentional transmissions.

As far as CB radio is concerned, the type of equipment that may be
used is specifically stated in Rule 9 (unmodified, type accepted), and
must not conflict with any other FCC regulation. See for yourself at
www.fcc.gov/wtb/prs/citzn.html.

Don't take my word for it. Go to www.cotse.com and read their Webmail
FAQ and terms of service. Info on a cotse account is given out and
account terminations are done - but only in extreme cases, e.g. death
threats and stalking.

Also, I am not "zerstorer@my-deja.com" and my ISP is certainly not
located in Toledo.

Thankyou,
-Aaron-

Hi Jack,

Thanks for the info. FYI, these radios are legal here too. Licensed US amateurs may also use them on their licensed frquencies but must NOT transmit on frequencies they are unlicensed for or, in the case of CB, on frequencies for which the rig is NOT tyoe accepted.

You'll hear(or read) many a ham that will "rewrite" the rules/regs to suit their particular distaste for certain equipment that is associated with a maligned segment of the RF community. Many believe it is unethical to use export radios on legit ham freq's...all are entitled to their own opinion re. ethics, HOWEVER, these rigs ARE legal for amatuer use. Transmit on unlicensed freq's though...and you're in trouble territory. Have a happy new year & "gooday.".

Couple quick questions... let's say the Yaesu FT101E(or "EE" I think) or the
EFJ Valiant, they are Amateur Radios, and have 11 meter selection
capabilities, why wouldn't a HAM be able to transmit on 11 meter with it?
Isn't it type accepted rigs for the bands it was designed to operate on?

Just curious like Pinhead...

If you plan on being in business any length of time, you might consider adopting the motto 'The customer is always right'. Sometimes they aren't of course, but somebody in your small organization needs to take a trip to Nordstrom's in Seattle, or Neiman Marcus in Dallas, and observe how big, rich companies got that way, and how they get bigger and richer. I'm delighted that your "CEO" made an ass of himself in public because it typifies the manner in which he has handled this situation as well as countless others no doubt. NOBODY reading this newsgroup now or in the future via dejanews would for a nanosecond consider buying anything from you after reading this thread.

The CB transceiver must be certified for the 40 CB channels and nothing else. Kit type radios by their nature can not be certified because of the many variables inherent in assembly. Although the old Yaesu might have the capability of 11 meters, it is now illegal to use it in that capacity because the rules have changes since its manufacture. I stand to be corrected, but I believe there is no grandfathering permitted by the regulation.

Well, we are all only human, and I am sure that we all have said and did some things that did not set well with others at one time or another. I know that everyone has a bad day, even CEO's, and if that condemns a man, then we are all in trouble. We all learn from our mistakes and in time it makes us much wiser.
I have to disagree with you on one point however, the customer is always right until he proves unworthy, and I am in no way saying this customer was unworthy, so don't twist my words, I am just saying that everyone makes mistakes, even customers. No one is perfect.

Not to mention the three seals that the dogs will eat on the ride into town!
Besides, last time I was in town Nuknuk sold me a lead dog with a bum leg, I
went in circles for three days before I figured it out. I wouldn't trust
him to keep my antenna straight!

Hams cannot give other stations permission to operate on the ham bands.

But some of the frequencies are shared with other services. The Ham usage can be either primary - where others have to avoid interfering, or it can be secondary - where Hams must be the ones to avoid interfering.

That part of the band may be shared, I don't recall.

On the other hand, there are packet radio networks that run 24 hours a day.

To whom it may concern(if the shoe fits,wear it!)
Im a first time visiter to this group.I think this is a fine resource for everyone interested in this great hobby!
Ive been into radio for the last ten years.I say great hobby because ive seen how it brings people together on a global scale. People getting together to raise antennas,sharing their experiences and knowledge to help each other in the hobby. The only negative thing ive observed about the hobby,are those individuals who"slither and wiggle"their way into the generally close nit "cb radio groups/clubs".
Their intent it seems is to spread division,and strife.The sad thing is,that very often they succeed in polarizing these groups,and causing clubs etc to fragment and break up,some leaving the hobby for good out of disgust.I am of course referring to the individual who seems to have appointed himself the "grand inquisiter/protector" of the holy mother church of cb.This rascal seems to actually believe the crap he preaches.But the truth is that there is no "pure and holy" version of the hobby.There is only radio. Some people like to put up a small verticle antenna,purchase a washington base and they are thrilled.Some folks like to purchase an export radio with all the bells/whistles,and run a million watts.Most are respectful of each other,because they share a common love.....radio. You may not agree with either side,but most put aside the differences for the love of the hobby.The only ones that do the hurting,and i might add,damage the hobby severly,are the busybodies who do nothing but spread strife and division.They constantly find fault with others,and dont mind spreading their deadly poisen at every opportunity.For the good of radio,and the hobby,they should SHUT THE HELL UP!!! Like the man said,if you dont like it turn the knob "off". Lets just agree to disagree,and go on.That said, i will be dropping in from time to time to this great site!!!

LONG LIVE RADIO!!!!!! AND LONG MAY YOU KEY DOWN BROS!!!!!!

THE ONE,THE ONLY ELPASOGUNSLINGER

Bill, the moment the so-called freebanders stop bragging about their illegal
equipment and stay on 27 megs (which is their playground, right?) I'll stop
"bitching" about the situation. Ten meters is allocated to hams, not Cbers.
I should know, being licensed.
And even though some frequency might appear not to be in use, e.g. on the
27.555 and so on, who knows what plans the govt or any other authority might

have for it? Furthermore, any ham knows that it's not a good idea to use excessive power, even though many of us are capable of putting out full legal power. Don't you agree?
And last but not least, LEGAL CB is a nice hobby for anyone, let's not confuse the hobby with the ILLEGAL folks! Gary

Did the guy ever get his refund? I was thinking of buying a radio from EEI. But no way if they stiff unhappy customers. They probably wouldn't want to sell one to me anyway, I'd pay with cash, and I live in a trailer. According to the CEO, I'm a deadbeat loser.

Amateur equipment is not type-accepted at all, ever. So I am no more
legal or illegal with my trusty Yayhoo, Valiant, WRL Globe King, or
Collins than anyone else. That the lower 22 was once a ham band is an
interesting bit of history, nothing more.

Bill, 28.0-29.7 is amateur worldwide. It is a treaty band everywhere so
there is no such thing as legal CB above 28. Where some confusion comes
is that there are also bands assigned by ITU regions (the Americas are
Region II). On HF these are 3.9-4.0 and 7.1-7.3 which are broadcast
nearly everywhere else. Allocations in the 50, 75 and 225 MHz vicinities
are at regional and national levels so they are a mess. 144-146 is
treaty, 146-148 are regional as are 420-430 and 440-450. Our FCC has been
a great supporter of Amateur Radio over the years and has maintained some
implicit promises made to the Amateur service many, many years ago.

The Amateur Service has no legitimate interest below 28 so I certainly
agree with your ideas here. That a bozo can go trolling and catch more
large-mouth bass than the law allows is not, however, an Amateur problem.
We can no more prevent bozos getting tickets than CBers can prevent their
buying a radio.

cnn1@ix.netcom.com writes:

>Anyone going to be attending the inauguration, and, if so, in what capacity?
>Will you be using FRS there?

Hi, Gary. According to an internal memo written by a member of the Bush transition team, George W's folks are bringing the radios they use on the ranch. At the risk of incurring the wrath of the Secret Service, here are the technical specs:

Frequency: Channel 35
MODE: AM
CTCSS: None
Roger Beep: On
Echo: On (When a Texan drawls into an echo mike, it has an a tendency to scramble the transmission, which improves privacy)

Code Words:
"Dave Made" = Please increase power
"Cut the limiter" = Please speak louder
"Freeband" = There is interference from another station. Switch to the *private* channel
"The Skip's in" = The President has a long-distance telephone call.
"Pin that guy's coax" = We have spotted a threat to the President. Take care of it immediately!
"West Wing It" = Somebody's watching. Start looking "presidential" like they do on television.
"Switch from the beam to the vertical" = Please bring the President some Viagra.

Note: After reading, please shred, burn, or swallow this document.

> Then that makes the keydown gang "trolls" because they are both
> disruptive and disrespectful to legal CBers. Thanks for clarifying
> that.

Sorry, but NOBODY other than you and your friend N8WWM is trying to disrupt and
draw flames to yourselves from as many discussions as possible in a group you
have no other interest in. That's what separates the men from the trolls. HTH.

> >I will be referring to this stated intent to disrupt and disrespect the
> >group throughout this post.
>
> First of all, I take exception to you "speaking for" the newsgroup.

Tough. I take exception to you speaking for legal CBers like myself.

> No one elected you spokesman.

You admitted that disrupting the group is your intent. I don't need to be
elected spokesman in order to correctly point out that you and your friend Gay
Doug are trolls of the group.

> If opinions about legal CB "disrupt" the newsgroup and it
> bothers you, you are free to post conflicting opinions. But that doesn't
> make them any more valid than mine.

Sure it does. You're a demonstrated liar, and therefore your statements
automatically carry less veracity than mine.

> >NEVER have I mentioned Professor in ANY of my posts.
>
> So who DID you mention as examples of good, quiet, pro-legal CBers?

Nobody. I mentioned examples of those who aren't trolls. You'll note your name
is conspicuously absent from any such list, and for good reason.

> >Again you have shown your tendency to LIE. How many does this make now?
>
> How should *I* know what your fabricated little "Voobner-Lie-Counter"

> In your own mind, Captain.

Yes, and right here in the NG for all to see as well.

> >Sparky showed needless disrespect
> >in a thread by dismissing without cause what I had said, and I showed
> it back.
>
> I would say his only "disrespect" was having the chutzpah to disagree
> with you.

Of course you'd say that, because it's the typical mischaracterization you trolls are so fond of. He disagreed rather disrespectfully and didn't bother to make a counter-argument.

> >Your deliberate mischaracterization is typical of a troll's tactics.
>
> (And how do you know so much about "troll tactics"?)

Don't forget, I've seen trolls come and go on this group for a number of years. You are a common troll who feels safe only when he can talk down to others. You have ZERO debate ability and feel intimidated on other groups because you can't be condescending there.

To whom (other than YOU) have I been a "thug"?
>
> To anyone who disagrees with you. Sparky was the first to disagree with
> you. Many to follow.

You're a liar. I welcome disagreement, and I mirror what respect is shown to me. Unlike you, I can express myself without being a disruptive, disrespectful jackass. If I am shown disrespect I am fully capable of showing it back, as I'm sure you're aware. `,)

> >>>Simply put, it's *obvious* you have a grudge against CB,
>
> >> Your saying so doesn't make it true.
>
> >Right. Your stated commitment to DISRUPTING A CB GROUP makes it true.
>
> Show me where I stated that I am committed to disrupting rec.radio.cb.

Right here, of course:

"but only if they are not disruptive, and make their
opinions known respectfully. (Which I think
is outrageous, pure BS)"

Opining that nondisruptive and respectful dissent is "outrageous pure BS" is CLEARLY such a statement. Your behavior also stands as proof.

>That's why I continue to correctly call you a lying troll and you
> prove it
> >yourself time and time again.
>
> You have proved nothing except that you enjoy flaming and then patting
> yourself on the back for it.

I do enjoy flaming you. You're a troll and you fully and completely deserve it. If you weren't committed to the disruption of a group I enjoy reading, I wouldn't flame you, and you wouldn't need to say, "no mas, no mas" and drop threads quite as often.

> You changed definitions in mid-argument. Of course no one supports an
> intent to disrupt the group. But a growing number support legal CB.

Only a fool would believe that you and Gay Doug "support legal CB" by trolling and disrupting the group. You also failed to name anyone supporting you two and your trolling.

> If opinions in favor of legal CB disrupts illegals, that's their fault,
> not mine.

Only you and your friend Gay Doug seem to have the explicit purpose of disruption and disrespect by expressing your "opinions in favor of legal CB". Both of you also share the common trait of having absolutely NOTHING else to say in the group. Trolls.

> I told you I have no respect for illegal CBers. They deserve no respect.

You accused me of being an "illegal CBer" AND a drug-dealer in response to my FIRST POST in which I ragged on you for LYING. Not only does this show your ignorance in calling ANYONE "illegal" based on usenet discussion, it shows that your purpose here is NOTHING but disruption and disrespect. You're a troll with a very thin disguise.

> >I fully support legal CB
>
> No one has ever seen ANY evidence of that, except for you saying it.

The evidence is that I single YOU out as a troll and I don't attack anyone with a legitimate pro-legal CB argument. The fact is that I despise trolls and liars and you have been proven both.

> > and I think being
> >rabid anti-illegal trolls as you and N8WWM are is a waste of time on
> usenet
> >discussion forums.
>
> Fortunately, YOU are not a factor in deciding how people spend their
> time.

However, since you are admitting to both your and Gay Doug's trolling, I AM a factor in how often you are busted in lies and how often your disguise is torn off for all to see.

> >I only hope none of the folks you mentioned intend to act in
> >the way that you have for the past few months.
>
> If you mean they might choose to speak their mind in a group dominated
> by rude, disrespectful, pro-illegal CBers -- I hope they DO.

Many of them already DO speak their minds. It's YOUR behavior that they don't imitate, because I'm sure most are aware that your behavior is as rude and disrespectful as any pro-illegal CBer. You also use disruption, false accusations and lies, which mark you and Gay Doug uniquely as TROLLS.

> >>>The very fact a known usenet abuser and troll
> >>>is/was your only real support should tell you something.
> >You've not explained why only YOU and N8WWM find it worthwhile to
> disrupt this group. It is *obvious* that you both despise CB,
>
> Obvious to YOU only.

I hope I'm making it more and more obvious to our readers. Gay Doug and you are both deeply disturbed individuals taking your frustrations out on a CB radio forum from behind a keyboard. Your trolling in this group has NO impact on illegal activity.

> You gotta be kidding. These people have no respect for anyone, and
> deserve no respect in return.

I wonder why you aren't out at "coffee breaks" showing your disrespect? Perhaps it's because you're too frightened to be an ass in Real Life? The fact is, enforcement takes place and will be done whether or not you and Gay Doug come here and disrupt the group. I enjoy reading this group and learning about radio from those posting here. You trolls don't.

> I stated that hateful, profane and threatening posts
> targeted at me exist. I did not say they "bothered" me.

Then I ask you why you complain so often and so loudly about them, especially when your express purpose is to generate such flames with your disrespect, lies and disruption as a troll.

> Clearly you feel YOUR trolling is an honorable "quest". You post your
> opinions, I'll post mine.

I don't intend to disrupt or disrespect this group, and therefore cannot be considered a troll. You, however, stated that you find non-disruptive and respectful dissent "outrageous BS". That makes you an admitted troll and worthy of all the abuse you receive here.

> I say "shame on you" for defending hateful, profane, and threatening
> posts. YOU infer that to mean I am "bothered"? That's in YOUR mind.

And in your behavior, shameful troll. I won't speak against any abuse you receive on this group because you are expressly inviting it by trolling. You'll note that NOBODY other than Gay Doug and YOU is subject to such widespread, deserved abuse. You also state that none of this abuse bothers you, which marks you as a troll and invalidates your complaints about it.

> >Are any of your "supporters" being persecuted as much
> >as YOU are? I don't think so. That's because they're not TROLLS.
>
> I thought you said I had NO supporters? Contradictory.

Not in the least. You'll note that the word "supporters" is in "quotes" as I don't feel that you have ANY supporters (other than Gay Doug) in disrupting and disrespecting this group as the troll you are.

> >When I pointed out that your calling me a "paid assassin"
> >was a big laugh to the net-savvy, that also disappeared from your
> >repertoire of "persecutions". You're a newbie that didn't realize that his lies were
> >so far-fetched, but you wised up quick and said nothing, hoping they'd be
> >forgotten.
>
> How do YOU know what I realized or didn't realize? Honestly, your
> presumption is ASTOUNDING. As is your erroneous version of events.

Does this mean that you REALIZED that your lies were far-fetched and counted on others to be clueless enough to buy into them? In any case, the archives show that my statement of events is VERY correct, and I invite all to read them and get a good laugh at your many well-deserved troll-spankings, lie-bustings, and other earned embarrassments.

> I wouldn't be so quick to invalidate attempts to "judge intent" if I
> were you. It's the entire basis of your argument against me.

Don't be ridiculous. I have your statement that non-disruptive and respectful dissent is "outrageous BS", as well as your many lies supporting my argument that you are a lying troll.

> Again, which one of us sought out the other?

Again, I made my first post to call you on an *obvious* lie, and you responded not with defense of your lie but with false accusations and implications that I was an "illegal" along with a host of other insanely foolish and totally unfounded bunk. You initiated the flamewar.

> Claiming victory, no matter how vigorously, doesn't make it so.

True. Actually achieving victory makes it so. I seek to show you for the lying troll you are and I claim a victory-in-progress in this pursuit, as well as obvious victory in the flamewar you initiated with me, as you dropped the threads. Your claiming I *haven't* achieved victory doesn't make the archives disappear.

> I see no evidence of your contribution to the group.

And I see no evidence that you are even *interested* in the subject of CB other than as an outlet for your frustrations. I mostly lurk here to learn about radio, except when a troll-in-sheep's-clothing needs his disguise removed.

> Show me where I dropped a thread due to your debating skills.

MsgID:<978969732.3a59e484d805e@webmail.cotse.com>

> >you included this concept in your .sig.
>
> You own no copyright on that concept.

And before I spanked you in debate over it, you acted as if the concept had never occurred to you. Shortly after dropping the thread, it appeared in your .sig as if by magic.

> I don't have to accuse anybody. Many posters gleefully admit that they
> operate illegal CB or traffic in illegal CB amps. Read the NG.

You accused ME without any such admission, beginning the flamewar you have been spanked out of (need msgIDs?). Lying troll.

> >after dropping *that* thread, because I also made you accept that you
> had NO right
> >to accuse others of breaking the law without proof.
>
> Show me where I dropped a thread due to your irrefutable logic.

Another challenge you were issued in -
MsgID:<978855604.3a5826b4dd645@webmail.cotse.com>
Was dropped without answer in -
MsgID:<978896353.3a58c5e1da3ee@webmail.cotse.com>

> >You then started bringing up my name to beat others over the head with,
> as if they had "cried to me" to come and work you over.
>
> THEY brought up YOUR name. I responded. Sorry if that bugged you.

You're a liar AGAIN, says this post -

MsgId:<93g5amfde1@nnrp1.deja.com>

> Your swaggering and attacks didn't "prove" anything. YOU initiated the
> flamewar for your own enjoyment.

I hit you with the TRUTH about your LYING, and that pissed you off and made you go off on one of your wild "you're an illegal" benders, as usual. Thus began the flamewar. In case you've forgotten, here's the msgID -

MsgID:<92rck4$tk5$1@nnrp1.deja.com>

> Ahem. You implied Mark Fuller was a "troll". He debated the merits of
> legal CB. Your definitions are lacking a certain, uh, objectivity.

ANOTHER LIE. Show a MsgID with me saying Fuller was a troll, you lying troll.

> If opinions about pro-legal CB "disrupt" a newsgroup entitled
> rec.radio.cb, there's something desperately wrong here.

Pro-legal opinions don't disrupt this group. Trolling campaigns disguised as pro-legal opinions from those too weak to try them on other groups do.

> >you are by definition A TROLL. Since you are proud of this behavior,
> >you can be proud of being a troll.
>
> You say I am a troll, I say I am not. So far you haven't been able to
> prove anything except that you are seeking to justify your attacks on me
> and my opinions any way you can.

So far you've been busted in more lies than I care to count, you've "suggested" to Gay Doug that he continue his flood-posting and trolling unhindered on COTSE (heh), made clear that you consider non-disruptive, respectful dissent "outrageous BS", and lost every issue debate you've accidentally gotten yourself into. Your own behavior exposes you as a troll. I'm just connecting the dots.

You failed to get the point. The customer bought a product. It appeared not to function upon receipt. He received a runaround with regard to returning it. A delayed check was sent to an apparently wrong address and returned. There was a further delay in cutting a second check and sending it to the correct address. The customer became angry about the repeated delays in the refund, in being placed on hold and being dealt with on the phone in a less than pristine manner. Your 'CEO' wrote a public message indicating that he was voiding the refund check because the customer had gone public with the complaint. He was just a typical customer with a typical problem encountered by every retailer-defective merchandise received and returned. Have I missed something here, and if so, what? It is apparent that you are attempting a CYA move that is too transparent to be believed. Yes, you are trading in what is essentially an illegal product, so perhaps we should all lump you into a collective basket with moonshiners, heroin dealers, and bookmakers, and remember what we have here. If you have no ethics on the front end, the customer should expect the same on the back end of the transaction.

>Im a first time visiter to this group.

Then perhaps you won't mind if we bore you a bit of history?

>I think this is a fine resource for
>everyone interested in this great hobby!

Agreed, with one caution. There is a small (but very vocal) group within CB who do not want to see responsible behavior because that throws a spotlight onto what they are doing. At every opportunity, they spread the lie that it's okay to break the rules, and that "everyone's doing it".

>The only negative thing ive observed about
>the hobby,are those individuals who"slither and wiggle"their way into the
>generally close nit "cb radio groups/clubs".

And that, Mr. Vaughan, is an example of the division within the hobby that you decry so loudly. Since you're here for the first time, should we exclude you as not being an "insider"? (And PLEASE don't "slither and wiggle" any more. Your butt's not made for it!). :)

>I am of
>course referring to the individual who seems to have appointed himself the
>"grand inquisiter/protector" of the holy mother church of cb.

Back to the history. For over four years, there has been a core group of participants in rec.radio.cb who gently (but firmly) refute misleading statements such as:
*The FCC doesn't act in CB matters
*The FCC doesn't have authority over CB
*You can run as much power as you want and not hurt anybody
*Hams want 11-Meters back (hahahahahahaha)
*It's okay to operate on 10 Meters. They can't find you.

By the way, some of the core group have ham tickets; others do not. But all have considerable knowledge about Citizens Band Radio.

You've been in the hobby ten years according to your post, Mr. Vaughan. You probably recognize those statements as myths. But there are others who are new to CB--some of them quite young. It is not right for them to log onto the Internet and read blatent lies without somebody occasionally refuting them. Otherwise, these myths just spread.

>This rascal
>seems to actually believe the crap he preaches.But the truth is that there
>is no "pure and holy" version of the hobby.

An odd statement, Mr. Vaughan. The individual you refer to seems to be bullish on accuracy. Of course he believes what he preaches. (Otherwise, he wouldn't preach it). But if you read what he writes, you will quickly see that it is true. Verify the rules yourself from the FCC web site. Confirm the "busts" from the ARRL and other web sites, as well as Popular Communications magazine. You seem to be operating in a vacuum, Mr. Vaughan.

>The
>only ones that do the hurting,and i might add,damage the hobby severly,are
>the busybodies who do nothing but spread strife and division.

Excellent point. You can't be on both sides of the fence at the same time, Kenneth. Are you going to spread strife and division by siding with those who lie to new operators? Or will you risk a few flames to stand up for Truth? (So far, it appears that you are attacking anyone who dares to point out that something may be illegal and that it's not a "victimless" crime).

>Lets just
>agree to disagree,and go on.

No, Sir! What a wimp! Mr. Vaughan, IF YOU DON'T STAND FOR SOMETHING, YOU'LL FALL FOR ANYTHING!

I will conceed that most of the participants in rec.radio.cb already know that amplifiers and freebanding are illegal. But there are a few newcomers from time to time who are visiting this group to learn about CB. Is it your desire that they find only lies? That's the equivalent of trying to improve your "scoring" ratio with women by watching porno movies to "see what women like". No wonder some of our mates cringe when we touch them. (Tenderness? Foreplay? What's THAT?) Wait! Better analogy: Learning to drive by watching pick-up trucks slip-slidding through mud in television commercials. (What do you mean, your transmission's gone out again? And how did you bend a tie rod on a new truck?)

>That said, i will be dropping in from time to
>time to this great site!!!
>

I hope you will, Kenneth. I agree with you that CB is a great hobby and that the "norm" is to give and receive help, and to meet many wonderful folks.

But I believe you're wrong when you say, "If you don't like it, turn the knob OFF". No hobby, or nation, or individual ever became great by "hiding one's head in the sand". And you can't be a person deserving of respect if you go through life with blinders on.

There are only two kinds of people, Kenneth. Those who participate in the game, and those who are victims and have to accept whatever comes along. I urge you to "plant your feet firmly" and stand up for what you think is right. Certainly there are times for compromise. But what's legal and what's illegal on CB isn't one of them. It's like being pregnant.

You IS or you ISN'T.

The "turn the knob" phrase is employed by the group that says, "I'll do whatever I want, regardless of whom it affects, and if you don't like it, leave." If you truly care about the hobby, I hope you will take the high road. Take a stand for what's right. And don't get pulled into the mud and slime, as some would try to do.

73, and don't let that Texas dust blow in your eyes!

>
>Dick Nï¿½BK

Not exactly. While this equipment is legal on amateur frequencies, it must not be used to transmit within other radio allocations. As pointed out by another poster, it is illegal to operate this equipment on 11-Meters, even though it has that option on the bandswitch.

There is no "grandfather" provision in the rules regarding type-acceptance of equipment used in the Citizens Band Radio Service.

No need, Lou. If charging under local ordinance, all that is required is that I testify to what I heard and observed. It comes down to a question of credibility in court, and the court sides with police officers in situations such as this.

I am friend of radio PERIOD. I give everyone the benefit of doubt. I overlook some things in life because they are harmless and minute, EVERYONE overlooks SOMETHING. I enjoy the radio hobby in general, regardless of its bad or goods. I guess I have had good luck in the past, I have never had a bad episode where the interference from someone got so bad I wanted to bitch about it and I live right in the middle of a city almost 60 miles wide. Keep in mind that I promote clean radio operations but sometimes it takes a lot of promoting to get people to believe.

It may not have been dealt with in he manner that most expect, but it is being dealt with. There were just communication problems in the whole matter and when this happens it makes for some unhappy individuals.
We are taking all the appropriate steps to deal with this customer.

Again, you lie and deny, but have nothing to back your lies with. Who said anything about Toledo? BUT, since you mention it, you know and I know who you are, and so do most of the others. You have no credibility on this ng, not one person shares your views, and simply put, you are a champion liar. But you screwed up, son. Just admit it and move on. I find it extemely difficult to believe that someone can be around as long as you and still be so stupid as to believe that you are fooling anyone. I believe you to be a high school dropout (recentl) and by the timing of your posts, you have proved you have no job. So again, either you still live at home, or your wife supports you, in either case, it makes you a hell of a lot lower than any one on here that you have ever accused of being illegal. To you, an outlaw cber is the lowest and worst. To me, a chump that has no job and allows himself to be supported by his parents or wife is a lower form of dirt than any cber can ever be for talking skip or running heat or out of band.. How my doing, Voob? Hit the proverbial nail, huh? You can always resort to more lies, but I've busted you in so many now, a few more from your mentally challenged self at this point is sheer novelty.

You are correct there, Lenny. I have found that in almost all instances of enforcing local ordinances, (noise especially) proof is not needed. It is usually a warning by a LEO, then the fine, if he saw or heard the infraction. It goes to the court, a good lawyer will cost more than the fine in most cases

To paraphrase Caterpillar, there is are no simple answers.

Then, Ham Radio equipment did not need to be type acceptance. CB radio, all classes (A, B, C, and D) did need FCC type acceptance.

Now, new Ham Radio equipment SOLD in the US must be type acceptance. However, a Ham Radio operator my purchase a non type acceptance equipment, import and/or modify it for his own personal use. It may be sold, but there is a limit to how many per year, linears I think its 2 per year.

Note: most Ham Radio equipment, no matter how old it is, has the ability to transmit beyond the band edges. An example is the 40 meter band, 7.0-7.3 MHz. 30 Year old equipment was generally set up to cover x.0 to x.5 MHz so most could transmit to 7.5MHz, well outside the band. For the most part, no one went outside the band, but there are always a few bad apples.

CB Radio is still stuck with type acceptance only (class A, C, D, and FRS).

Why thank you, Ted. You can call me, "Twisted". You wondered aloud how one mans views can affect so many. If that man feels wronged, has half a brain, and makes enough noise, that news will spread like wildfire. In any event, I certainly am willing to give you the benefit of the doubt. Everyone is entitled to a screw up (ours is a colorful little troll who believes he has multipersonalities, even talks to himself ((chuckle)) see if you have found him yet). It appears as you are attempting to rectify the situation. I also believe it was a savvy move to put a PR person in charge of complaints and responses. The upper executives should NEVER attempt this directly. It takes one skilled more in diplomacy than in revenue generation to fill a finely honed position that requires such finesse. Good luck to you.

QRM, you sound like a reasonably intelligent creature, and I totally respect your position and right to voice it. A few things in your post I disagreed with, but were so minor that it wouldn't even merit discussion. I do however, take issue wth your statement that the fodder troll speaks the truth. I mean, now I am beginning to wonder about you. If you are referring only to his parroting of rules and regs., my sincerest and humbled apologies. But if you are in any way referring to any other drivel, reasoning, retorts, or convoluted biases put forth by this oozing piece of human fecal offal, then you are the one in a vacuum, man. The legality of the issue is moot with it's kind. The unemployed langur has personal problems than run quite deeper than cb and it's operators, I assure you.

Twisted,
I agree with you 100%. I am a Manufacturers Rep. I get irate calls every once in a while and I turn them into a pleasant conversation and help the customer no matter what. I have been called more bad names than you can think of. When I get those kind of calls, by the end of the conversation the customer is apologizing to me. And yes, I have given out free items to make it correct. As a matter of fact I gave a customer of mine a free $150.00 Nema 7 Thermostat yesterday that they ruined and said it was bad when it came from the factory. I know for a fact that it was fine when they received it and when they tried to install it, they damaged it. The point is I took care of it. And they will always call here for anything they need and tell other people the same thing. I get tons of calls from people to whom I`ve never spoken to, that tell me so and so told me to call you. Now these people are my customers. I can`t afford to have even 1 bad customer as far as I`m concerned. I wonder what these people from Express would think if the shoe were on the other foot and it was happening to them ?????? We all know the answer to that question.

Thats my 2

Yes, I agree, this is definately not the place for a CEO to lose his cool. I may not have all the answers hat people want to hear, so all I can try to do is be a mediator to where tempers will not flare. We all mess up sometimes, and we will learn by these mistakes, but, end the end, it makes for a lot better person or Company for that matter.

Take care and have a wonderful day.

Well I have to agree with your statements here, and don't think for a minute that we have not done the same thing as in giving away free merchandise, if the situation warrants it. We have all done that if we try and run a respectable business.
As well, we all have to eat crow sometime or another, and this situation will be a valuable lesson in future customer relations.

Thanks for your input and have a great day.

> participants in rec.radio.cb who gently (but firmly) refute misleading
> statements such as:
> *The FCC doesn't act in CB matters
> *The FCC doesn't have authority over CB
> *You can run as much power as you want and not hurt anybody
> *Hams want 11-Meters back (hahahahahahaha)
> *It's okay to operate on 10 Meters. They can't find you.

I would agree that there are and have been refuters of these statements here, but I don't believe Mr. Vaughan is referring to these well-meaning and knowledgeable folks. I believe he is referring to a certain troll whose main purpose is to deliberately and maliciously disrupt discussion.

> >This rascal
> >seems to actually believe the crap he preaches.But the truth is that there
> >is no "pure and holy" version of the hobby.
>
> An odd statement, Mr. Vaughan. The individual you refer to seems to be
bullish
> on accuracy.

I disagree. He has an unfortunate history of being bullish on lies and unfounded accusations, I would say. After informing him that he was lying, in my case, he imagined that I was one of the "super-illegals" from the depths of his imagination and told me it was only a matter of time before I was fined and jailed for drug-dealing. Since I run legal CB and don't drink or do drugs, I found this preposterous nonsense quite offensive and proceeded against him.

> Of course he believes what he preaches. (Otherwise, he wouldn't
> preach it). But if you read what he writes, you will quickly see that it is
> true.

I disagree. He cares not for truth and desires only to appear truthful, that he might win credibility with those leaning toward his point-of-view.

> Excellent point. You can't be on both sides of the fence at the same time,
> Kenneth. Are you going to spread strife and division by siding with those who
> lie to new operators?

As I have said, there are a number of pro-legal participants of this group, and the liar in question is merely riding their respectable coattails to annoy and harass the group much like the individual responsible for flood-posting to this group who has the amateur call n8wwm. If you give it any significance, the liar

in question has "suggested" that this amateur avoid being kicked from his ISPs as a result of his shameless usenet-abuse by using the anonymous remailer that I use. He will quickly discover that this is no safe haven for flood-posters.

> Or will you risk a few flames to stand up for Truth?
> (So far, it appears that you are attacking anyone who dares to point out that
> something may be illegal and that it's not a "victimless" crime).

I doubt Mr. Vaughan has any disagreement with respectful, non-disruptive pro-legal contributors. In fact, I believe he is referring to at least one of the two individuals I describe above.

> >Lets just
> >agree to disagree,and go on.
>
> No, Sir! What a wimp! Mr. Vaughan, IF YOU DON'T STAND FOR SOMETHING, YOU'LL
> FALL FOR ANYTHING!

I don't think calling Mr. Vaughan a "wimp" is very constructive or very respectful. You may have an opinion, and if Mr. Vaughan chooses to disagree and move on, it is not "wimpish", but a clear indication that he is not willing to change his opinion. If the two trolls I reference above could learn to "agree to disagree" and move on, this group would be the better for it.

> I will conceed that most of the participants in rec.radio.cb already know that
> amplifiers and freebanding are illegal. But there are a few newcomers from
> time to time who are visiting this group to learn about CB. Is it your desire
> that they find only lies?

I disagree with your characterization of the group and it is my firm belief that most here will "tell it like it is"; that newbies to this group are informed of the legal status of any activity they have questions about.

> >That said, i will be dropping in from time to
> >time to this great site!!!
>
> I hope you will, Kenneth. I agree with you that CB is a great hobby and that
> the "norm" is to give and receive help, and to meet many wonderful folks.

Yes, that is usually the norm, but the two aforementioned trolls (in my estimation) seek only to harass, annoy and disrupt this group. I perceive your response to Mr. Vaughan as a defense of the liar/troll in question, and I can only say that I support his claimed pro-legal stance but don't believe that he is sincere about anything other than disrupting discussion among those who are well aware of the legalities of CB radio.

> But I believe you're wrong when you say, "If you don't like it, turn the knob
> OFF". No hobby, or nation, or individual ever became great by "hiding one's
> head in the sand". And you can't be a person deserving of respect if you go
> through life with blinders on.

It is important to note that the liars/trolls I refer to do not appear to realize that they can have no effect on illegal activity by annoying and

harassing those involved in discussion on usenet. It is true, there is no greatness arising from acting like an ostrich, but there is also no greatness from barking up the wrong tree, and if one is very concerned with illegal activity in CB, there are many more useful ways to address it than trolling a CB group.

I'm also aware that there are those who enjoy seeing the "illegals" harassed, but these same "illegals" are the ones who have FOR YEARS shared their knowledge of CB with pro-legals such as myself on topics such as antennas, mobile setup, etc which would get one mostly ignored or ridiculed on amateur groups. I, for one, do not support such helpful people being harassed, no matter what "high and mighty" ideals the harassers may have, especially when the trolls responsible are liars and usenet abusers and have nothing other than disrespect and disruption to offer the group.

> Certainly there are times for compromise. But what's legal and what's illegal
> on CB isn't one of them. It's like being pregnant.
>
> You IS or you ISN'T.

And *continuously* notifying a woman with a bulge in her abdomen that she appears "pregnant" will get you abused in much the same way as the two trolls I refer to do.

> The "turn the knob" phrase is employed by the group that says, "I'll do
> whatever I want, regardless of whom it affects, and if you don't like it,
> leave." If you truly care about the hobby, I hope you will take the high road.

I would agree, and add that Real Life is the place to find "illegals", and if you feel strongly enough to take time to DF these "illegals" and report their violations, then more power to you. Taking a stand is entirely too often done where such stands are mostly useless, as the two trolls demonstrate, and too often for the wrong reasons, as also demonstrated by them.

I do respect your opinion and share it concerning legal CB, but I disagree with your apparent support of malicious troll activities simply because the perpetrators claim to also support legal CB. I believe the two trolls have no interest in CB whatsoever and simply use this issue as a cover to legitimize themselves, and have seen enough evidence of it to be convinced. There are those with pro-legal CB comments who participate in this group and find no need to be disrespectful and disruptive of the group, and it is with those individuals I share common ground as well as a desire for troll-free discussion.

SCD

2213. Coming out of retirement...WAS: EXPRESS Electronics Inc RIP OFF!!!

It's dealers like this and the replies that have been flying that have caused people that know I've returned to Jersey to seek me out. After much thought and reflection I have decided to take on radio work again just to piss off a few local shops because of the shitty work coming out of them. This is by no means a request for people too send radios to me and I will only do work on radios brought to me by people that know me. Just a comment on the shoddy work and bad information that remains the constant in the CB community. I will be building a new website for my newest radio venture and it WILL be up and running as soon as the domain I have reserved under the new TLD .biz becomes available to me. After being out of working on radios for some time now and just continuing to build the CBMODS database, I feel it is time.
Bullshit sites with loads of crappy merchandise abound.....This will not be one of them!
More to come.

Randy, and I am without doubt that you excel in your position and your company realizes this. As I said, it takes a special talent to deal with the irate customers, and you will always have an unsatisfied one. But to do what you just described is truly an art form in itself. When you flip the pissed consumer to the apologetic state, or have them begging for you to sell them your product as you head for the door telling them it's not really for them, you truly have a valuable skill and asset in todays market. I did the sales thing for a while, one of my more youthful endeavors, made some good money and all, but didn't really like the "people" aspect of it, with their constant complaining, and I never had a lot of patience for stupidity..heheh. I took on the attitude spoken in the immortal line by Tom Hanks in the movie, "Volunteers" with John Candy....."It's not that I can't help these people, it's that I Don't WANT to". In any event, thanks for the input from someone who is there in the field and pits. You don't have a radio shop, do you :) ?

> Clearly, the old saying -- "all that is necessary for evil to flourish
> is that good men remain silent" -- never had more relevance than it does
> today in rec.radio.cb.
>
> -Aaron-

That's provided that you are "good". It's quite simple Aaron. "Evil to flourish" - Interesting way of putting someone transmitting with extra power, or our of band. "Evil".... I ask ya, where in the Bible does it say that operating a radio without a license or out of band with excess power is "Evil"??? Or did Moses really come down from on high and drop the 3rd stone tablet which had that and another 4 commandments on it?

Or, is this "Evil" being done everyday a new commandment which you personally are conveying to us from God himself? What form did God take when telling you this? Burning antenna? A ball of light? Or did he speak forth from your radio saying from on high, "Aaron voobner, your mission should you choose to accept it is to crusade against the 'evil' out of band excessive power radio operators."

Once again, I reitterate. Yes, transmitting out of band or with excess power is against the law. Transmitting on marine channels while on land is against the law. (a few exceptions I'm sure) I agree with you there... But I gotta tell ya, everyday
you're beginning to sound more and more like a whiner. (That's whine-er, not winner.) Look, as long as you're not doing it, you've got nothing to worry about. Let them do it, and if they get caught then fine.

Here's how I figure out if I'm going to fix a problem:

1) Is it *>MY<* problem?
2) What is the *>SOURCE<* of the problem?
3) Can the source be isolated/removed?

If the answer is yes to all three questions above, then I fix the problem. Now, putting myself in your shoes, let me explain my reasoning to you.

1) Is is *>MY<* (meaning Voobner) problem?
Answer: No. It is not my problem, I am a law abiding citizen. I am not an EVIL out of band operator.
^^^ That right there should be enough. But let's continue just for fun.

2) What is the *>SOURCE<* of the problem?
Answer: The sources of the problem are too numerous to mention.
^^^ This right here should tell you that you're going to fight an uphill battle all the way.

3) Can the source be isolated/removed?
Answer: No, because the problem is so far spread that it's impossible to really isolate because it stems from so many places/operators/radios, etc at infinitum.
^^^ This right here should tell you that by attacking a few people in a newsgroup and making accusations where you have no evidence to back up your acusation makes you vulnerable to rhetoric such as this post and tarnishes your honor and credibility.

So, let's sum it up. It's not your problem, you are not in a position of authority to do anything about it. Crying about it, and making false accusations towards others makes you look like a fool.

Now Voobner, I gotta tell ya... You're not making any points... With anyone... I too hold a HAM ticket, and I don't care about 11Meters at all. They can do what they want. Can't stop it, because it's difficult to enforce, and doesn't make the money in fines that it costs to enforce it. I talk on it because some of my friends either don't want to get their HAM ticket, or are quite content where they are.

SO! If you REALLY are on a crusade, write your congressional constituents and ask them to get funding to enforce the law. Now go put on your bicycle helment and take a spin on your tricycle and think about what I've just told you.

I fell over backwards reading only halfway through that one. It hurts... I can't breathe...I'm laughing too hard...

Hey I was thinking... I'm gonna train my dog to chase cars that have passengers that don't wear seatbelts. I mean, can't we protect ALL THE STUPID people from their own ignorance?

I wonder who trained Voobner?

How long will the dog last in traffic?

I don't know if anyone remembers this one... But Voobners crusade is a awfull lot like the environmentalist whackos that reacted during the valdez oil spill.

These people saw otters all soaked in oil. They were also cleaning rocks with Dawn dishwashing detergent. You know, the one that, "Cuts grease"... One thing you have to realise about oil spills. There's oil leaking out into the ocean ALL THE TIME naturally... The ocean has a way of cleaning itself up. (This doesn't make sense to environmentalists though... Obviously God stopped cleaning the ocean when he created man. Man should do it, because evidently god stopped... or some such nonsense.)

In any case, the Exon insurance company wound up paying about $88,000 PER OTTER for it's "cleaning"... When it came time to release the first otter into the wild, the whole town decided to have a festival on the release of the animal into the wild. The band was there, the mayor made a speech about the progress, and the DANGERs of oil. And how the whole town came together for the environment, yadda yadda yadda.

Spark up the band, let the otter go. So the otter bounces its way towards the ocean, jumps in and swims out about 100 feet from shore where it stops. It peeks up, and looks back. Doing things otters do in the wild. It "appeared" to wave, but it's just natural bahavior of the animal.

Then ALL OF A SUDDEN an Orca Killer Whale surfaced and swallowed the otter in front of the whole town and it's populous. The band stopped playing.... The Mayor left... And the Orca submerged again and swam off with an $88,000 lunch paid for by Exon's insurance company.

The moral of the story... A lot of time effort and money can get invested into a project that sounds good and has honorable intentions. The outcome of the project may be short lived. Nature at work.

I have run both the Moonraker 4 and 4+4 Jo Gunn.
As far as construction, there is no comparison. Jo Gunn
is far better constructed than the raker. I thought the
Moonraker seemed to have better rejection than the 4+4.
The Moonraker seemed to get better reports within 50 miles
than the 4+4, but the 4+4 got better reports 500 miles + away
with stock power, and with help :). If you don't mind spending
$$$$$ and want to talk the long stuff without worrying about
the wind blowing the thing apart/down every time a storm
comes through, the 4+4 is my vote.

> many per year, linears I think its 2 per year.

Linears have special rules but there is not now nor ever has been type acceptance of Amateur equipment. I can buy what I want, build what I want, modify what I want. The responsibility is mine and mine alone to meet tech specs. If you see a sticker, it is for Part 15 not Part 97 and basically says the receiver is not a Part 15 device. There may be some certification that it does not run in its natural state on 11 meters (probably not worded that way). There may be a lot of things but operation under Part 97 does not require type acceptance.

As are nearly all services in which licenses are not required or where unlicensed users predominate. There are, for example, special rules on Marine VHF (1/25 watts selectable and monitoring of 156.8) and in no case

can frequency be adjusted from the outside other than by a channel switch.

> CBers of the group.

Now, if you read the bold text you will note that according to Voobner there is a consirpacy out to get him. He thinks these "assasins" that are out to get him are "paid" by ranks of troublemakers. And he also misinterpreted the post he's responding to. Which merely stated that Voobner get back to the main stream of the group and talk about coax length, and other CB issues.

Voob... Seek help... Seek professional help. Pick up the phone and call your county health organization. Tell them how these "paid assasins" on the newsgroup are "singling you (and if you include other posts) and your family". Just tell them your version... I'm sure they'll send someone over to talk to you.

And as a bonus you get a free jacket! You're going to have to try it on, and they'll get it custom tailored for ya. And yes, it's also bulletproof, so even if you don't like the way it looks, you'll be entirely safe when wearing it.

Regarding N8wwm, or whatever he's calling himself this minute, he's a
ham-lite, not a CB'r. I think folks, (not you, Dick), lose sight of that,

especially with all the posts being made about crude, vulgar CB'r behavior.
These two are just trolls that care nothing about the people here. All they
care about is hooking as many "Fish" as possible and stirring things up,
getting normally calm people to respond in kind. Classic Troll tactics.
I say again, "Ignore them. I know it's difficult. So was Physics but I
got through that. It can be done."

I have a Realistic TRC-212 (21-1662) for sale. This is the full size 40 channel unit with carrying case. High/low TX power switch. Around 5 watts output on high. LCD display with TX and receive meters. Great shape. Original long (around 5 feet) center loaded antenna. Has external antenna, power and charger connections. Has an 5-pin mic connector as well. Requires 8 'AA's or 10 'AA's rechargeables and you can recharge the batteries WITHOUT taking the batteries out.

Asking only $ 45.00 (US$) INCLUDING shipping from Canada

Great deal ! ! !!

A Picture can be e-mailed.

Quote from wlfdad:..">IF YOU READ
>THE SITE...IT SAID....(THIS WAS COPIED FROM SITE)In America , and
>Canada, many retailers sell the Galaxy, Ranger, Connex, and President radios
in their 10 meter configuration. ......Radios in their 10 meter configuration
are often a lot cheaper than their "International Band" (export version)
counter parts. Copper
>Electronics, Thomas Distributing, and many other online retailers sell 10
meter amateur radios. These radios they sell can not be used on theCB channels,
they must be converted back to their original export
>version condition to work on all the bands again. Some are made intentionally
so they can not be converted to full-band use. Some of these companies try to
sell you a "how-to" instructional video tape so
>you can do the tricks yourself. Realistically, it can be done on some
>radios by an amateur, some radios are easy. Some require many hours of
>work by a skilled technician. We..........."

LET'S Disect Some of the LIES in this actual quote:
1) The part about "the 10 meter radios usually cost less than their
"international band export Version counterparts"
---- THIS line & many similar others throughout their website give the
FALSE impression & imply to a potential customer that they are actually buying
DIFFERENT VERSIONS (their word) of the 2950 , ranger 6900 or Superstar 4900
base than what is available from the other dealers they name (&don't), when in
reality, the customer is buying the Exact Same radio, some dealers may "move
the jumper" or snip the wire for you, but the 2950DX you buy from Thomas,
Bill's , Advanced or Copper is the SAME radio you are getting from Express.
Very misleading.
2) When refering specifically to Thomas distribuing & Copper, they say 2
things, a- .."They must be converted BACK to their original export version
"condition" .... and b- " Some are made intentionally so they CAN NOT be
converted to full band USE" (??)
----EXpress KNOWs full well that Thomas & coppers Galaxy's & Rangers ect
are the same radios they sell, & need the same exact conversions for full
band, & MORE IMPORTANT, There isn't ANY currently sold 10M rig , except for
the Radio Shack HTX-10, that can't be converted...Does Copper or Thomas sell
the HTX-10??? That is playing dirty pool to Use them by name along with these
false statements.
3) "10 times the receive ' processing' power than a regular CB"...
-- What do you think a potential customer thinks this means?? I still
can't find anybody that can even explain this, no one has ever seen "recieve
processing power" anywhere in writing except their website, and there is no
part called a "signal processor" in any radio. There are also no DSP circuits
or pentiums in any 10M or export rig...& most techs will still tell you they
don't have any "better" receive performance than a Grant , hooked to the same

antenna on the same channel.....AGAIN Extremely misleading meaningless (if not false) "sales Pitch" STATEMENTS.
4) And to claim a next to non-existant warranty is "better" than Uniden, Cobra or Midlands, & that mods on some of the radios they sell take "Many Hours" by a qualified tech.....THIS SPEAKS For ITSELF

>sincerest and humbled apologies. But if you are in any way referring to
>any other drivel, reasoning, retorts, or convoluted biases put forth by
>this oozing piece ..... (Rest snipped to protect my virgin ears---grin)

Thanks for raising that point, and you are right on target. I was referring to the earlier rational presentation, rather than the shouting match which followed.

Several years ago, I proposed a theory that a thread should expire after the seventh post because by then, it will have drifted off topic. By the tenth post, the name calling has begun. By post twelve, the terms "Nazi" and "Hambo" make their appearence.

Next is the famous 13th post, which basically says, "Oh yeah? Let's meet in person and here's what I'll do to you...." :)

Following that exchange, the readership is reduced to the two waring posters, so "sock puppets" begin to appear after post 15.

Plot a few threads against this formula. It's erie how consistent we are! :)

By the way, thanks for the kind words about sounding "reasonably intelligent"---especially after I got high on Vicks VapoRub and wrote the "Presidential secret code word" post! (I'm doing better now. Somebody finally told me that THIS isn't the Vicks you take internally!)

If you live in the United States of America, you better read and comprehend english. Not speaking english is a problem if you live here. If I move to france, I expect that I will learn french. If I am french, and move to the US, I would expect to learn english.

Being lazy and not comprehending english, hey... That's not the merchants fault.

Let's look at air traffic control...

Air Traffic Controller: Flight 797 change course to heading 310 at an altitude of 4000 feet immediately. You will collide with flight 375 if you don't!!!

Flight 797: No habla englais.

BOOM!

Now, I wonder why ALL PILOTS have to learn and understand English... Hmmmmm?

If you live here, you learn english. If you don't learn english, then you will be at a disadvantage. Having to write labels and everything in multiple languages isn't a way to integrate a society. It only makes problems worse. The more crutches you give the disadvantaged, the more they resist integration and change.

No... I don't agree with your "If I can't read english" idea... If you don't know how to read english, then you are at the disadvantage. If you can't communicate with the rest of the society, then you are disfunctional, not the society.

That's one euphemistic way to put it. Brutally murdered is the real
name for it, however. Just the same, the shot that killed him did
not have the desired effect - instead of quelling the outrage and cries
for freedom, they made MLK a martyr and galvanized the whole movement.
In large part, it is the defining seminal event that has brought this
society to where it stands today WET race relations.

For blacks who, despite the Civil War and Emancipation Proclamation and
Consitituional amendments were still subject to obnoxious treatment
under the law, it was the shot heard round the world.

How can a non-animate object commemorate anything? You know,
like 'Traffalger Square'(excuse the spelling), or all those non-
animate statues? I find fault with your logic.
'Doc

Dick, I think he missed your point. You are correct, amateur gear is
not 'type accepted' - I think he took that to mean you could transmit
on 11 meters with the amateur gear which, of course, you can't!

re: Manual Down load on the Swan - Siltronix 1011 web page

Hello there,

I've revised the free Owners Service Manual file formats to provide jpg
gif and pdf down loads. If you've tried without luck to down load the
large original file, these smaller zips will do the trick much better.

Also have a look at the killer new pictures of the original 1011 prototype
tranceiver.

cheers
skipp

Well, I will admit the presidential thing had me wondering for the first few sentences.....great job! As for the theory, I can see it is probably so weird that it's probably true, although I was laughing like hell by the time you got around to explaining post 12, I kinda had an idea where you were going with it. I know it's flu season up (?) there, but man, a double shot of Nyquil night time so-you-can-rest swill probably will do the job a little better than the vicks, besides, I bet it's safer :)

A very intelligent post, and a dissertation that seems to apply to all areas of life, not just CB.

You Sir, are a refreshing change from the graffiti writers one is used to seeing on various newsgroups.

The "supposed" non-modable 2950DX's were sold only to Ham Radio Outlet
& Amateur Electronic Supply store, & before they (DX) were available to other
dealers.
I say "supposed" because we already had 2 customers come in that bought
them from HRO & were able to mod them.....I have a "sneaky feeling" very few if
any un-modable 50/70DX's are out there, I think it may have been a story to
keep other dealers quiet when those 2 stores had an exclusive on the DX
models......

And as politically incorrect as it sounds, I remember him as a whore hopping preacher who was involved as a tool of the communists.

I marched with him once in Alabama, trying to do my part for equality and was privy to some of the private conversations that went on. I heard remarks from he and his people directed towards the local blacks that well could have come from the local KKK.

I departed both disillusioned and disgusted, sadly I wondered how a Black had a chance for equality when their "leaders" cared more about money than them.

He serves the black community far better in death than he ever did in life.

Twisted,

I tried to get into the 2 way field after I got out of school. (I don`t mean high school.) 20 years ago there were a lot of shops around here. I even offered to work for free, but it didn`t seem to help. I would still like to do it. (Even for free) 2 way radio fascinates me even though I can`t remember much of what I learned so long ago.

And you are right about the company I work for. I was going to leave a couple of years back and go to work General Motors. The owner called me into a closed door meeting and asked me what was going on. I told him. He told me that if I left and wanted to come back later that was ok. That really floored me. I also got a VERY LARGE raise to keep me here. Now I can`t afford to leave. I also like this job.

I might just end up working for free, in the evenings, at the local cb shop yet !!!!!!!

Most people will trust what you say if you sound like you know what you are talking about, but more importantly you better be there right now if something goes wrong. When people want to scream you`ve got to be on top of the situation now. I`ve had some major disasters to deal with and they are still my customers. I`m not talking about nickel and dime stuff either. There is no substitute for good relationships with your customers, even if they are getting on your nerves. I treat people like I want to be treated and expect to be treated. That covers it plain and simple. I have customers that refuse to buy a competitors product no matter what. That`s the kind of customers you want.

I`ll get off the soap box now.

Tim, it's getting hard to keep track of all the spam and QRM that we are getting in here. Either N8 what's his call or Boobner has attached a disclaimer that it is their right to argue against 'illegal' radios. I see nothing in that idiot's post other than namecalling at the prepubescent level. I don't blame you and I'm going to start complaining. Some of these idiots are going to make me throw away my ham license (again! Did that around 1980 but retested in 1993 - am I elegible for social security disability for being brain-dead?). What a way to answer a newcomer to the radio game! Sigh ...

best of 73s to the newsgroup (with the exception of boobner and N8)
Jim Hampton AA2QA
PS - if you try not to flame and use reasonable English, you won't have to hide behind some silly pseudo-name!

PPS - go get 'em, Tim!

Just gotta add my two cents in here... Voobner is a nutcase... No doubt about it... Davemade running coke up and down the seaboard. Paid assasins, man oh man... Can you say D E L U S I O N A L????

I'll comment below.

"Sea Captain Deadbeard" <goldberg-no-spam@cotse.com> wrote in message news:978418851.3a517ca31bde6@webmail.cotse.com...
> Who said I was illegal? THIS is exactly the reason I don't support your
> paranoid trolling stupidity. You come here and howl "illegal" at everybody that
> sees you for the shambling ignoramus you are. Get a grip, nutjob.

You don't have to say it... It's his way of making himself feel good. He convinces hiumself that you are illegal, and because he's legal, then "he's better than you." It's a delusion... The guy is nutty as a can of planters.

>
> > floor. Sounds as if you are VERY threatened by me, otherwise you would
> > have stayed down there at the bottom where it's nice and safe.
>
> BWAHAHAHAH!! As if *you're* some kind of threat to *me*? You are probably one
> of the most milquetoast-ish trolls this group has ever seen. Your newbie
> trolling doesn't inspire fear in me or anyone else, you preposterous looney.

The delusion here is that he's one of "power" and people "fear" him. This enforces his delusion that he's better than you.

>

> cause, you miserable freak.

Voobner... How many kids get ripped off by the gumball machine at your local store? Perhaps you should take up that campaign. At least the kiddies will like ya. Think of all those quarters being stolen from innocent children by the industrious gumball cartels? Damn conspiritors... They're main plan is to actually create a gumball that has a tracking device in it which tracks your every move to their headquarters buried miles beneath the earths crust. They will control you with a remote control device that you ingest when you swallow the gum. If you chew the gumball, and someone slaps you on the back causing you to ingest the device it's one of their "evil" operatives.

Only people involved in the cartel know which color gumballs are safe to chew each week. But I may have said too much already. They're always watching... I can't stand it anymore... Perhaps this would be a better cause to fight? The yellow gumballs this week are the tracking devices, and the red ones are the remote controls.

Whatever you do, don't get the big ones... I can't start to tell you about the hazzards and pitfalls that the gumball cartels have in those babies... I've been compiling some statistics and I find that 9 out of 10 "extremely illegal" CB operators actually chew gumballs.

>
> > No, of course we will never see anything factual posted by you.

TO
> JAIL for being so ABYSMALLY STUPID as to suggest I'm breaking laws just
because
> I find you a useless, worthless, lying, egg-sucking annoying dipshit.

I second that observation. He is fun to watch though. He's not fascinated
with aliens or cattle mutilations. He just thinks that everyone who finds
him useless is a criminal. Typical paranoid defense... Oh yeah, and let's
not forget to mention that he thinks there are "paid assasins" out to "get
him" and they've "singled him out"...

Man... I wonder what his impression is of people who make rolling stops, or
drive 5 miles over the speed limit?

>
> > Aaron H. Voobner

Dealers & Techs...Here's one more quote from the "mikes" page of express website (Doozey # 247!!)
They show a mike called the SS2000, which is a chrome mike with a "heavy duty cord". In the description it CLEARLY SAYS " A heavy duty version of the Road King 56 By TELEX.".....
.......Yet, as they surely know, This mike is NOT a roadking 56, it is NOT made or sold or distributed by TELEX (An american company that makes mikes in the USA & Mexico) but rather a knock-off of the Telex Roadking 56 made in the orient by another company!
HOW CAN THEY MISLEAD & LIE on Almost EVERY page of their website like this?? Say anything to get a sale??? I can't believe this! Imagine calling a CB radio a "version of the PC-66XL By Uniden", when they really ship you a GE CB made by a different company, in a different country with different parts!?!
Even if it's a good CB, is that the way to do business?????
BEWARE OF EXPRESS ELECTRONICS!!

are you guys located in longview? are you associated in any way shape
or form with the company called exports r us? isn't your 'company'
doing business out of a truck stop? what's with all these silly
titles? respectability and cb radio shops? boy that's an oxymoron.,
am i missing something here? you know, the guy makes a good case. and
your refutation of said case leaves a lot to be desired. i am still
waiting on good tidings from this. you know the internet has a plus
side for you and a plus side for the rest of us. with the great
advertising medium comes a responsibility for good service after the
sale. now i know and you know, that you all don't really want to give
this guy his money back. after all you are in this to make as much as
you can , as fast as you can, because you don't want to have to go get
a real job with all the real day to day pressures and stresses
associated with it. i can understand that. but with the internet's
endless electronic frontiers making accessibility to your business's
front door, shall we say, easier, for the targeted marketing segment
that you want, it also has a down side for you. and that is, you will
be dragged kicking and screaming into the wonderful wide world of
respectibility whether you like it or not. so be careful here. we are
watching and listening. who knows, one of these days i might actually
get a wild hair up my ass, and email you with a request for one of your
highly over priced x farce amps, but then again, maybe not. but there
is that possibility and the possible loss of sales due to this flap
over a obviously overpriced piece of radio junk, could be the
difference between a good year and a bad one. think real hard about
it,......cd is out.....................

2265. Re: A bust happens from new (read "purposed") law!!

Newsgroup: rec.radio.cb
Date: 2001-01-12 22:28:07 UTC
From: W4JLE <Fred@w4jle.com>
Message-ID: <93o0ff$9ac$1@iac5.navix.net>
Source record: 68265

You got sucked into the wrong argument. many of the jail house lawyers on here feel that they are covered in their illegal activity by such nonsense.

The argument isn't about English or anything else, simply "how can I cover my hindparts if I get caught running my Davemade 32 pill amp.

Carried to the point of further absurdity, "Of course I robbed the bank, can you prove I knew it was against the law?" That's why since the days of old English common law "Ignorance of the law is no excuse" has been a guiding principal.

We recently observed a miscreant emote his life story and problems when faced with a rather large fine. While we could all relate to the misfortunes of this individual, none of them either caused or had any effect on the illegal operation he was charged with. Nor will the myths perpetrated on these newsgroups serve as a defense for transgressions to FCC regulations.

But, then again a pile of profanity filled messages, proclaiming imagined rights to break the law with impunity, may impress the judge.

One could only hope he is the proud possessor of a NoName 32 pound maul and will understand their plight. I don't think I care for the odds on that one!

Just went through this with the FCC directly, there has in fact been a "Notice" from them with a list of exports that are illegal to import, market, and believe it or not, the word "use" was in the letter. The logic is that any 10M rig with the 40 CB channels displayed in any way is evil. The list includes the2510/2600. (The 2600 required the chipswitch as far as I recall). I don't agree with it in any way, shape or form, but....
Asked for a definitive answer as to what in hell I am supposed to do with my radio, along with the rest of the guys who really do use 'e,m on 10? No answer as yet....

Actually Voob... I've been laughing so hard I find it hard to type.

In your last life were you a punching bag or something? Man... You just don't know when to quit.

Now get off the highway and let people drive. Seatbelt or not. You're playing in traffic, and eventually someone will be talking on a cell phone and inadvertently run your paranoid "obey the law" pain in the rear butt smack dab over. And if they know you like we do, they'll probably back up to finish the job. And I'd be willing to bet that the person on the cell phone who ran your tightly wound sorry obsessed lunatic butt over was wearing their seatbelt!

Buckle up yourself, and your kids... Stop trying to get everyone to wear them you lunatic. I honk my horn in your general direction. GET OUT OF THE &#^$ing ROAD!

Now go put on your bicycle helmet and take your tricycle around the block for a spin and think about your actions. You're like the old lady across the street who doesn't have much of a life herself, so she has to cause problems for others.

She actually called the cops while I was away in London last september because I hadn't cut my lawn in 3 weeks... I WAS OUT OF THE GOD DANG COUNTRY... And furthermore, the officers had to tell her there was no law against tall grass.

Voob, you're the same as that crotchedy old hag.

disrupt and draw flames to >yourselves from as many discussions as
possible in a group you have no other interest in. That's what
>separates the men from the trolls. HTH.

Sorry but NOBODY is reading this except you, me, and one or two of the
rabidly illegal zealots (e.g. Twistedhead. Hi Twist!) DeadBeard - you
can strut, preen, puff your chest out, and shout victory from the
rooftops, but (for reasons coming up in today's post) - it is ALL for
naught.

> >I will be referring to this stated intent to disrupt and disrespect
the
> >group throughout this post.
>
> First of all, I take exception to you "speaking for" the newsgroup.

>Tough. I take exception to you speaking for legal CBers like myself.

You can't prove you're legal or illegal.

> No one elected you spokesman.

>You admitted that disrupting the group is your intent. I don't need to
>be elected spokesman in order to >correctly point out that you and your
>friend Gay Doug are trolls of the group.

Please. You're not harming me by calling me names and manufacturing
evidence to support them. Here's the reason: your (and other
anti-Voobner-types) opinion does not matter to me. We'll be exploring
this concept throughout my post today.

>
> If opinions about legal CB "disrupt" the newsgroup and it
> bothers you, you are free to post conflicting opinions. But that
doesn't
> make them any more valid than mine.
>
>Sure it does. You're a demonstrated liar, and therefore your statements
automatically carry less >veracity than mine.

And your statements automatically carry *no veracity at all* - due to
your status as an anonymous flamer called "Sea Captain Deadbeard". You
are a fictional character with a name robbed from 'Robot Frank'. There
is no reason (except for amusement) that ANYONE must answer your silly
charges. You act as if you are a real person with real impact on other
people. You are not. All your phony evidence-collecting and
lie-tracking is automatically voided by the fact that you have no
credibility whatsoever as a trustworthy entity in any arena.
>
> >NEVER have I mentioned Professor in ANY of my posts.
>
> So who DID you mention as examples of good, quiet, pro-legal CBers?
>
>Nobody. I mentioned examples of those who aren't trolls. You'll note
your name is conspicuously absent >from any such list, and for good
reason.

Nagging and name calling isn't proof of anything.

> >Again you have shown your tendency to LIE. How many does this make
now?
>
> How should *I* know what your fabricated little "Voobner-Lie-Counter"
> reads today?
>
>I'll think about posting a Big List of the ones you've been busted in.
>As it stands, the "Lie-Counter" >(which hasn't been "vandalized" - LOL)
>stands at "A BUNCH".

You are free to spend DAYS researching my statements and posting lengthy
annotated commentary about them if you wish. That does not make them
true.
>
> >and at no time did I "slap him around" or "keep him in line", as I so

&#65533;
>Of course you'd say that, because it's the typical mischaracterization
>you trolls are so fond of. He >disagreed rather disrespectfully and
>didn't bother to make a counter-argument.

I don't bother to make many counter-argumuents when the initial
arguments are absurd.
&#65533;
> >Your deliberate mischaracterization is typical of a troll's tactics.
>
> (And how do you know so much about "troll tactics"?)
&#65533;
>Don't forget, I've seen trolls come and go on this group for a number
>of years.

Really. And what was your posting name way back then?

>You are a common troll who feels safe only when he can talk down to
others.

Where are you getting this stuff? Honestly. YOU have NO idea WHAT I feel
or when.

>You have ZERO debate ability

That's why you're spending hours a day debating me?

>and feel intimidated on other groups because you can't be condescending
>there.

AK! Captain! Again...you are projecting how I "feel". (see above)
&#65533;
>To whom (other than YOU) have I been a "thug"?
>
> To anyone who disagrees with you. Sparky was the first to disagree
with
> you. Many to follow.
&#65533;
>You're a liar.

Sparky DIDN'T disagree with you? What REALITY do YOU subscribe to?

>I welcome disagreement, and I mirror what respect is shown to me.

I too mirror what respect is shown to me, however, some of the
disrespect shown to me would be too low-minded to mirror. Disrespect
which you obviously support.

>Unlike you, I can express myself without being a disruptive,
>disrespectful jackass.

AGAIN: Nagging and name calling isn't proof of anything.

>If I am shown disrespect I am fully capable of showing it back, as I'm
>sure you're aware. `,)

There's no audience for empty boasting here, Cap'n.

> >>>Simply put, it's *obvious* you have a grudge against CB,
>
> >> Your saying so doesn't make it true.
>
> >Right. Your stated commitment to DISRUPTING A CB GROUP makes it true.
>
> Show me where I stated that I am committed to disrupting rec.radio.cb.

>Right here, of course:

>"but only if they are not disruptive, and make their
>opinions known respectfully. (Which I think
>is outrageous, pure BS)"

>Opining that nondisruptive and respectful dissent is "outrageous pure
>BS" is CLEARLY such a statement. >Your behavior also stands as proof.

Proof is ONLY in your mind Captain. My statement refelects and rebuts
your idea that illegals will tolerate legal discussion but only if it
"respect" is paid to keyclowns first. I will NEVER subscribe to that
idea.

>That's why I continue to correctly call you a lying troll and you
> prove it
> >yourself time and time again.
>
> You have proved nothing except that you enjoy flaming and then patting
> yourself on the back for it.

>I do enjoy flaming you. You're a troll and you fully and completely
>deserve it.

If you must manufacture a righteous justification for your actions, be
my guest. I don't care if you dedicate your life to me, either.

>If you weren't committed to the disruption of a group I enjoy reading,
>I wouldn't flame you, and you >wouldn't need to say, "no mas, no mas"
>and drop threads quite as often.

As my dad Abner used to say, "strutting and boasting doesn't for
veracity make". And nagging and name calling isn't proof.

> You changed definitions in mid-argument. Of course no one supports an
> intent to disrupt the group. But a growing number support legal CB.

>Only a fool would believe that you and Gay Doug "support legal CB" by
trolling and disrupting the group. >You also failed to name anyone
supporting you two and your trolling.

I don't care what a fool believes or does not believe. Especially when
you are that fool.

> If opinions in favor of legal CB disrupts illegals, that's their
fault,
> not mine.

>>Only you and your friend Gay Doug seem to have the explicit purpose of
>disruption and disrespect by >expressing your "opinions in favor of
>legal CB". Both of you also share the common trait of having
>absolutely NOTHING else to say in the group. Trolls.

I think I had a lot to say. You're always quoting me.

>You accused me of being an "illegal CBer" AND a drug-dealer in response
>to my FIRST POST in which I >ragged on you for LYING. Not only does
>this show your ignorance in calling ANYONE "illegal" based on >usenet
>discussion, it shows that your purpose here is NOTHING but disruption
>and disrespect. You're a >troll with a very thin disguise.

Your righteous indignation act is laughable. Your Big Flame Show
strongly supported illegal CB. And no one called you a drug dealer.
Although you may be one. How can I know? You're not even a real person.

> >I fully support legal CB
>
> No one has ever seen ANY evidence of that, except for you saying it.

>The evidence is that I single YOU out as a troll and I don't attack
>anyone with a legitimate pro-legal CB >argument. The fact is that I
>despise trolls and liars and you have been proven both.

Captain. Again and again, I point out, your showy flames have proven
nothing to no one.

> > and I think being
> >rabid anti-illegal trolls as you and N8WWM are is a waste of time on
> usenet
> >discussion forums.
>
> Fortunately, YOU are not a factor in deciding how people spend their
> time.

> deserve no respect in return.

>I wonder why you aren't out at "coffee breaks" showing your disrespect?
>Perhaps it's because....

[the usual amateur psycho-analyzing, snipped]

Perhaps it's because I don't take the advice of fictional characters who
show up in rec.radio.cb to flame me.

> I stated that hateful, profane and threatening posts
> targeted at me exist. I did not say they "bothered" me.

>Then I ask you why you complain so often and so loudly about them,

Read about it on my web page.

>especially when your express purpose is to generate such flames with
>your disrespect, lies and >disruption as a troll.

That's not my express purpose just because you say it is.

> Clearly you feel YOUR trolling is an honorable "quest". You post your
> opinions, I'll post mine.

>I don't intend to disrupt or disrespect this group, and therefore
>cannot be considered a troll.

Arriving out of nowhere to stir up a flame war - like you did- also fits
the definition of a troll.

>You, however, stated that you find non-disruptive and respectful
>dissent "outrageous BS". That makes >you an admitted troll and worthy
>of all the abuse you receive here.

only your fantasies about me.

> I say "shame on you" for defending hateful, profane, and threatening
> posts. YOU infer that to mean I am "bothered"? That's in YOUR mind.

>And in your behavior, shameful troll. I won't speak against any abuse
>you receive on this group because >you are expressly inviting it by
>trolling. You'll note that NOBODY other than Gay Doug and YOU is
>subject to such widespread, deserved abuse. You also state that none of
>this abuse bothers you, which >marks you as a troll and invalidates
>your complaints about it.

The pro-illegal gang that uses this NG as their clubhouse is predisposed
not to agree with me. There is no logical reason why I (or anyone)
should care what they think.

> >Are any of your "supporters" being persecuted as much
> >as YOU are? I don't think so. That's because they're not TROLLS.
>
> I thought you said I had NO supporters? Contradictory.

>Not in the least. You'll note that the word "supporters" is in "quotes"
>as I don't feel that you have ANY >supporters (other than Gay Doug) in
>disrupting and disrespecting this group as the troll you are.

Again - there is no reason on God's Green Earth to trust anything
alleged by a fictional character named "Sea Captain Deadbeard". The fact
that other fictional characters support or don't support me is of no
consequence in the larger scheme of things.

> >When I pointed out that your calling me a "paid assassin"
> >was a big laugh to the net-savvy, that also disappeared from your
> >repertoire of "persecutions". You're a newbie that didn't realize
that his
lies were
> >so far-fetched, but you wised up quick and said nothing, hoping
they'd be
> >forgotten.
>
> How do YOU know what I realized or didn't realize? Honestly, your
> presumption is ASTOUNDING. As is your erroneous version of events.

>Does this mean that you REALIZED that your lies were far-fetched and
>counted on others to be clueless >enough to buy into them?

That (above) is all a fantasy about me constructed by you.

>In any case, the archives show that my statement of events is VERY
>correct, and I invite all to read them >and get a good laugh at your
>many well-deserved troll-spankings, lie-bustings, and other earned
>embarrassments.

The archives show nothing except a troll having his kicks flaming me.

> I wouldn't be so quick to invalidate attempts to "judge intent" if I
> were you. It's the entire basis of your argument against me.

>Don't be ridiculous. I have your statement that non-disruptive and
>respectful dissent is "outrageous >BS", as well as your many lies
supporting my argument that you are a lying troll.

Well put my statement in a crochet frame because it proves nothing
except that you were astonished that Sparky dared talk back to you.

> Again, which one of us sought out the other?

>Again, I made my first post to call you on an *obvious* lie, and you

>responded not with defense of your >lie but with false accusations and
>implications that I was an "illegal" along with a host of other
>insanely >foolish and totally unfounded bunk. You initiated the
>flamewar.

The above is foolish and totally unfounded bunk. I can't help it if you
troll the group, looking for "lies" to avenge.

> Claiming victory, no matter how vigorously, doesn't make it so.

>True. Actually achieving victory makes it so.

And you have not.

>I seek to show you for the lying troll you are and I claim...

[ridiculous chest thumping, almost snipped]

>a victory-in-progress in this pursuit, as well as obvious victory in
>the flamewar you initiated with >me, as you dropped the threads. Your
>claiming I *haven't* achieved victory doesn't make the archives
>disappear.

I let that one stay - so your vast "audience" can witness your advancing
state of megalomania.

> I see no evidence of your contribution to the group.

>And I see no evidence that you are even *interested* in the subject of
>CB other than as an outlet for >your frustrations. I mostly lurk here
>to learn about radio, except when a troll-in-sheep's-clothing >needs
>his disguise removed.

So you are a fictional character enacting a service for other fictional
characters? Your efforts have proven nothing to no one.

> Show me where I dropped a thread due to your debating skills.

>MsgID:<978969732.3a59e484d805e@webmail.cotse.com>

That post shows nothing but meaningless vituperation on your part.

> >you included this concept in your .sig.
>
> You own no copyright on that concept.

>And before I spanked you in debate over it, you acted as if the concept
>had never occurred to you. >Shortly after dropping the thread, it
>appeared in your .sig as if by magic.

Your "spankings" are fantasies of yours. Sick ones at that.

> I don't have to accuse anybody. Many posters gleefully admit that they
> operate illegal CB or traffic in illegal CB amps.&#65533; Read the NG.
&#65533;
>You accused ME without any such admission, beginning the flamewar you
>have been spanked out of (need >msgIDs?). Lying troll.

Name calling again, Cap? Sounds pretty damn "trollish" to me.
&#65533;
> >after dropping *that* thread, because I also made you accept that you
> had NO right
> >to accuse others of breaking the law without proof.
>
> Show me where I dropped a thread due to your irrefutable logic.
&#65533;
>Another challenge you were issued in -
>MsgID:<978855604.3a5826b4dd645@webmail.cotse.com>

>MsgID:<978896353.3a58c5e1da3ee@webmail.cotse.com

Your imaginary victories.
&#65533;
> >You then started bringing up my name to beat others over the head
with,
> as if they had "cried to me" to come and work you over.
>
> THEY brought up YOUR name. I responded. Sorry if that bugged you.
&#65533;
>You're a liar AGAIN, says this post -
>MsgId:<93g5amfde1@nnrp1.deja.com>

The post demonstrates nothing except a platform for your empty boasts.
&#65533;
> Your swaggering and attacks didn't "prove" anything. YOU initiated the
> flamewar for your own enjoyment.
&#65533;
>I hit you with the TRUTH about your LYING, and that pissed you off and
>made you go off on one of your >wild "you're an illegal" benders, as
>usual. Thus began the flamewar. In case you've forgotten, here's the
>msgID -
&#65533;
>MsgID:<92rck4$tk5$1@nnrp1.deja.com>

Truth is what Captain Deadbeard (an anonymous flamer) decides it is? I
THINK NOT.
&#65533;
> Ahem. You implied Mark Fuller was a "troll".&#65533; He debated the merits of
> legal CB. Your definitions are lacking a certain, uh, objectivity.
&#65533;
>ANOTHER LIE. Show a MsgID with me saying Fuller was a troll, you lying
>troll.

What do you feel Fuller is/was, then?

> If opinions about pro-legal CB "disrupt" a newsgroup entitled
> rec.radio.cb, there's something desperately wrong here.

>Pro-legal opinions don't disrupt this group. Trolling campaigns
>disguised as pro-legal opinions from >those too weak to try them on
>other groups do.

Another unfounded accusation supported by a highly subjective opinion.
But that's your M.O.

> >you are by definition A TROLL. Since you are proud of this behavior,
> >you can be proud of being a troll.
>
> You say I am a troll, I say I am not. So far you haven't been able to
> prove anything except that you are seeking to justify your attacks on
me
> and my opinions any way you can.

>So far you've been busted in more lies than I care to count,

"Busted"? By who? YOU? Feel free to publish whatever you like about me
and call it "busts" or whatever you want. Your opinion does not effect
me. And the opinion of illegal CBers in this newsgroup as to what or
who I am does not concern me.

>you've "suggested" to Gay Doug that he continue his flood-posting and
>trolling unhindered on COTSE >(heh), made clear that you consider
>non-disruptive, respectful
>dissent "outrageous BS",

Doug. You might know a lot more than I do about it.

>and lost every issue debate you've accidentally gotten yourself into.
>Your own behavior exposes you as >a troll. I'm just connecting the
>dots.

You're not doing a very good job of connecting anything.

I am neither influenced nor effected by your boasts of "exposing me" to
an audience comprised of anti-legal CBers.

It's all legal. Legal to own. Legal to sell, even on e-bay.

The only thing that may not be legal is for some to transmit.
Offering one of these radios on e-bay does not in any way
mean that it will be used illegally.

Begin quote:

PUBLIC NOTICE
FEDERAL COMMUNICATIONS COMMISSION
1919 M STREET NW
WASHINGTON, D.C. 20554

May 13, 1996

Extended Coverage High Frequency Transceivers

The purpose of this Public Notice is to clarify the
Commission's rules regarding equipment that is intended to operate in
various radio services in the high frequency radio spectrum, including
"10 meter" Amateur Radio Service (ARS) equipment

The Commission has noted that a number of transceivers
imported as ARS equipment are also capable of transmitting and are
being operated in nearby frequency bands allocated to other
radio services such as the Private Land Mobile Radio Services,Maritime
Services, Auxiliary Broadcast Services, International Broadcasting
Services, the Citizens Band Radio Service, and the U.S. Government.
Operation of this equipment causes interference to the authorized
users of these frequencies. Some of these transceivers are capable of
using output powers or emission types which are not permitted for the
radio services listed above and some are capable of transmitting in
the radio astronomy band where no two-way radiocommunication is
permitted. Some manufacturers are promoting the sale of conversion
kits, or have designed their transceivers such that they can easily be
modified by the users, to extend the operating frequency range into
the frequency bands listed above. In addition, so called "export'
radios which are deliberately designed to facilitate this capability
are also being imported and marketed.

Manufacturers, importers, vendors and users of these transceivers are reminded that transmitters intended for operation on frequencies allocated to any of the FCC authorized radio services listed above, except the ARS, must be type accepted by the Commission for the particular radio service(s) in which they are intended to operate prior to their importation, marketing or use. The Commission considers that the transceivers discussed above are intended to be operated on frequencies where the use of type accepted equipment is required because of the simplicity of modifying them to extend their operating frequency range. Transmitters designed and intended for use only in the ARS must comply with the applicable technical standards contained in Part 97 of the Commission's Rules but are not required to be type accepted.

It is a violation of the Commission's regulations to: (1) import or market a transmitter that is designed or intended to operate on frequencies outside of the ARS bands, if it has not been issued a gn=rant of equipment authorization for the radio servce(s) in which the transmitter is capable of operating; (2) import, market or operate a transmitter that requires a grant of equipment authorization but for which no grant has been issued: or, (3) transmit on a frequency allocated to a licensed radio service without the appropriate Commission issued station license. Violation of the Commission's regulations will subject manufacturers, importers, vendors and users of this equipment to appropriate criminal penalties as provided for by federal law(s), including fines and/or imprisonment In addition, the equipment described above can be seized by, and forfeited to, the government

For further information concerning this Public Notice, contact Gary Hendrickson at the FCC Laboratory, 7435-A Oakland Mills Road. Columbia. Md. 21O46, (301) 725-1585, extension 223, or E-maiI: ghendric@fcc.gov.

End quote

In a nut shell mere possession of one of these radios is not illegal. Transmitting is.

The wanna be legal experts that love to spew their opinions on this
group will remind you that doing this will make you a criminal. But
who cares what they think anyways. They have no conception of the
real world.

In a stock radio your clarifier moves your receive frequency and has
no effect on your transmit frequency. It is a MUST when using
SSB to have the ability to make the receive and transmit frequency
track together with the use of a single clarifier control. This can
only be done by unlocking the clarifier. "Unlocking the clarifier" is
a standard mod that ties TX and RX together and allows adjustment of
both by the use of the clarifier control. Any good tech can accomplish
this mod.

No matter what, especially if you're using the radio in a mobile, the
frequency will drift, so you WILL be moving your clarifier to
re-adjust your reception as your radio warms up. If you want your
transmit to sound just as good as your re-adjusted receive, then you
have to have TX and RX tied together.

In addition, no radios will be on the same frequency especially
if you consider temperature changes. This is critical on SSB. If you
had just two off frequency SSB radios trying to communicate to each
other then the standard clarifier setup will do. However throw a third
off frequency radio in the mix and now it is impossible for any one of
the radios to tune in two radios at the same time. This is not a
remote scenario. It happens all the time with stock radios. Therefore
the easiest solution is to tie the RX and TX together and then
multiple SSB parties can all tune into the same frequency. The exact
frequency is UNIMPORTANT, as long as everyone has the ability to
get on the same frequency.

Hey LZBoyz,
I promised not to get on the Newsgroup, but I feel I need to respond to what you have said. First off, I agree with what you said 150%. You are exactly right in everything that you said except one thing. This one thing is that you said that EEI does not try to help irate customers. This is not true. I personally have hundreds of customers that have actually become friends, simply because I made right of a wrong. I have spent money out my own pocket to make someone happy. Many times in the past, I have paid for express shipping so that a customer can get an item on time. I have calls occasionally where a customer is irate. Many times these customers yell and cuss out my secretary on the phone. My first instinct is to tell the guy off. I mean I am human. I have never done this, though. I can only think of a very few instances when the customer was not completely satisfied after we got off the phone. I wish that I had 100% of my customers that were 100% satisfied. Unfortunately, this is not possible. Many may say that I am bragging on my part. My answer to that is simple. Making a customer happy is what I get paid for. I consider myself lucky for being the sales manager of one of the largest radio dealerships in the US. I go out my way to make customers happy, and I do it often. If this is bragging, then by golly, I'm bragging. What happened to one of our customers that started this mess was and is unfortunate. I wish that the CEO hadn't handled it in the way he did, but you guys don't know the entire story. I could tell you, but I won't because I feel it is between EEI and this customer. However, EEI has very few customers that have complaints. I hear cases about this person being aggravated or this person being screwed by EEI. Many of these are rumors. In all actuality, these rumors are usually started by a competitor, a CB hater, or by a customer that failed to actually call us and attempt a settlement. In most real cases, if these people had only called or emailed us, the problem would have been resolved. Like all retailers, we do have warranty policies. We do stick to these policies in most cases. We will work with customers in different circumstances, but our warranty policy normally stands. I have no problem making deals, or settlements with any customer that feels that he/she has been let down or dealt with poorly by EEI. That is my job. I do not, however, have respect for someone who will not call me or any other EEI staff member in search for an answer. But instead talks trash on channel 19, to a friend, or to a Newsgroup.
In addition Mr. LZBoyz, I would like for you to know that this one situation does not reflect the normal work relations of EEI. In fact, this man was dealt with very kindly and very professionally. He simply chose to be an ass and make a large deal out of a small problem. In fact, many attempts were taken to handle this account before he started this. I know that most of you guys do not like me or EEI because we sell products that you do not like; CB radios. I also know that many of you have your own opinions and that Hell will freeze over before you listen to reasoning.

I've dealt with people like you for years. I have always tried to handle people like you professionally and with all honesty. That is why I am sales manager of EEI. I do not worry about anything that has been said here. I do not worry about what you guys think you know or what you believe you know. The bottom line is this. EEI sales only top brand products. We offer them at the lowest prices possible. We offer one of the best warranties in the industry; which by the way we do keep. The customer in question's order was warranted, but he chose to change our policy to best meet his wants. We have a great customer service department. We have the best technicians in the industry. If you do not agree, call Galaxy USA, Ranger USA, or Magnum Intl. They send us business everyday because they know our technicians our the best.
In closing, I look forward to dealing with our customers; presently and in the future. Also, for those that have a problem with EEI, email or call me. I will try my best to help you however possible. Until then, I ask that you guys settle this. If not, go ahead and get it out of your system. I have personally taken over 450 sales today alone. This is not counting the orders taken by our large sales staff. The people you are reaching believes your nonsense and is only about 2% of our market. The other 98% of our market believes that we stand behind our products and are very happy with our customer relations. What you guys are doing is not effecting any new customer. I have kept up with you guys for years and by next month you will be talking down someone else and will be praising EEI. I do not see that many of you guys (and your acquaintances) will ever be customers no matter what. Do what you feel is necessary. I simply feel that LZBoyz needed to be corrected slightly in his statement. Once again, if I can help you, let me know.

Thanks,
David

2280. EEI Salesmanager

Newsgroup: rec.radio.cb
Date: 2001-01-12 23:28:26 UTC
From: David <sales@exportradios.com>
Message-ID: <PpM76.175$PS2.102733@nnrp3.sbc.net>
Source record: 68281

Hey LZBoyz,
I promised not to get on the Newsgroup, but I feel I need to respond to what you have said. First off, I agree with what you said 150%. You are exactly right in everything that you said except one thing. This one thing is that you said that EEI does not try to help irate customers. This is not true. I personally have hundreds of customers that have actually become friends, simply because I made right of a wrong. I have spent money out my own pocket to make someone happy. Many times in the past, I have paid for express shipping so that a customer can get an item on time. I have calls occasionally where a customer is irate. Many times these customers yell and cuss out my secretary on the phone. My first instinct is to tell the guy off. I mean I am human. I have never done this, though. I can only think of a very few instances when the customer was not completely satisfied after we got off the phone. I wish that I had 100% of my customers that were 100% satisfied. Unfortunately, this is not possible. Many may say that I am bragging on my part. My answer to that is simple. Making a customer happy is what I get paid for. I consider myself lucky for being the sales manager of one of the largest radio dealerships in the US. I go out my way to make customers happy, and I do it often. If this is bragging, then by golly, I'm bragging. What happened to one of our customers that started this mess was and is unfortunate. I wish that the CEO hadn't handled it in the way he did, but you guys don't know the entire story. I could tell you, but I won't because I feel it is between EEI and this customer. However, EEI has very few customers that have complaints. I hear cases about this person being aggravated or this person being screwed by EEI. Many of these are rumors. In all actuality, these rumors are usually started by a competitor, a CB hater, or by a customer that failed to actually call us and attempt a settlement. In most real cases, if these people had only called or emailed us, the problem would have been resolved. Like all retailers, we do have warranty policies. We do stick to these policies in most cases. We will work with customers in different circumstances, but our warranty policy normally stands. I have no problem making deals, or settlements with any customer that feels that he/she has been let down or dealt with poorly by EEI. That is my job. I do not, however, have respect for someone who will not call me or any other EEI staff member in search for an answer. But instead talks trash on channel 19, to a friend, or to a Newsgroup.
In addition Mr. LZBoyz, I would like for you to know that this one situation does not reflect the normal work relations of EEI. In fact, this man was dealt with very kindly and very professionally. He simply chose to be an ass and make a large deal out of a small problem. In fact, many attempts were taken to handle this account before he started this. I know that most of you guys do not like me or EEI because we sell products that you do not like; CB radios. I also know that many of you have your own opinions and that Hell will freeze over before you listen to reasoning.

I've dealt with people like you for years. I have always tried to handle people like you professionally and with all honesty. That is why I am sales manager of EEI. I do not worry about anything that has been said here. I do not worry about what you guys think you know or what you believe you know. The bottom line is this. EEI sales only top brand products. We offer them at the lowest prices possible. We offer one of the best warranties in the industry; which by the way we do keep. The customer in question's order was warranted, but he chose to change our policy to best meet his wants. We have a great customer service department. We have the best technicians in the industry. If you do not agree, call Galaxy USA, Ranger USA, or Magnum Intl. They send us business everyday because they know our technicians our the best.
In closing, I look forward to dealing with our customers; presently and in the future. Also, for those that have a problem with EEI, email or call me. I will try my best to help you however possible. Until then, I ask that you guys settle this. If not, go ahead and get it out of your system. I have personally taken over 450 sales today alone. This is not counting the orders taken by our large sales staff. The people you are reaching believes your nonsense and is only about 2% of our market. The other 98% of our market believes that we stand behind our products and are very happy with our customer relations. What you guys are doing is not effecting any new customer. I have kept up with you guys for years and by next month you will be talking down someone else and will be praising EEI. I do not see that many of you guys (and your acquaintances) will ever be customers no matter what. Do what you feel is necessary. I simply feel that LZBoyz needed to be corrected slightly in his statement. Once again, if I can help you, let me know.

Thanks,
David

Voob... Yer really getting interesting... He didn't say he was buting any federal laws... You don't have any proof. He just offered you advice. And yet, you accuse HIM TOO!

Incredible... Simply astounding. Your paranoia seems to trigger your ego into accusing anyone that replies to you as being a criminal.

You are really funny.. So tell me, why is it that you think he should "fear" the authorities? Has he broken any laws? Do you have proof? Again, you accused another person.

Gadzooks man... SEEK PROFESSIONAL HELP...

Oh, now their elderly and defenseless... Voobner move if I ever saw one...
Use his own family as human shields... Man, that's class... And seeing as
his uncle is a ex military MP, he'd need to check out your ID and such...
PARANOIA!!! Holy smokes...

Next time someone asks for my ID when I purchase some beer I'm going to say,
"Am I being Voobnered?" I hope the coin the phrase...

Cop will pull me over, "License, registration, and insurance card." ....
"Am I being Voobnered?"

X-Stn-Info:

http://www.hyelectronics.com/

Duly reported to the FCC.

You gayboys can kiss my ass. You can post my face ALL over America if you want, 1mangayboy,
So what?

You dumb ass, it isnt even me...HARDEEHARRHARR...Life is good when you aint a MORON who
is inferior to people with Down's syndrome, like you. You jackasses bought that troll hook,
line
and sinker. HAHAHHAHAHAHAAHHAHAH HARDEEHARHAR...You have been set up by the best, turd
brain.

You aint nothing but a sissy boy with mental problems. You and all your butthead ILLEGAL
KEYCLOWN BUDDIES!

I hope you do show up in Dayton. I will be there. Let's see if you got the guts to come up
to
my face, sissy boy. Start some stuff with me, gaylord...go ahead. HAHHAAHHA..You know yer a
cowardly little sissy boy, you hide behind a false ID and attempt to mess with me. You
cant,
though. That is because you are my entertainment, you idiot. I MISSED your ignorant
postings the
last few days...I actually had to go to the joke a day webpage for entertainment...shoot
that
was lame. Post some more, idiot. Post all you want. Thank you for the entertainment. You
cant

stop me and I laugh my butt off at you. Keep it up, it is quite funny. It also proves my exact
point about you CB dorks.

Attempt to get me off ANY ISP on earth. I don't care. There are a million of 'em, and you gaylords dont have a clue where or who I am. I am smearing your face in dog crap and you cant do
anything about it.

I will have a present for you very soon, sissy boy. Enjoy your fun while you can.

You are impotent and moronic, Phoneyboy.

Actually he is a rarity of the specie who actually thinks for himself
rather than have Jesse Jackson, Al Sharpton, the NAACP, etc. tell him
what he should think. Tune in and be pleasently surprised.

They may no be listable on e-bay but they are not illegal They are legal to own. If you don't believe me then contact your local FCC field agent and ask him if you can purchase, for example an AR3500.

I did exactly that, and got approval to purchase such a radio. It is not illegal to own such a radio.

2303. EEI salesmanager

Hey LZBoyz,
I promised not to get on the Newsgroup, but I feel I need to respond to what you have said. First off, I agree with what you said 150%. You are exactly right in everything that you said except one thing. This one thing is that you said that EEI does not try to help irate customers. This is not true. I personally have hundreds of customers that have actually become friends, simply because I made right of a wrong. I have spent money out my own pocket to make someone happy. Many times in the past, I have paid for express shipping so that a customer can get an item on time. I have calls occasionally where a customer is irate. Many times these customers yell and cuss out my secretary on the phone. My first instinct is to tell the guy off. I mean I am human. I have never done this, though. I can only think of a very few instances when the customer was not completely satisfied after we got off the phone. I wish that I had 100% of my customers that were 100% satisfied. Unfortunately, this is not possible. Many may say that I am bragging on my part. My answer to that is simple. Making a customer happy is what I get paid for. I consider myself lucky for being the sales manager of one of the largest radio dealerships in the US. I go out my way to make customers happy, and I do it often. If this is bragging, then by golly, I'm bragging. What happened to one of our customers that started this mess was and is unfortunate. I wish that the CEO hadn't handled it in the way he did, but you guys don't know the entire story. I could tell you, but I won't because I feel it is between EEI and this customer. However, EEI has very few customers that have complaints. I hear cases about this person being aggravated or this person being screwed by EEI. Many of these are rumors. In all actuality, these rumors are usually started by a competitor, a CB hater, or by a customer that failed to actually call us and attempt a settlement. In most real cases, if these people had only called or emailed us, the problem would have been resolved. Like all retailers, we do have warranty policies. We do stick to these policies in most cases. We will work with customers in different circumstances, but our warranty policy normally stands. I have no problem making deals, or settlements with any customer that feels that he/she has been let down or dealt with poorly by EEI. That is my job. I do not, however, have respect for someone who will not call me or any other EEI staff member in search for an answer. But instead talks trash on channel 19, to a friend, or to a Newsgroup.
In addition Mr. LZBoyz, I would like for you to know that this one situation does not reflect the normal work relations of EEI. In fact, this man was dealt with very kindly and very professionally. He simply chose to be an ass and make a large deal out of a small problem. In fact, many attempts were taken to handle this account before he started this. I know that most of you guys do not like me or EEI because we sell products that you do not like; CB radios. I also know that many of you have your own opinions and that Hell will freeze over before you listen to reasoning.

I've dealt with people like you for years. I have always tried to handle people like you professionally and with all honesty. That is why I am sales manager of EEI. I do not worry about anything that has been said here. I do not worry about what you guys think you know or what you believe you know. The bottom line is this. EEI sales only top brand products. We offer them at the lowest prices possible. We offer one of the best warranties in the industry; which by the way we do keep. The customer in question's order was warranted, but he chose to change our policy to best meet his wants. We have a great customer service department. We have the best technicians in the industry. If you do not agree, call Galaxy USA, Ranger USA, or Magnum Intl. They send us business everyday because they know our technicians our the best.
In closing, I look forward to dealing with our customers; presently and in the future. Also, for those that have a problem with EEI, email or call me. I will try my best to help you however possible. Until then, I ask that you guys settle this. If not, go ahead and get it out of your system. I have personally taken over 450 sales today alone. This is not counting the orders taken by our large sales staff. The people you are reaching believes your nonsense and is only about 2% of our market. The other 98% of our market believes that we stand behind our products and are very happy with our customer relations. What you guys are doing is not effecting any new customer. I have kept up with you guys for years and by next month you will be talking down someone else and will be praising EEI. I do not see that many of you guys (and your acquaintances) will ever be customers no matter what. Do what you feel is necessary. I simply feel that LZBoyz needed to be corrected slightly in his statement. Once again, if I can help you, let me know.

Thanks,
David

Tim, FYI. Read the FAQ below.

Thanks,
-Aaron-

---

http://www.cotse.com/abusepolicies.html

Note to those using our services:
We offer Pseudo-Anonymous services. We protect your privacy, none of our services brand your IP to any outgoing data. Although even with logs there is doubt to your identity, you are not 100% anonymous. To see the information we know about you, go here. If you pull a bonehead move that gets you in legal trouble you will have to deal with the consequences. We will surrender logs we have on subpoena. We do not keep logs of the web traffic for very long due to the size of these logs and the volume of traffic, but we do utilize logs to analyze traffic patterns. Logs are now on a seven day rotation. The only information we know about a poster is the IP address along with date and time they accessed the page. We do not share any details of this information without a subpoena.
There are some exceptions to this:

* If you send a bomb threat or death threat we will just hand over your information to the proper authorities.
* If you use our web proxy to mess with guest books, cgi chats, web discussion boards, or other items where you can input data on a web site, we will just hand over your information to the administrator of the server involved.

We do NOT tolerate the use of our services in this manner!

Notes to All:
Webmail & Usenet Posting:
This service is similar to hotmail. We are strict on spam and will terminate an account for spamming. Our privacy policy for webmail is the

same as the other services, which means that we will not give out any information we have without a subpoena, with the exception of bomb threats and death threats. We will notify our user of subpoena should one be issued for logs. Please see below for issues relating to Usenet posting
Web Anonymizer:
We offer this so that you can proxy off us in case you are unable to get to a certain site from where you are. Some use it because as such it also provides a shield against potentially malicious sites. It also provides a level of anonymity from these sites. We do require a subpoena to release the IP with the same exceptions as above.

Usenet specific Net abuse FAQ

NOTE: Complaints received regarding Usenet postings that do not violate any of our policies will be copied to the account being complained about when we respond.

Q: Someone is forging me, will you block that user from posting?

A: You can't forge from cotse. All posts are stamped with the cotse account that posted it. The e-mail address must be a duplicate to be a forge. Simply having the same nick or moniker in the from line is not a forge.

In extreme circumstances (it must be obvious and it is our judgement that is used) we will terminate an account if a user is deliberately spoofing you to cause trouble.

Q: Will we terminate someone's account because they posted something you found offensive?

A: No. Usenet is a global unmoderated discussion group, there will always be something someone finds offensive in this type of environment. The answer to this is to use your kill files. Kill file what you find offensive.

Q: Someone is using our service to troll, will we terminate their account?

A: No. It takes two parties to troll, one to post a troll message and one to reply. Both those that post the initial message _AND_ those that reply are responsible for the trolling. Nearly every time we have investigated a complaint it is near impossible to tell who is trolling who, so we do not involve ourselves in these situations.
If you have a troll the best action is to ignore it. An ignored troll WILL go away. Everyone that says this is not true has a troll that people are responding too. You feed your troll you keep them. If you succeed in costing it an account, it will come back with two. Kill filtering is the only way to stop it.
Q: Will we terminate a users account if they spam?

A: Yes, if it is really spam. Our definition of spam is lots of messages essentially saying the same thing. When the BI crosses 20, we take action. We follow the BI in news.admin.net-abuse.usenet and automatically take action when a user exceeds a BI of 20.
We will not take action because a user posted something you think violates some charter and therefore have labeled this post spam. We will take action if the user is flooding your newsgroup.
If the user is posting a URL:
We will take action if it is posted to many groups. We will also take action if it is a commercial advertisement posted groups where the general topic of the group is completely unrelated.
Users:
If you are selling something and want to ask the newsgroup you hang in if they want it, prefix it with FS: in the subject.

Q: What should I do about a user that posted links to child pornography?

A: Report them to us, we'll terminate their account. Also report them to the service they advertised.

Q: A user is taunting me, will you terminate their posting abilities?

A: No. Use your kill file. Discussions often degenerate into name calling on Usenet when there are disagreements. If the user is venturing into actionable harassment seek legal solutions, we will comply with a subpoena in legal situations and provide you with the IP that posted the offending post.
If the user violates any other of our policies we will take action.

Q: A user posted my personal info, will you terminate their account?

A: Yes. While it is not illegal to post publicly available info, if they are doing it as a means to harass and attack you we will terminate their account. Please note that personal info means name and address or phone, not name alone.

Q: The user is posting off topic, will you kill their ability to post?

A: No. First, we are not the topic police and have no idea of what is or is not on-topic for your newsgroup. I have seen groups with as many as three charters, all claiming to be the _only_ real charter. Second, in every newsgroup that has complained about off topic posts there have been "regulars" who routinely post off topic discussions. Singling out one particular user is unfair.

Q: This user is posting hateful racist messages, isn't it your responsibility to stop that?

A: No. Although many find some views offensive, it is just a viewpoint. If it was illegal in the US to have this viewpoint then white supremacists, black militants, extreme nationalists, etc. would all be in jail. It is when that view becomes an action that it should not be tolerated. If you are being attacked and it has crossed into a legal issue, then you should be pursuing this in a legal forum, we will comply

with a subpoena for our logs.

There are instances, however, that we feel cross bounds and we will act on, that is deliberately posting racist messages to ethnic or religious groups attempting to start a race war. Way out of bounds posts may also get an account terminated.

Q: But this is against our charter, aren't you going to stop it?

A: For the most part charters are a guide. Especially in the alt hierarchy. We are more strict regarding the big 8.
Q: This user is forging approval headers to avoid the moderation in a moderated group. Will you terminate their posting ability?
A: You can't forge approval headers from within cotse webmail.

Q: But this user is morphing, using other services, etc. just to avoid our kill filters. Kill filtering does not work!

A: This shows that they do work. He's annoyed and trying to get noticed. Quietly keep kill filing. Kill filter him on our service too, he can't change his from e-mail address. You've won.

Q: This user is slandering me, I'm suing you and him for slander if you don't stop this!

A: First, slander is spoken, it's libel that is printed. Second, if the user is libeling you then you should seek legal action against that user. We have no way of determining whether you have a civil libel case or not. We will comply with a subpoena for our logs. But if you are seeking legal action you should act quick, it will only hurt your case to wait.

If it violates any of our other policies we will take action.

Q: This user hacked me, it's your fault!

A: Cracking is criminal behavior, you should pursue this with the proper authorities. If it came from one of our servers please provide relevant logs. We will take action fast. If the attack did not come from one of our machines, you should be pursuing this with the ISP where the attack originated. If it originated from us we will give the admin of the server attacked the IP that came to us.

Q: Isn't it totally unfair of you to expect me to take responsibility for a user who is annoying me?

A: No. Again, this is why kill files exist. If you don't like what someone says kill file them. It is 100% your responsibility to police your usenet use by the use of kill filters and ignoring what you find offensive. What you find offensive is not necessarily what another would find offensive, and it could be that they find your opinion offensive to them, therefore they have as much right to their opinion as you have to yours.

If a user has crossed the line into actionable harassment or libel, then it is your responsibility to pursue this is a legal forum. We will comply with a subpoena for logs. We will also act if they violate any of our other policies.

Q: My news reader does not have a kill file, therefore isn't it your responsibility to accommodate my poorly chosen software?

A: No. There are many freeware news readers with kill filter abilities, install a different news reader. If you can't for some reason, then visit www.nfilter.org, this is a free kill file program that will work in conjunction with almost all news readers giving them greatly enhanced kill filter abilities.

Q: Why are your policies so against me?

A: They aren't. For the most part, Usenet is a global unmoderated discussion forum, you chose to participate in it, you need to understand the workings of it, it will not conform to your desires.
Someone will always have an opinion that differs from yours. Someone will always have an opinion you find offensive. Someone will always use some kind of language you find offensive. If you are opinionated someone will always taunt you for it.
Learn the use of a kill file, this is why they exist. Only you know what you do and do not find offensive, exercise your right to decide what you view through the use of a kill filter.
Q: If I threaten to sue you, will you react faster or more favorably?

A: Definitely not! If you threaten to sue then we will not even respond to you. By threatening to sue you place us in a position of being a defendant. By you doing this we have no option but to ensure that all correspondence goes through your lawyer. It is then up to you to have your lawyer contact us. It is not up to us to have our lawyer contact you.

The same is true for criminal issues. If this is a criminal issue we will only accept correspondence from law enforcement. If you tell us it is a criminal issue we cannot even respond to you.

If you have any questions about usenet practice, see the what is Usenet FAQ.

If you have questions about the BI or feel that these policies are unfai

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1206432178

SONY ICF-2010 Air/FM/LW/MW/SW PORTABLE RADIO
Item #1206432178
Photo & Electronics:Consumer Electronics:Radio: Ham:Receivers

Currently $159.49 First bid $100.00
Quantity 1 # of bids 5 bid history
Time left 1 day, 20 hours + Location Windy City

Sony ICF-2010
covers AM (LW/MW), FM, Shortwave (w/USB & LSB for SSB)& Air
continuous coverage from 150-29999.9Khz, 76-108Mhz, and116-136Mhz
dual conversion receiver with quartz digital synthesis tuning
32 programamble memory presets
tuning: direct entry keypad, memory scan, or with dial
fast/slow dial tuning with lock setting to prevent accidental station change
syncronous selectable sideband tuning on SW to eliminate interfernce on
ajacent frequencies
narrow/wide bandwidth switching
clock w/ 4 programmable timer (alarm) settings and sleep button
LCD read out for frequency, time & memory channel number
green& red led's for battery level indicator and tuning meter
includes: external antenna w/ jack adapter, ac power adapter, sholder
strap, and owner's manual
requires 2 'AA' batteries for memory & cpu & 3 'C'batteries for portable
operation
This unit is in perfect operating condition. Minor cosmetic
imperfections: there is a bit of dust under the display glass, some
small scratches can be found on the unit, and the attached telescoping
antennais missing its tip.

Guaranteed NOT DOA. Buyer to pay actual UPS shipping plus insurance.
Paypal accepted.

On Jan-12-01 at 18:46:00 PST, seller added the following information:

Someone asked about tuning accuracy.

According to page 11 of the manual:
"...frequency is tuned in and displayed at the following intervals,
depending on the bands.
AM: 0.1 kHZ (w/the manual tune mode set to slow)
1 kHZ (w/ the manual tune mode set to fast)
FM: 0.05 MHZ
AIR: 0.025 MHZ"

Not sure what an AR3500 is. But I suppose you'll be using it as a
doorstop? Or maybe just for "receiving"?

Careful folks,

There are still illegal CB amps being sold on eBay. If you were to buy one and use one, you would be in violation of FCC rules as well as being an inconsiderate slob to your CB neighbors. Here are examples of two such amps reported and slated to be pulled off the auction block later today. (Item #'s witheld to avoid direct bids).

>Not sure what an AR3500 is.

Ranger AR3500 Ten meter radio. One of the original
10 meter radios

> But I suppose you'll be using it as a
>doorstop? Or maybe just for "receiving"?
>
>-Aaron-

The point is it can legally be bought and used
this way. It is only e-bays policy that stops this radio
from being listed. It has nothing to do with illegality
of the product or its sale.

Yes, he was murdered, and most likely by powerful forces within the establishment. Here the King family and I agree.

> Just the same, the shot that killed him did
> not have the desired effect - instead of quelling the outrage and cries
> for freedom, they made MLK a martyr and galvanized the whole movement
[...]

The movement described was more against freedom than for it; see

http://www.revilo-oliver.com/Kevin-Strom-personal/Beast_as_Saint.html

and making King a martyr may have been one of the motivations for the killing.

With all good wishes,

But that would not be true - the nation does not commemorate MLK. The nation commemorates a false, glorified, media-created, image of MLK (and a media-created, negative, image of whites).

In reality, Monday is just another day to trash whites with hate-filled, politically correct, rhetoric (a prelude to the white trashing orgy of February's Black History Month).

this is also interesting stuff.

Q: This user is slandering me, I'm suing you and him for slander if you
don't stop this!

A: First, slander is spoken, it's libel that is printed. Second, if the user
is libeling you then you should seek legal action against that user. We have
no way of determining whether you have a civil libel case or not. We will
comply with a subpoena for our logs. But if you are seeking legal action you
should act quick, it will only hurt your case to wait.

When and exactly where in Dayton is this hamfest? I might show up with a video camera and record the carnage. In a fair fight, my money's on Doug. In a bushwhack or ambush, I'd have to put money on the illegals. Afterwards we could all have a big "rec.radio.cb kinship dinner" over at some nice restaurant.

It really only matters if a customer orders something and he is pleased with what he/she ordered, then that is what counts. There are going to be times where a customer is displeased with our service as there are in any company. You try and deal with the matter as diplomatic as you can and learn from every instance.

Dave,

Wow. It's a big business. How many of those orders are for illegal CB
amps or export CB radios sold to US users?

Well, as you clearly state, the SS2000 is a heavy duty version of the Road King 56 by Telix. This statement in no way says the mic in question is made by Telix.
Upon observation, this mic is just as it is quoted.

We are not in any shape, form or fashion associated with Exports R Us. In fact, our business is all done from a huge wharehouse in Longview which does not even have a walk in and buy storefront.
There is a picture of our wharehouse on the website, and it is our actual location.
As far as this situation goes, all you know is what this guy has said on the group and in no way know the facts of the matter. If you believe everything that you hear, without giving it some sort of investigation, then I think the world is in sad shape.
Everyone can for a view on this matter from what has been posted, and I know for sure, some of the things that fly around in this group are so rediculous it is very hard to say a word without someone twisting it to their needs and making mountains out of molehills.

We will deal with this matter the best we can, and it is not because of what someone said on this group.

Holy smokes, I didn't say anything about proving anyone guilty. "Proving guilt" and stuff in flame-wars is that Captain guy's obsession. I don't know what anyone has told you about mean old Aaron Voobner, but I am really a pussycat. I am certainly not going to try and convict you of any crime on rec.radio.cb. I was just asking what a guy who has no intention of getting a ham license does with a brand-new expensive ham radio. You can be straight up or you can take the 5th. Doesn't matter to me.

A: No. It takes two parties to troll, one to post a troll message and one to reply. Both those that post the initial message _AND_ those that reply are responsible for the trolling. Nearly every time we have investigated a complaint it is near impossible to tell who is trolling who, so we do not involve ourselves in these situations.
If you have a troll the best action is to ignore it. An ignored troll WILL go away. Everyone that says this is not true has a troll that people are responding too. You feed your troll you keep them. If you succeed in costing it an account, it will come back with two. Kill filtering is the only way to stop it

Try it it will work, no one has the will power to ignore this dildo.

This statement should be the last thing any of us should have to read on the subject of M.L.King. The last thread was getting wayyyyyyyy out there.

Here goes:
YOU WOULD HAVE TO BE REALLY FUCKING PREJUDICED TO NOT TO TAKE A DAY OFF........FOR ANY REASON ! ! ! !

Train

2355. Re: IMAX 2000 vs. Maco V58 - opinions & RFI

Newsgroup: rec.radio.cb
Date: 2001-01-13 12:35:47 UTC
From: Jay in the Mojave <jay123a@qnet.com>
Message-ID: <3A604BA3.C7C6A1C8@qnet.com>
Source record: 68468

Hello Bill: It may be true that a bad or corroded connection in the antenna somewhere may cause unwanted signals to radiate. But I have never seen that or heard of it. I would think that a bad connection would generate noise a lot more than harmonics. I can't see how harmonics would be generated.

I have "Band Sawed" opened many A99 type antennas to look at the impedance matching device, or attempt a repair. I have seen just one manufacturing flaw, were the shield had come lose from its soldered connection, causing the antenna to have a SWR 57 to 31 (meaning very bad). But most A99 type antennas have pretty good connection between the sections. I have seen A99 antennas have loose (not tighten sections) sections, that eventually broke due to high winds, but this isn't the manufactures fault.

I think a after market, high power handling, low loss, impedance matching circuit could be sold for the A99 type of antennas. But the cost of the labor and parts would be way more than the original cost of the antenna, possibility.

Actually, I think he was using a computer at home. The message was sent from the "cts.com" server, not from a military ".mil" server. He only filled in the organization block of his email program with "COMNAVSURFPAC," which I doubt would interest the commander.

It's a damn good thing you didn't go to work for GM 'cause I did work for them in the eighties and was making good bucks until the layoffs came..you know, last hired, first fired. A decent severance package for only a short stint there, though. I knew deep down I should have bought some land there at the time and sat on it. Could have retired now if I would have. But I had it by that time and headed for cheaper living costs as compared to northern Cal. Working conditions were indifferent. If you didn't speak fluent Espanol, you were usually outside the majority clique, as anyone not Mexican was the minority, so us 'non mexicans' all hung out. Good luck with starting your hobby again. I am certain you will excel at this as well. The field needs more folks like you who consider the customers needs first. Too many "techs" talk the talk and when it is time to actually produce and they are put to the test with a challenge, lipservice that would make a politician blush is usually offered up. What's your twenty, anyways?

> Hey Doug, I thought about bidding on it. Will ya take my money?

I just heard this week that twa is auctioning off itself because of
bankruptcy.

We have only two such companies where I live, Delta and US air. But,
the newsreport says that when twa auctions itself, that there will only
be three companies, and with three companies, that prices will go up.

What can I do to keep the third company from locating in my city to
prevent prices from going up.

and what can I do to find out which company will buy twa. For
instance, if it will be that central American airline, Panama. And if
so, will it be as bad on the prices if they are not a US company, and
never come to my city? Or where the company is, it does not matter,
and prices will go up wherever the buying company is

With all due respect, CD, I think that you brought up a verrry excellent and candid point to be considered. I know nothing of this business other than what I read here. I make no assumptions and stick to the facts. Facts that we ALL agree on in this instance: said customer bought item at express, unsatisfied with item, so returned it and asked for refund. Now the conjecture. Both sides were upset and the possibilty exists that both sides said stupid things at one point. Now, it appears that damage control (Ted) has taken over and is attempting to satisfy the customer, and quite well, so it appears. We are all anxiously awaiting the results. At this point, giving the benefit of the doubt to the company that they will rectify the situation, they make a second REPEATED error that may have nicked an artery this time. Mr. Chris gets out here (bad move, I just got done saying what a brilliant move it was to put someone with a tact for diplomacy at the spokesperson helm) because he feels he needs to clarify an issue, and in turn, CALLS THE CUSTOMER AN ASS! What the hell is that? After what appeared to be a sincere move on the companies part to rectify this situation, the customer is now an ass? Even if he is, for your company to blatantly and publicly endorse the fact is akin to horrible business practice. Even if he was dead wrong, you don't treat a customer like that. Seems to me this one of those times that you would be better off taking an immediate loss to the customer at this point and just cut your losses now. You are wrecking what's left of your reputation, and I just became aware of you in the past couple of days.

It doesn't bother me being the way I am. I don't care if I make anyone mad as others can get away if they don't like me. On the other hand, I can't get away from myself and might as well accept myself for the way I am and someday if I want to be as broadminded as you, I reserve that option. Until then, get off my back monkey.

You will hear a lot of opinions on this one, but we have yet to ever see a "reverse-engineered" unit with a technical evaluation by a second party. We have had fantastic luck out of this mod, as it was very well researched before we opened it up for resale to ourr customers. You may try our web forum for the most up to date opinions, and what radios it works best on, and which ones it does not help much. I'm afraid you will get a very uneducated opinion on rec.radio.cb it seems this newsgroup has become more of a circus than a tech support area.

hey i got a question for ya. why is it when a slowdown comes, the car
makers always cut expenses by laying off workers? why don't they lower
their damn prices? i'll tell you why. they want their prices to remain
the way they are now and higher in the future. the american public has
already bought into these rediculous prices for these cars already , it
seems. i mean $40,000 for a damn car!!!! where does it end??? when
only rich people can afford a decent car??? i tell you . i noticed
this week they are whining about a lack of sales. and the first words
out of their mouths are layoffs. heck if you want to move the excess
inventory and still make money and keep people working then have a big
honest to goodness sale, but oh no, we want those artificially high
prices to stay that way. you know speaking of high prices, have you
priced those xfarce amps at express electronics lately, they are out of
site,.....cd is out.......

Source record: 68484

Greetings!

You're going to find the tubing to be a lot longer than using ordinary solid wire.

I believe you're making a simple dipole out of this concept.

As far as mounting, if you plan on keeping both sections vertical - one on top of the other, this is the easy part.

If you wish, and not sure if you can try this, is to make the dipole insulated from the mast using a section of wood, like a 2X4.

Spar it too, using a varnish on the wood to seal it from the elements and wind rain sleet e&c...

Got any conduit holder clamps, straps? These can be used to tack the conduit to the board. Using a small sheet metal screw thru the clamp to the conduit will keep the tube from sliding on you. Drill a tapping hole to allow the screw to bite the metal thru the clamp and let the clamps hold it in place. Of you can skip the clamps and drill straight thru using a bolt and washers with a nut to hold onto the 2X4.

As far as spacing the "gap"? Try about 1/8 ~ 1/4 inch first. As far as making good contact, see if you can use a bolt and ring lug on both ends of the gap to mount the center to the top section, then the braid side to the bottom. Drill thru the conduit to mount the bolt thru the conduit, use two nuts, one for the connection to the ring lug side, and the other nut to hold it to the 2X4. Like you're making terminal connections. Use the 1st nut to offer a means to hold the ring lug to the conduit by installing it inside the conduit tubing up against the head of the bolt on the tubing. This way you get mounting and connection points that won't shake loose on you.

As far as trimming, well you seem to have the tools necessary, just use the tubing cutter and trim this to length - cutting off equally on both tubing sections. SWR? Plan on about 1:1.7 or thereabouts. You can get it lower, but you should try to trim it down with it assembled and mounted in location - so if you get it below 1.7 - you're fine.

As far as routing the coax? A good trick is to use the lower tubing section for this - using the inside of the tubing to shield the coax from the elements. You also can remove some unwanted radiated signal from the tubing if you route the coax thru the bottom tubing section.

Then you simply "dangle the coax" off at an angle using strain reliefs and drip loops to keep the coax dry.

Sealant? You'll need it on the coax, at the antenna terminals. So
anything like "Marine Goop" or "Goop" will work in keeping the coax
sealed. Seal it well too.

Message-ID: <7f616tcip8v8asuldguit4tvtdea8tlpev@4ax.com>
Source record: 68485

Greetings!

A lot of "crystal" changes, the piggyboard that is used has a trimmer cap used to set the frequency when the crystal is switched in. May not be the best but if he has that type of conversion kit, the trimmer cap is the one that needs to be adjusted.

Otherwise, "tweaks" to CT2, L30 and L31 will need to be done. All on the main board for the 148.

Not a big deal.

On Fri, 12 Jan 2001 18:26:29 -0500, while the modem was ice fishing with the Mouse, tnom@mucks.net dissertated the following:

> E) The radio will include a registration card that will make it easy
for the
> Republican Senators that wrote & authored most of the CB & Scanner
restriction
> laws to find you........
>

Here's the run-down of features on the new Ex Vice President Al Gore AMATEUR Radio:

A) Even though most people bought the other model radio, (The GW Bush), this company will never the less claim that they have the most popular radio made. They want to count only the radios that they deem as valuable and discount other radios that don't have the same features. Like military radios. Furthermore, they will count dead radios. Pregnant radios, dimpled radios etc...

B) The instruction book is full of mis prints and "false truths" like "full coverage" when the band is only covered in certain areas, and only allows for "full coverage" if you qualify as a recipient of public assistance.

C) The volume knob and channel dial is on the front of the radio, but will only change volume or channel when a focus group is appointed to discuss if the change "feels right".

D) The radio will be manufactured in Red China because Pres Bubba decided to sign the free trade agreement with Red Chicom. Of course the radio will be environmentally sound, and use minimal power and output a maximum of 1 watt to accomodate the environmentalist whackos preventing any power plants from being built. It will operate on 6 volts because on the west coast that's all about what comes out of a wall outlet nowadays.

E) The radio will include a registration card that can be redeemed for 4 blank absentee Palm Beach county ballots and some bus tokens.

F) The channel dial on the radio will flip flop between channels as the focus group makes progress on what "feels good"

G) On the circuit board there is silk screening which just under the Made in China says, "Nationalize all industry" whereas on the GW Bush model it says, "Tax Cut" under the "Assembled in China" silk screening.

H) The radio was engineered by dropout college students from both the divinity and legal studies.

I) The radio will have both SSB, AM, FM, and spread spectrum transmission methods. Oh wait, it's printed that way in the manual, but there's an addendum that states, "Sorry, did we print that? It's a false truth. AM and DM are all that is available." DM is gone over in feature "M"

J) When you purchase the radio, if you are homeless you get a coupon to keep the shopping cart.

K) The radio manual doesn't lie. At least, not that the manuals creator knew about.

L) The channel indicator will often indicate that you are on one channel, and actually be transmitting on another. For instance Channel 19 will indicate you're receiving on channel 1 and transmitting on channel 9. This can be so that if someone is on channel 1 saying something profound, you can immediately re-phrase and repeat on channel 9 and deem it your idea.

M) A new modulation scheme known as Democratic party Modulation is actually a new form of Sympathetic Modulation. It rides on the back of carrier waves out there taxing their range. It generates a warm soft fuzzy background sound that immediately puts your listeners at ease and allows you the benefit of saying how you "feel their pain". Although this form of modulation will get you greater range and acceptance it only works when someone else is transmitting and your audience is mainly sheeple. Use sparingly.

N) When operating the radio you must remember to wear your protective helmet, and rubber glove while operating the microphone. Those harmfull radio waves and the possibility of getting zapped by lightning are awfull hazzards, but when using this radio you can be comforted in the thought that you're protected from those harmfull elements by taking the precautionary

measures as set forth in manual Page 296 paragraph IV sub paragraph A.

O) The radio has an ozone generator attached to the final transistors. When it's detected that you're using Democratic party Modulation the unit will generate ozone to protect you from the harmfull rays of the sun. It also helps stabilize the earths orbit around the sun. It's rumored that the new series of radios "Senator Clinton" will have a feature the prevents the moon from crashing to earth. (I assure you this is not a marketing ploy... (yeah - right...))

There are more features, but you'll have to read them in the operating section of the manual page 1025 paragraph 63 sub paragraph D

Can't answer my extrememly poignant questions? Too much effort?

What will your "vast audience" think?

By your own standards (dropped threads, etc) and by the MANY UNANSWERED
CHALLENGES (least among them your COTSE status) in this thread (The
Voobner Effect) you have conceded utter and highly shameful defeat.

Funny to see you move on to a strategy of scattered HIT AND RUN
"Anti-Aaron" TROLLING.

Respect has nothing to do with answering my question. You can either
say "I use my 10 meter ham radio illegally on 11 meters" or think up
some wacky reason why you'd own it but not use it.

Hi Twist,

Don't forget, YOU were the guy who thought me, N8WWM and Captain
Deadbeard were all the same person, remember?

But let's drop that nonsense and talk about reality for a moment.

I was talking with my wife Ludmilla about this whole affair. "Are those
illegal CB people still acting up?" she asked. I was explaining to her
about N8WWM and his Dayton challenge, when she came up with a remarkable
idea.

There may be a health club or a YMCA close by where the hamfest is being
held. We could all pitch in and rent the boxing ring. That way N8WWM,
if he's willing, could take on challengers in a fair, referee'd fight.
I'll even go a few rounds with whoever wants to. Separate bouts of
course.

Despite all our disagreements, it would be really fun to meet up with
some of the folks in this NG. (I'm working on getting Deadbeard to go,
but he's dragging his feet).

Afterwards we could all sit down over a big pancake breakfast. It would
be great to meet you and hear your theories on UFO's and CIA
mind-control experiments, Twist.

Whaddya say?

Sincerely,
-Aaron H. Voobner

Hello Everyone,
I have an X Force Amplifier for sale. This one is the model X600"12", with 2) 2sc2290 Toshiba Transistors for the Driver Section, and 6) 2sc2879 Toshiba Transistors for the Final Section...It has Variable Power, a Copper Board-- with Cutouts for 16 Transistors.(Easily Expandable). The Following Features were added at the time of Manufacture: Biasing Circuit.. (Designed by "12", as the last 2 numbers on the Model signify.) Single SideBand Delay, with On/Off Switch. Recieve Amplifier (Pre-Amp). UpGraded Power Leads.(1- 10 ga. for the Driver Section, and 3- 8 ga. for the Final Section. I also have the 18 foot Wired Remote Control. This Amplifier was Custom-Made for Me, in June of this Past Year, with EVERY Available Factory-Added Option. It has never been Over Driven, Over Volted, or pushed beyond its limits in any way. The Original Transistors are still inside, meaning it has never been Rebuilt, either. This Amplifier would also make a good driver for the 3cx3000a7, for you AC guys.. I am Quite Negotiable on the price. E Mail Me, if You have any questions.... I will be happy to Answer all....

Current Draw at full Output: Approx 110-120 Amps.
Power Output (with 4 Watt Drive): 150-600w RMS, 850-1200w PEAK.
..I was using it with a 130a Alternator,(at 13.8vdc), with 2) 900ca Diesel Batteries.
I had no problem reaching full output.... I have since put the Unit in Storage for the Winter.
Here are some Pictures of it.
http://members.nbci.com/iomega216/xforce/xforce.html

Thanks for Reading, and Hope to hear from you soon,
Maniac.

Unsuppressed harmonics an stray RF energy are causing most of your problems.Harmonics are fundamentals of the frequency you are transmitting on,Ch.19 is 27.185Mhz,multiply this times 2 and you have your first order harmonic which would be 54.37Mhz,multiply 27.185 times 3 and you have your 2nd order harmonic which would be 81.555Mhz, 3rd order is 108.74Mhz.etc.etc.These harmonics can be strong enough to interfere with selected t/v and radio stations that are transmitting at or close to these 1st,2nd,3rd or 4th order harmonics. The stray Rf energy thats being radiated from your radio and antenna can actually induce itself into speaker lines and data cables for your phone and computer,make sure your coax is routed well away from other data lines and power cords to minimize this effect. A low-pass filter installed between the radio and antenna will cancel the harmonics,you may also need a high-pass filter for the t/v and the stereo. RF chokes can also be placed around data cables to reduce interference.I noticed that your antenna is mounted on your window, Excessive exposure to RF radiation can cause cataracts to form in your eyes,make sure you are not exposing yourself to more than the maximum exposure rate for the frequency that you are transmitting on,the body absorbs RF radiation differently at different frequencies. Use a 9ft. or shorter wire to ground the chassis of your radio to a 8ft. ground rod driven into the earth,your antenna also needs to be grounded to this rod. A low SWR is indicative that your antenna is tuned but it does not mean that youre reaching out and touching people,as the other gentleman mentioned you need a ground-plane or (counterpoise) to make the antenna work correctly,your magnet-mount is not a good choice for a base-station antenna or mobile application.Sorry for running my pie-hole so long .Hope this helps.....

Hello Craig: I don't know of any present manufacture that sells a "On the Air" light type of accessory. You might try the accessories at at e-bay for a "On the Air" type of light for your radio at: http://listings.ebay.com/aw/listings/list/category4671/index.html

The old Buddy Base units had a separate speaker unit, that had a trick "On the Air" light that looked totally bitchen.

And the Buddy Base Amp had a great "On the Air" light as I remember. This amp had 1 driving 5 6LQ6 tubes and had the greatest audio I ever heard.

Use to talk to Jeep from the San Fernendo Valley, to San Pedero where my old mans fishing boat use to dock. Jeep use to say "On the Air" brother!

You obviously have me confused with someone who gives a damn. You will not find one post as to my referring to you as deadbeard. Didn't think you could get through a post without a lie. Ok. Now that we know who you are and you know that we know, admit and we can indeed, drop the nonsensicle imaginary playmates and alter egos and tend to more pertinent issues rather than throwing stones for a belief. I like your masquerade, but until you produce something other than a fake email addy coupled with lie after lie, what you say really holds no merit. Not one reader can take anything you say as even being remotely associated with truth or of any authenticity whatsoever. Now, don't that suck?
I have made it abundantly clear in a previous post that I would more than likely in no way be attending Dayton this year, due to conflicting work schedules, the fact it is located in one of the nastiest sty's in the buckeye, and the fact that it holds little interest to me. You'll find me at a keydown, where the folks actually smile and talk to each other, long before you'll catch me in Dayton. But, hell, I like the boxing idea thing. Why rent a ring? Just bring a pair of eight oz. gloves if ya'want with ya' to one of the bigger keydowns. I'm sure we can work something out. For funsies as ya' say. Probably be the best work out I had since I quit smoking.
I'd love to expound to you, the clinical interior corruptness of a greater nature at work, however, you have much more to learn, grasshopper, before we can take such a leap of faith as to wish you to comprehend the various tonalities which must be mastered. You must walk, before you can run.

> Hello Bill: It may be true that a bad or corroded connection in the
> antenna somewhere may cause unwanted signals to radiate. But I have
> never seen that or heard of it.

The difference in voltage between the two junctions (when corrosion exists)
causes rectification.

Rectification causes a square-wave. A squarewave is a sinewave with
(supposed) infinite harmonics.

By definition, it causes harmonics. That is why all speech clippers also
have a RC filter after them, to
remove the harmonics caused by clipping.

I HAVE seen this problem before. Take antenna down, clean, and gorrilla
snot all junctions, problem went away.

I would think that a bad connection
> would generate noise a lot more than harmonics. I can't see how

Not only that, but the FCC has turned CB into an "Implied Consent" service.

You purchase a radio, and hook it up, you are a federally authorized
communications station, as long as you use it in a legal fashion.

As soon as you hook an amp up, or modify the radio, it is no longer legal,
and your authority to operate it under part 95 is retracted.

Read the laws.

He was killed for ripping off a truck driver. Not because of any feud on
this newsgroup.

A number of the people who regularly circulated this newsgroup at the time
where questioned
by federal authorities, and it was deemed that rec.radio.cb had little to do
with the incident, other
than hooking up the two people.

After that, the deal was carried out via email.

Quit trying to be a sensasionalist. You look like a dick when you do it.

How about.....I use my radio legally. I purchased it
legally, and when I feel like it, I will sell it legally.

All of this legal activity from an unlicensed individual even
if e-bay or people like yourself don't approve of it.

> work out I had since I quit smoking.

Sorry I can't go to any keydown. It is an illegal activity. I hear they are going to start busting them soon anyway. How about the day before or after Dayton? You don't even have to go to the hamfest if you fear hams. We can meet at the gym.

My other idea is to invite Riley Hollingsworth to hold a "CBer Q&A Session" at Dayton. It would be "CBer-Only" Event, so you wouldn't have to feel self-conscious in front of hams. All of you could attend and have the chance to ask Riley stuff about selling and operating illegal linears, export rigs, etc.

Come on Twist, don't be a douchebag. Say you'll think about it.

From: Gary Danaher <gdanaher@home.com>
Message-ID: <3A613110.4B7F1009@home.com>
Source record: 68434

The phone number listed on your web page is: 903-236-4569. On the web, do a reverse search of this number at:
http://www.infospace.com/_1_4OV3UF2037LHE1J__info/revphone.htm?&actnav=org
and the result is: Bernice White
3201 N 4th St
Longview, TX 75605

I didn't make this up folks. Just telling you what I got back. Anyone else can check at InfoSpace and get the same result.

In Shrewsbury at the corner of Rte.20 and Rte.140 there is a truckstop with a CB shop on the south side of Rte.20. He worked on my 2950 when i passed thru town in my large-car and did a great job for a little bit of money. I highly recommend him.Good Luck.....

A talk show with offices on Wilshire Blvd in west LA won't help much with a guy selling illegal equipment in the depths of east Texas. Heck, how long did it take to close down the L'il Whore House in LaGrange??

I thought Ranger was the only one that made amateur radios!!!!I dont have
any experience with the 2960F but i think you have a great radio,anything
RCI makes is top notch dude. I have had my 2950 for 5yrs. and i still would
not trade it for 2 Galaxy99s.

Thanks to you and everybody who gave advice. I appreciate it. My friend has a galaxy 77 he loved it. It died but I plan on giving him the phone # for galaxy and he can get it fixed.
I could ask "whats the best antenna" but that thread would be miles long and I could ask in the truckers group but u guys here know alot more of the tech stuff.
BTW the galaxy worked great for 5 years.
Still undecided but this also gives me time to save up and is kinda fun just trying to decide which one to get.

2438. Legal vs Illigal CB

Newsgroup: rec.radio.cb
Date: 2001-01-14 03:44:26 UTC
From: h <not@aol.com>
Message-ID: <t627v271pf584c@corp.supernews.com>
Source record: 68443

Illegal CB is used for freebanding, talking over long distance and forming communities. In many cases it is a stepping stone to being a Ham when finally someone can afford a kenwood or Yasua. Its basically harmless. Legal 4 watt CB's are used for: Finding the candy man at a truck stop to buy drugs. Finding out if the scale is closed so you can drive 36 hours with no sleep while on drugs. Same thing without drugs but for 18 hours straight. Learning new 4 letter words you'll never hear on an export radio.Finding out how much the local lot lizard (prostitute) is charging.Complaining about : dispatcher,police,DOT. Buying illegal CB's at insane prices or stolen stuff at more reasonable markups. finding some chor boy for your crack pipe. finding some crack to smoke(see candy man) Learning 6 letter words and many other words for hatred of minorities. Finding a good buddy for those that swing that way. Getting rid of stress by randomly cussing someone out or being a radio rambo.
setting up a fight.

Question: would you let your daughter listen to ch19 on the legal cb channel or let her listen to what's being said by freebanders or the other 360 ch's used buy people with illegal export radios?

--
Sincerely,
Ken
pwrguy@intergrafix.net

2439. OK, what are eBay's rules on amplifiers?

Newsgroup: rec.radio.cb
Date: 2001-01-14 03:47:09 UTC

Message-ID: <93r7ce$99u$1@bob.news.rcn.net>
Source record: 68444

Where can they be listed, where can't they be listed. What has to accompany the description?

and NO, I repeat NO, and I will repeat it one more time, NO I AM NOT SELLING ONE!!!! I see people listing certain items that say they cannot be used on CB, are not sold in the CB section. So what are their policies and where do they get them from? Several CB boxes I have seen have the ability, from a technical stand point, to be used on 10m and so on.

Any of you flamebots out there, save your words, I won't listen, I don't care, and run stock equipment, no amp and no export radio or any radio with extra channels, power, modulation. I am simply asking a simple question with, hopefully (like if no one starts another this is illegal you are gonna get busted, you suck, so and so is a d!ckface, etc.), a simple answer.

Thank you, 73, good DX, have some radio fun legal or not, merry christmas, happy MLK day.

PB from KG4 land......

2440. Re: IMAX 2000 vs. Maco V58 - opinions & RFI

Newsgroup: rec.radio.cb
Date: 2001-01-14 03:50:18 UTC

One disadvantage of multi-band antennas is they tend to generate harmonics with the RF signal,but i dont think i can classify the IMAX 2000 or the MACO V58 as a multiband antenna even though the bandwidth can be quite wide. I can see how a ground connection or other leaky connection that was fixed may have cured the interference...........

2441. Bendthelite puts EEI's Back against wall

Newsgroup: rec.radio.cb
Date: 2001-01-14 03:50:39 UTC
From: Big Dog 326 <scott_326@my-deja.com>
Message-ID: <93r7me$ka2$1@nnrp1.deja.com>
Source record: 68498

All my dealings with EEI have been positive. You must not forget when dealing with gray area companies, you are not shopping at K-mart. You just can't walk up the counter and return radio because it did not live up to your expectations. EEI always follows through on what they say and they have many satisfied customers. You will note that when you posted on this newsgroup, you did not see many others posting with the same negative opinions as you in regards to bad experiences with EEI. Once you posted your link to your bitch page, you put EEI's back against a wall, and now you will get nothing. If they back down, then every novice will take a screw driver to their radio and want a full refund. There is more to this story than you are telling. Did you try to tweak or mod this radio yourself. I bet you did! As I said, the gray area market is not like K-mart and you can take back the shoes you used for a month for a 100% cash refund! EEI has always followed through for me and I know there is many others on this NG that can say the same. Maybe your next radio should be a KRACO from K-Mart. You could throw it against a wall and they will still give you your money back. As I have always said you can catch more bees with honey than you can with vinegar. I bet if you post an apology to EEI you will get a check in the mail! If you are to proud...I bet you never see a dime!

EEI,
I guess you don't realize it, but the more you ramble on here trying to cover your ass, the more you are making a fool of yourself. You might as well admit defeat in this case and move on. There are still plenty of ducks out there to take advantage of.

EEI Support <support@exportradios.com> wrote in message news:t62586gmsqns7a@corp.supernews.com...
Well, I think that your informant is wacko! Like I said, we are not affiliated in no shape, form or fashion with Exports R Us, and thats the Truth.

There's no "grey" involved. The law is black and white in terms of
selling illegal export radios.

Well, that may have been who the number use to belong to, and if you have any knowledge of how those lookup's work, they do not change the information provided as soon as you aquire the number. That number has not even been listed a year yet, so I am sure their updates are far behind.

If you mean shooting skip and playing "ham radio" on channel 38, sure.
Have fun. But going above 40, running power amplifiers, buying amateur
gear and operating it without a license - is just plain selfish and
stupid. And illegal.

There's nothing "noble" about screwing other radio services by stealing
their frequencies. Or blowing a hole in the spectrum with a dirty CB
amplifier so you can shout "AAAAAUUUDDDIIOOOOOO".

So it goes in this great country of ours! What Howard Stern says and
does on the radio everyday is against FCC regs. for Commercial
Broadcasting. This must also be a gray area, since no fines are issued
in the area of broadcasting. Could it be an issue of BIG business and
BIG government. Let me think a minute...what does more harm to our
society...CB radio... or.... sick demented Howard Stern with shock radio
just to earn a buck? In your superficial one track mind, CB radio! Or
is just this NG gives you the attention you need as you play a part and
act a role.....Just like Howard Stern does?

I have read a number of rationalizations for illegal activity, but comparing your activities to those of our founding fathers is the most ostentatious example of bovine excrement I have observed to date.

It is time Sir, to return to your history books and determine why this country was founded. It certainly wasn't because a group of people just wanted to break the law. Does the term "taxation without representation" bring anything to mind? I defy you to find a parallel in the illegal operation of radios on any band.

No, I did not try to work on the radio at all. Thats the honest to god truth. None of this companies responses to my statements have been truthful. They are on the newsgroup lying daily, and I am purposely not responding to see just how far they are going to go.

Do you really believe I would put up a webpage on a major company without being 100% positive I was in the right? Everything I said about this company is accurate. For real. I have never said, or tried to insinuate in any manner that EEI does not have many completely satisfied customers.

But, that is not really the issue here. The issue regarding my dealings with EEI is that they have been, and are continuing to cheat me out of a $320 refund they told me 2 months ago they would pay me.

The CEO is still pissed off, so he has instructed his crew to contain the damage by saying anything necessary no matter how untrue it is.

I do not owe them an apology. I have done nothing wrong. Best regards Scott, you have a good one. Im glad that others have had more positive encounters with EEI.

I do believe you have made a good point. I would much rather my family listen to Channel 6 or 11, than listen to the foul-mouthed drivers on Channel 19. There is certain unwritten rules of radio etiquitte that most operators abide by on 6 and 11. You will very rarely hear ANY profanity on 6 or 11. You may not be able to know where the cops are, but why are you speeding anyway??

If that's the case the illegal CB operator has many "bad habits" to break once they get their Ham license, namely following the rules. And finally, a fair number of these people found on the "freeband" already have a Ham HF rig they use, so money is not an impediment for them to get licensed either.

> Question: would you let your daughter listen to ch19 on the legal cb
channel

I heard more than once, your comment above alluding to the crap one hears on CB Radio on the air, why some dumped their CB's, and got a Ham license. One guy said he got sick of trying to remember to turn off his CB whenever he had his kids in the car.

You act astonished that I bring this up. Hasn't anyone ever disapproved
of illegal CB before?

I think he is way backlogged.

I talked to him about 2 weeks ago.... Using my black al capone.

One of the better antennas you will find.

Again, its called customer service

A person had a problem getting in touch with the tech support department.

Imediately, the vendor responds with he must have dialed the wrong number.

Thats bullshit. Any retail management trainee education would tell the
people that.

Just makes you aware of who your REALLY dealing with, the way they can't
just STFU and let the complainers and idiots fall away... They always do.

Gary,

When you dial 1411, 555-1212, whatever, it is accessed to a central database in North Carolina.

I know personally the person who admins the unix box that the master telephone dir sits on.

Your information is old.

As a matter of fact, the national database has no entry, meaning that it hasn't been registered all that long.

>or let her listen to what's being said by freebanders or the other 360 ch's
>used buy people with illegal export radios?
>

No one in my car listens to channel 19 but me. I use an earphone.

As for exposing your children to Freeband activities, that's endorsing illegal activity to youngsters who are trying to figure out the world and their place in in.

Don't be surprised if your daughter grows up ignoring your rules about using the car, what time to be home, having her boyfriend over to the house between the time school lets out and when you get home from work, etc.

After all, you set the example. Good luck. I hope you like the results a few years from now.

Hello 937: Roger that! Good post I laughed on that one.

I always go to the TRW Swap Meet, near the Los Angles International Airport (LAX).

There's a bunch of great guys there, I like talking antennas and such, and like the other guys views on the technical points. I always learn a few things there.

The funniest guy is the one with the small mobile whip antenna on his hat, with the duplexer, and two coaxes running from the duplexer. I am sure no one makes this guys dress or get equipped this way.

The others bring their dog to this heavily populated public gathering. I saw one of the old hams in a wheel chair hammer one of the dogs right between the eye's with a large Coke Bottle, after a large dog kiss and lick. Laughed may ass off, with tears and convolutions of laughter.

Oh yeah the "once a year Mom makes me take a bath guys". You got that right, about selling some Irish Spring Soap. I saw one of the vendors pick up a arousal can of smell good stuff, (or was it a can of Raid) and spray one of the hams at his little table of electronic items. Trying to keep an even balance and remain standing while in hysterical laughter was difficult at best.

Lets not forget the Goof Balls that report there GPS locations, and what type of resistors and old W.W.II microphone connectors Joe Blow is selling at Table Location B-27, with a belt full of HT's and a fist of Obese Fat Fingers, that punch more that one button at a time. That hasn't brushed his or her (sometimes hard to determine) teeth in a few years.

I always like the push and shove type ah guys in the crowd. Big Bob being out of Prison was at the last TRW swap meet. When a push and shove type ah guy pushed Big Bob to one side, or tried to, I saw the big guy pour coffee all over the pushy guy. You can't buy entertainment like this.

Jay in the Great Mojave Desert, ... just down the rod ah ways from the fillin station.

What I am letting my daughter do has not been one of your options. I'm teaching her amateur radio so she can bypass your freebanding "middle step"! She will have fun the rest of her life without being illegal AND without being turned off by what you've listed. In the meantime, I operate my CB on the side, completely legally and still make friends. They are out there, they're not all foul-mouthed.

Well, we are taxed at a much, much higher rate. And we are not truely
represented.
So what you are saying is. Its ok to not pay taxes, but by God don't Freeband.

Ken, all of your examples do indeed take place on the cb channels, however, all one has to do is flip that switch to magically transported to a wonderful world of freebanding, where, yes, I would have no problem with my daughter listening, with the exception of 555. When I listen to the broad banded scanner and them there hammie fellas on certain frequencies, why, it sounds just like 555, except they have legal calls, which they don't always use. Your post was great, Ken. Enjoyed it and the laughs it brought as I drank my morning coffee. Enjoy what's left of the weekend.

The Voice of America is illigal just like freebanding.
They don't have a liscence or permission from the Soviet or China versions
of there FCC and they MUST respect "THE LAW!!!!!"
Who does America think she is to use ILLIGAL and Powerfull amps to
broadcast into these countries?
Please join with me to limit Voice of America to 4 watts and to obtain a
liscense from Bejing:)

Spend your coins on a spellchecker. It is 'legal', 'powerful', 'license
or licence', and 'illegal'

Might be funny (doubt it tho) if we didn't have to send it to decrypt.

Wellllllll, in all fairness Voonb, you have copied from many in here. You've taken the "best of" from everyone who has effectively nullified, voided, embarassed, controlled, ridiculed, and generally out smarted you at every turn and like a greedy thief, tried to use them for your own daily consumption because the jaundiced inferior characters and lies you put forth can not stand on their own, and what better place to get assistance than by stealing from the ones who defeated you?

I guess I can see the FCC's point -- why would you buy an export radio unless you intended to operate illegally on the CB band -- but I would think you could "get away with it" if you bought one and had an FCC type-accepted CB right alongside that radio as proof of merely wanting to listen to the illegal activity. My HF rig is already "opened up" for those freqs as a result of prior MARS activity, but not wanting to get back into that radio to flip that switch again is no reason to suspect me. And yes, my FCC type-accepted radio is right next to the rig for legal, ground-wave only activity. I do like to listen.

I enjoy kickin' the cat every once in a while squeeze, especially when it's injured and down. I don't sweat the small stuff. It's like an extremely quiet night on the radio except for the one voob who is sitting on one channel all night long saying a bad word over and over. He's looking for a response. Every once in a while I might say "break channel" and nothing more just to change the temporary rhythm of things by eliciting a semi-lucid response other than the oft repeated robotic response. Doesn't mean a thing as long as you remain in control.

Hey, if this was a big company, they would have sent you the money 2 months ago to satisfy you, and then not make fools of themselves here. How much time have they wasted reading all of these posts and then responding to them? If time really was money to them, again, they would have mailed the check. Apparently it isn't though, so the natural assumption is that they are a mom and pop truck stop operation, and that $320 sale might have been all that kept them from locking their doors at the truck stop. A big company might fuss about the loss of a $320,000 sale, but $320? What does anyone really know about them? Ted, CEO, and the other unnamed postings are probably the same person, and if he isn't at the truck stop now, maybe he is working out of his garage. If anyone reading this happens to live in Marshall or Longview, they ought to cruise around and see if they can learn anything.

Gary
For once I agree with you. Even if they were in the right. They have lost more
than the $320, just in lost possible sales.

And don't forget the propaganda aimed at Cuba from the south side of the sand pile. Since there are no obstructions and its open water, I move to limit the output to milliwatts and the equipment to handhelds with the use of no repeaters. That way we can be assured of interfering with no one and offending no one, unless the batteries in the unit were made in commie red China!

Just to kick some dust, how's this? We are taxed. Tax money is allocated for laws, which in turn, are utilized as attempted "governing" of the airways by a self appointed US faction, who arrogantly feel they own the spectrum. Where is the citizens representation to this sort of taxation on PUBLIC, yes, public air? The ARRL? Nope. Not for the citizen. The licensing committee? The fact that it exists alone confirms and reiterates my point. The FCC recently allowed the reintroductory use of low power FM community radio. How nice. They allow us to use something that was ours to begin with. If there is no cash money in it for the Feds, it will not be permitted. Of course, the quota factor is always present. Why do you think Joe Q. Public cannot broadcast a low power station in his neighborhood without a license? 'Cause the public may pay attention, and stray from the corporate canned BS. To control, to a degree, what is on the air, denying and permitting certain applications or licensing based solely on their projected contribution revenue, is routine every day business in the corporate broadcasting world. The corporate lawyer whores for the broadcasting industry and lobbyists that keep this colossal, monetary parasitic juggernaut afloat are second maybe only to the tobacco industry.

At this point, I guess it really doesn't matter what we say because you have believed none of what we have posted, but yet you believe yet another individual that you know nothing about as well.
Like I said, we opperate out of a huge wharehouse (which there is a picture of on our website) and are not located at a truckstop.
As far as me, whats to know, I am not the CEO thats for sure, and my various duties here at EEI are not in question at all here. I have not been with the company all that long at all, but I do know the CEO for quite a while before coming to work here and he really is not the cruel, unfeeling person that a lot of people think he is.
As far as the customer in question goes, you think that after he has posted such slanderous remarks and created pages dedicated to slandering our business that we are to lay down and play dead? I really do not think that anyone would in this situation.
The part that really gets me, is that you choose to believe all the lies and remarks from him, but you have no proof of what he is saying and what has been done by him to make the situation as it is, and you believe nothing of what we say. He stated that "if he was not right in what he was saying, why would he write a public web page devoted to it". It just shows me that he didn't think the situation out before he started tapping those keys, which ended up hurting him before the situation had a chance to cure itself.
I do believe this however, I thought that all people should be created as equals until proven guilty, and no one has proven anything here.

You make it sound as if our overall sales depends entirely on this NewsGroup, and I assure it does not. Granted, it does not promote our sales by all the deceit that has taken place here, and since day one of Express Electronics Inc, this is the first time a situation like this has occured, and most of it is because of people that do not know the facts jumping in and acting as if they are the knowledge holders. The only people in this group that knows the facts is the Customer in question and EEI. Thats it. Everone else just joined in on a subject just for the benefit of making the situation worse, although there are some out there that have had great dealings with us as well.

Hey folks, please, please, please, stop responding to Voobner's silly comments! Do you guys not understand that he thrives to reply to posts? Just let him do so, and ignore him.

He is a nothing, always has been, always will be! His only joy in life is knowing that he got under someone's skin. He knows full well that he can never make a difference in someone's decision to be legal or not. Actually, he probably would be quite bored in life if rec.radio.cb was not here. Maybe not, there all still the kiddy porn sites I guess, so that last statement may or may not be true. At any rate, please do not respond to him. Be the bigger person, and let him talk to himself. One analogy would be to liken him to a sore that you keep picking at.....if you leave it alone, it will heal, if you keep picking at it, it will be there forever.

And about the E-Bay thing with him, just do not post that radios are modified, or that amps are capable of being used on 11 meters. We all know what equipment can be modded, and what name brand amps are actually designed to be used on 11. Without blatantly stating that they are for 11 meters, E-Bay will have a harder time of deleting the posts.

Have a great day!

Source record: 68567

Aint nature grand... Survival of the fittest... But because of touchy feely "oh look at that poor..... can't let it die....."

Why should society HAVE TO PAY THAT? Doesn't matter that it does, but like I said, can't protect all the sheeple from their own stupidity. Isn't that the job of their insurance policy?

BTW - nice angle on the emotional part of them being taken care of, compounded by the financial blow to the wallet.We've had seatbelt laws and helmet laws for quite some time, and all I see is increase after increase in taxes. I don't see a decrease after the law was passed. So therefore, your "blow to the wallet" cry is null and void.

Nice try... No wonder they get laws passed banishing such hazzardous objects as pointy sticks... Also worthy of note is that the United Kingdom banned guns... Know what happened to their violent crime rate? It skyrocketed... Geeeeeeee... Wonder why? Why am I mentioning guns? Simple. Liberties my friend... Freedoms... Helmets, seat belts, gun laws, concealed weapon laws, etc... They are all laws designed to "protect us"...

Also, what's the problem with carrying cash nowadays? My friend and I went to a car dealership and he bought his new Durango SLT+ and paid in cash. When the sales creature saw those stacks of 50's and 100's he remarked, "So, what kind of drugs do you sell?"... Truth is that my friend sells internet banner adds, and he got pissed at his bank who told him that his bonus check of $45K was going to take 5 business days to clear EVEN THOUGH IT WAS FROM HIS OWN BANK! So, he closed his account, told them to piss off, and took all his business to another bank IN CASH and deposited the extra into new accounts and kept enough in cash to pay for the vehicle. Funny how society seems to think that large amounts of cash are things only criminals carry around. I guess some sheeple have watched too many episodes of Miami Vice or something.

So take your touchy feely emotional strings and stop tugging on the threads of the american flag. I'm sorry that you weren't educated in your school about freedom and liberty. Because with both of those comes responsibility for ones self. And you're not going to turn our democratic republic into a socialist nation where society has to pay for protecting sheeple from themselves by constantly repeating emotional diatribe. It makes me want to puke, vomit, and generally woosy when I here crap like that spewed forth from some liberals mouth proclaiming that we'll all benefit from it. The truth is that yes, there is a benefit, but we lose what freedom and liberties we have.

You're a 5 year old being told that you can have two shiny quarters for that ugly piece of green paper but what's worse is that you think it's a good

deal.

Sigh... Some people just don't get the big picture.....

2517. E-bay's Policies on radio gear.

Newsgroup: rec.radio.cb
Date: 2001-01-14 16:41:34 UTC
From: randyc2800@aol.com
Message-ID: <20010114114134.17905.00003499@ng-cg1.aol.com>
Source record: 68571

This is copied from E-Bay's site. Just don't say that the equipment is one of these, and things should be fine. Right Voob? Things may get tougher for you now! :-)

Extended Coverage High Frequency Transceivers - Equipment that is intended to operate in various radio services in the high frequency radio spectrum, including "10-Meter" Amateur Radio Service (ARS) equipment, is lawful and may be sold. However, some items of this nature that are capable of transmitting, and are being operated, in nearby frequency bands allocated to other radio services such as the Private Land Mobile Radio Services, Maritime Services, Auxiliary Broadcast Services, International Broadcasting Services, the Citizens Band Radio Service, and the U.S. Government. Operation of this equipment causes interference to the authorized users of these frequencies.

Users may not list a high frequency transceiver that is designed to operate on frequencies outside of the ARS bands, if it has not been issued a grant of equipment authorization for the radio service(s) in which the transmitter is capable of operating.

CB Amplifiers: The Federal Communications Commission (FCC) does not permit the use of power amplifiers with Citizens Band radios. Therefore, eBay prohibits any listings of the following:

CB amplifiers
Amplifiers specified for use on the 11 Meter band
Amplifiers designed for use in frequencies 24 MHz to 35MHz
Amplifiers posted within the CB category
CB Radios that are amplified to exceed 4 Watts using the AM Settings or 12 Watts using the SSB settings

>You act astonished that I bring this up. Hasn't anyone ever disapproved
>of illegal CB before?
>

Its only illegal when used to transmit on CB freqs.I sell it merely for a educational study aid or export to whatever 3rd world countries will allow such a device..If some sick twisted individual will buy it and hook it up (Use at least 4 gauge directly off the battery.No more than a 2 watt dead key) and talk on it its not my fault

The internet is more than a global pornography network

i kinda get a kick outta checking this newsgroup every couple of days and seeing his constant postings. It's really a timestamp that proves the guy rarely leaves the house, and considers this to be his primary source of socialism..Truly pathetic when ya step back and look at the whole picture. So, post away, i say ! Just keep proving the guy has no life by baiting those hooks. That lonely fish will bite every time. Gotta go, its snowmobiling time ! 747@27.345

By no means. I am suggesting that your overall sales are dependant upon this singular sale. Why else would you make such a fool of yourself? You have admitted that the customer returned the radio. You have admitted that you sent a refund check--or if you didn't, you at least admit that it was in order, so the point is moot. Reportedly, the check was returned, other things happened, and you lost your temper. The customer still is without a radio or his money. You threaten to stop payment on the refund check. This angers even more people. People begin to search address and phone listings and find anomolies, such as the the EEI address on I-20 near Marshall at the truck stop. How much has it cost you to read and address all of these postings? More than the radio cost you. From word of mouth, a lot more than you are going to make after all is said and done. You are assuming that people who look at your web page and order things are unaware of search engines which can locate information on your company. ALL of this stuff is readily accessable to anyone with a computer and net access--the same access needed to get to your web page. If you were a smart businessman and wanted everyone off your back, the thing to do would be to send this guy a check for all of his costs including the postage it took to return the defective radio you sold him, along with a gian apology. Not much of a chance of that happening though, huh?

Very well put Randy, i could not have said it better myself. I am a licensed ham and got my start in C.B. but i choose not to advertise my call letters for various reasons. I do not promote the use of unauthorized equipment either but on the same note "live and let live",know what i mean Vern....I tend to lurk but i enjoy helping a fellow CBr or Amateur with a problem that there having or to clear up some bad info they received. Anyway i just wanted to say hello and introduce myself........

If the Chinese really gave a damn they are in a position to do something about it. It happens that the part of the International Telecommunications Union that handles broadcast is at the moment run by a Chinese official.

The ITU dates from 1869 so it isn't part of any New World Order. From day one, the rule was each country licensed its own and the world recognized it. If it weren't for the smiley I might think you were serious.

I have the 76-2 Stargun "Bopper", with a 32" shaft, Dual-Coils, and the Star Wing Kit.... Mounted on the Quick-disconnect mount, on the trunk.My friend has the Al Ca'Pone with the Medium Length (12", I think), on the roof of his new Ford pickup

I think the Stargun, and the Al Ca'Pone are about equal for Transmit. But the Al Ca'Pone has a much better bandwidth, and better Ears....

Lee Just called me this morning, will be sending out the antenna when he gets back into town.....Real nice guy, I guess he was short of Materials. Not a Problem.
Maniac.

Greetings!

You're missing a very valuable point.

Archives.

Anyone wishing to visit and do a search on your company, will see
these responses under Yahoo or Deja.

With "roambots" getting smarter, they do look at what people see in
the NG by simply the number of times a page is hit. How does the site
get hit? thats where the "roambots" locate it.

It's simply not wise, you might want to set your X-no-archive flag
properly to suit this need. And resolve this issue to remove the
dangerous slant these pages will provide prospective clients searching
the databases to locate places catering to their needs.

Found this on another group:

Solid figure A is a four-sided pyramid with a triangular base (a regular tetrahedron), and solid figure B is a five-sided pyramid with a square base. All of the edges of solid figure A and solid figure B are one unit long. A triangular face on solid figure B is aligned to a triangular face of solid figure A, and the two faces are glued together. How many sides does the resulting object have?

a) 5
b) 6
c) 7
d) 8
e) 9

Billy Tauzin is in a world of his own, his way or the highway. I can't see why the good people of LA put up with his bull crap. Yet they keep re-electing him. Tauzin must be bringing some big federal bucks to the swamps. And yet the rest of the country has to put up with him.

Ever try contacting a and Federal elected official from out of your area? They will stand tall and tell you that your not in their district and will not talk to you. Yet those same people will not think a darn thing about spending your tax dollars at the blink of an eye.

1 bar showing on your 2950s SWR meter is approximately 1.3-1, 2 bars showing
indicate a SWR of 1.8-1, and yes it is a fair indication of your SWR and
Field strength. You are ok to transmit as long as 1 bar is showing
preferably none,but definately not 2. I wont key up my 2950 with a SWR
higher yhan 1.5-1..Check out the RCI Web and Panther Electronics,they are
into RCIs....

The FACT is that IF radio was around then, it would be just
another thing for England to break the LAW against US again, just like
the other ILLEGAL and UNLawful things that England was doing to this
country. Some Hambos would be TORIES and the Founding Fathers would
ALL be Freebanders, JAMMING UP the Torry TV channels with TVI, which
would prevent the FILTH on TV and propaganda from being watched by REAL
Americans. Sure the FCC is the 6th plank of the Communist Manifesto.
It seems to me that the Hambos today ought to be more worried about the
TRASH on 52-890 mc and from Sputnik, and their own bands, instead
of "worrying" about illegal skip shooters on 27 mc that have been doing
it since the 50's or 60's !!!!!!!! I remember it since the 60's !!!!
Dave!!!!!!!!!!!!!!!!!!!!!!!!

Greetings!

Neon is a good choice, illuminates when exposed to RF.

As far as mounting on the antenna, you'd have to run some power to put up the entire "ON THE AIR" or your call-sign characters to light up.

As far as seeing the "On the Air" inside, there was a few spots, one was in an older AES catalog that used a RF detector to operate a relay that isolated the high voltages needed to arc the neon tubes to light up whatever you wanted. A self-contained unit that lit up every time you keyed the radio.

What's funny is, one of the gentlemen that has this, can also use it as a RF annunciator when someone keyed up in the driveway. Works like an "illuminating" doorbell!

It's not cheap though, last time I checked it was about $150 for six letters or numbers.

What is neat about the concept is the flat panel, no tubes, the panel is made in three layers, with the cutouts for the alphanumeric and the needed connection "tubules" and the blackout paint - was sandwiched in between two glass sheets - a three-layer job.

A company in Kalamazoo Michigan was selling these as custom orders. With a choice of colors, and naturally the cost increase associated with it. A dual or tri-color display was possible.

On Sat, 13 Jan 2001 18:38:36 -0500, while the modem was ice fishing with the Mouse, Jay in the Mojave <jay123a@qnet.com> dissertated the following:

I have a Solarcon IMax 2000, mounted on top of a Rohn H50 Telescoping mast pipe. It is made very well, and I have had no problems with it.
The physical size is about 44' total Height.

Rohn also makes the following:
H20--- 19'3" Physical length
H30--- 28'0" Physical length
H40--- 36'3" Physical length

These items can be purchased from Palco Electronics. They can be reached at (734)-283-1313. The owners name is Tony Palmeri. REAL nice guy. Dealt with him many times, no complaints. He also carries many hard to find, or discontinued merchandise, in guaranteed factory-new condition.... Happy hunting.
Maniac.

Just wanted to let everyone know, These guys are the BEST technicians in the ChicagoLand area.They have been doing work for me for about 10 years now. I moved out further east into Indiana, and became friends with another Tech, that runs a shop out here. I had him work on my Base (Galaxy DX2527), to connect the Wokman MD4 External S-Meter. First of all, he wanted to keep the radio overnight. I knew what he planned to do. He was going to wait until I left, and take the Radio to another Tech for the Install. I told him I wouldn't leave the radio. So he started the task right in front of me. To make a long story short, he SMOKED my radio!!! NO keyup at all!! I wish I would have listened to Sean. Now I have to take the Radio out to RWE (about 45 minute drive), and get it done right, along with the repair...
The "Golden Screwdriver" paid for the Repair, but I will NEVER go to another Technician, even if they are right down the street.
The shop is in the Petro truck stop, Exit 335, on I-57, south of Chicago.
Sorry Sean, You were right!!!
Maniac.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1206432178
SONY ICF-2010 Air/FM/LW/MW/SW PORTABLE RADIO
Currently $182.50 First bid $100.00
Quantity 1 # of bids 6 bid history
Time left 2 hours, 27 mins + Location Windy City

Sony ICF-2010
covers AM (LW/MW), FM, Shortwave (w/USB & LSB for SSB)& Air
continuous coverage from 150-29999.9Khz, 76-108Mhz, and116-136Mhz
dual conversion receiver with quartz digital synthesis tuning
32 programamble memory presets
tuning: direct entry keypad, memory scan, or with dial
fast/slow dial tuning with lock setting to prevent accidental station change
syncronous selectable sideband tuning on SW to eliminate interfernce on
ajacent frequencies
narrow/wide bandwidth switching
clock w/ 4 programmable timer (alarm) settings and sleep button
LCD read out for frequency, time & memory channel number
green& red led's for battery level indicator and tuning meter
includes: external antenna w/ jack adapter, ac power adapter, sholder
strap, and owner's manual
requires 2 'AA' batteries for memory & cpu & 3 'C'batteries for portable
operation
This unit is in perfect operating condition. Minor cosmetic
imperfections: there is a bit of dust under the display glass, some
small scratches can be found on the unit, and the attached telescoping
antennais missing its tip.

Guaranteed NOT DOA. Buyer to pay actual UPS shipping plus insurance.
Paypal accepted.

On Jan-12-01 at 18:46:00 PST, seller added the following information:

Someone asked about tuning accuracy.

According to page 11 of the manual:
"...frequency is tuned in and displayed at the following intervals,
depending on the bands.
AM: 0.1 kHZ (w/the manual tune mode set to slow)
1 kHZ (w/ the manual tune mode set to fast)
FM: 0.05 MHZ
AIR: 0.025 MHZ"

In response to all the email interest in the idea of having a friendly boxing match between N8WWM and whoever cares to show up at the Dayton hamfest, I did some quick research and called the downtown YMCA at 316 N. Wilkinson St, Dayton OH (tel. 937-228-9622). I talked to Ben Davis there who said we could rent the boxing area for a nominal fee. As I stated earlier, after N8WWM's match I'd be happy to put on the gloves and mix it up with anyone who wants to.

Cross-posted to: rec.radio.amateur.misc,rec.radio.cb,rec.radio.shortwave,rec.radio.scanner

1) Attempting to eat at a fast-food restaurant. You are likely to find them extremely short-staffed, since most black employees will take the day off. They will do this regardless of whether or not the employer has approved their absence. If a business owner should DARE object, he would immediately be branded as a "racist", "evil white slave driver", or worse.

2) Attempting to eat at a sit-down restaurant. While some black employees will not show up for work, others will. The ones who are working that day will spend the day harboring anger for whites. This hostility is likely to lead to actions judged undesirable to customers...like spitting in your food, for example. The great civil rights leader Jesse Jackson has admitted doing this and has encouraged his minions to follow his example. Just to get back at Whitey, of course.

3) Attempting to drive anywhere in the vicinity of a MLK Day parade. Your passage is likely to be blocked by the "festivities." If you dare object to the inconvenience, the black hordes are likely to turn on you with acts of violence. Contact Reginald Denny in Los Angeles for further clarification.

4) Running out of the following items, if you happen to own or operate a convenience store: 40-ounce bottles of malt liquor, Newport cigarettes, Magnum condoms, and deli take-out packages of fried chicken.

>VOA is illegal

Wrong.

1. VOA is authorized by the government in the country where the transmitters are located. When the transmitters are in a non-USA location, they are operated with permission of the host country, or the transmitter is located aboard a US flagged vessel in International waters.

2. VOA operates on frequencies assigned to International Broadcasting. These are coordinated worldwide by the ITU.

3. VOA transmitters must meet the same standards as other stations reguarding frequency stability, bandwidth, and purity of emissions.

Thank you for your inquiry.

>Freebanding = Juvenile Delinquency...

Your kids are watching you and listening to your conversations. You lead by example. Pick your road.

*Brag about cheating on your taxes.

*Brag about freebanding.

*Let them do homework with supplies you lifted from the office.

*Speed. Run red lights. Curse other drivers.

Then, wonder why we don't like your kids as much as you do. (Wonder why YOU don't like them as much as when they were little tykes). Wonder why they stole your checkbook and wrote a few. Wonder why cash keeps disappearing from your wallet while you're sleeping. Wonder why they got kicked out of school for cheating.

(Sigh). A chance to be a great parent and produce outstanding offspring, and you blew it!

Oh well....you've always got your freeband buddies to talk to. That's more important.....

Well I don't know who you were referring, but I assume it was me, since I mentioned I would have no problem with my daughter listening. She is just about her own person and nearly an adult now. A movie, a record, what she hears on dads "radio thingy" is not gonna influence her life or decisions one way or another at her age. She wouldn't know the 11 meter from any other meter and she sure don't seem to care. We share many interests, but playing two way radio is not one of them. If something as trifling and minor as music, a book, a play, a show, a movie, etc., can influence a kid at that ages decision making, save your pennies for counseling, cause the kid is already screwed up, more likely than not from inadequate parenting. I am quite happy with my parenting results. Looks like she may be going to the university of her choice on a scholarship, is in the top 12 percent of her class, and as far as rules, I never really have to set any serious rules (other than the damn phone) because she never gives me reason to. She would much rather sit in her studio-room with her friends and compose music (?) than take the car out and "cruise" for guys,. We live near the beach so that is never a problem. She isn't interested in a serious boy-girl relationship until shes done with college, at least thats the plan and shes done real well so far and we're real proud of her. STill can't get her to key up a mic though. Yep, got no problem with her listening to the radidio, like I said, except 'ol 555, or, if the freq started getting all potty mouth, I'd do what I do even when alone...change the LaFrequencia, si?

Well, VooNW8, technically, when I'm in international waters on my skiff, I think I can pretty much go wherever I want, if ya' wanna get technical about it. Not that I do, but when you hear that "floating cabin cruiser" bringing you nothing but the best of everything music has to offer (by this I mean the stuff you will NEVER hear on commercial broadcastradio) strange hours of the night on weekends from the salt flats of Fla., listen real close, I may have some pull with someone who knows someone and ya' may even get an honorable mention. Like someone else in here said, "I kin make ya' famous"!

I put a hold on the date. Left my number with the YMCA and they promise to call me Monday about the price, etc. (You guys agree to split it, right?) I boxed a bit in the Air Force. And there's plenty of time between now and Dayton to get in real good shape. You're on. Except for the part about not posting. Posting is everyone's right, including yours. However, if you did happen to win (by KO or referee's decision) I would agree to stop writing letters to the FCC concerning illegal CB operation.

Very interesting... Typical liberal tactic. Start a new thread, try to turn the tables on the discussion and hope and prey that unwitting people don't take the time to read the previous threads on this discussion. Well Voobner, your tactics don't work here in this newsgroup. We're smarter than that. Perhaps it'll work in other newsgroups you frequent... alt.games.nintendo perhaps? (I don't know, I don't read that one) But with adolescents perhaps you'd have a snowballs chance in hell.

I will say one thing though, you are persistent. Like the fly against the glass window trying to get out.

Yes Voobner, like Wylie E. Coyote you've proven yourself "genius" once again by slamming repeatedly into the canyon wall.

YOU ARE BOXED IN THE CANYON SIR. No way out. Time to give up Voobner. Tuck tail and perhaps we'll let you lurk.

> > course you will not find a Voobner listed in St. Mary's County.

Dad's sister? That would be your AUNT... You can tell he's not all that bright. Course I often wonder if he has to refer to her in this manner because of inter family breeding. Dad's Sister. Perhaps Dad is a "FrUNCLE" - Father and Uncle. Who knows... Perhaps he's got a few BROPHEWs too... Maybe a SNEESE? (Sister and Neese)...

Yep... Them Nordic's are an interesting bunch. But then again what can you expect from thousand of years of living in darkness and cold? Fierce warriors... Hahaha... Inbred violent barbarians... That's what they are. I gotta say it... When god was passing out brains, Voobner thought he said trains and got a nice big slow one.

[More stuff deleted]

Why will this "cause trouble" for W?

Oh, I get it...if someone is "raciest", they MUST be Republican, right?
Democrats/Liberals couldn't POSSIBLY be racist, now could they?

2588. The Real Story

Newsgroup: rec.radio.cb
Date: 2001-01-15 00:20:28 UTC
From: EEI <exports@exportradios.com>
Message-ID: <snr86.220$lv6.106484@nnrp3.sbc.net>
Source record: 68644

The Breeden Story: ...by those that know

His radio had no warranty to begin with, he purchased a factory condition model. We sell these near cost to radio operators that prefer to service their own equipment, and smaller shops. To sell these at the absolute lowest cost, we can not afford to service the units, and offer them the full support of our normal Export Turbo Tuned Model. The EXTT model we test, tune, and align, we know that the unit is 100% when we ship them out, so we stand behind them, and we warranty them for a year. We do not put so much faith in the factory fresh versions.
Damon purchased a factory condition model, as you can see on his receipt he posted. We tried to work with him on the exchange, but he was insistent that we some how intentionally sent him a lemon. We simply took the radio out of a master-crate from the pallet, and it went to our shipping department. Factory Condition. However, after speaking with Mr. Breeden we decided that there may actually be something wrong with the radio, and we agreed to exchange the unit for him. Not exactly our policy, but close, we do try to work with customers. When we received the unit it was in perfect condition, it functioned flawlessly. In this case we usually charge a restocking fee, and then refund the purchase, or replace the unit after additional shipping has been paid. Mr. Breeden called daily, and was rude and discourteous to the customer service staff, which has nothing to do with the accounting department that actually cuts the checks.
However, he was so belligerent that the customer service staff eventually just transferred his calls upstairs to get rid of him. Usually, we cut checks once per month to customers. He couldn't wait for some reason, and continued to call and complain several times a day. Although we could have exceeded policy and cut him a special unscheduled check, he blew that chance when he pissed off everyone he talked to. So, eventually he had the misfortune of accidentally being transferred to the CFO, which oversees the accounting office. He was then outright hostile to the one person that could have cut him a check on the spot. Needless to say, Mr. Breeden's priority level dropped every time he opened his mouth. We offer equal service to everyone, but our staff is not in place to act as a punching bag, or to council the socially inefficient. However, we scheduled him for reimbursement the next 15th anyway, and then either on purpose or accident, we don't know...one of the CS staff sent his check to the wrong Breeden, not once but twice. She was fired, for that and other mistakes, but as she was usually the front line for Mr. Breedens verbal attacks, so we don't know if she did it on purpose or not. This was determined after his newsgroup hate campaign, which is when it was brought to the attention of someone whom could research the issue. It took ten minutes, he could have called and asked for a supervisor and got the same results two months ago.
Now, Mr. Breeden has filed a Better Business Bureau complaint, so we

have to follow the guidelines for responding to the Bureau. Now, it will take a few weeks to process the request through that agency, to make sure all details are attended to. Eventually Mr. Breeden will get his refund, as he has been told. Now we have to work through the BBB so it is out of our hands. Although we offered him simple deal, and he chose pride instead of his refund, or he could have had his refund sooner. So the truth is quite simple, someone in our company made a mistake, and he further aggravated the situation by being rather unsocial. So when we were presented with the opportunity to quickly correct the mistake, someone passed on the opportunity. All in accordance with regular policy, we simply reschedule the refund for the next pay period when for some reason one is missed. It's not nearly as complicated as he would have you believe. Also, some of the post allegedly made by EEI staff, were forged. No doubt for the entertainment value, and to get a rise out of the newsgroup, as it did. All of us log in from www.expresselectronics.net , any other IP address should be suspect. Especially the Deja News Web Interface, no one here uses it.
Officially, EEI "Support" is the only staff member that post on the newsgroup. And we conduct no business in this format, nor do we discuss any transactions at any level. We are a consumer electronics firm, that happens to sell some controversial radio equipment. Whatever your individual opinion may be, you must understand that we have a business to run, we drive to work every morning like everyone else. It's a nice office setting with typical fluorescent lighting and very few windows. All of our employees are professionals, and being human they respond accordingly. More importantly, the people that answer the phone are female, and typically emotional. When treated disrespectfully their efficiency declines, and so does the service available. Although we did fire the CS rep that screwed up, we do not support the notion that anyone call our toll free line and vent their frustrations at the expense of our employees. Mr. Breeden had the unfortunate experience of pissing off all the right people that could have helped him. We asure you that is a difficult task indeed, and a very rare occurence.
Also, the retail outlet in Marshall is only partly owned by EEI. The rest is held by one of our minority share holders. We have no EEI corporate staff at that location, and no customer records. All of our corporate affairs, and internet sales are handled from our corporate office in Longview, Texas, the facility pictured on the Internet. And althought the retail site is "in a truck stop" as EEI leases a sizable percentage of the Pony Express Travel Plaza's service center, it is quite a nice outfit if you need an install, or on the spot service. Deffinately not your typical CB Shop.
We have responded here not because of all the lamers that have gone off at the hilt over this one, but for all the many people that have supported us, and those that have e-mailed their support and asked for the real story. Everyone that knows us, thousands and thousands of satisifed customers, know we would never intentionally rip off anyone. We are quite the opposite from our competition. Anyone that has dealt with both will be sure to tesify to that one. Also, we have received many e-mails asking us to just remove the Breeden site, and a few others for that matter. That may well be within our powers, but it is frowned upon by the hosting ISP's. In spite of our obvious

previous excursions into questionable networking techniques, our network security personnel are delegated to more important task at the moment, but we appreciate your confidence in our abilities, Thanks Guys. As always, all your radio equipment needs can be found at http://www.exportradios.com , come see the biggest and the best.

Sean Dillion,
Express Electronics Inc.

Maybe you could lighten up a little with the group,i am sure they would not mind if you did. I am a licensed ham and i dont advertise my call letters for various reasons and i dont advocate the use of unauthorized equipment either but on the same note i got my start in Citizens Band and i am glad to see other people with a interest in the hobby testing the waters to educate themselves. Sure theres bad apples in every crowd but theres a lot of good as well. They dont bother me cause i know how to turn that power switch CCW till it clicks, live and let live man cause i know you werent born with a 2meter in your hand and neither was i. I dont run power on any of the bands i use for the simple fact i dont need to. Lets work together to educate the people and teach them to stop thinking mega-watt PEP and start thinking mega-watt ERP, that means Effective Radiated Power in case you did'nt know. Show them how to maximise their existing equipment so it works together. A lot of people are confused on what a amplifier does and does'nt do. The Antenna is where its at man. People need to realize that reaching out and touching people is 90% Antenna and 10% Radio. Dont get me wrong here,we aint swapping spit and i am not your friend but i do see your point in the matter. You keep on doing what you gotta do and i'll keep on doing what i gotta do.............Take Care of Yourself.

Well, it IS tough when you have to uphold the standards of radio and the
entire civilized world against your doc, the Illuminati, black
helicopters, blue helmets, and codeless Techs. But getting the Extra does
free you from radios on a belt and hard hats with rubber duckies. But if
you aren't running obsolete trash, how can you hold up your head at
QCWA??? :-))

Sorry, this is what i meant to say- Ok to transmit if no more than one bar
is showing,preferably none but definately not 2 because that would indicate
a SWR higher than 1.5-1 which is the maximum SWR reading that i would care
to have while transmitting,other people may allow operation with a higher
SWR than me but that is only my opinion. I try to achieve a perfect match
whenever possible.....

Took a look at the site, this antenna is another of those latest, greatest,
that defies all rules of electronics. I am in the process of modeling it in
NEC4 and will post the results in the next day or so.

I will compare it with a 1/4 wave full size whip.

In the mean time caveat emptor...

You were doing pretty good until the nonsense about it being out of your hands because of the BBB. The BBB does not get in the middle of a transaction. They simply ask you how you handled the situation. Either tell the man your sending him his money, or "tough noogies"- your choice, but to come on here and expect us to believe yet one more layer of BS insults our intelligence.

Do some reading on what happens when you pass an rf signal through
a non-linear device (such as a diode).

I think you're dead wrong with this post. MLK day is not Black vs.
White. It's a day to combat racism of all kinds. With a post like
this, I think we really, really need this day.

Next, ask your dad about the Fox hole radios that used a rusted razor blade as a detector. Now put the two together and here comes the harmonics...

Any rusted connection, will at some point on the connection, show the characteristics of a diode.

2615. Message to Sean over at EEI

Newsgroup: rec.radio.cb
Date: 2001-01-15 02:49:06 UTC
From: k8cpa@arrl.net
Message-ID: <3a6261cf.1378688@netnews.att.net>
Source record: 68717

Hi Sean,

I was going to send this in E-mail, But I figured everyone in here would like to read this.

as some of you know, I ran a small house-based Internet Sales Shop here, Which basically was in my room here. and I'll tell you, it was "interesting" to say the least, I mean, I didn't know what was worse, The people that would call me to get "my best price" and then go over to "so and so" dealer, and have that dealer cut my dick off for 5 bucks, or the one's that would call me, and say, "What kind of "GOOD" radio can I get for $50.00?"

So, Sean, My point is... All this crap you guys are going through, is ALL a part of the business. I know, that coaxkid, Bill at Bills2way, Steve at Export R Us, Robert from Wildcat's radios, could all say. that have went through the crap that you're going through... and so can I.

Why did I quit? First and formost, The reason I Quit was my profit margin was very small, I wasn't making crap on any of the stuff I sold, Because I was trying to give the average joe a "deal" and in result, I ended up spending more money to make my site "nice", then I was making money, I never "screwed" Anyone, Ever. I was honest to every customer, I was even honest to the point of cutting off my foot, despite my leg... and in this business, they don't wanna hear the truth, they wanna hear that a Palomar Elite 500 Base will do a thousand watts, and it's just not freaking true... But that's what people wanna hear!

Anyhow... You guys over at EEI, Hang in there, this all will blow over soon and you'll be back to business 101...

73 and take care.

-Chuck

Just picked this thing up for a dollar at an auto swap meet.
A moble unit with 2 12jb8's and two TR43B transistors on the back.
Wondering if anyone remebers/has info on this unit. I don't plan on using it jsut put it on the shelf with the rest of the collection. Seems to have a relay vibrator to pulse the transistors to create the high volatage to the plates. Seems really neat.
It is a black case with a shrome face that is real plain looking.

Also picked up a CPI 100 base for a couple bucks. Neat looking with the dual channel knobs on it.

Thanks
'64 Falcon Southeastern Michigan

The sad part is that radio equipment makes up a very small part of our comapanies sales, but the majorities of the headaches. We can see why people drift to other lines of work. But we will indeed hang in there, thanks.

Question: how was CANADA named?

Answer: They put all the letters of the alphabet into a hat, and drew them out one at a time.

C eh N eh D eh

Unfortunately the royal stenographer was purely brittish and didn't know that "eh" wasn't A. It's just the lingo they use in those parts eh?

In any ase, nice to see that the igloos are holding up in the great white north. I went across the border yesterday dressed in my in my tuke and muck lucks to get some doughnuts and some real beer. Stopped in for some back bacon and saw a lead dog piss on my HMMV. I did manage to help out a stuck sled dog team. After I put some 2 cycle gas in the sleigh and pulled the cord then explained throttle and brake mechanisms the eskimo let the dogs off the harness attached to it. I had to refuse his offer of beaver pelts in exchange for the gas, but I shared my doughnuts and we told stories to each other over a few real beers.

Course eventually I did manage to trade the eskimo some ice for a container of real maple syrup.

I was better, but I got over it.

The Breeden Story: ...by those that know

His radio had no warranty to begin with, he purchased a factory condition model. We sell these near cost to radio operators that prefer to service their own equipment, and smaller shops. To sell these at the absolute lowest cost, we can not afford to service the units, and offer them the full support of our normal Export Turbo Tuned Model. The EXTT model we test, tune, and align, we know that the unit is 100% when we ship them out, so we stand behind them, and we warranty them for a year. We do not put so much faith in the factory fresh versions.
Damon purchased a factory condition model, as you can see on his receipt he posted. We tried to work with him on the exchange, but he was insistent that we some how intentionally sent him a lemon. We simply took the radio out of a master-crate from the pallet, and it went to our shipping department. Factory Condition. However, after speaking with Mr. Breeden we decided that there may actually be something wrong with the radio, and we agreed to exchange the unit for him. Not exactly our policy, but close, we do try to work with customers. When we received the unit it was in perfect condition, it functioned flawlessly. In this case we usually charge a restocking fee, and then refund the purchase, or replace the unit after additional shipping has been paid. Mr. Breeden called daily, and was rude and discourteous to the customer service staff, which has nothing to do with the accounting department that actually cuts the checks.
However, he was so belligerent that the customer service staff eventually just transferred his calls upstairs to get rid of him. Usually, we cut checks once per month to customers. He couldn't wait for some reason, and continued to call and complain several times a day. Although we could have exceeded policy and cut him a special unscheduled check, he blew that chance when he pissed off everyone he talked to. So, eventually he had the misfortune of accidentally being transferred to the CFO, which oversees the accounting office. He was then outright hostile to the one person that could have cut him a check on the spot. Needless to say, Mr. Breeden's priority level dropped every time he opened his mouth. We offer equal service to everyone, but our staff is not in place to act as a punching bag, or to council the socially inefficient. However, we scheduled him for reimbursement the next 15th anyway, and then either on purpose or accident, we don't know...one of the CS staff sent his check to the wrong Breeden, not once but twice. She was fired, for that and other mistakes, but as she was usually the front line for Mr. Breedens verbal attacks, so we don't know if she did it on purpose or not. This was determined after his newsgroup hate campaign, which is when it was brought to the attention of someone whom could research the issue. It took ten minutes, he could have called and asked for a supervisor and got the same results two months ago.
Now, Mr. Breeden has filed a Better Business Bureau complaint, so we

have to follow the guidelines for responding to the Bureau. Now, it will take a few weeks to process the request through that agency, to make sure all details are attended to. Eventually Mr. Breeden will get his refund, as he has been told. Now we have to work through the BBB so it is out of our hands. Although we offered him simple deal, and he chose pride instead of his refund, or he could have had his refund sooner. So the truth is quite simple, someone in our company made a mistake, and he further aggravated the situation by being rather unsocial. So when we were presented with the opportunity to quickly correct the mistake, someone passed on the opportunity. All in accordance with regular policy, we simply reschedule the refund for the next pay period when for some reason one is missed. It's not nearly as complicated as he would have you believe. Also, some of the post allegedly made by EEI staff, were forged. No doubt for the entertainment value, and to get a rise out of the newsgroup, as it did. All of us log in from www.expresselectronics.net , any other IP address should be suspect. Especially the Deja News Web Interface, no one here uses it.
Officially, EEI "Support" is the only staff member that post on the newsgroup. And we conduct no business in this format, nor do we discuss any transactions at any level. We are a consumer electronics firm, that happens to sell some controversial radio equipment. Whatever your individual opinion may be, you must understand that we have a business to run, we drive to work every morning like everyone else. It's a nice office setting with typical fluorescent lighting and very few windows. All of our employees are professionals, and being human they respond accordingly. More importantly, the people that answer the phone are female, and typically emotional. When treated disrespectfully their efficiency declines, and so does the service available. Although we did fire the CS rep that screwed up, we do not support the notion that anyone call our toll free line and vent their frustrations at the expense of our employees. Mr. Breeden had the unfortunate experience of pissing off all the right people that could have helped him. We asure you that is a difficult task indeed, and a very rare occurence.
Also, the retail outlet in Marshall is only partly owned by EEI. The rest is held by one of our minority share holders. We have no EEI corporate staff at that location, and no customer records. All of our corporate affairs, and internet sales are handled from our corporate office in Longview, Texas, the facility pictured on the Internet. And althought the retail site is "in a truck stop" as EEI leases a sizable percentage of the Pony Express Travel Plaza's service center, it is quite a nice outfit if you need an install, or on the spot service. Deffinately not your typical CB Shop.
We have responded here not because of all the lamers that have gone off at the hilt over this one, but for all the many people that have supported us, and those that have e-mailed their support and asked for the real story. Everyone that knows us, thousands and thousands of satisifed customers, know we would never intentionally rip off anyone. We are quite the opposite from our competition. Anyone that has dealt with both will be sure to tesify to that one. Also, we have received many e-mails asking us to just remove the Breeden site, and a few others for that matter. That may well be within our powers, but it is frowned upon by the hosting ISP's. In spite of our obvious

previous excursions into questionable networking techniques, our network security personnel are delegated to more important task at the moment, but we appreciate your confidence in our abilities, Thanks Guys. As always, all your radio equipment needs can be found at http://www.exportradios.com , come see the biggest and the best.

I started in CB. Then I got bored with it, and started on packet radio. But for that I needed only the No Code Tech license. (Sorry fellas, banging out morse isn't my idea of fun. Having a computer do it at a few thousand bits per second, well... That's exciting for me.) Never was much for HF, but now I play in microwave.

Still do talk on the CB from time to time to friends of mine who jabber on it. Most are content with what they got. Rest of my time is spent on some of the repeaters in the area. But time... Yeah, a little short on that these days. Waiting for plaster to dry in the other room. Perhaps I'll get to painting it tomorrow, then yep... You guessed it... Onto the next room. 1 down, 10 to go.

But I do have to say, not all CBers are dullards and resort to vulgarity. Some of them are quite bright, and don't really want to spend $500 or so on a new yaesu, string up another antenna, etc... So they typically gather round the sideband for a chat on 11 Meters. Beats conference call to Canada and all from New Yarkansas (now that Hillary got ??elected??).

Whether it be an infrequently on the 11 Meter frequency, or a jabber on 70cm, or spread spectrum on 2.4Ghz it's still a hobby. And I like my hobbies to be fun.. Computers being my main one, wireless networkwing the next, and then finally some chat on the 11 Meters.

Source record: 68737

Hey... About time... I hate morse code... It's obsolete... Get rid of it... Put more tech questions into the exams. You know, REAL tech questions...

Years ago people used to beat very loud drums to relay a message across long distances. Turns out that since Marconi they still do this very operation in the same manner. It's just using a device known as a radio instead of a drum.

Computers aren't going to go away. And I don't think we need to worry about the commies causing a large EMP anymore rendering all solid state devices useless. So, just like the butter churn, the buggy whip, and the horse plow. Let technology take it's course and GET RID OF THE homish style of thinking regarding radio.

Times change, people adapt. Sheeple just bahh and ballywhoo about it. I imagine a lot of farmers who didn't buy the machinery thinking that their horse was better than the tractor eventually bought the tractor, or moved to the city. Either way, noone plows a field with a horse anymore.

Don't worry... You can still beat your drums... Not outlawing morse code... Just taking it out as a requirement. You can still drive a buggy on city streets. Just uh... Pick up after yer horse. Thanks. But I don't think that part of the drivers test for an automoble license should be on how to shoe a horse, do you?

Also... I don't think that to become a doctorate of quantum physics that it's necessary to learn how to use an abacus or a slide rule. Hmmmmmmm... I wonder why that is? But, you'd have to ask one, cause I'm not a doctor. Perhaps a historian could tell ya how it works.

I interperet the controversy over morse and amateur radio as this:

"Waaaah, they're taking away a requirement that I had to learn in order to pass the test. Sniff sniff, sniffle... That's not fair." Ballywhoo and squaller all you want. Petes sakes, even my old Hayes 300 Smartmodem does morse code. And it hasn't been powered on since 1985!!!! Talk about O B S O L E T E...

Now really... Give me ONE SINGLE *>REASON<* why morse code should be a requirement? Not an excuse, but a real honest a god [*>R E A S O N<*]. And don't bring up major existentialisms like, "If you were trapped in a submarine, how would the rescue team communicate....." One REAL reason...

I eagerly await your replys. This is going to be fun.

They mistakenly got put into the photo transporter (a real honest a god device - but this is just for phun). and they appeared here last year. Course I fired up the inverse unit, and they should be on their way back via Relativity Express - when it absolutely positively has to be there last week.

I was better, but I got over it.

You have got to be kidding, right? Either that or you're a fool.
Racism against whites will not even be mentioned today (MLK day).
Instead, we'll have endless pictures of white police officers beating
blacks in Alabama (events from almost 50 years ago) and endless talk
shows with blacks talking about how horrible whites are.

In reality, today is just another day to trash whites with
hate-filled, politically correct, rhetoric (a prelude to the white
trashing orgy of February's Black History Month).

Sean, I can honestly and with a clear concience state that your posting regarding this problem I am having with your company is one of the most untruthful things I have ever read. You guys are even worse off than I originally thought. I have got to give you an E for effort though.

First off, it must be pointed out that any information that is posted by EEI or its agents on this or any newsgroup or forum regarding this matter is nothing but a further attempt to stall and sidetrack my attempts at exposing them to the radio public, the scrutiny of which through lost sales, it is hoped, will eventually leave EEI no choice but to submit to their own greed, over their CEO's immaturity, and pay the bill that is owed me.

I have been watching these hateful people post lie after lie daily as they do literal cart wheels to repair their tainted image.

The truth of the matter is that I have only called EEI regarding this matter on the telephone 3 times. The first call being made on 11/13/2000. When I called on that date the woman whose department that they said I was mistakenly transferred to was the one who answered the phone. I was never transferred to any other department. She put me on hold after asking what my call was in reference to, after a short time she came back on and said that my radio had been checked out and that there was nothing wrong with my radio, I said that I did not agree, that it was making these strange noises, and she came back on and said that it had a blown fuse. I said that I thought there was more wrong with it than that, and she asked me if I wanted another radio. I said no, and she then asked me if I would rather have a refund, I said yes, if that was possible. She said it was, and I asked her what the amount of my refund check would be, and she told me the amount I had sent in for payment of the radio, or $320, I then asked her when it would be sent out, and she said the next day on 14th. I said thank you and we hung up. I was not rude or impolite, and I did not try to minipulate or even suggest that I should get a refund, much less try to force anyone to send out a check on a certain date. All I said was yes after she asked me if I wanted a refund, and then asked when it would be sent.

On 11/27/2000 when I called I was asked after giving my name why I was calling, I said it was in regard to a refund payment, I was told that the person I needed to talk to was off work for the day. You claiming I upset people is a lie. Flat out, period. I was not rude at all, or mad in the least. The last call I made regarding this matter was made on 12/1/2000. After being hung up on numerous times for absolutely no reason, I was put on hold, and the CFO as they have termed her came on the phone and said your refund was sent U.S. mail...I asked when, and

she said about two days ago, I then asked the amount, and she got mad and said it was the same amount we had discussed before on 11/13/2000 and said goodbye and slammed the phone down. I absolutely at no time acted angry or negative towards anyone at EEI on the telephone. I was slightly abrasive in some of my e-mails, slightly, but thats it. I never called them at all after 12/1/2000. Any claims to the contrary by EEI is an absolute lie. Maybe we should bring in the phone records Sean...they tally exactly with my statements about calling 3 times. Get it?

If I were to tell you that my phone calls to your company were recorded, and also with witnesses listening on the speaker phone, proving that I was polite, and that your employees were the rude ones, not me, what would you say then? You want to go there?

Every post that EEI puts up regarding this matter is as a result of your companies unwillingness, or inablity, for whatever misguided reasons, to pay the bill EEI owes me.

You sent out the check twice to the other Breeden in my town huh? Really? You know whats wrong with that.....there are no other Breeden's in this town! Your company never even tried to pay me...you instead concoct these retarded claims about sending the check to another person with the same last name. If you did send a check out, it is my contention, knowing how hatefull your CEO is, that it had the wrong address on it on purpose. This way you could fall back on it as a seemingly ligetimate excuse to explain why I never received the refund payment you owe me. When actually, it was, and has been, a dliberate attempt by your company, under duress from the CEO, if not to cheat me outright, then to with hold the refund payment that is owed as long as possible in the extreme using the publics mis guided belief that if your company has many satified customers, then it is not possible for the CEO of EEI to get mad and freak out on someone to the point of pulling strings until whats happened to me has happened.

What angered you people at EEI is that I, this one person, dared to fight back, and even more aggravating, I used the truth to do so. Something that EEI can never do in this case. No matter how many speech writers your company brings up to bat every week.

Your company is headed by a very disturbed person. And this hard hearted and literal spoiled brat has stated flat out in his posting to this newsgroup on the 1/5/2001, that it was his goal to intentionaly cheat me out of the refund his company owes me. I think that time and the facts have shown, dispite your ever more desperate attempts at damage control, that this person hates and has hated the thought of paying me the money he owes me so badly....that he won't. I would hate to see this guy get mad in his house or office...I bet it is absolutely terrible. I feel sorry for his dog.

Until you have absolutely run out of bone headed stall tactics, you are not going to pay me.

I have noticed that if I state that your companies employees treated me rude, then you guys turn around and say I was the one who was rude to your employees. Typical.

And regarding the deal that EEI made me...they e-mailed on 1/10/2001 and told me if I would take down the website thay would pay me. They then asked me for a real address and phone number which told me right then they were still trying to stall. All the CEO wanted was for me to remove the website, so he could reduce the bad publicity, and go right on refusing to pay me. The address they have had from the begining has been valid, so them trying to use that lie again told me they were still trying cheat me for as much longer as they possibley could.

All of this trouble is as a result o your CEO being a rich guy brat who got a hair up his rear when I said the radio his company sold me was trash. He then put the word out through the company that I am not to get my refund...period. And any problems that arrise out of that are to be handled using the ye ole billions of satisfied customers shuck & jive bit, we have strict policies we adhere to bit, to make the lies and excuses that your company has been using for months to explain why I have not received my refund payment seem at least slightly believable, at least to the sheep.
In my opinion.

It occures to me I may have mispelled some words in this post...If so, please forgive me as the spell check on this webtv is erasing my posts when I try to check them.

Have a good one Sean, no hard feelings and best of luck to you and everyone else.

If Steve from "Ex-ports r us"
Is the Main supplier for the "X-Force Amp's"
And he is out of the "GAME" what are you all going to do?????
#1 Go back to get a "DaveMade"
#2 Get a "Foxy"
#3 Get a "No Name"
I hope the hell not a "SkallCracker"!!!!
The onlything that i can see is , If you are going to get a amp you
should get a Dave....
#1 You Will not have a probe. getting it..
#2 You need it to key on the"Duck" that You hadbeen working on..
#3 You need it to talk "Skip"...

So anyway you look at it you will win.....

Have a good day.....

>

The short answer is that it should not be for two reasons: first, the use of Morse is not a skill that needs testing anymore, and second, that learning 5wpm introduces so many bad learning habits that it probably is more of a hindrance to dittybopping than a help. I did 20wpm for the FCC and don't really give a rusty fuck if you learn it or not; it is, however, a skill that a compleat Amateur is going to learn for its enjoyment value for no better reason that it is in use worldwide today. I will admit to a growing private opinion that bozos who bellow about a 5wpm test (the Boy Scouts wanted 8 for a Merit Badge) are probably better off for themselves and the hobby if they go somewhere else - anywhere else.

It is a rather odd situation but a real one that the very definition of the Amateur Service in the ITU treaties that govern radio includes Morse knowledge. Most countries take this to mean 5wpm which incidentally was the first US standard a gazillion years ago. This is not going to change for three years at the earliest and that assumes it even gets a spot on the agenda in 2003. The existential fact is that for a while at least learn Morse or drop dead.

I have not a clue what the prevailing opinion among active Amateurs might be but I do know that opinions in general are always interesting, sometimes important, but never decisive. In the fullness of time you will get your wish -- just don't stand on one foot waiting. In the best of all possible worlds, you would have your codeless license and I would be a

rich man. Rather than spend the time bitching about Morse we would both be well advised to do something a bit more useful.

Sounds like you have your life together, good job even if I am a great fan
of drywall. Implicitly you make two good points:

1) Radio is a multi-faceted hobby. To speak of it as one thing is flatulent.

2) There is no inherent conflict between CB and the Amateur Service.

Couldn't agree more.

Uhh ....yea.....whatever dude.
Anyway, you'll get your money sooner or later I'm sure. The company hasn't ever had a BBB complaint filed on their behalf so they are just playing it cool to make sure all the proper paper gets shuffled. I could personally care less if you ever get a dime, but it's not my decission. Policy is policy, and they would have cut you a check eventually no matter what you did. And once again, not all of the post you are referring too were made by EEI staff. The e-mail you received from our IP address and mail server is the only official communication from EEI you have received. It would be my advise to try to be cool and not piss off anyone. You don't do that very well, but I offer the advise all the same. Realistically, you have to realize that EEI could just blow you off, you do realize that right? They don't usually do that, they never have to my knowledge, but you have to realize it's possible right? It seems like you could see the logic in the suggestion. If you really think you're hurting EEI with your newsgroup post, or the web site, you are deeply mistaken. Newsgroup activity usually increases web traffic slightly, that's about it. At this point the company can barely fill the orders fast enough, and they are hiring new people every week. You seem to really think your doing something, but I assure you that if EEI has lost one sale because of you, they didn't notice. EEI could very easily quit selling radio equipment all together, and do just fine. I vote for that one daily, but no one has listened to me yet. It appears to me that you're enjoying the attention more than you are missing the money, but that's just my opinion. I just work here. I'm paid well, but not well enough to respond to every one of the factual inaccuracies in your previous post. None of it matters at this point anyway, they will either send you a check, or they won't. Either way, I get paid the same. I hate to sound crass, but it would be hard for me to see your side since I know the truth.
And since I also know you don't have a radio (obviously), maybe you should check out some of our new models at http://www.exportradios.com We also have a new accessory page coming up, and we have the new Connex 4800 DXL (with 12 Bands of channels and echo/reverb, variable power, and hi/lo power) in stock now. Maybe you could talk them into sending you a radio instead. If so, I highly rate the new Connex, or anything Ranger. Have a nice day, I gotta' go to work.

This crap with all the bitching and moaning should really have been settled on the phone or in E-Mail. While it does provide laughter for the masses and food for the TROLLS, Usenet is not the place for all y'alls dirty laundry.(damn.....I'm getting that redneck thing back)
I think it has been well shown that these are not places to buy radios if you are looking for good service. Might be good places to go if you are looking for smoke being blown up your skirt......But that still makes for poor radio service and customer care. Rather than trying to cover their collective asses to the group that reads this NG, they would most likely be better served using the time to get their own houses in order.

EEI you guysreally suck why dont you drop the subject if his complaining meant nothing to you you would not be out here defending yourselves obviously it has and will hurt you guys since you are all liars your web page post mis-information as well I guess this will really uncover alot of bullshit about your little company as all eyes are on you guys and in a negative fashion. GET OVER IT! If you are as big as you say you are get over it but I highly doubt any of your claims.

Well, a ways south of ya' in Lancaster, Pa., there is a modest Amish settlement. They still use horses to plow the fields and horse drawn carriages instead of the automobiles. True Mennonites that adhere to old ways do not even accept electricity. Morse would be considered a modern, technological practice to some. But man 'o man, can they whip up some serious grub!

Try a wooden dowel. With the weight of this thing it would be a fun
experiment but only if you've got tools & other supplies already
available. Otherwise it'll just start costing money for something that
has some bandwith but that's about it.

Ditto's on Real World Electronics. Sean has done several radios for me and many others I know and it would be hard to find another as good and honest as Sean. He is very easy to talk to and takes the time to explain how it all works like no other. He has taught me and others very much with this hobby. He can make a radio sing loud and sweet, and by the way I still get complements and how well the radios sound after many years of use.

Sorry about your radio Maniac, Sean will fix it up for you with a smile and tell him hi.

Dave,
I just read a post a little bit ago about dropping this topic. It makes no difference to me. We can go on and on if you like.
I know of only one person that has purchased something from your company. I believe it is a 2990DX turbo tuned with 150 rms and 225 peak watts. I now am going to look him up and see what he has to say. I don`t know him in person, just the handle he goes by. I am now curious to see what he has to say.
I have looked at your site quite a few times and it`s rather interesting. I have sent emails to your company and got no responses from them. I have also sent emails and got responses from them. That is not really a problem because I know that you guys are busy and can`t answer all my stupid questions.Some of the questions I sent, if answered, would have constituted a sale. I would like to think that if I was to buy something that the CEO would not be involved in the transaction.
Most of the things that I have read about EEI are good. I would like to think that EEI will stand 100% behind their customers. I`m glad that the CEO of EEI doesn`t handle situations like this more often. He needs to take the time to think about the little people that are calling for whatever reason, that truly make up your company, because without them you are nothing. I am one of the little people that may call EEI one day and want to buy something.
I can tell you this. I would not be in the position I am in, if I didn`t take the time to see that everything is going smoothly in my world. I will kiss the customers ass if it needs to be done and I`m not afraid to admit it. I do what needs to be done.
I am also proud to be in my position and can sleep at night knowing that I did my best to solve a persons problem. More of us should feel that way and I believe that YOU do also.
Lets get this resolved and put it to bed. There is always going to be another fire to fight. Just remember, it might be your fire that needs put out and what do you want to happen when you make that call ?????????
Take care
Randy

Twisted,
I`m about 20 miles South of Pittsburgh, Pa.
Pa is not the place to be anymore. The average age is climbing and the "good" jobs are getting hard to get. Most of the steel mills, coal mines and heavy industry are gone. They`ve got all these industrial parks around here paying $8.00/hr where the mills used to stand. It`s depressing to me. I remember the mills stretched farther than the eye could see. There must have been a 1000 to 1500 cars in the parking lot at any given time. Very little crime. You left your keys in the ignition of your car and never locked the doors in your house. It`s a damn shame and it`s not safe to walk down the sreets around here anymore. The hand gun sales are climbing and the women are all getting permits to carry to make themselves safer. It`s getting to be a cold world that we live in.
Geez, I`m going off the deep end. I think that`s enough.

73
Randy

Yep, he was at the Communist training school in '57 in Monteagle, TN with Elanore Roosevelt (another commie). He was very IMMORAL with MANY woman, probably how he was killed by one of his woman's husbands, (unless the commies in the Govt. killed him to furthur communism here) but we won't know for sure til his files get opened in 30 years or less, unless you want to see what this communist was all about, then ask your Congressman or Senator to open the sealed King files that some reprobate Fed. Judge shut for 50 years in the 70's! FOR a tract by Julia Brown called "Don't Glorify MLK," e mail me @ truth@planetc.com and I'll tell you where you can send your $.75 for a copy of this paper from a SPY that infiltrated the commie party here in Ohio in the 50's that this GREAT black Lady spilled the beans on Pinko MLK. I am an equal opportunity commie basher, no matter which race they are!!!!! I wonder if the commies ever used CB's in this country? !!!! Dave!!!!!!!!!!!!!!

It's not the cash, voo8er, I go north usually once a year, sometimes twice. Not too far from the buckeye, either. But Dayton, nah! Only thing I like about Ohio is SOME of the folk there and the last exit sign before you leave the state, reminding me I will soon be gone. See, Ohio is one of those states that you either live and die in, never going anywhere your entire life, or by luck, hit it big time and remain there. The ones who do manage to pull themselves away, are usually returned by some sort of default. I have spent time in Cinci, Cleveland, Euclid, Dayton, Hebron, Ashtabula, East Liverpool, Steubenville, and Akron. I have no desire to return there anytime soon. But the invite still remains for the keydowns. One coming up in March, 'bout half way between us. Be a sport. Meet me half way and we'll pull the long noses in a huge circle and it won't cost us a thing.

"Mr. Aaron H. Voobner" <aaronvoobner@my-deja.com> being a complete nutjob and whiner scribbled the following babble in message news:93j49s$k5$1@nnrp1.deja.com...
> Believe it or not guys, all the things you mention above are caused
> directly or indirectly by the "it ain't illegal if ya don't get caught"
> philosophy that you so enthusiastically share.
>
> -Aaron-

Who said we share any philosophy aside from you being a complete nutjob and whiner who's off on some holy crusade to slay the "evil" CB radio "mafia" who has hired "assasins" to "single you out" and "attack only you".

We don't share any philosophy regarding illegal activities. No "evil" person has "hired assasins" to "single you out" and hunt you down. We're merely telling you that talking about ANY topic is freedom of speach. Yet you find is necessary to jump in and say stuff like, "Isn't that illegal...." Pointing you finger and waving it back and forth saying "tsk tsk tsk..."

This is a GLOBAL (meaning not just US) newsgroup. What's illegal here could be perfectly legal in say Austrailia. How presumptuous of you to go forth and try to enforce our rules on other people, much less people that are NOWHERE NEAR, and haven't caused you a single grief.

Now take your snivelling snot nose comments regarding problems that aren't yours and stick em.

I got an idea. Get yourself a spectrum analyzer, a directional antenna, and go on a "fox hunt" for the illegal CB'ers in your area and stop pestering people that haven't done a single thing to you, or a single illegal CB activity. In short, you don't like the problems in your area, then do something about it instead of hiding behind a keyboard and pointing your finger when it isn't in your nose.

You run off at the mouth, point fingers at people, and cry wolf every time you see your shadow. And quite frankly people in this group are fed up with you.

As a matter of fact, do a search in this group for the word "illegal" in all the message body's. Hmmmmmm... Who's name comes up on the list more than anyone else? Any one of your posts I can pretty much guarantee that you'll find that word in there. Also, other people come up in the list as well, but surprise surprise surprise. They're quoting you, you repetitious troll. There's little difference between your mental capacity and a parrot.

Now I don't know what your mission REALLY is, because obviously it isn't to stop illegal CB activity. I can tell that because you haven't done a dang thing about in your neighborhood. So, I submit that your delusion here of being in a position of authority is just so that you can prove to your wife how much of a man you are when you have your pillow talk.

Obviously she's foreign, doesn't speak english very well, and is very dependant on you in this new land. So, this is probably your way of making yourself look important to her because you feel the rest of your life is just as insignificant as you believe. So this psychobabble you continually spew forth is nothing more than a vague attempt as making your easily misguided wife think you are a MAN of authority rather than a lying snivelling delusional nutjob like you really are. Because how would she really know? Excellent job my boy... Excellent job... Family life is so bad, that he has to make his wife believe he's on a crusade during "pillow talk".

Jeesh.

I wouldn't doubt it if he voted for Gore. But uhhh, I heard he had a problem understanding the ballot, and he wants a re-vote. He may have voted for Buchanan. He couldn't really make up his mind when it came time to cast his vote either.

Couldn't find Mickey or Goofy as a choice.

2681. one last thing to mention

Newsgroup: rec.radio.cb
Date: 2001-01-15 17:21:38 UTC
From: David <sales@exportradios.com>
Message-ID: <UjG86.1704$hD5.35066@nnrp1.sbc.net>
Source record: 68685

First off, Damon, did you happen to read the receipt that you were sent? Since you bought the radio 10 m only, there is no warranty. We worked with you, or should I say, attempted to work with you. Anyway, I appreciate you posting this, so here is the link.

http://members.tripod.com/valleyarts1/superstar_4900b_sales_receipt.htm

Also, Damon, would you mind showing the letter that you sent me first? You showed my reply, but didn't show your original letter. This is one of the reasons that I forwarded every complaint that you sent me to the complaint department. I have changed computers since then, and don't have it on file or I would show it. I think you should show how rude you were to start with, and show the nasty letters that your "friend" sent me. And mention the nasty phone call that your "friend" made to me. I am not condoning what the CEO did, but I am not going to condone the language or attitude that you gave to me and the EEI customer service staff. I guess you forgot to mention that. And don't come off as being so innocent. I do not lie and will not lie; especially over a measly $320.00. I have more important things to do. You just remind me of my little sister when I was growing up. She would always tell my parents exactly what she wanted them to hear about me, but would forget to mention what she did to cause it. I don't know what to think about you, Damon. I personally don't care if you keep the site up. It is completely up to you. I will tell you this, though. Starting crap on a NG with people that already don't like us is not a big deal. Very few people like us in the NG. Those that do, don't care what you say because they are completely satisfied with EEI. Just like Nick250. We basically messed up his order. We took care of it for no charge, and now he is happy with his purchase. The same goes for BigDog326. We didn't mess up his order, but we have been there for him when he needed us. There are other loyal customers of EEI here, that have emailed and called me commenting on how stupid that guy is on the NG. And they are not referring to EEI. So do what you want. It really makes me no difference. To be honest with you, I am not too terribly worried about guys like Aaron and Taxi Driver, anyway. They have their opinions, which they are entitled to, and I have mine. Unfortunately for them, a very small group agrees with them and a very large group agrees with me. As I said before, it's just my 2 cents.

Greetings!

Went to the site, that is a neat antenna.

I *HIGHLY* recommend that others go to the site and see it for yourself.

The "dual frames" feature helps, click on the individual photos and see the details enlarged. You notice some construction techniques that will *help anyone out* in putting together a system.

Click on the links above and see the details - this antenna is a machined unit. Look at the base mount, it uses an SO-239, SMART! A lot better, if not beefier, mount to hold this beast.

There is a photo of a lady holding this antenna, note the length of the whip, it extends beyond the length of the photo. This antenna, when you put it together, is gonna be one mean [SOB].

The use of it as a mobile beam, the dimensions and distances will help those in competition. Or just those interested in mobile beam or any type of beam setup.

This site is well thought out, mostly photos, and I can see where they don't want to give all their secrets away, but it certainly looks durable.

When my ship comes in, I will be going back to the site and getting one of these. I have the location on the Tracker already set up for this antenna.

Since when does 'factory warranty only' imply 'no warranty'? If you a factory rep for the merchandise you sell, then you should be in a position to warrant DOA merchandise.

It hardly matters at all how the customer responded to you initially; you sold defective merchandise. If you don't stand behind it, then you stand behind nothing at all, and all readers of this NG should now be aware of this. I'm certainly happy that you were able to clarify your position. If anyone had any doubts regarding your culpability, they certainly have now been clarified.

From: David <sales@exportradios.com>
Message-ID: <JVH86.1708$hD5.37108@nnrp1.sbc.net>
Source record: 68691

Well he must have called the wrong number. Or he may have just said he did
to start some problems. Either way, we don't want the NG to think that we
can't even remember our own phone number. Besides, as much as this guy has
attempted to bash us lately, why would he call us?
1) He actually doesn't know all that he claims to know, and realizes that
the EEI techs are the best in the business.
2) He actually didn't call and he wanted to start a problem.
3) He called the number just for kicks, and he called the wrong number.

Regardless of his reasoning, there is not a lady named Bernice answering our
tech calls. BTW toll free, why did bigradios.com shut down the message
board?? Could it possibly be because members got on there to cause problems
by stating false accusations and false allegations??

Sorry for the Spelling.
The conclusion is that Express seems to have an arrogant "know-it-all attitude", combined with misleading & possibly false statements through out their website.
Browsing around the site seem to lead you to endless long-winded pages of propaganda telling you that EVERY single other CB shop that has ever existed is bad, stupid, or incapable of fixing or modding a rig. The need to "explain" in bullshit detail to you what all their competitors are doing, THat their meters are all "Bad"...on & on.
Misleading descriptions of items lead you to believe you are buying a "version of the XXX by XYZ company"....& then you find out it ISN't an "XXX" or "BY" XYZ company, as they claim, & yet they don't even tell you who does make it! Presumably their Export "VERSION" of a radio is still that same brand radio, but "version" seems to mean a different thing on each item, with no explination. The average Joe customer would believe they are getting a different version radio than the "modded" 10M rig sold elswhere, when in fact they are buying the same "modded 10M" rig from Express!! Or a trucker might think he bought a "Heavy Duty Version of the Road King 56 By Telex", as it clearly (and Only) states in the webpage, only to find they shipped him a copy mike made in China & not affiliated with Telex at all!
BUYER BEWARE

>

As far as bundling, your guess is as good as mine. What is kind of funny if not a bit tragic is what you do if you happen to be one of the multiple forms of Mennonite and don't happen to like or be very good at farming. I spent 18 years in the largest dairying county in the US with a large Mennonite population in a neighboring county. While the courts handled the claims on super-duper all-metal silos, there were several teams of Mennonites that would put you up a very lo-tech silo that was round, straight, did its job admirably, and barring a nuclear device would fall down sometime in the 24th century.

A dairy barn is somewhat specialized because the whole farm revolves around it; when it is 30 below outside, the animals are the heat source so dairy farmers can't add or subtract from a herd at will. Given the herd size that the barn determines all else is scaled to feed, milk, and support the herd. As a practical matter, this means electric power for the milk house, etc which the Mennonites probably don't know a hell of a lot about; one of the great problems in an area where the ground conductivity is so crappy is to be sure the best path to ground does not include Bossy -- she gets a little bitchy with a few microamps thru the milking machine.

Dear EEI,

I am working on a letter to the FCC, using many of your emails as
examples of why you should be investigated for selling illegal CB gear,
violating FCC law, etc.

I wonder if the above quote (where you say that you sell X-Force) is the
best for my purposes, or perhaps you have better, more enthusiastic,
open admissions of guilt.

Thank You,
Aaron H. Voobner

What this day is really about is DOUBLE STANDARDS.
It's about the reality that - if you are a politically-correct minority -
you can be universally-accepted as having cheated your way to your Ph.D. degree
and being a clergyman who constantly cheated on wifey with more women than Bill
Klinton did, and still be honored with a national holiday.
Scandals of
antigun politicians - that even the NRA doesn't mention!

It just proves that this NG is widely read and used as a "virtual
clubhouse" by illegal CBers and dealers of illegal CB equipment.

Don't know about channel 6 but I can go along with this:

never buy a house
with a Homeowner
Association !!!!!!!

Unless you mean that there are hundreds of people talking at once on that channel and you find that unusual. That is the "Superbowl" where all the big guns hang out (yes they are running amps, yes they are doing illegal things so anyone else that wants to clarify on the use of such "Channel 6" equipment doesn't have to, I think I have done that well enough.)

Well I hear plenty of them Mennonites and Dutch folk turn their backs on the old ways once they get a taste of sowin' their oats during their teens, all hell breaks loose, and it's real difficult like to get back in good graces with the church. At least that's what the buggy driver told us, after we paid our tourist rate of six bucks per person to squeeze in a stagecoach looking contraption pulled by a working farm horse for a quaint little ride in the country that consisted of 4 right hand turns. Wonder if the state makes you insure them? Hell, I wonder if you gotta have a license for 'em. Maybe a certificate from the vet or something, vouching that your horse won't get friendly with the first SUV it sees. With food like the Amish make, it's a good thing I live on a seafood corridor.

The mobile version of the Courier BL-100, I believe. It is a linear amp, and you should know the rules about them by now due to all the recent traffic on this newsgroup regarding such devices ;-). I have a schematic of it if you would like one. Post a request here, I will scan it and send it off to you.

This thing has been sitting on my desk for the past couple of months and I want to know if anyone has any info on it. I believe it had 2 6LQ6s. It was given to me by a friend of mine's father who had it in his garage and didn't know what it was. I plugged it in, works fine just don't have anything to test it with. However, I went in to clean one of the tune/load caps and the coil tap inside had been moved down the coil, so, this might be set up for another band possibly 11 or 10 (this is why I am posting it here). Any info is appreciated. Thanks!!

PB from KG4 land.

It is a shame that the Black youth of today do not understand Dr. King's message. When one hears the phrase "Thank God for MLK, if it wasn't for him, you wouldn't know where to buy drugs in a strange town" it speaks volumes for the wasted opportunities that he fought so hard for.

As I am old enough (almost 62) to remember the Jim Crow days and the real social discrimination Blacks endured, I want to reach out and slap some young hip hopper who claims he is the victim of "oppression".

Removing discrimination does not mean everyone will love you, it simply means that no road blocks will be placed in the way of those willing to work for the American dream.

Hello Toll Free: Good posting I have learned something. Thanks.

It would be neat to look at a transmitted signal with a spectrum
analyzer and see the spectrum with a bad connection.

When I was a kid we use to put fine dust in the Pi Network load
capactor, to get it to arc causing broadband noise for fellow CB'ers, in
a local jam ah thon. The guy up the raod ah ways use to go outside and
blow his horn when we was gettin to em.
Ah the old days.....

Hey Aaron, what are your numbers? I'm interested in seeing if you have a ticket or not. For some reason I picture you in a log cabin miles from civilization. I'm just curious. Oh, BTW, you can think what you like, but my phone hasn't slacked up in 3 months. Maybe you guys are blowing in the wind. Maybe there are so many loyal customers of EEI on the NG that they would believe us over an irregular ham operator. Maybe you will eventually notice that where as people complain about our company once every blue moon, they never seem to slack up on the jokes and wise cracks aimed specifically at you. As I said before, it's just my 2 cents. But as for all of our EEI customers in the past, present, and future, we look forward to dealing with you in the future. BTW again, Aaron, why do you think that the only electronics we sell are radios? This is a very small percentage of our market.

Thanks,
David

Thank a tree hugger! At the end of WW2 we rebuilt the Japanese steel industry as is our practice of rebuilding a defeated enemy. Their plants were able to produce high quality steel and their labor rates were far cheaper. At the same time the US steel industry was faced with the tree hugger crowd demanding that the US steel industry reduce emissions. Faced with dropping orders lost to cheaper import steel and rising operational costs the majority of the plants shut down US operations. Pittsburgh and Birmingham, Al in particular were hard hit. Both being one industry towns, the trickle down effect virtually wiped out the economy.

Had the Government been less aggressive on it's clean air plan the steel industry would have still had a tough roe to hoe, but jobs would have been saved an the industry given a chance to survive. What little profits were eked out were taken in union demands and government environmental fines. The goose that laid the golden egg was dead, but by damn we showed those greedy capitalistic pigs!

Don,

Please quit thinking. It may be dangerous to your health. You *think*
you know the answers, but you really do not. Many people feel that big
brother's wide hands do not need to be involved in radio. I for one
dislike HAM privileges. You are basically opening up your personal
life to the govt (like it isn't already! - but now over the open air
waves). You give them your name, address, phone, etc, etc. Everytime
you end xmissions, you must give your call out. Any bozo with a web
browser now knows your location via qrz.com at this point. No thanks.
In my world I will talk as I please, and when I please, and on what I
please. Try to stop me. Oppps! You cant! Too bad.. Keep
complaining on rec.radio.cb, or go find your own little group to
infest. You are the disease. I am the cure. Take your commie style
bureaucracy elsewhere pest. Have a good day at it also! =o)

Has anyone ever heard of this radio? It is a 10 meter radio that puts out 25 watts peak. Does anyone know if the radio is modifiable for extra freqs?

tnx

So in otherwords, they are like your local CB shop, but on the internet?! :)

There's one back in NJ called "CB Radio Exchange". Most people call it "CB Rip
Off Exchange"... :)

Whatever winds your clock. The only fear I ever had of Big Sam was in the Nam days when radio ops were a bit rare; all that happened was getting recruited by what I gather was the NSA wanting me to copy Russian fishing boats. Been handling bozos all my life and have yet to see one on this or any other newsgripe that scared me.

It is just too damned much work to masquerade as the Velvet Codpiece -- so I don't. Real men do not live in prisons of their own making.

Several points here:
1. I have no way of knowing that you are not the CEO using a new name. You are just as likely as not the same person. Nothing but pure faith speaks otherwise.
2. I don't know that anyone cussed your wife out on the phone. Iif she was paid to answer the phone, then regrettably, that is part of the job, or she has the option to hang up. I suspect that a lot of people might be so enraged with your business tactics at some point as to cuss, though it is not excusable.
3. The radio receipt indicated that it had the factory warranty. You claim that it had NO warranty.
4. Under what law would you be permitted to tell the customer to go fly a kite? Really, don't blow this off. The receipt says it is guaranteed. You are the retailer. I have no way of knowing what you told him verbally, but the written record shows that it was guaranteed. Under what TAC are you permitted to do this?
5. If the guy broke your warranty policy in several areas, that implies that there was a warranty to break. Inumerate the areas in which he broke the warranty.
6. In what way could Damon have been helpful to you so as to elicit a proper refund?
7. When CEO chose to make this a public issue, he took the lid off the kettle. That's why this needs to stay a public matter until you take care of your customer. If you fail to handle the matter properly, the rest of your customers/potential customers should be aware of your business practices and act accordingly.

Looking & reading their website is like a mirror image of talking to a "used cars salesman"!
Go to a car dealer & mention the auto dealership in the next town over, & right away you get endless "bullbabble" about how their service dept is the best & has better qualified techs, how their cars are somehow a notch "above" the same model cars sold at other places, You are warned about how you can't trust anyone but "express cars inc"...etc. THEY have to had used a "used car salesman's Bible" when designing that webpage!!!
PS.... The best plumber in your town is probably NOT the guy who recently graduated graduate school, has the fancy Van with the $2,000 lettering job & set up the fancy website to match.....It IS the guy that has 20 years experience, probably didn't get an engineering degree or have a slick website, but he knows more tricks & knowledge about his work & will do it better, faster & cheaper job than MR. "Diploma Slick" , even though MR. Slick has that new $8,700 Bird "Waterflow" meter & the new digital radar pipe fitter.
Express IS Arrogant printing all that negative crap about other dealers, while elsewhere on the site doing thing that will allow OTHER dealers to use them as a prime example of CB ripoff artists....

2724. FS:No Name 5lb Maul $240.00

*cough*cough*

This is lame. EEI, dont worry about these peckers. Jealousy hurts
many. Keep on doing the great job you have been doing. This will all
pass with the wind. I will continue to order from EEI because they
have done me well. The radios I have purchased met your claims, have
been aligned properly and the work done to 100% satisfaction. Keep up
the good work!

BROWNING MARK III, COMES WITH TRANSMITTER, RECEIVER, SILTRONICS 90, INTERCONNECT CABLES AND STOCK D104. THIS IS MY OWN PERSONAL RADIO THAT HAS BEEN SITTING IN A CLOSET FOR THE LAST 2 YEARS UNUSED.IT IS IN NEW CONDITION AND YOU WOULD HAVE TO LOOK VERY HARD JUST TO FIND A SCRATCH. ALL THE KNOBS AND METERS ARE LIKE NEW ALONG WITH THE FACEPLATE AND CABINETS. I PLUGGED THE ANTENNA SO I CAN TEST IT THIS BABY WAS TALKING ALL OVER,I PLUGGED IT IN AND ALL LIGHTS AND METERS ILLUMINATE. I DON'T FORESEE ANY PROBLEMS BECAUSE I HAVE NEVER EVEN TAKEN THE COVER OFF OF THIS RIG, AND IT ALWAYS WORKED FLAWLESSLY. I WOULD IMAGINE ALL THE SWITCHES WOULD HAVE TO BE CLEANED JUST FROM SITTING. THE SHOP I PURCHASED THIS FROM TWO YEARS AGO WAS WALT GOODMAN TWO WAY COMMUNICATIONS DOWN IN ALEXANDRIA,LOUISIANA WHO SELLS HAM RADIO EQUIPMENT AS WELL AS CB EQUIPMENT.THERE IS A SWITCH ON THE BACK WHICH WAS ADDED BY THE STORE WHERE THIS RADIO WAS PURCHASED.IT TURNS HE PING ON AND OFF. ALSO INCLUDED IS A SILTRONICS 90 VFO, THIS ENABLES THE RADIO TO GET ALL THE EXTRA CHANNELS. THE D104 IS THE STOCK TYPE, IT WORKS WELL WITH THIS TYPE OF TUBE RADIO. THIS RADIO IS SOLD "AS IS" THERE IS NO WAY I CAN GUARANTEE 25 YEAR OLD RADIO. THIS MARK III IS A 9.5 OUT OF 10(THERE IS NO SUCH THING AS A 10). IF YOU WANT A COLLECTOR CONDITION MARK III THIS IS THE RADIO FOR YOU. PAYMENT BY POSTAL MONEY ORDER IN ADDITION BUYER PAYS ACTUAL SHIPPING COSTS AND $15.00 HANDLING AND PACKING FEE. PLEASE DON'T WASTE TIME CAUSE THIS IS THE BEST OF ALL CB RADIO BASE STATIONS.

What is served by any company getting in to a personal urination contest?
The better part of valor is to take care of the customer, and let the rest
of the stuff die out. Your continued responses aimed at individuals that are
not even customers, or possible customers is counter productive.

LOL

You relative newbies are showing your lack of time in the CB world.

The T-Bolt 305 was a 6LQ6 amplifier.

Tubed

Base Station.

Made similiar power to the other 1 drivin 3 amps of its time.

Nothing against ya, but it was one of the bigger names out on the market in
the early 80s :)

Bottom line.

Svetlana tube manufacturer made the worlds largest power tube (at one time) for the "Russian Woodpecker) *the hams will know what I am talking about here*

The woodpecker was used for jamming transmissions during the cold war eminating from the VoA and other "propaganda" stations.

If the Commies wanted to do something about it, they would... But why? They have their people so scared now that it isn't needed.

An interesting sidenote, the Russian Woodpecker was able to defy more than a few laws of physics, like bending, "seeing over the horizon", just to name a couple.

Can't remember where, but I read an excellent article about it a few years back.

Anyway.

>
>Gee QRM... sounds like a personal problem to me. You must speak from
>experience!
>

Unfortunately, I do speak from experience.....the experience of listening to their stories while teaching them a trade in prison, and while helping them find a job when they get out.

For every Mama who was trying to raise them right, there was somebody influencing them to go the other way....a father, older brother, neighbor.

The vast majority started with little things. You know. The ones that don't matter. Everyone's doing it. It won't hurt anybody. (Freebanders--anything sound familiar here?)

So will illegal operating on CB create a bank robber? Probably not.

But it WILL influence your children and their attitudes toward society and their respect (or lack of respect) for others.

I'm well aware that one guy cranking out these posts won't change the world. But if it makes even one parent THINK, it's worth it. That's all. Just THINK.

I'm in awe when I hear someone who looks back on life and says that his Dad always stood for what was right. Or a biggie (but unfortunately rare) comment, "My Dad admitted that what he'd done was wrong, and he vowed to make it right."

A week ago, I received an E-mail from a fellow who talked about the positive influence a local CBer had on him many years ago when he was a youngster. It was such a tribute that I located the CBer at his current address and mailed him a copy of the E-mail. This CBer probably never though of himself as an inspiration to others, but clearly he was. (If it's still on the hard drive, I'll post it here. See if you agree).

There's a guy on the radio from another generation named Paul Harvey who is fond of saying, "Self government won't work without self discipline." If we're not passing along time-tested Principles and Standards to our children, they can be lost in a single generation.

Mrs. Clinton did not originate the idea that "it takes a village to raise a child." That concept was around a long time before 11 Meters was opened to the public. But it's still just as valid in all areas of life, including Citizens Band Radio.

Just think about your influence on others. That's all we're asking here. Just give it some thought and do what you think is best. Thanks.

QRM

Thanks Mad Dog -- saw the FAQ on the Firestick page and had some
reservations about a couple of their answers. It's been posted here
before, but there was one about an 18-foot coax "rule" that's just
plain inaccurate. Also about rolling coax up into an RF choke and how
it's a bad thing. All a choke does is act as a cheap balun -- big
deal, I would think it's a good thing. If it's not good, I'd like to
hear an explanation.

We had a TVI complaint that I was part of handling for a radio club. The problem was in an aluminum Delta Loop (essentially a triangular quad) beam that was grungy as hell and had some half-baked repairs when it suffered some damage. Generated all kinds of crap. Aluminum is probably the worst for goofy diodes at fracture points.

I received the following last week. Since the CBer also obtained a ham license, I was able to determine that he still is alive. I mailed him a copy of this tribute. I have not received a reply yet. I assume he is elderly and blind, but I hope someone was able to read it to him.

(Portions of the text have been snipped for brevity and privacy.)

-QRM-

Hi Paul!
When I was really young, I was very excited about radio.

My best friend in the sixties was a wonderful man named George
//////////////////.

He was blind all his life and was provided with a Heathkit HW-12 by the Canadian National Institute for the blind. (CNIB)

His voice and manner were the biggest thing going in Toronto at the time and I lived only blocks away. He was later granted the call sign VE3***. He had a 75 meter antenna strung over his roof and a Super Magnum, half wave ground plane, 60 Feet up, very near the edge of Lake Ontario.

He used a Cordon Satellite CB With 23 possible channels included.(The follow up was the Cordon Spitfire . New Technology at the time, Still tubes.)

Only, he was allowed channels !,2,3 or 23.
The call channel was eleven and highly enforced. A pair of crystals in the sixties was twenty bucks, cash! Nobody dared to break the law. They were all sober except for Annie that sold the most of us our radios. Annie was on every night and very outspoken.

I only saw George a handful of times but I loved him so much that I would listen to his incredibly rich voice on tape when I was on holidays away from Toronto.(God ,what I'd give for those tapes today! The times were about !966 to about 1971. I met my wife and drifted from CB then. Whoa! was it ever passionate then! Hot! Hot, HOT! Noonies Galore!

The city of Toronto was very much in love in Old George at that time and I wonder if there might be away for you to find out any more about him. I believe he died a few years later. Around here, he was the father of many lifetime radio operators and inspired me in electronics. In my hundreds of hours talking to him or staying up all night, I never went over a hundred milliwatts and then I had a Johnson Messenger 1, then a Satellite and a Spitfire And a Super Magnum. I even built a Hot water12! I lent them to friends and they were soon lost and I was back to a hundred milliwatts but I stiil had the Antenna. Only

50 feet.

George was by far the most popular man on CB and never broke rules. George taught us everything about radio and was better than any talkshow host in history. He was very tactful and caring.

He lived in his room with his aunt looking after his needs. He looked after ours as the best teacher I have ever known! I was born may 19, 1954.

Thanks again QRM2000!

Be talkin' at ya!.

2743. Re: Bendthelite puts EEI's Back against wall

Newsgroup: rec.radio.cb

Once again, if the NG reaches 2% of our market, it is lucky. As I mentioned earlier to you, we do not wish to market the NG. If we were to say anything, the anal retentive hams would make up some cockamamie story about how their ham gods told them that what we are saying isn't factual. Our guys watch the NG often and email potential customers. I feel sorry for someone that is just getting started in CB radios. You anal retentive ham-ops and CB haters rip them to shreds just for stumbling onto this NG. I can hear them now,"Well I'm not going to buy a CB because some ham-op named Voobner says it is illegal." Yeah right!! Like anyone that is getting into CB cares what a ham-op says. If they cared, they would get their ham ticket. I know that by visiting and responding to this NG the last couple of days, I have lost precious time that I could have spent with customers. You guys must not have a job if you can live on this NG. You may need to reconsider your priorities instead of preaching to the same old NGer's who have been here since day 1 about your unpopular beliefs. Just for the record in case someone has had their head in the sand for the last two years:

Voobner is an anal retentive ham. He hates CBers. Especially those that use them illegally. He jumps down guys throats with the same answer to every question(regardless of what the question is referring to) being,"That's illegal!! No question, that's illegal!!"

Gary Danaher is the same except that he can actually stand CBers. He just thinks that the CEO was wrong. Yeah, so do I. Whoopee!!

Taxi Driver disagrees with EEI also. He uses more foul language than normally heard on 27.185. I'm certain that he had his CB stolen and is now a CB hater. BTW, if our prices are too high, go elsewhere. I don't have a big problem moving stock at our prices.

bendthelite(Damon) is mad at EEI. Instead of handling it correctly, he started a hate site. I am really enjoying the constant email I am receiving from this particular site. Man, I am actually surprised at the many names guys have come up for you. Needless to say, I'm not receiving compliments about your site.

www.kp82.coms doesn't like CBers either. He is 20 years old, yet is pictured drinking whiskey on his front page. (I could have sworn that was illegal in Texas)Yet he talks to me about breaking laws. (I hope he doesn't drink and drive!!!) He also likes to talk about homosexual acts in his comments. I don't quite get this guy.

This is all I have time to mention for now. You guys need to reevaluate your schedules. Even your fellow NGers are starting to make fun of you.

2744. EEI again

Newsgroup: rec.radio.cb
Date: 2001-01-16 01:24:00 UTC
From: Gary Danaher <gdanaher@home.com>
Message-ID: <3A63BE9D.95D35678@home.com>
Source record: 68848

Sorry for the continued EEI comments, but that's how EEI seems to want it. It seems that he is trying to move this all to private mail and away from the group, so I thought I would clip and post his most recent response to my query. I sent a plain text message and he responded after spending time to change the color, font size, etc. Curious that a busy businessman with plenty of things to occupy his time would spend time doing this, but again, that shows where these guys are coming from.
Anyway, in ascii:

1 , 2 , 3 , 4 , 5 , 6

1. I have no way of knowing that you are not the CEO using a new name. You are
just as likely as not the same person. Nothing but pure faith speaks otherwise.

Well, think what you want. I have plenty of customers that know the difference
between the CEO and I. In fact, give us a call if you like. Ask to talk to the sales
manager and then the CEO.

2. I don't know that anyone cussed your wife out on the phone.
I said his wife, not my wife.
If she was paid to answer the phone, then regrettably, that is part of the job, or
she has the
option to hang up. I suspect that a lot of people might be so enraged with your
business tactics at some point as to cuss, though it is not excusable.

Well, luckily we rarely deal with customers that feel the way you do. We have
tens of thousands of happy customers. I can't say that many of these customers
are ham operators, though.

3. The radio receipt indicated that it had the factory warranty. You claim that
it had NO warranty.

Ah, but you are wrong. The radio has no warranty through EEI. The customer is
welcome to send the unit back to the factory for warranty services.

4. Under what law would you be permitted to tell the customer to go fly a kite?
Really, don't blow this off. The receipt says it is guaranteed. You are the
retailer. I have no way of knowing what you told him verbally, but the written
record shows that it was guaranteed. Under what TAC are you permitted to do
this?

We guarantee delivery. The customer bought a radio that was factory warranty
only. This means that the customer must direct all complaints, questions, and
compliments, to the manufacturer. We are not the manufacturer and do not
accept manufacturer defective radios that we do not service. If we do not
service them, then we do not have anything to warranty. I do see your
argument, albeit a poor one. We explained to the customer that with this version,
we do not offer a warranty. He agreed to this. If you don't like this policy, that is
tough. I didn't make the guy buy the radio. We are bound by law to offer a 90
day warranty on all serviced equipment. Since we did not service this radio, we
must abide by our warranty, which we have.

5. If the guy broke your warranty policy in several areas, that implies that
there was a warranty to break. Innumerate the areas in which he broke the
warranty.

If you will read again what I wrote, I think you can answer this one yourself. But
to clarify, if in fact he had bought a warranted radio, he would have broken his
warranty by servicing it. If it is opened, the warranty is void. For example,if you
buy a Sony TV, and open up the screws that say don't open. Send that back and
see what Sony says. They will laugh at you in 20 different languages.

6. In what way could Damon have been helpful to you so as to elicit a proper
refund?

This is easy. He wanted an entire refund. Our warranty page states that we will
refund the equipment, minus a restocking fee, and minus the shipping. He
refused to do this. We offered to exchange the product, repair the product, or
replace the product. Once again, we didn't have to do this according to our
warranty policy. He had to be anal about it and take out his anger on me, my
co-workers, my boss, and his wife who just happened to answer the phone.

7. When CEO chose to make this a public issue, he took the lid off the kettle.
That's why this needs to stay a public matter until you take care of your
customer. If you fail to handle the matter properly, the rest of your
customers/potential customers should be aware of your business practices and
act
accordingly.

As I said before, I don't care if this stays public. The people you guys are
reaching fall into three categories.

1) Ham ops who are CB haters or CB haters. We do not want, nor need their
business.

2) Our loyal customers who couldn't give a rat's a$$ what anyone says about
EEI, because they are customers for life. Believe it or not, over 90% of our
customers are extremely satisfied. Wal-Mart can't even say that.

3) Future customers that may or may not buy from us. When they ask a question
in the NG, they usually have 10 guys mention a different shop. This is where our
guys email them direct and get their business. They will go with us or not. I hope
they will, but will not cry a river if you guys talk against us. In the end, they will
know who they should have gone with. The EEI team.

I really don't have time to deal with Damon and his groupies. Email me if you like,
but I am not really worried about you guys at the NG who didn't like our

company
in the first place and were just looking for a stone to cast. Damon
gave you your
stone and the CEO made it easier for you to throw. Continue if you must,
but I
think we all know who is going to win in the end. And his initials
aren't DB.

Thanks,
David

I have to agree with you there ken. I am a Ham operator with a tech no code license. I like DX, that is the main reason I use radio. Right now I can talk useless (to me) Vhf now but no HF unless I use 11 meters. So about the only DX im doing is freebanding until I suffer through these tapes and learn this stupid code. I can already pass the General exam and I'm studying for the Extra, but all my DX is on 11 meters.

Plus when I go out 4wheel driving and want to keep in touch with my XYL (wife)if I use regular CB it is to crowded, and she dosn't have a ham license so what freqs do I use??? You guessed it, I go above channel 40 on 11 meters. I don't bother anyone and I have safe comm with the XYL.

The main thing about freebanding is to use courteous operating procedures, good equipment, a Low-pass filter, grounded gear and not to much power.

The amp referred to is a very nice small amp. I owned one in the 80's. Just as was stated, it uses 1-6lq6 sweep tube to drive three. Case is all stainless steel, except for the cover, and the power supply is plenty heavy to support the stated power output. The amp is actually capable of around 400 watts, but this leaves little headroom.

Yes, I saw this mobile beam on the website. I am confused. How does this thing work? It seems to be a contradiction, (a vertical whip with horizontal directors) ???
I am not disputing if this works, just never saw it before. Has anyone on here tested this antenna out. Very interesting design. I wonder how well they work hanging off the side of that Freightshaker condo (pictured).

Hmm, I wonder how many criminals started as free banders? Maybe that was Tim McVae's problem!! I'm curious, does anyone, other than me, see the obvious humor in this?? "My son is in jail because I allowed him to freeband as a child. Oh, if I could only go back now. Oh God, why was I so stupid??"

2752. Re: Crying Ham's

Newsgroup: rec.radio.cb
Date: 2001-01-16 02:26:00 UTC
From: Frizz <none@none.com>
Message-ID: <940bc5aej1@bob.news.rcn.net>
Source record: 68856

After being very inactive in all transmitting facets of radio, I only read this group and listened to the shortwave and scanner for my hobby radio comms. However, when I did get back into CB and at the same time got my Ham license I formed my opinion this way. There is a difference between "internet hams" (those that supposedly bash CBers on this group and in general) and other hams. Now not all hams bash CBers and vice versa it just seems that when I say that I used to be, and still am, heavy in CB to someone on 2 meters they don't cringe and start bitching. I think I might be the only person that uses both in my area. It seems that, yes, when some amateurs get on this group they want to vent and have the right to but I have never heard a lengthy discussion of how CB sucks, everyone there hacks their radios, everyone uses amps, etc. AM seems to have gone to the dogs. When the skip is down, SSB is mainly what I talk and find no profanity, no jamming with the exception of the occasional truckdriver that wanders onto the freq, and a very active population that stays within the 40 channel boundaries. People use power but it is not excessive and they are fairly responsible with it. One bad apple screws it up for the whole bunch and that is why people get so mad but the whole bunch, in some cases, isn't all that bad.

Nice post, I really enjoyed it. I look forward to the posting you alluded to in regards to the positive influence from a CBer. It is amazing that sometimes our simplest actions have far reaching consequences.

2754. Re: Things every CBr should know,maybe.....

Newsgroup: rec.radio.cb
Date: 2001-01-16 02:27:20 UTC
From: Mad Dog <lgsast@friedspammerstrato.net>
Message-ID: <9lO86.2987$Q06.60482@e420r-atl2.usenetserver.com>
Source record: 68858

Personally i have had bad luck trying to use lengths shorter than 18ft. between the radio and antenna,sometimes i wonder if it is a RF feedback thing or a matter of the coax being shorter than a 1/2 wavelength and screwing with the current,phase, voltage relationship. Hell, i honestly dont know what gives. Months ago i received a brand new 2000 Freightliner century class w/the factory dual antennas and a 9ft. co-phase harness [9ft. between radio and antennas], i installed my 2950 up in the console and the SWR went thru the roof, after having no luck trimming the antennas because they appeared to electrically long i added a single 9ft. jumper to the co-phase harness and a perfect match was created..Dont know what to say about that deal...Very strange indeed. As far as rolling the coax is concerned a few [less than 3] tight coils wound around a coffee can and taped in place to hold their shape when the can is removed cause we dont want to build a Inductor [if ya know what i mean] will create a Resonator, at the same time this functions to narrow the bandwidth and enables a more accurate measurement of SWR...Careful because to many loops will drive the SWR up. You may want to experiment with this and check my theory cause its been a while and i could be slightly mistaken, but thanks for the reply.....

I used to to have one of those a LOOONG time ago. If memory serves, it would do about 100 watts or close to it. Like you say, it was a modified 6 meter box.
It had a nice swing if you detuned it. It definately can be modified for 11 meters.
Try it out, let us know what happens.

David, no one thing in life, nor even the same thing has the same effect on everyone.

Would you not agree that if we show our children that it is permissible to pick and choose what rules they should obey, lacking your life's experience they may make some wrong choices?

It is unlikely Charles Manson's mother was a freebander, but something, somewhere, as equally inconsequential may have been the cause of his behavior.

I was working with a group of Cbers a number of years back who wanted ham tickets. I had one person that just could not get the code. I worked with him on a personal basis for over a week before I discovered he could not read or write.

It was a faulty assumption on my part that everybody reads and writes. I spent the next year working with him on reading and writing, and I have to tell you it was the greatest feeling in the world when he came out of the test with his ticket.

TW,

Whatcha been up to? Me, I've been layin' low with all the sh** flyin' about the newsgroups lately.

I don't live in an Amish area, but my ex-wife is from Indiana where there is an Amish population. I was fascinated with the huge gang plows pulled by mega draft horses. Most of them I ran into, especially the young ones were very friendly towards outsiders. It was amusing that they won't have electricity on their farms, but the young boys will drive their buggy to the local store to use the telephone! "Heathen" girlfriends. maybe? No cars, but, if they must travel a longer distance than can be realistically covered with a horse, they will hire a car to take them where they need to go. They will watch *your* TV with just as much interest as anyone, but won't have one at home. I was told of one Amish lady that would go to a non-Amish friend's home and use her electric sewing machine on the sneak. Of course, her friend would NEVER snitch on her. They will go to a Wal Mart and browse thru TVs, washing machines, VCRs, computers, even flipping thru the TV channels to find something of interest. And another Amish lady of which I was told went to her neighbor's almost every day because she was hooked on soap operas! LOL! Lastly, I once visited one of those "tourist" farms where the owner left in some haste. Seems for years he had had an elec-tric pump on his well and a "hidden" faucet in the house. Of course, the well had the required hand crank and bucket. Eventually, he was discovered by the elders (he was an elder himself) and immediately given the punishment of "shunning". I have always wondered why they will use *YOUR* conveniences, but reject it at home--like the furniture shop I saw--all Amish. It was powered by a gasoline engine (John Deere) and used a shaft in the ceiling to run the machinery via belts.

Last I heard, the Amish are VERY worried because their youth are much attracted to, not only the modern conveniences, but the outside people as well. Go to the malls in Ft. Wayne, and the young Amish boys are everywhere.

See ya,

Jerry

>Hmm, I wonder how many criminals started as free banders?

You ignored the part of the post that addressed this. Not surprising, since you earn your living selling radios--many of which end up in the the United States operating illegally.

From your web site:

"Each amplifier is shipped in a plain brown box with no documentation, instructions, or owners manual. That is just the way it is. If you have to ask why, you don't need an amplifier."

We don't have to ask why. Thank goodness your wife and kids don't care HOW you earn a living, as long as you bring home the money.

Yoy obviously have never been in customer service. As we in customer service say: "The customer is always right..unless they are fucking wrong"! No one has a right to cuss out anyone in any form of business transaction. I have denied many a refund, just because the customer was a prick. If a person talked to me on the street, like they have talked to me a my place of work, I would belt em in the mouth. I don't get paid to take a persons shit, just to handle a business transaction. Keep it in mind next time you think "the customer is always right"!

Actually,

The Factory Reconditioned (NOT FACTORY CONDITIONED.... Their is no such thing) are held to a much tighter tolerance than the assembly line radios you or I purchase in a store.

I can't remember the exact ratio used, but it was like high 80 percent of tolerance for regular purchased equipment, but factory reconditioned was required to be closer to the mid 90s.

So, if he truly did purchase a factory reconditioned model, then it should have been better than store bought...

man, stop with that, quot "sometimes we get angry" "we all"
ya ya stop appologising and give the dude a refund, basicly the bottom
line is stop fu**ing around, a guy wants a refund, should there be
qustions asked? No i wouldnt think so.
Personally i would go down there break some heads, (canadian method)
but thats me.

Thats one thing that gives all the other CB and radio shops a bad
name, copper electronics started the ball rolling, seen one ya seen'em
all. I preffer to buy my crap locally, or build the shit myself.

bottom line is, stop beating around and the bush and if someone wants
a refund, give it to'em on the fly.

Yeah, it would. I have looked at one from a clipper, but never thought of
using
one at an antenna... hrm. :)

Source record: 68883

>Once again, if the NG reaches 2% of our market, it is lucky.

It doesn't reach any influencial people, either. So breath a sign of relief. Anything you say here is completely private. No FCC. Nobody. Just hams and CBers.

>If we were to say
>anything, the anal retentive hams would make up some cockamamie story about
>how their ham gods told them that what we are saying isn't factual.

Even the ham gods don't doubt the facts. If the spec sheet says that amp puts out 1,000 watts, nobody disputes what you published. If you say you build 'em to order, we believe you. If you say you ship them in a "plain brown box", who here can doubt it?

>You anal retentive
>ham-ops and CB haters rip them to shreds just for stumbling onto this NG.

If someone were attacking my source of income, I'd be defensive, too. But relax. The ratio of those crying "we'll do what we want" to those saying, "you know, operating illegally may not be such a good idea" is clearly in your favor. As the TV judge told a talkative defendent, "M'am, at this point, you're ahead. Shut up!"

>I know that by visiting and responding to this NG the last couple of days,
>I have lost precious time that I could have spent with customers.

Glad you understand this basic principle of sales. While you're on this NG, you're not doing your job. Actually, we hoped you were doing this during your off hours and not on company time.

The explanation of the sales receipt and warranty was appropriate. But now you've become very defensive just because a couple of people questioned the legality of what you're doing. (sigh).

If this NG reaches less than 2% of your customers, why worry? Keep ranting and your web site MIGHT get some attention that you'd rather not have.....

Of course, there are no cases on file where the sales manager got NAL'd. Relax. The authorities can't touch you. Why are you so wired up? Know something we don't?

I could care less what he called. My point was that EEI, or its
representative here
on the newsgroup was quick to point a finger at the person who was having
the
problem.

And couple that with the story about the guy having the radio problem, and
you
guys don't have that good of a track record..

Personally, I could care less. I deal with nobody but manufacturers. I am
in Texas
as well, and have been in this radio game for quite a while.

Either way, we don't want the NG to think that we
> can't even remember our own phone number.

???

That was somewhat of a left field comment. Nobody accused you of that?

I just stated that I thought your comment was somewhat flippant, and that
you lacked
the necessary self control to be posting in a public forum, without getting
emotionally
involved.

Besides, as much as this guy has
> attempted to bash us lately, why would he call us?

I dunno.

> 1) He actually doesn't know all that he claims to know, and realizes that
> the EEI techs are the best in the business.

Sure. Who would these be?

> 2) He actually didn't call and he wanted to start a problem.

That would probably be correct. He just wants to start problems.

Sorry, but that doesn't go very far.

> 3) He called the number just for kicks, and he called the wrong number.

I actually could buy that reason.

>
> Regardless of his reasoning, there is not a lady named Bernice answering
our
> tech calls. BTW toll free, why did bigradios.com shut down the message
> board??

Honestly, I have no idea. Ask Chris. He administers the boards. I just
run the email server and
take care of connectivity.

Could it possibly be because members got on there to cause problems
> by stating false accusations and false allegations??

OK. If you state it, then it must be true?

Don't try the tactic of throwing a question at me to get the heat off your
back. Bigradios.com has nothing
to do with you, your company, or Rich's formal company.

The fact remains. When a (potential??) customer had the problem of getting
ahold of you guys, you
automatically make him feel like he is an idiot that is incapable of
pressing the buttons on the phone...

And with the research that he did, I highly doubt that he "dialed
incorrectly".

Free time has nothing to do with it.

Pick up the phone, call an old friend, bullshit with him about when we all lived on the west coast, and ask for a simple favor.

Wait.. You never use the phone to call friends?

Regardless, the fact remains. I seem to remember someone else "supposedly" from your
company stating that the numbers have been the same for years. I could be wrong, but I don't think
so.. Somewhere else, in another thread.

Oh well. Care to try again?

The directory assistance will go anywhere that is designated as the local call center.

However, the server housing the database is located at a company in North Carolina.. Research Triangle area, to be more exact.

This same company is going to be doing the caller ID system for the world. Since they have the databases, it was a natural for the bells to pick them :) And, they gettin ready for an IPO :)

This is generally just a poor excuse to cover lazyness. If they are
dyslexic - then how can they read the test questions?

If none of the Scouts passed, then their preparation was insufficient.
All the Scouts that I know who have taken the 5 wpm test passed with
flying colors - usually 100% copy.

Out from under my rock I come once again for my two cents worth.

I have been following the posts of EEI in regards to their situation
with a certain unhappy customer. I have also read the fallout from
their attempts to defend themselves. I also realize that we are all
human (except N8 and Voobie of course) and it's hard to sit back
and not defend ourselves when we think we are being wronged,
but.....I am not sure that EEI wouldn't have been better off to sit back
and watch the flames like their competitors, without making comment.
I realize this is hard to do, but in my opinion it wouldn't have escalated
to the scale it has now.
My guess is that it would have blown over had they choosen not
to comment. There are others who are in the business who get flamed
regularly, and I know they read the group, but they just sit by and take it.
Sometimes just biting your tongue is better, no matter how much it hurts.
Just my opinion.

Point taken although I don't think the Scouts have had a merit badge in several years.

I claim no knowledge whatsoever about dyslexia but I have seen dyslexic effects with Morse, inversions of sense (p becomes x) and sequence (the f and l problem) that I think come from trying to learn it too slow. The people who have this problem the worst are people whose jobs require dexterity with both hands or who perform jobs where the mirror-image function is performed. A house painter doing the north side say will do one corner right-handed and the other left-handed, probably using both hands in the middle. My worst case was freebanding Sidebander who happened to work for a railcar repair company doing brakes -- a symmetric job if ever there was one. He has had an Advanced for twenty years or so and is a good friend so it was a solvable problem.

While it is no longer an issue, the hf licenses until last April were at 13 and 20 wpm. The 13 was set back about 1937 to be sure that everyone encountered the dreaded 'hump' in the 10-12 range. What, of course, was happening was that everyone had to defeat bad habits gotten into at lower speed and sweated blood beating them. It was not a test of character and certainly not intelligence but simply a case of learning it right.

I have always thought that this had something to do with "handedness". No one is completely right or left-handed (I suspect being left-handed has some unique aspects as well) so you get people who do a number of things off-handed and some who are right-handed belt up and left-handed belt down; remember Ron Cey with the Dodgers and Cubs known as The Penguin. It is often difficult to tell if toddlers are right or left-handed. So I think it is very important to determine very early for your mind and body that code-copying is a right or left-handed activity but not both. In my friend's case we had him copy with his left hand in his pocket and early

in the game under his belt. The sound came in his right ear, early with a headphone. This guy was trying to copy both sides at the same time and had one hell of a hump at six wpm. For 5 wpm this would probably have been enough but remember 13 was the goal.

When you think about it, getting to 16 (safety margin and oddly most people get to 16 when the hump is broken so it is an almost natural speed) can be done by learning the characters then gradually increasing speed which is how most try to approach it, or by setting 16 as the standard and adding letters (two at a time is traditional) and gradually copying them all. The beauty of the latter method is that while it is a trifle boring and doesn't give you a lot of warm and fuzzy feedback it is for sure the quickest and fastest way to 16. To his credit, my friend did exactly that and passed his Advanced at the FCC office first try.

Without telling war stories about walking to the FCC three miles in the snow both ways uphill I will note that study materials have improved a lot in the last several decades and the VE system is a lot more convenient than Tuesday morning at the FCC office if you lived there and every 90 days if you did not. The Kansas City office served St. Louis as well as Omaha and Des Moines; can you imagine the St Louis area with one exam session every 90 days now???

I prefer random 5 letter groups simply because this means you get equal repetition of each letter and don't get the green weenie when the exam has W7XZJ working KQ3YB with his 4 element quad at 17 meters. Handwrite the thing on unlined paper; no VE gives neatness points. I did my extra in five letter groups (not that unusual at the time given the commercial ticket requirements but the FCC lady did volunteer a small grin) so anything that works. And by all means buy a set of cheap headphones for your compooter before your family throws you out in the snow with the incessant beeping.

For five wpm, I would set my compooter for 7wpm spacing of 13wpm characters, the Farnsworth method which I believe is still used for the exams (13-16 wpm characters spaced for 5 wpm) random groups. Make a mark for each letter whether you know it or not and add two letters to your repertoire as convenient. If, even using the handedness techniques mentioned above, you have a problem with inversions resign yourself to doing it at 16 period. For that reason, I would start with letters that are inversions of each other (A and N, G and U, etc) and be sure to get sequence inversions in as well (F and L, B and V) and be sure you are not having major problems. An hour a day is plenty, preferably in two half-hours. Take every opportunity to practice in other ways: spell Chevrolet when you are behind him in traffic, if you are equipped, copy W1AW the ARRL station. If there are friends involved, practice with them; better than garlic for driving away other people.

Need software? get Morse University from Joe Speroni's site http://ah0a.org.

Unfortunately, medical waivers went out the window in April as well but there are not that many who need the waiver more than they need a coach and the desire. If I can help, the spam filter will alert me before flushing the message so my e-mail is available.

Good Luck

Dick N&#65533;BK

The way I look at things, "...what they don't know won't hurt 'em." If they keep their kids out of their hobby, they won't know or care about illegal activities that their Mom, Dad, Sister, Brother or whoever else is doing.

I don't understand the concept of comparing freebanding and influencial attitudes toward society. Its like comparing apples to rocks; way, way, way different. What you need to concentrate on is keeping your nose clean and stop worrying about some guy 8 states over freebanding.

Someone once posted... "...is just plain selfish and stupid. And illegal." Whats so selfish about radio? What's so stupid about radio? Maybe the illegal activities are illegal but what about radio? Isn't that what this FORUM is all about? Information? Is this illegal?

David, I do not have any knowledge of any these claims about having someone e-mail or contact you or your company on my behalf. Or contact your company pretending to be somebody else. I would never do that. Thats the truth. I am curious about that though. If I have a problem with someone or something, I take care of it myself. As far as Im aware, I did not post any one sided e-mails on the website, unless it was an e-mail I sent your company and it was never answered.

Someone tried to break into the website files several times....so I am removing the site. I accomplished my goal of getting your company to admit in a public forum that I will paid the money I am owed. So im assuming that I will be paid very soon. So this whole thing is basically over as far as I am concerned. Tired of having to think about this tired old mess.

David, you have a good one, no hard feelings, and best of luck you and everyone.

Lemme try to understand what you're saying...

You're saying that if we try to cutback on illegal activities on 11 meter, our children will be better off tomorrow? Because as we continue to operate illegally as CBers, we will teach our kids to choose what rules to obey thus making wrong choices? I highly disagree with you. I know many Law Enforcement personnel kids personally who know that their parents work for and support the Law 24 hours a day and still smoke Crack, Meth, and commit various misdemeanor crimes for the hell of it. Its not because their mom or dad are freebanders, its because they are their own person and they make their own decisions whether right or wrong.

Fred, its a personal thing... its not taught!!!

The term is factory condition! This means it is not tested, tuned or
peaked by the seller. This would also mean for service it would need to
be returned to Ranger not the seller!

well i think the story of eei and the rest of these internet wonders is simple. they think that the internet is their ticket to riches. and don't ask me where they got that idea. he says he has tens of thousands of happy customers. so what does this mean. please explain that. is that fuzzy math???? cb radio is a dying hobby and they are getting well off of this. i don't believe it. there are hard core cbers left

over from the glory days but very few people are getting into it now. the truckers for the most part, don't use the amps anymore, and that will change also when this new law takes hold, because they are the most likely target. the easiest target shall we say, with a ready source of cash, which is the point of the new local enforcement law anyways. truckers are using ham radios to communicate a lot more these days and have been for a long time. get out better on vhf, no heterodyne. and cellular phones and on board company computers to tell them where to go next, etc. so that source of cb work is drying up, i would think. so where do they go to get cb work. well that is a very good question. i just feel that this internet thing will eventually be a bust for all of these get rich schemes hatched by these guys who think they can make their wad off of this stuff. local cb radio is dead. face it. except for skip talking 50 something black men on channel 6 and 11, etc, there is nothing else going on in cb radio at this time. so i look for this band to be taken back over by the hams. so where does that leave the cb shop??,.....hmmmmmmmmmm??? out in the cold , would you say? besides eei has only been in operation for how long?? not that long really. and already he has tens of thousands of happy customers. me thinks not. but i ask you , what is the purpose of a large warehouse? anyone would be a fool to keep a large inventory on hand unless you are in good with the manufacturers and you can send back what you don't sell. these guys??? as stone cold steve austin would say.....ahhh!!! ahhh!!!, ...cd is out.....

If you spent more time at work, instead of playing I'm the pissy consumer
with EEI....You would have earned what they owe ya and more......
But then that would take effort...easier just to sit and type....

you fucking ignorant wanna be ham idiots need to get your shit straight.
a 2510, 2950, galaxy etc... is legal for a ham to use on 11 meter if they have
a general class or higher ticket and keep it within legal power.
so shut the fuck up already

When you figure that they may well sell outside of this country and in
the U.S., tens of thousands may be possible. And since there are so few
players in market, and they do have the broadest lines, they may be doing
better than you think. As for CB the only place it is dieing is less
salesman, and teenagers are buying. The hobby side is as strong as ever.
Cb will never die, it is as American as apple pie......

I have to say that I agree 100%. I really do my best to sit back and let all the stupid, mindless, and imature remarks just float on by, and I think I have done pretty good thus far, but geeesh, I sure wish it would go back to the same ole rash of trash it used to be, I mean Voobner is enough!

Yes,
Copper sells them for about $179.00...
My friend bought one, and it worked well...
The only thing this radio lacks is a RF gain and a Mic gain, but otherwise
(from what I've experienced with the radio) it is a nice radio...

To Differ Sir! Amateur and CB are 2 separate services. The holding or not holding of an amateur license has no bearing what so ever on 11 meters. My extra class license means zilch were I to venture to 11, I must use a type accepted radio. Simply turning down the power to the 4 watts on a non type accepted radio is as illegal as hooking up a 32 # maul.

My Icom 706 MKIIG, while capable of operation on 11 is illegal regardless of any power setting.

As to your first sentence, ignorance is normally easy to spot, look for profanity in place of the synonyms used by the learned.

A quick true story. I worked for Sycor in Ann Arbor Mi. We were bought out by Northern Telecom, when they took over they declared the computer center off limits and posted their version of the SS to keep lesser mortals such as myself out of the place. One holiday weekend, I and another worker climbed through the ceiling and replaced all the enter keys with ones labeled "EH?"

Needless to say the new management took umbrage to it.

In spite of an intense investigation including "Ve have Vays uv making you talk", we were never found out.

Wow, is this a new FCC ruling? I can find nothing in Part 95 or 97 about
General Class and higher being authorized to transmit on 11 meters with
non-type-accepted equipment.

Yea, David. I see mucho grande humor in it. Like the jerkoffs in Washington trying to tell our kids pot is the gateway to harder drugs. Yea, the same thing can be said for milk, coffee, cigarettes, booze, and candy.

Hey Jer, Amish in Ft. Wayne, hmm? Well, I never. Actually, I've only been to Indiana a few times and never spent much time there except near Noblesville doing the camping thing, and the rest of the time was passing on through. I know they have a similar settlement in Ohio, also. Yea, I heard similar stories about the Amish youth. Even if some do indeed indulge themselves to a point, ya' gotta admit, they do without a hell of a lot on those farms. I checked the web last night for some info. for the place we went a few years ago, 'cause we have a winter excursion in the north in the fall of this year and I wanted to see if the buggy rides would operate in the winter maybe pulling a sleigh, and guess what? They do! And I found out after yesterdays post that many of what is considered wealthy among the Amish, who reside in northern communities, spend their winters not to far from me in a snowbird settlement for the Amish in Sarasota. Even have some of the same family owned restaurants that they operate back north. Looks like a day trip is in order one weekend real soon. By the way, shouldn't you guys be thawing out yet? Guy I talked to in the Keystone said they had fifty three degrees the other day.

I cut my teeth (which are fewer in number than in '74) on 11 meters and my call sign was KART-8926. It was fun buying a cheap "fannon-courier" 4 watt mobile running a 3/4 wave archer ground plane. IT WAS GREAT FUN!

I got my "HAM" ticket in '83 and my call sign is KE4BNF. Most of the guys and ladies I talk to still have friends on 11 meters... I am one of them. Why? IT IS ALOT OF FUN! So is 2m and 6m!

Lesson: If you cannot have fun with the radio hobby, let it go. (Absense makes the heart grow fonder!) If you really love the radio hobby, learn about the great things that others share and ignore the garbage that others try to use to steal your joy of radio...

10-10 from Kid Cody or '73's from KE4BNF... take your pick!

From what I heard, this radio is just a repackaged Galaxy 88?. With lower quality standards and parts, or refurbished boards as the roomer goes. So expect some drift on SSB. I'd have to see the board number to be sure--- But for that price--I'd bet you'd get your moneys worth. Talked to a few guys that were using them and audio sounded good and they seemed to like them.

The Russian Woodpecker was an over the horizon Radar. It was frequency agile and moved all over the bands. It was at it's strongest on 20 Meters (14 MHz).

It was easy to move, one simply gave a long call to H5HHH at 20 wpm and it would change freqs.

Yup,

Amish are concentrated around Berne, IN with settlements nearer to FT Wayne. I was always fascinated with their discipline and lifestyle. In some ways, I think they have the right idea--and it reminds me of my own families' farms in the '50s. True, we had electricity, but cooking and heating was done on wood stoves. We plowed fields, sometimes with horses, more often with an ancient John Deere. I obtained 200 Rhode Island Red chicks thru 4-H (remember that?) and raised them for my project. We got to keep half of them and they produced enough eggs for us and to establish an egg route in town. What I remember most were the social gatherings. We had ice cream suppers, corn shuckins' and "cake" walks at the local grammer school. We helped neighboring farm-ers gather in their hay, riding on open combines and tying up bags of seeds as they filled up. Ah, Ah, AH CHOOOO! The dust was awful! Now they have those air conditioned, stereo-equipped combines. I know we all get nostalgic for days gone by, but I can't help feeling that, as we continue to lose the rural nature that characterized American life in the past, we are also losing other things with it. No need to go into that here, but I think you know what I mean. Maybe that's why we have all these "fights" and filthy words on the NG. Probably why CB was much more genteel in those days as well.

Best 73,

Jerry

2859. Illegal CB? Time are Changing!

Newsgroup: rec.radio.cb
Date: 2001-01-16 18:17:49 UTC
From: qrm2000@aol.com
Message-ID: <20010116131749.08531.00000521@ng-bj1.aol.com>
Source record: 69013

We get so caught up in this hobby that we miss seeing developing trends. Or, some of us are so happy with the current status that we fight change. Neither position is healthy.

For example, one of the trends is a return to legal operating. More and more operators are abandoning the "My amp is bigger than your amp" mentality. It's non-productive, and expensive. At the same time, the Big Guns and Freebanders are fighting change--feeling that something is being taken away from them.

Another trend to watch is that of enforcement activity. It began with an intensive FCC program to address numerous problems in the ham bands. Now attention is being expanded to 11-Meters. The losers in CB will be those who say, "They can't catch me," or who stick their heads in the sand and pretend it isn't happening. The results will be loss of equipment, fines, and a very angry spouse who says, "You don't have money to fix the kids' teeth or to put a new transmission in my car, but you have $7000 to 'piss away' in fines because you just had to have the biggest radio in town!"

Finally, if you look around in the United States, you will see a trend for people to swing back to what could be called "family values". Examples abound. Home schooling children is growing by leaps and bounds. Parents are taking more interest in their kids' welfare and well-being to the point where some change careers in order to have more time for their families.

Two new studies on teen sex behavior clearly point to the dangers of widespread media messages that are not reinforced by the more in-depth and personal counseling that parents can give. These reports show that an increasing number of students are saying "no" to vaginal intercourse and are substituting mutual masturbation and oral sex. Unfortunately, these activities can spread sexually transmitted diseases--something the surveys show that teens are not aware of.

What does the entertainment industry say? We can argue whether television and motion pictures "mirror life" or influence it. Probably both is true. Either way, the entertainment industry makes an interesting barometer. Did you see these recent releases:

*PAY IT FORWARD. Great film staring Helen Hunt. As part of a school assignment, a young person comes up with an idea of doing good for other people when someone has done you a favor. (Don't pay it back. Pay it forward). By the way, if you haven't visited your child's school lately, at least see this film to get an idea of what students are facing.

*AS GOOD AS IT GETS. Helen Hunt again, making a better man of Jack Nicholson.

*CAST AWAY. Tom Hanks is the time management specialist left with infinite time on his hands when his plane crashes on a remote island. The plugged-in professional, with a clock where his heart should be, is forced by

circumstances to go unplugged and become a resourceful survivalist.

*THE FAMILY MAN. Multimillionaire Wall Street guy, alone in bed on Christmas Eve, discovers how empty his life is.

*WHAT WOMEN WANT. Cute plot, but the bottom line is that Chicago advertising whiz Mel Gibson, alone in his penthouse with his only companion being a bottle of Beaujolais, realizes there must be more to life.

*FINDING FORRESTER. Sean Connery in his best role since "Hunt for Red October". Drama about a mentor/student relationship. A writer (Connery) takes a black high school kid from the Bronx--an aspiring writer and star basketball player--under his wing.

*REMEMBER THE TITIANS. Probably not showing in your local theater presently. But it was so inspiring that several professional football coaches took their teams to see it.

*OCTOBER SKY. Get this one on video. How kids from a coal mining town in West Virginia overcame obstacles to become NASA scientists. True story. It was not unusual for audiences to applaud at the end when this was shown in theaters.

And then there was.....well, that's enough. You get the idea.

Times are changing. Those who would like to use CB for personal and hobby communications realize that a handful of people are going to ruin it for everybody.

Meanwhile, when anyone DARES suggest that operating illegal equipment or on illegal frequencies might be a bad influence on others, the sales manager for an amplifier distributor comes on and hoots that its just humor. Well, DUH! This is how he puts food on the table. What did we expect him to say?

This post isn't for him. And this isn't for the insecure guys who are "nobody" on the CB bands if you take away their big amps. (They don't have anything to say, and they are not very good operators, so they depend upon RF POWER to get attention).

This is for the folks who have said, "enough is enough". Let's make CB useful again. Let's make it a good place to hang out. I'm with you, folks.

This is for Riley H., to encourage him to keep going, in spite of how much work there is to do. The busts are beginning to get attention, Riley. Word is spreading. Keep up the good job.

And this is for Voobner. I don't always agree with how far you take things in the flame fests, but I support you in calling a spade a spade. Or, in this case, calling an illegal radio what it is.

Finally, this is for those of you who are parents. You ARE the major influence in your children's lives. What you do DOES matter. And they ARE watching you. Give it your best shot. Society DOES care if you succeed.

> Home schooling children is growing by leaps and bounds.

I take it you haven't been following Bush's planning closely. He hopes to eliminate home schooling all together. The Bush campaign will claim that parents are not capable of teaching our children properly. It really comes down to patriotism. The leaders of the world want children of the "world".

Second. Please don't bring media into this. The media wants everyone to look like Hollywood whores with the fear of acceptance into modern society. Implants, surgery, and enough make-up to make a clown jealous is all that is on TV and in the show house. I refuse to watch this crap. And the music your media is pushing upon our kids... Sigh.

Third. Do you really think the FCC has the time or the budget to go around and fine every single CB rig that can talk 10/11/12 meters? Do you even humor the belief that they are out tracking a user for running 600 watts? Frequency jamming, RF interference, and such are wrong. But do you really think this is going to stop the industry? Do you really think that an organization the size and manpower of the FCC can really stop this? We have a billion dollar drug war taking place in our streets and you have the intestinal fortitude to sit here and lecture on the proper use of the airwaves? Make a difference; put your energies to good use. With the thought power you just used in typing this post, you could have made an actual difference in many children's lives. It seems that your ego is riding this wave.

> They don't have anything to
> say, and they are not very good operators, so they depend upon RF
> POWER to get attention).

Wrong. Many agreed are complete morons, just as licensed Ham's are themselves. People are people, a license won't change this. Some are great people with great morals that would put people like you to shame.

Last. Before you reply to this know that I will not reply to you again. I have wasted enough time and we hope this may open your eyes to the world and governments you obey and your real tasks at hand.

Fix it, don't break it.

Source record: 69024

As priorly stated, I believed you to be of general sound mind, QRM, but I am beginning to wonder. Let's take it rational, one step at a time.
1) I see no evidence of cb returning to anything other than what it is. As I told VooN8er, wishing and stating does not make it so. As a matter of fact, I see quite the opposite. I see statistical sales on cb's (ALL cbs) are UP compared to all previous years except the seventies. Proof? Ask the dealers. Oh, I'm sorry. I forgot, if one is a dealer and takes issue with your position, they have no credibility. Since I am not a dealer and still I take issue with your reasoning, you ineffectively prejudged me (by amplifier owership) by calling me "insecure". Nothing could be further from the truth, but I do not have to defend that reasoning to you, or anyone else, especially the damn feds., UNTIL you prove I broke their damn precious RULES, not laws.
2) How can you say we fight change? Well, I guess half the country did, does, and will always continue to do so, in some variance. Pertinent point?
3) A trend toward "family values'? Whose? Yours? Damn! I thought we were done with all this political correctness and old assed rhetoric drivel. Let me tell you something here, my friend, and this may possibly be the best advice you ever receive concerning, "family values". A return to family values are for people who long ago abandoned them and this is their way of relieving some of their guilt over their misdeeds and screw ups. It's just another way to masquerade ones personal ACCOUNTABILITY! (Little Johnny skipped school today to smoke crack, shoplift, and get arrested. Gee, honey. Let's really talk to the him. I'll quit my second job and he will quit whoring the girls on the street. See if we can help him NOW?) Why? Because you never had any damn family values to begin with. Some of us never abandoned family values, so those of you that have, quit trying to tell the rest of us how to do it. WE never lost them. But we hope you find yours. ANd don't try that VooNW8er song on me either about illegal is illegal is illegal. It's ridiculous and don't wash. I have proved it over and over, especially when your so called crime is usually victimless
3) Teen sex? Again. What is your point? Think kids are screwing less and having oral sex because of some kind of new found moraity? LMAO! They chilled for the same reason so many our age (Or, let me clarify and say MY age) quit smoking after so many years. "Cause we found irrefutable evidence, it CAN kill you. They just haven't been taught that they can die by cunnilingus or by giving a BJ as well. THAT, is directly the parents fault for not educating their child. The same parent who all of a sudden NOW wants a return to family values. Yea.
4) Lastly, society does NOT care and that has been proved time and time again. Society has taken God out of the schools and received violence in return. Society has taken away our school nurses and installed cops full

of lies with piss poor attitudes. Society has taken otherwise innocent law abiding citizens and turned them into criminals. Society has taken away the right to kick your childs ass when he needs it, on one hand, and condemn your parenting abilities when your kid goes bad, on the other.
And if you check the posts, that was ME that called a spade a spade. Please do not ever attribute anything I ever said to VooN8Wer, and vice-versa.
But I did enjoy the movie reviews. I usually wait until they come out on video, since the last Drive-in closed down here last year.

Yea,Jer, I think you are right. A piece of Americana is being lost, especially amongst the largest wealth transfer ths country has ever seen. The Amish do indeed preserve a somewhat tranquil-like life that appears to be rapidly diminishing. Thats alright, though. Few more years down the road I hope to be able to have my chalet high in the mountains away from everything to spend the best time of the year, and become a snowbird to this state instead of a resident. Summers in the mountains and winters here at the beach. Ah, the best of both worlds. Convincing the wife may be another story. We have talked about it. All I can say is, I'm gonna miss her..hehehehehe!

SNIP>
"You don't have money to fix the kids' teeth or to put a new
transmission in the car, but you have $7000 to 'piss away' in fines because
you
just had to have the biggest radio in town!"

BIGGER SNIP>

Sorry....had to snip out most of your usless article, so that I
could comment on the little snippet that offended me the most.

1. I put $3700. worth of braces on my daughter two years ago,
and because the dentist was an idiot and removed them too soon
(came highly recommended though) I am now spending another
$3000. with a competent dentist to do the job right with a
guarantee. Total cost $6700.00.....screw you!

2. If I want to "piss away" another $6700+ in fines that is MY
BUSINESS, not yours or anyone elses.....it's MY MONEY!
As long as my family is well cared for (and they are) and the
bills are being paid on time, I can do whatever I want with my money.
I can make piles of $100 bills in the back yard, set 'em on fire, and
jack off while they burn if I want to. Point is...I work hard for it
(60+ hours a week) and I'll do ANYTHING I WANT with it.....dickhead.

3. People like you who generalize Cb'ers as poor white trash that
don't work, don't pay their bills, and drive junk cars,
and spend what money the do have on CB equipment & linears
REALLY PISS ME OFF. Of course the high and mighty hams I'm
sure ALL have jobs and pay their bills on time........yea right.

4. If you hambones would take the time to look into it, I am sure
you would find as many irresponsible, unemployed/underemployed
ham operators as cb'ers........but it's more fun looking down your nose
at us.

5. This is the most important one. Your hobby does not define who
you are as a person, your status in society, your employment or
financial status. Try to remember that.

6. Seek mental help.

CB refers to the 11 meter citizens band, 10 meters is an amateur (ham) radio band and requires an amateur radio operators license issued by the FCC to operate there. USB (upper sideband) and LSB (lower sideband) refer to a type of am transmission, either of which may be used in either band.

What the hell are you talking about? Did I say anywhere in my post that I was going to use the damned thing on 11 or even 10 meters or were you refering to the other poster? Yes this thing says it is a six meter box and after I posted this I talked to a person on the ham bands about it and he said again that it is quite possible that the box could be put on 10 or 11. 50 MHz causes problems for me anyways on some of my TVs, even worse than my CB does, so even if it works there, I have no intention of using it.

People are generally judged by their actions. The use of profanity and pejoratives in a message tends to make most people think "Jerry Springer" refugee.

When one states that they are not of a lower class, they do not use lower class language to express their position.

If it messes up your TV in the null under the antenna and out of the
main radiation pattern, I wonder what it does to your neighbor's TVs?

2882. Top Ten Excuses For Being An Illegal CBer

Newsgroup: rec.radio.cb
Date: 2001-01-16 21:09:10 UTC
From: "Mr. Aaron H. Voobner" <aaronvoobner@my-deja.com>

Source record: 69037

Top Ten Excuses For Being An Illegal CBer
(or distributing illegal CBs and amps)

10. There are worse crimes. So ignore mine.
9. My illegal business puts food in my kids mouths!
8. The system is unfair so I don't obey its rules.
7. Stealing frequencies ain't a crime if nobody's using them.
6. I'll pay the penalty if I'm caught. That makes me respectable.
5. Nobody would care about illegal CB - if you'd just stop talking
about it!
4. You can't prove I'm illegal. My amp/export rig is just a doorstop.
3. It's a victimless crime. A 5KW amp on 11 meters doesn't hurt
anybody.
2. But EVERYBODY does it.
1. Because I can!

Illegal CB is used for freebanding, talking over long distance and forming communities. In many cases it is a stepping stone to being a Ham when finally someone can afford a kenwood or Yasua.

It's Yaesu, Looks like you could not afford spelling for dummies

Ok, yeah I have to object about this one. People that have been reading this group for the past couple of years know what happened to Dennis and that Mark Fuller character that went on the same crusade you did. The outcome was not very pretty.

You *don't* tend to repeat it, over and over. You, like most thinking individuals, state your position and engage in reasoned argument, when appropriate.
Voob-ski knows nothing. He is an endless loop. He is a little busy-body Troll that loves to hear and experience the abuse piled on him daily.
He calls himself a friend of the Ham, when he has no ticket and if one is to believe him (yeah right!) he does not plan on getting one.
Actually, he's been exposed as a lying troll, time and time again, who's very existence is suspect. He's someone, true, but it's hard to believe that he is really named "Aaron Voobner". Just another willing victim to be ignored.

This stuff happens every once in a while. It was Mark Fuller, John Wilkerson, and probably a whole host of others before and after those. We all know what happened to them so just sit back, enjoy, and wait for it to die down.

I would have been disappointed if you hadn't responded
exactly as you did to this one Freddie. I am not out to prove
anything to anyone in regards to education, position in
society, nor anything else. If I choose to use bad language,
it's MY choice. If you think I am a lesser man for my words,
thats YOUR choice. You really just don't understand.
I figure you for one of those guys who is Mr. Proper English/
Good Grammar around your co-workers (that is if you work)
and friends (if you have any other than the mythical Voobner)
just to impress them and show them how smart you are. I used
to work for a guy like you until I took his job. People like you
are usually insecure and have to put on that facade to look
important to feel better about themselves.

Get a Spell Checker !!!!! It's "Illegal" not Illigal. Oh and Don't let
me forget "Powerfull"
Do us a favor , Go pick up a book to teach you how to spell. It looks
as if you should be more concerned about other issues. Than preaching
the illegalities of people whom you do not know !!

Well that statement would need some backing as the rules I read say CBs need to be type accepted. This would rule out all of the "export" radios from legally transmitting on the Citizens Band. By the way, profanity only shows a lack of vocabulary and intelligence. So I would have to say that the ignorant person would be you sir.

"DetHMetaLx" <dethmetalx@aol.com> wrote in message news:20010116013800.04518.00003292@ng-mi1.aol.com...
you fucking ignorant wanna be ham idiots need to get your shit straight.
a 2510, 2950, galaxy etc... is legal for a ham to use on 11 meter if they have
a general class or higher ticket and keep it within legal power.
so shut the fuck up already

While Ham Radio and CB Radio are considered "hobbies", Ham Radio also offers a service to the public in the form of emergency communications, for example. That is why as Ham Radio operators we have numerous privileges we enjoy, compared to CB Radio. Along with those privileges come a responsibility, a responsibility to operate per the rules. CB Radio on the other hand has no such public service element outlined in Part 95.

Good point

> 9. My illegal business puts food in my kids mouths!

If 10 holds true then why not.

> 8. The system is unfair so I don't obey its rules.

Don't you know that nice guys always finish last. No ones is going to
look out for number one, but number one himself.

> 7. Stealing frequencies ain't a crime if nobody's using them.

How true. Another great point.

> 6. I'll pay the penalty if I'm caught. That makes me respectable.

A good Hockey player always sticks up for his teammates, even if
it cost him in penalties or fines. He gains much respect for taking a
stand regardless of the consequences. Sometimes you just have to
do, what you have to do.

> 5. Nobody would care about illegal CB - if you'd just stop talking
>about it!

In reality, no one (of any importance) really gives a hoot about CB

> 4. You can't prove I'm illegal. My amp/export rig is just a doorstop.

Mostly true. You can only talk on one radio at a time, therefore the
other eight radios or so, must be doorstops.

> 3. It's a victimless crime. A 5KW amp on 11 meters doesn't hurt
>anybody.

It never hurt me. I don't know of anyone ever injured by 5KW. Heck I
live next to a 100KW broadcast house, and I'm still here.

> 2. But EVERYBODY does it.

That's because of all the correct explanations from above. Duh!!!

> 1. Because I can!

Why not. Someone has to do it.

Hmm. Your making apples into oranges but I'll answer any way. Assuming no
reguard for the legal implications here with a frequency liberated radio:
Ranger(RCI) 2950, Kenwood TS-50, some might say a Galaxy v99.

Win the lotto? Got a Mars/Cap licience? Then try an Icom IC-706, Yaesu
FT-100D or Alinco DX-70th.

Hi Roger, since Gary never heard of an export radio he isn't qualified to offer you advice. His statement was false. Tim over there in Tx has a good deal going, 100 bucks for that rig is a decent deal. Also, the DX-line that Galaxy makes is a decent rig for what they do. Connex makes some rigs that are alright. Others are partial to Ranger, RCI. Can't give an opinion on the rat shacks 'cause I ain't had a chance to try them. If money isn't really a factor, consider an HF rig capable of transmit and receive on the eleven meter band.

whats your problem man? i have no issue with whatever you do in the newsgroups. after all its a public place but now that youve seen fit to contact personal friends of mine that have nothing at all to do with this matter and its getting a little ridiculous. what type of man are you after all? if you have something you want to say you can say it to me.

tim

Source record: 68969

Greetings!

The one common thread I found in all these links were the fact that if you have SWR problems, tuning the antenna is the first priority.

And they also state that if the antenna can't be tuned to show a low SWR - there is a problem.

And all state that the coax length issue should not be used to fix the problem unless it is a last resort. It the choice of the operator, not the pages'. Firestik is the exception in this thread.

All suggest using the shortest length as the best route. On two of the pages, the Firstik and Tripod site, even offer help to properly solder the PL-259. Nice touch.

Firstik offers the "fire-ring" type connections. If anyone ever had to deal with these in a mobile set-up, they are not infallible and are some of the worst performers when it comes to durability. The following is why I say what I do...

The things I emphasize, is that the "shortest" length possible may not always be possible in all situations - whether base or mobile.

It's not worth messing around with trimming coax unless you're good at sealing the coax connector from the elements. I'm sorry to see that 18 feet gets some peoples underwear in a bunch, but it is a convenient length for custom installs in a large variety of vehicles.

Some get anal retentive over the fact that Firestik recommends 18 feet - simply due to their antennas were designed for that particular length. Can't see the bug-dung in the pepper like they do...;-)

Considering the environment, wind, rain, sleet, snow, ice, sunlight - All take their toll on connections and the coaxial jacket. A pre-molded and sealed end length of coax is a better alternative when dealing with a new user and having to "make the route length short as possible" cutting off a 100' run of coax to trim 10 feet off of it so he doesn't have to "wrap" it into a coil - all I say is...

"Use what works for you" - and if you're happy, thats all that matters!

On Mon, 15 Jan 2001 21:27:20 -0500, while the modem was ice fishing with the Mouse, "Mad Dog" <lgsast@friedspammerstrato.net> dissertated the following:

:+> Personally i have had bad luck trying to use lengths shorter than 18ft.
:+> between the radio and antenna,sometimes i wonder if it is a RF feedback
:+> thing or a matter of the coax being shorter than a 1/2 wavelength and
:+> screwing with the current,phase, voltage relationship. Hell, i honestly dont
:+> know what gives. Months ago i received a brand new 2000 Freightliner century
:+> class w/the factory dual antennas and a 9ft. co-phase harness [9ft. between
:+> radio and antennas], i installed my 2950 up in the console and the SWR went
:+> thru the roof, after having no luck trimming the antennas because they
:+> appeared to electrically long i added a single 9ft. jumper to the co-phase
:+> harness and a perfect match was created..Dont know what to say about that
:+> deal...Very strange indeed. As far as rolling the coax is concerned a few
:+> [less than 3] tight coils wound around a coffee can and taped in place to
:+> hold their shape when the can is removed cause we dont want to build a
:+> Inductor [if ya know what i mean] will create a Resonator, at the same
:+> time this functions to narrow the bandwidth and enables a more accurate
:+> measurement of SWR...Careful because to many loops will drive the SWR up.
:+> You may want to experiment with this and check my theory cause its been a
:+> while and i could be slightly mistaken, but thanks for the reply.....

Regards!

Please post the empirical data that substantiates this ridiculous claim. Of course you cannot because there is none. On the contrary, having ALL of the English language to select from, including profanity, enables one to more clearly express oneself. I get really tired of sanctimonious bozos like you using the cry of profanity used by someone else in lieu of any substantive argument for your position. In reality it only shows a lack of intelligence on your part for making such a ludicrous assertion.

So were in Part 95 does it say that CB Radio has a public service element to it, like in Part 97, which was my point? As far as REACT goes, the last thing I read about it, a while back in POP COM, is it's dying because of all the B.S. in the organization. Too bad some bozos had to go and screw it up.

Window mounts are no good. You could a tab welded to the frame with a hole large enough for a mount and put a 7' skipshooter on it. You see many custom rods done this way to avoid body damage or they are glass bodies.

The only thing that is changing around here is that anyone who had truly anything to say of value regarding CB radio, amplifiers antennas etc no longer participate in this group. It has become a wasteland of Trolls and Troll Bait.

Please take your movie reviews to the proper group. Sounds like you spend a lot of time on your A$$ watching movies.

I take it you are some authority of trends regarding CB radio use, teen sex and family values. That is quite a resume. Care to provide your credentials that makes you such an authority or are you just an aspiring armchair movie critic who's A$$ has gotten so large you can't do anything else.

Subj: got yer pinkeys slapped, ay keyclown?
Date: 1/16/01 5:19:12 PM Pacific Standard Time
From: n8wwmdoug@hotmail.com (Keyclown Killa)
To: knightpatrol82@aol.com

Dimmy,
You whine at me AFTER you post that web page<DONT LIE>??
You are not in my league, DIMMY. Take the Geocities site down NOW and we will discuss you not getting your ISP removed. You were laughing and joking at me with all the rest, that is OK. When you call someone a child molester you have stepped over a line, sonny. You wanna be a funny little fella and put up the pooroledougie AOL webpage, OK. But you get the consequences. You are utterly transparent in your "I don't have a problem with what you do, Doug" bullcrap. You damn liar, you posted "forwarded to abuse" so many times it aint funny. I AM STILL THERE AND I WILL BE THERE FOR AS LONG AS I WANT. YOU AND YOUR SISSY BUDDIES CANNOT STOP ME.
The posting of the web page on Geocities after you got spanked by AOL proves what I say. You little sissy boy.

Come on keyclown, post some more crap. You will get the biggest thrill of your online life next time. I know PLENTY about you, Dimmy. And I have JUST STARTED if that web page aint down by tonight. You want trouble? You came to the right place. Just like Scottiekins and Phoneyboy. THEY messed with me and got ROYALLY spanked. You wanna be next? I will get you in so much trouble you will NEVER forget it. Go ahead and talk big and bad in the newsgroup ONE MORE TIME, and see.

You wanna get some REAL TROUBLE sonny? You are a miserable drunken wretch who cant POSSIBLY compete with me. You 20 year old little swinish baby, COME ON AND POST ONE MORE THING AND SEE WHAT HAPPENS.

I DARE YOU TO POST THIS MESSAGE TO THE NG. COME ON SISSY, DO IT!
COME ON sonny, COME ON Dweebo, COME ON, DIMMY!

You wanna have a rational discussion of the situation, thats fine. make email to me at this addy with the subject RATIONAL DISCUSSION.
Otherwise, just go ahead and prove how big and bad you are, sonny. POST SOMETHING ELSE RELATING TO ME IN THE NG!

Up to you, boy.

Source record: 68995

Neither the radio or the amp is of quality to bear the word amateur, the
both are over rated and not worth what the bid is. The radio will key too
high for that SMALL amplifier, which by the way is a crummy design.

900 watts on CB? And you want to sell this to another CBer so HE can
inflict it on HIS neighbors?

Shame on you.

>it, like in Part 97, which was my point? As far as REACT goes, the last
>thing I read about it, a while back in POP COM, is it's dying because of all
>the B.S. in the organization. Too bad some bozos had to go and screw it up.

CB radio showed it's true potential in the emergency situation after
Mt. St. Helens popped its cork back in 1980. The hams didn't do
anything but sit on their asses and brag about how they could do the
job a whole lot better (there were a few rare exceptions).

After Spokane's ice storm four years ago the citizen's band was poorly
organized and grossly abused. It didn't help at all, and sometimes it
even hindered. The hams didn't do anything but sit on their asses and
brag about how much help they provided back in 1980 (again, there were
a few rare exceptions).

With the current abundance of moronic behavior, bad attitudes, and
cheap splatterboxes on 11 meters, nobody should even consider using CB
radio in an emergency. REACT has become even less dependable than ham
radio (with no exceptions at all).

Yeah, but there are a LOT of OLD LADIES here on the CB newsgroup
that are mainly HAMS that will say that AYOU WILL use it on 11 meters!
Aren't they SICKOS? I have a small 2 or 6 meter linear that I want to
sell, that is not a CB linear. It is SMALL and silver and
transistorized. Anybody interested e mail me direct and I will tell
you what is on it and will have it checked out to see if it works.

OH REALLY? The TRUTH is certainly what this "day" is NOT
about. We judge King by his "I have a dream" speech, wherein he talks
about CHARACTER being how we judge a man. King being an ADULTERER
definately blows his character. We need to be about the TRUTH. The
truth is that this holliday pushes INTERRACIAL MARRIAGES (the UN Brown
man-Tiger Woods) and all other UNBiblical nonsence. King went to that
Communist training school. Julia Brown says NOT TO Glorify MLK. WHY
do you want to? Are YOU a commie?

While you're at it, why don't you recommend the Yaesu FT1000 - it's a nice
rig. It would go extremely well together with a Henry 2 kW linear, too,
right? Gary, oh8mfh

Actually, I have seen all ten of those excuses used on this newsgroup. I sort of collect these silly things now. Here are a few more "excuses for being an illegal CBer" I've seen:

* Howard Stern is illegal so why should I follow FCC rules?
* The founders of the USA were illegal so it's OK for me to be.
* A ham was mean to me once. I don't like hams.
* It's not illegal if you don't get caught.
* I don't choose to be legal right now.
* No one I know ever got busted so that means no one ever will.
* I operate my illegal station considerately.
* My linear is clean.
* I don't go above 29.900 Mhz
* Me and my friends always go a mile or two out of town before we key our 15KW CB radios.
* I have a constitutional right to be illegal.
* I only have a Tech license so I need to freeband.
* I don't want the goverment to know where I'm located.
* Illegal CB is the only place where I can work with really big RF power amplifiers.
* The FCC rules are trivial and not meant to be obeyed.
* I only obey rules I agree with.
* Rules are meant for other people.
* The cops in my town all run illegal CB's.
* I know an FCC guy who said it was OK.

Yeah, Gene, I understand my grid square KP34 would create a nice pile-up on six meters - why waste such a nice piece of equipment? 73, Gary, oh8mfh at KP34UG, QRV 2m CW es ssb, occasionally FM, CU

CitySlicker <not_enuf_time@foolscorner.net> wrote:
> Window mounts are no good.

Okay so the question is... WHY are window mounts no good?

Is it an interferance issue? (The separation between the antenna and the antenna pickup on the inside of the window?) Is it that their range sucks due to being comparatively small? What are the issues involved? What are the pros AND cons?

I've seen cellular-like window mount antennas for CBs, scanners, and HAM/ARS.

I'm a bit similar to the original poster.. I have a mid-90s wagon. I have an automatic telescoping radio antenna, and a window-mount cellphone antenna. (no cellphone yet -- the car just came with the mount pre-installed.)

Eventually I'd like to trick-out my car with lots of nifty stuff. (Read "trick-out" VERY conservatively -- no major customization for me.)

So basically what that means is that eventually, I'd like to add one or more of the following options for my communication and listening pleasure:

CB, scanner, HAM, FRS, SWR. (and more, but this is enough to list for now.)

Basically I'm dreaming, but I figure at least CB is reasonable.
(I'm not yet a HAM.) And I already have an old CB radio pulled from my familys' old camper-vans (read: I haven't done/investigated this stuff in a while other than helping a friend set up and troubleshoot theirs a bit.).

I would love to go for solutions that will apply to multiple problems, but in my research so far, it seems that I am S-O-L. (But, then again -- I don't have enough information, and don't neccessarily understand all the various issues.)

Things of interest to me: 1) aesthetics are important to me, I don't want the car to become a monstrosity; 2) I would prefer something I could buy from, or order through Radio Shack either in the stores, or online -- I have some gift certificates; 3)magnetic mount antennas are bad,Bad,BAD!!- I used one when I was taking a trip with a friend and the dang thing scratched up my roof!

Also, should I go this route (window mount antennas) or even other options.. how much should I pay? (things generally go on sale periodically, what price should I wait for or reasonably expect?)

[Please note, I could not find references to the window-mount antennas on the radio shack website otherwise I would have given the URLs for reference.]

> You could a tab welded to the frame with a hole
> large enough for a mount and put a 7' skipshooter on it. You see many custom

> rods done this way to avoid body damage or they are glass bodies.

Original poster asked (sorry I just deleted your byline by accident):
>> I have a '93 Saturn wagon - only metal surfaces are hood and rear
>> hatch. All windows except front are tinted (consideration if I use a
>> window mount).
>>
>> What kind of CB antenna can I use on this car. Are any available that
>> will attach to the lip of either the hood or rear hatch?

That's one of the biggest problems. "I'll do what I want, when I want, and "F" you if you don't like it", yet they'd be the first to bitch when someone with a bigger and badder setup walks into town. For every one or two "big gun" stations, getting a huge rush from their perception of power, there are probably a hundred or more legal stations that are being denied their access due to the antics of the "big guns". Purely selfish and self-centered.

>
> You see, Redneck, you view this as purely a radio situation. Wrong. Your
> "anything goes" attitude tears at the very fabric of our society.

Absolutely. It's not just radio users. Society, as a whole, has degenerated to the point where authority is routinely questioned, no one is respected, and rules are summarily ignored or broken depending on the rationalization of the individual. One frequently heard expression of this logic is "Why do cops bother to bust people driving over the speed limit? It doesn't hurt anyone. They should be chasing "REAL" criminals"(the definition of which again depends on the perception of the individual).

Laws and rules were created to ensure an orderly society. They weren't done to "spoil someone's fun". If you favor an attitude that says that you can ignore the rules that you don't agree with, then how can you complain when someone does something illegal to you (a rule that he might not agree with)? Do people really want anarchy? Where do you draw the line? Who's capable of drawing it?

By blatently breaking rules and laws, and flauting it, you effectively send a message to impressionable young people, that this is acceptable behavior in our society, and they too will adopt this practice. What you should be teaching them is respect and courtesy for others.

Back to radio for a moment, if you run high power, and have a "F* you" attitude to your neighbors when you cause TVI, how would you feel if the one TV show that you wanted to watch, were suddely disrupted by another neighbor running some illegal transmitter? Would you be so accommodating of his "right" to run high power? What if it happened regularly?

The best rule of thumb to use is to turn the situation around. If someone complains about something you do, think how you would feel if you were on the receiving end. If you can't handle it, then you shouldn't dish it out.

2979. I got "spanked"??????

Newsgroup: rec.radio.cb
Date: 2001-01-17 13:58:01 UTC
From: The Phoneman <phoneman01@hotmail.com>
Message-ID: <01c0808d$103c3860$82878685@clip>
Source record: 69133

I got "spanked" by you fatboy? Thats a good one. Could you explain
how you "spanked" me? If you consider the numerous childish posts
in this group calling me names like a scorned 10 year old,
I guess I have been spanked. As far as I can tell, other than
annoy me by sending unwanted mail to my hotmail account pointing
me to your webpage of the doctored Tim & girlfrriend pic, you
haven't done a thing.
Another casual observation would be that you can dish it out, but
can't take it. You email me a link of the web page you wasted time
to create with a Picture of Tim and his girl altered to make her
look like a man (poor job by the way) but you get bent when
someone puts up a page suggesting you're a child molester. I don't
see the difference. You expect to antagonize and degrade these
people daily and not have them retaliate?
As much as I disagree with a couple of the hams who post here,
I must say at least they are not childish about their posts and
attack me and my opinions directly and like a man.

The Phoneman

PS>You and you're alter egos are filtered out of my newsreader,
so don't bother spamming the group with numerous replys
calling me childish names. The only reason I got this piece of
trash is it was an attachment to Tim's msg.

SNIP>

. Just like Scottiekins and Phoneyboy. THEY messed with me and got

Hmmmm. Better tell the people who drive through the state of
Pennsylvania this. Last time I checked all the PSP Barracks
had a CB Radio sitting beside the communications console.
REACT donated to all the stations in 1977-78.
I hear comms all the time on 154.755 & 159.210 regarding
assistance calls on I-81 and PA Turnpike that they got via CB.
The Phoneman

PS>Odd they don't have a Ham radio sitting at the console
since they are much more superior than CB.

SNIP>

> With the current abundance of moronic behavior, bad attitudes, and

While the CB service does not have a public service element
SPECIFICALLY outlined in Part 95, I encourage you to attempt to
convince any active REACT member (of which there are still quite a few
hanging about) that CB does not fulfill a public service. Also,
please note that in times of emergency, most RACES organizations do
monitor CB channel 9 for emergency traffic from non-ham sources.

Maybe he's going to re-sell it??? Perhaps it needed a cleaning, or was broken and he got it for a deal, and his intent is to re-sell it in a refurbished state to a registered HAM and make a few bucks... I don't care, he can use it for a door stop, a foot rest, a pillow, I don't give a crap about what he does with it.

If it were me I'd shove it so far up your rear you'd taste it, and I'd key it up to make you dance just like Captain does.

You are a troll, liar, and definitely delusional. You don't get any respect because you don't respect anyone else, and him not answering your question, and you making the implication that he's going to use it on 11M (TWICE!!!) through the "apparent sarchasm" approach is laughable. Your attitude combined with your delusions, and then saying that E-Bay policy is actually law is simple proof enough that you know only enough to be a danger to yourself.

You're fun to watch... Just like that fly against the window... You keep trying the same things over and over again yielding the same result. But that's ok... Most of us just watch you do this, but after enough people swat at ya I'm sure you'll get the idea and buzz off.

What's the board number on it? The 148F is basically the same board as the
Cobra 148 and the Uniden Grant. Unless of course you have a 148F DX+
version with an ETP690010z, and if you did I could e-mail you a schematic.

BTW is it broke? You didn't state why you needed a schematic.

Hmmm...you are right, we weren't talking about freedom of speech OR international agreements. The guy asked a simple question and your answer had nothing to do with which he asked, and on top of that, it was incorrect, you KNEW it was incorrect, that makes it a lie. You want some dirt to go with that hole?

Greetings!

There are drawbacks to any antenna. [See below for further details]

On 17 Jan 2001 12:54:15 GMT, while the modem was ice fishing with the Mouse, multiple seriousity <msimons@bob.slackware.com> dissertated the following:

:+> CitySlicker <not_enuf_time@foolscorner.net> wrote:
:+> > Window mounts are no good.
:+>
:+> Okay so the question is... WHY are window mounts no good?

The design concept is simple, use an adhesive pad and you have an external radiator, with a coupling unit on the inside - both combined together to make a highly inductive coil with a capacitor that is the glass that separates the two - as the dielectric.

The problems are;

Size - less than ideal, and to reduce wind drag, the whip/radiator section uses small wire to induce the needed length [approx 22AWG wire - similar to magnet wire in toy motors] as a coil wrapped in a small form. This type of construction uses a technique called "loading". This is what makes the antenna small and compact. There is a price to this - at the cost of less surface area to radiate, and inefficient capacity to "tune" to a large frequency range. The CB band uses 440KHz of spectrum space - to cover that you need bandwidth. The small antennas like this, don't have the ability to cover a wider bandwidth like the more dedicated antennas designed for CB can.

Construction materials - a sticky pad, with aluminum or brass plate and the "pivot point" that has to make metal to metal contact with the radiator section. Some use a removable section that allow you to drive the vehicle thru the car-wash without cracking the glass as the machines tend to grab anything in their path that isn't smooth or has rough edges. The adhesive doesn't last long in most cases. About 2 years and you'd have the antenna flying off in the whack of wind produced by a Semi in the opposite lane traveling past you. The coupler has a dual duty of accepting what the radiator is picking up - including a wide variety of static discharges present with an insulated wire on a non-conductive surface - pretty noisy at highway speeds - and the ability to pass 4 watts of RF power thru itself into the radiator - a lot of heat will be produced in a short time as the coupler has to force this energy to the radiator in order to function.

Lack of surface area to radiate a signal. These antennas are as close to a coat-hanger and dummy loads as you can get and still pay up to $70.00 for these "failures". You get about the same performance too.

Some of these antennas provide a grounding braid, this limits locations to areas close to the rim of the glass - by frame metal. Grounding the strap to the metal improves the performance but you still have the overall size as a big factor.

CB band - is 11 meter - meaning the distance traveled for only one cycle of the wave - is 11 meters. You forcing a radiator less than 12" long to accomplish the task a 108" whip can provide for 1/4 of the wave cycle. The 102~108" whips are considered 100% efficient.

If you want something at least half-way effective at getting you "on the air" a more dedicated CB antenna designed to mount on a trunk-lid, rear-hatch, or a mag-mount/permament mounting arrangement needs to be made.

If all you want to do is look good, keep a razor blade around, you're going to need one to scrape off the old adhesive to re-attach another "sticky pad" after you've located where the radiator went when it blew off and if it was still intact.

Why do I say the above?

Let's say it's from learning the lessons from the mistakes others have made before...

Regards! |

As a ham and CB operator, many of us stayed pretty busy in Miami in
1992. Lot of common folks turned their CBs on to communicate and find
out the best way out of the city etc, and fortunately there were those
of us who were there to pass information back and forth from ES and the
ARES net to the CBers out and about.

This guys is really nutty... Man... Once again tugging on the emotional threads, and then... Why does this not surprise me?

Next he'll be saying that spurious emissions from 11Meters caused by dave made amps are causing the spotted owls to drink water from an oil spill that could have been avoided if the captain of the tanker wasn't distracted by an illegal CB er.

Nice try... Fly against a window.

Ray, I understand that, however the point I am making is Ham Radio is a service (not JUST a hobby as the original posted said), whereas CB Radio is a hobby. One of the differences is the public service element outlined in the rules each operates under. Even now there are a number of "experimental" licenses granted to several Ham Radio stations to conduct propagation studies on a "possibility new Ham band" located somewhere between 75m and 40m, if memory serves me correctly. The FCC realizes there is a gap there, where another band would provide better emergency communication service when needed.

>
> Thanks!

I wouldn't put it on the hood. Too much chance of picking up engine noise and it looks plain geeky. I'd stick with either a lip-mount or a good mag-mount. I'm assuming that you don't want a 102" whip, even though it's the best mobile antenna you can get, but the better mobile antennas were only 1/4 S-unit or less off the ehip in some back-to-back testing I did with some buddies a while back.

Direct advice? Go with either a K-40 or Wilson 2000 mag-mount or trunk-lip mount according to whichever works best for you. They're both good-working antennas that won't look too funky on even the most modern-looking car. If cost is an issue, look at the K-30 as it still has the oversized coil of the K-40 (coil size and power rating are a couple of indicators of efficiency; smaller coils lose more to heating than big coils do), and the stinger is fairly long (the shorter the antenna portion, the less-efficient the antenna. Period.), but the cost is significanly less.

And if all the CB Radio operators stop doing any kind of emergency communication work the FCC could care less. It was never one of the basis for the creation of the CB Radio Band. On the other hand, if all Ham Radio operators quit doing any kind of emergency communication work the FCC is going to ask why, since it is part of what we (at least some do) are to do in times of need, per Part 97.

So all in all I do understand that both do emergency communication work, only the Ham Radio "Service" has an official mandate, as opposed to CB Radio, from the FCC per Part 97, to do so. That is the difference between a "Hobby Radio" and a "Service". That is the bone I have to pick with the original poster of this thread.

The 2990DX has a totally NEW designed Main board. Although the outside has the same look as the original 2990, its an all new radio. Surface mount design board. The receiver is more sensitive, and seems to be a bit better on signal to noise even though the spec's themself do not indicate there is. I should say, that the Power supply and Power amplifier section is unchanged.

You stated you had a wagon so you will be limited to a frame mount. Front fender, or a roof permanent or magnetic. A high quality mag mount such as a Wilson 1000 available from www.bills2way.com should not pose the scratching problem unless you drag it across the finish trying to remove it. The mag is strong enough to prevent it from moving at highway speeds.
Keep the underside clean and a the paint finish well waxed and you should be okay.

WWW.Firestick.com has a number of mounts and their site has a lot of photos to help you understand what's available.

Keep that cell antenna it will make a decent scanner antenna.

Not much into CB anymore. With 5 kids and a new wife (blended family - 3 of mine and 2 of hers) am too busy to even get on ham except when heading to work. I just still like to play and keep thinking about stringing up a wire antenna for 11 meters one day so I can put my mom's old base station back on the air. Bought it for her and took it straight to 10-4 CB shop in Ocala to have EVERYTHING done to it, but she died before even getting a chance to see it. She was one of the most well-known CBers in Gainesville, and her funeral parade was a solid line of whip antennas. Since then I just havetalked that much on the air anymore, but I love playing with my kids and old CBs and teaching hte basics and antenna theory etc.

So - I've done nothing wrong. Tell 'em to go ahead.

As Nixon said...

"From time to time, in my public life, I've WELCOMED this kind of
introspection... People have the right to know whether or not their
President is a crook... Well, I'm not a crook - I've EARNED everything
I've got."

> That's probably not the kind of attention you wish to attract!

If the FCC starts responding to reports based on information contained
in Internet newsgroup posts, we are all in deep trouble. Anyone can
forge a poster's handle/e-mail, and post all kinds of
damning "evidence" (not that there is any in any of my posts, anyway).

This is a crock, and you know it, QRM.

I find it very strange that folks are getting upset about broadcasts
from stock/compliant radios/stations, that for all intents and purposes
look exactly the same as any other transmission.

> QRM

Yeah, that would cause a problem. is there a roof rack to mount to and
is it grounded? Maybe use a mirror-mount. He'd asked about a lip-mount,
so I'm wondering if the hatch extends up into the roofline any and if
it's metal-skinned?

Wait a second - Riley Hollingsworth is in charge of Amateur

> Yo' Leland! That is very interesting. SInce I ain't a hammie, can you
> tell me what part 97 requires of licensed amateurs?

Sure. Copied this off the ARRL web site:

Subpart A--General Provisions

§97.1 Basis and purpose.
The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:

(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.

(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.

(c) Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communications and technical phases of the art.

(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.

(e) Continuation and extension of the amateur's unique ability to enhance international goodwill.

> Does it require
> mandatory response and monitoring or something?

No. Some Hams however take doing public and emergency communication services very serious, and spend many hours doing it. Others work on other parts of Part 97.1. As long as the FCC feel conformable with the effort put in to the various parts of Part 97 we have a good chance of keeping our bands. It's when we ignore those provisions is where we run the real risk of losing our spectrum. And there are no end of groups watching us, just waiting for the excuse to grab some of that spectrum for other uses.

> You said only some.
> Certain class or all?

This applies to all classes. When I said "some" I was refering to "some Hams", not some classes.

> Unless you are referring to RACES, but that ain't
> mandatory, is it?

Emergency and public communication services not "mandatory" for Hams, with a big "BUT" if we don't, then we have less reason to have the access to the large amount of spectrum we use. You can say that Part 97 is the "justification" why the Ham Radio service exists. The main Idea is in an emergency situation a Ham can be called upon to perform emergency communications. In fact that is what "Field Day" is all about really, a practice run for the "real thing". It's not meant to be a weekend DX contest - BBQ party in the park as many treat it.

> If hammies quit participating in whatever it is you
> refer, who is the FCC going to ask,

Good question. The real question then is who is "prepared" to conduct communications over large distances. I know it can be done sometimes on 11m, but 11m, and even 10m, is not the best band to use for long haul comm's. When a band is closed, well it's closed, and you have to be able to use another one which is open, thus the reason Hams have so many bands to use.

3039. What the Radio Makers need to know....

Newsgroup: rec.radio.cb
Date: 2001-01-17 22:57:02 UTC
From: polehead@aol.comgfek
Message-ID: <20010117175702.21226.00000100@ng-fw1.aol.com>
Source record: 68943

Hey radio makers......Listen up!

It seems that some idiot over where they make the radios has to brufk up at the last stages of design......examples:

The Magnum 257, 357, Titan, Prostar base & similar mobiles - Man, these radios could have given the 2950 a run for the money....All the features of a 2950 & the size of a PC-122...Yet you need to do "keystroke mods" every single time you turn on the radio to get the freqs...AND the 1kz step Doesn't roll over to the next 10 digit, at 27.409, the next click Forward brings you BACK to 27.400! What grasswipe engineer thought up this move??

The new RCI-2950DX - They added 12 meters & improved the board, & yet still omitted ctcss tone encode to enable REAL use of 10M repeaters with their shift function...Who was asleep at the wheel during this re-design??

UNIDEN CB RADIOS - All uniden has done in the past decade to their CB's is look at what Cobra is doing cosmetically & copy them...They made the Grant into the Grant XL, only difference, The faceplate was changed to look just like a Cobra 148! The new Grant LT, only difference, The faceplate & mic jack was changed/moved & extra "DSC" knob added to front to be more like a Cobra 148NWSTracker!...ditto with PC 76/78, 66/68.....shame on Uniden for not having more originality to back up their fine radios....What Corporate Duck brain thought up these "me too" moves??

GALAXY 959/TEXAS RANGER CB - These may be the finest "approved" CB sets out there, they tune up to "export" power, but why not use a chip that would easily give standard banks of channels?? Cheap midland, Maxon & other "approved" CB's have them, yet with these rigs you end up with a 148 style "switch/chart" mod, or need to hunt down a drifty "viagra" add on board.....Wake up people!!

COBRA - Why did they abandon all base stations?? When are they going to give us a more compact SSB set, a good looking base, or a COBRA 10M or 2M rig.....????

No doubt, Pain! Done heard yer' name being called a few times but never had the pleasure of taggin' ya' in DX land yet.. Same here, if I'm patient enough I can usually hit 257 when I try. I've heard him pretty regular lately. I'll be a listenin' for sure!

3041. Several fair questions for illegal keyclowns

Newsgroup: rec.radio.cb
Date: 2001-01-17 23:13:51 UTC
From: keyclwnzrmoronz@my-deja.com
Message-ID: <9458v6$qj1$1@nnrp1.deja.com>
Source record: 68947

Every single item covered below is true and factual.

Q. Do you think operating on frequencies that are allocated to other services is inconsiderate to the services they are allocated to?
A. It is, whether you think so or not.

Q. Do you think causing interference with spectrally dirty illegal amplifiers and non-type accepted equipment is inconsiderate to your neighbors and nearby radio services?
A. It is, whether or not you care

Q. Do you comprehend the concept of immorality?
A. Doubtful, since you present so many justifications and fallacious excuses for your criminal activities.

Q. Why did Nebo have to change where he posted his anti-n8wwm web page?
A. Because N8 nailed him and AOL spanked him for it.

Q. Why is Phoneman off AOL? Why isn't he playing 1mangang any more?
A. Because N8 nailed him.

Q. Why isn't Scott, Unit 69, carrying the anti-n8wwm web page anymore?
A. Because N8 nailed him, and his ISP threatened termination of service.

Q. Why did Nebo get his AOL service temporarily suspended?
A. Because N8 nailed him and AOL spanked him.

Q. Who whined to ISP's first and started the chain of events leading to the situation above?
A. Illegal operators who could not cope with the fact that their favorite trolls, 1mangang<phoneman> and SCD, could not cause any damage to Voobner or N8. "The ISP complaining wars" would not have started if that was not the case.

Q. Who is in a superior position regarding this entire issue?
A. Those who are legal CB operators and their boosters.

Q.Who is going to lose things they hold dear as a result of their illegal conduct? <not talking about the flaming and trolling, fellas, N8 and Voobner DESTROYED you there>
A. Illegal operators of CB equipment, and those who threaten others over the internet.

Q. Why is the FBI interested in the anti-n8wwm web page and this newsgroup?
A. Because Carnivore has harvested death threats and accusations of individuals on this NG being child molesters. These accusations and threats crossed state lines, and by definition became federal concerns.

Q. Why does twistedhed think Voobner is N8?
A. Twistedhed is not astute enough to realize that this is not the case. He also is not intellectually honest enough to come to the understanding that a lot more than just one guy thinks that illegal CB operation should be reported and halted. It just does not register due to his limited perspective on the issue. A lot of other guys on the NG suffer from the same problem. Many will wake up only when it is too late. So much the better; they will pay a price from enforcement agencies for their ignorance.

Q. What is about to happen?
A. Stay tuned, fellas.

All I'm saying is that this group bitches more about nothing than any channel I've heard on the radio. My question is simple. WHY? All there is to read about is a bunch of people making idle threats to each other. If it were to come down to it, I can about guarantee that when it came face to face, both the haters would run like the little bitches that they are just like they always do on the radio.

As far as liking the cb more than ham, so do I. As far as toking, so do I. So smoke a bowl and CHILL THE FUCK OUT.

There is no CB group, lobby organization etc to provide a voice or guidance. There isn't even a magazine devoted to CB that provides real test data, performance info etc. Can't keep the manufacturers on their toes without national media scrutiny. Most likely the guys designing this stuff don't even use it on a regular basis. How do you think you can expect any meaningful improvements? Cosmetics are cheap and provide a quick spike in the sales chart.

As long as CB has to limp along at 4 watts to stay in compliance and the Hams keep 10 Meter locked up for the skip cycles there will be nothing to provide the stimulus for the manufacturers to invest heavily in new generation radio'

Raise the power levels to 50-100 watts and open 10 meter up to the general public and watch what comes rolling out of Cobra, Uniden and the rest.

Hello Polehead: All good points!

The manufactures half to meet the FCC certified requirements ect, Ok but there are miles and miles of room for improvement.

I looked at a new radio the other day, yes it had a digital readout, but the readout was only 5 digit display..... What a piece of crap! And the radio didn't even have a Noise Blanker or ANL, JUNK! But it had SSB, somebody needs to be horse whipped.

What manufactures should do is to have a good radio designed from the inputs of users and customers ect. But keep in mind there are a bunch of different CB radio type of customers. Suck as:
1- Ma & Pa usage, plug it, hook up and go.

2- Juniors first radio from Mom & Dad, hoping junior will become a rocket scientist.

3- Truckers, back light displays, super incred-Oh noise reduction designed in to the radio. High and low transmitter power selection. A real RF gain.

4- The CB Radio Hobbyist. The radio should be designed to have after market modifications. Such as a IF Crystal Filter, Double Balanced Mixers, Physco noise cancelling filters, speech processors, Double finials in a push pull circuit, modifiable front panel for various user modifications, and a hole bunch more.

The marketing concept can even go further. A National Club needs to formed with a web site site. (something like the 2510 radio has only a lot better) The manufacture can take inputs and suggestions from the using public. On line training and radio circuits operation, electronics theory, trouble shooting, modifications, and many more things can be added. A newsgroup for the new radios users can be set up and maintained.
Articles can be written to modify existing CB antennas for the 12 or 10 meter bands, ect.

On line courses can teach the testing theory and morse code for the ham general class license, as to allow operation on 12 & 10 Meters. 12 and 10 meter nets can be set up and throw some personality in them, rather than the old fart ham nets, and add quit a stir of interest could fill up the ranks of the amateur bands, having a radio that could cover all the top HF bands.

And I am sure a bunch of other things could happen to get a radio that is modifiable stir a large interest in the CB to Ham interest.

Food for thought ah?

Jay in the Great Mojave Desert, ...just down the road ah ways from the
fillin station.

Just more race baiting from people who believe in black helicopters, that the Holacaust never happened, Janet Reno planned Waco, etc. Dave and Debbie exemplify the reasons that minority groups in this country dislike white people. I am ashamed to have the same color skin as such racists. Anyone who thinks you can accomplish anything in this country even remotely approaching a decent existence for everyone espousing that garbage is dead wrong.

Of course, it is likely that they do not care. They CLAIM to be Christian, they ACT like Satanists. I would be willing to bet they are "SOOOO nicey nice" around black folks. That is because they are hypocritical and cowardly examples of the blackest and most evil elements of human society, and live in fear of going head to head in this world with others of different backgrounds who may just not carry their own sickeningly limited mindsets.

Dave and Debbie are, in the words Reagan used to describe the people who blew up the US Marine barracks in Lebanon back in '83, "COWARDLY, SKULKING BARBARIANS"

Any person reading such tripe as what they post and giving credence to it is equally deluded.

If King had trysts that does not change a thing. His ideas were those of great leaders before him, and damn few since. he originated nothing. What he did was to articulate injustice and force us to confront it. To deny that there was injustice <and still is> is to be even more "commie" than the commies. Afterall, the Russians are the ones who never speak about the millions killed by Stalin, etc. History books are rewritten there to purge or add the historical flavor or non-flavor of the month. This was done to control the populace through fear and doublespeak. That is exactly what Dave and Debbie are doing. Appealing to the base elements of human nature and ignoring the real contributions made by King. I know as do we all that it is wrong to commit adultery. So did King. That does not negate the message he carried unless you are too small minded to comprehend, or just want something to base your hatred for a bigger man with bigger ideas that those you carry in your hate filled cranium.

I believe that Dave and Debbie KNOW they are full of it, but think, like the Russian communists did, that if they can blather long enough their version of history that it will become the perceived truth. Think again. Fantasies are fun sometimes...Your fantasies are a disgusting travesty of truth that only an evil element of humanity would embrace.

Hello Tim: I am glad ol JR posts here. It's real obvious that the government isn't going to sent him to the United Nations to represent anything. Due to his broken record type of postings.

Speaking of 40 meters, who was playing the old time radio show the "Long Ranger" the other night? Great audio quality, it your gonna do it, do it right. Too many of the music programs don't use the proper audio filtering or keep the audio level down so that its a good audio quality. Maybe a few old broadcast engineers out there ah? Something the guys on 80 meters should pay attention to, ah?

If you take the time to read the threads, there are a few (a couple in particular) folks who claim to be trying to eliminate 'illegal cb'. From the way they post (the language, in particular), it appears to me they are simply trying to 'flame' the ng. Certainly, out of the hundreds or thousands who read the posts, some are bound to take offense at these posts. Not everyone is complaining, but there are a few folks who seem to get a perverse pleasure out of causing a lot of hate and discontent. Try to understand it is a small minority making it look bad. I'd still like to know if Voob*** and W8*** try to pull over speeding vehicles in their neighborhoods. There are few folks (percentage-wise) that are running the dirty kilowatt rigs, yet these two try and give a black eye to all CBers. It sounds reminiscent of my college days where the local cops gave tickets for 1 MPH over the limit and failure to stop (when folks DID stop). I personally got a ticket for failure to stop - at a stop sign halfway up the hill to the dorms which had not been plowed, salted, or sanded. I tried twice and couldn't start from the stop. The cop was waiting for any and all students who didn't stop. He knew no one could get up that hill without chains on the tires. But at least he was the law (albeit a bad cop); the flamers are just wannabe FCC agents. Try not to get too upset at folks who get a bit miffed over them.

Sure. Been there, done that. In 1993 I called the FCC to find out who gave the tests (I called Alaska, at the time one of the last places to get a real FCC person - but that was due to the time being too late for anything but the West coast). They gave me the W5YI group which I called the next day. I called the local group in the afternoon and found out the testing for the fall was starting up again - and the first test was at 7:00 PM THAT SAME EVENING. Went down with no license and no study. The last Morse I had copied was in 1969. I tested out. Lotsa fun. Ya just never know what will fall out of the box of Cracker Jacks! Also, in 1966, I did both the commercial telegraph, and amateur extra at the same time. That was cute!

73 from Rochester, NY
Jim AA2QA
(ps - I would not have been able, at the time, to do solid copy at 40 WPM on paper like I did in 1967 in the US Navy. Could I have done better? I don't know, 40 was the fasted they could send the tape, but that was starting to push me a bit. Stupid typewriter keys could jam.)

I think I understand. Some of the articles in QST can be a wee bit lame! I'm not in to contesting, however I have gone on the air to give away points to those who would just die to get another one to boost their score. The V/UHF contest is this weekend, so I might get out there, and give away a few freebies just for fun.

DXpeditions articles, not for me either, can't figure out why somebody would waste their time, parked in front of a radio for hours on end, in an exotic location. Me, I would be out sight seeing, eating the food, and talking to the locals, screw the radio crap with the 8 to 10 hour shift nonsense!

I believe you are mis-informed. The FCC does care what happens outside the Amateur service. The agency publishes its enforcement actions--Amateur and otherwise.

While it was not my suggestion to bundle up your posts and forward them to the FCC, I stand by my statement that you are creating a heck of a lot of attention among licensed persons.

If you can handle the heat, then stay in the kitchen. I was simply passing along what is being said in other forums. Heed it or not. You're an adult. Make your own decisions.

You are aware, I am sure, that opening 28.0 to 29.7 would require a treaty modification. The US FCC does not have the authority.

I would agree to an extent with power levels but in return I would like to see Antique Modulation outlawed as it has been outside the Broadcast and Air VHF services.

Dave, a very reasonable post. Some folks may think I have taken sides - my only complaint has been the extremely poor taste in words used by a few hams about this. There is no excuse for flaming the CB newsgroup. Those posts (mostly by two people) were intended to flame. I disagree with that. Your point is well taken concerning some order within society. I can understand, and don't object to, the use of small linears, especially in vehicle (yes, it is not legal), since the skip causes a lot of local interference at times. Usually (not always) this is due to stations running hundreds or even thousands of watts. My belief in the FCC allowing localities to enforce some regulations is that it allows relief for some folks located in close proximity to grossly over-powered, dirty signal stations. I had an experience this morning that WILL prove interesting. I have an idiot across the street who has thrown parties and folks like to park in front of my driveway. I have found empty beer bottles in my driveway. This morning, I went to the post office, only to return to find that stupid car parked in front of my driveway. I called 911. About 15 minutes later, the lady came out and was getting in her car. Yes, I went out and confronted her. Her attitude? I was only parked 10 minutes. You could ask me to move. I told her the cops had been called. Her response? It takes them hours to come. Well, tomorrow I'll start the ball rolling. It will roll REAL good, I assure you. I had a problem with another neighbor who had tires, cars, and every kind of trash you could think of in his back yard (adjacent to mine). I battled the city for 2 years

before I got smart. My attorney sent a letter to the city. Within 1 week, city crews cleaned up the mess - and the charge was added to the idiot's taxes! If I need a court order to state the neighbor across the street may NOT park in or in front of my driveway, so be it. Next time, I won't need a cop, only my camera. This has happened before. One idiot had his driver's license revoked for drunk driving. He was seen driving around, and a few pictures were taken (by ordinary citizens). There was proof he was driving. He went to jail. Tough. In any case, there won't be a confrontation. I was pushed over my tolerance, now I'll set the legal wheels in motion - and I don't let go.

Amateur and
> otherwise.

Of course I understand that the FCC cares what happens outside the ARS. I was saying that Hollingsworth should only be concerned with issues related to the ARS. I had gotten the impression that he only was in charge of ARS enforcement from all the references on the web to his ARS enforcement actions over the last few years. I finally came across something metioning something other than ARS actions:

http://www.gmrsweb.com/gmrsnews.html

But even this article points out that he is interested mainly in Amateurs violating GMRS rules - and that GMRS violations should be reported to the FCC. I would gather it shouldn't be reported to him - unless it is Amateur related? I suppose he would pass the information on - if he thought it was warranted.

BTW, I still don't think the FRS/MURS Crossband Simplex Repeater is in direct violation of the rules - and I've gone out of my way to explain the proper use of the system, so as to avoid interference issues.

> While it was not my suggestion to bundle up your posts and forward
them to the
> FCC, I stand by my statement that you are creating a heck of a lot of
attention
> among licensed persons.

Again, I find this strange, as the only people who are complaining are those that are not in the least bit affected by this issue. Basically, it has been hams and GMRS repeater users(not GMRS interstitial users). At this juncture, I've gotten zero complaints from actual FRS users(the people who WOULD be affected - if you really believe there actually is an affect). I have to assume that the FRS users are happy to know that they may have an inexpensive way to extend the range of their existing

radios.

The way it looks to me - the "complainers" aren't just satisfied playing "radio cop" on the ham bands - they've got to go sticking their noses into others peoples business. Well Sheriffs, I'm afraid this issue is out of your "jurisdiction".

I suppose these "radio cops" have gotten the attitude that is is OK to muddle into the affairs of other radios services, because of the fact that the CB debacle WAS related to the ARS - because the main problem was the conversion of ham gear to 11 meters. Not only is this issue not in the least bit related to ARS(or even GMRS non-interstitial), this issue is negligible compared to running hopped-up amplifiers on 11m.

Upset, No Tim...I am delighted that you decided to post it. In fact, I would like you to go to every free server in the world and keep posting it everywhere. That way I can laugh even harder. To quote your wife when he tried to get me outta here..."You are goin' DOWN"
You fellas started it...after you get bounced don't come whining to me and lying about stuff, like you did last night on here...talking junk about "whats your problem?" My problem is you have not given me any competition! I gave you a chance, Tim. I emailed you last night and told you to stop or it was gonna break bad for you. It is now out of my hands. You had your chance and it was the only one you were gonna get. You have been listening to your own mouth too much, not to mention the mouths of other unknowing people. If you knew me you would know that I am not easily angered, because I feel the best response is to get even about 5 times over rather than get mad. Ask Phoneyboy and Scottiekins.

You have the disadvantage of being a boy in a man's world, fella. Don't worry though, you will be growing up in a few days. Wait 'til you see what happens. You will be on here crying and I will be howling with laughter. Wait and see, Tim.

--
If you do not like being told you are ILLEGAL, the do not be ILLEGAL.

hey doug, is that what men do these days? sit behind a computer and cause trouble to unknown people for there personal enjoyment? if so i'll stay a kid in my diapers. you were right about one thing doug. i'm not on your level. i'm way past it. i was on your level back in second grade on the playground. now speaking of getting spanked, why is it you cant post to usenet via your aol account anymore? true enough you didnt get knocked off of aol but you got put on restricted use. what are you going to do to me? i'm anxiously waiting.

ps you guys should have heard the great dx on 11 meters today. 5 continents worked since this morning. it was a nice day for cb radio.

AM is alive and well on the ham bands, Tune in to 3.885 MHz and hear some of the fine sounding old boat anchors.

The amp will need to be retuned. That means different loading and transformer caps, and possibly different transformer turns ratios. There is no recipe for the changes, you have to have the test equipment and skill to do the job.

An easy upgrade (20% power increase with no other changes) is replacing the 455s with SD1446s.

I never insinuated anything, I stated a fact, I operate on the ham bands with a valid call, not a made up one.

"www.kp82.com" wrote:
